

Colorado Department of Health Care Policy and Financing Preferred Drug List (PDL)

Effective January 1, 2022

PA Forms: Available online at https://www.colorado.gov/hcpf/pharmacy-resources

<u>PA Requests:</u> Colorado Pharmacy Call Center Phone Number: 800-424-5725 | Colorado Pharmacy Call Center Fax Number: 800-424-5881 The PDL applies to Medicaid fee-for-service members. It does not apply to members enrolled in Rocky Mountain Health HMO or Denver Health Medicaid Choice.

Initiation of pharmaceutical product subject to Prior Authorization:

Please note that starting the requested drug, including a non-preferred drug, prior to a PA request being reviewed and approved, through either inpatient use, by using office "samples", or by any other means, does not necessitate Medicaid approval of the PA request.

Health First Colorado, at 25.5-5-501, requires the generic of a brand name drug be prescribed if the generic is therapeutically equivalent to the brand name drug. Exceptions to this rule are: 1) If the brand name drug is more cost effective than the generic as determined by the Department, 2) If the patient has been stabilized on a brand name drug and the prescriber believes that transition to a generic would disrupt care, and 3) If the drug is being used for treatment of mental illness, cancer, epilepsy, or human immunodeficiency virus and acquired immune deficiency syndrome.

Please see the <u>Brand Favored Product List</u> for a list of medications where the brand name drug is more cost effective than the generic drug.

Brand Name Required = BNR, Prior Authorization = PA, AutoPA = authorization can be automated at the point of sale transaction if criteria are met Preferred drug list applies only to prescription (RX) products, unless specified

Preferred Agents	Non-preferred Agents	Prior Authorization Criteria		
		(All Non-preferred products will be approved for one year unless otherwise stated.)		
	I. Analgesics			
T	nerapeutic Drug Class: NON-OPIOID A	NALGESIA AGENTS - Oral - Effective 7/1/2021		
No PA Required	PA Required			
Duloxetine capsule (generic Cymbalta) Gabapentin capsule, tablet, solution	CYMBALTA (duloxetine) capsule DRIZALMA (duloxetine DR) sprinkle capsule Duloxetine capsule (generic Irenka)	Non-preferred oral non-opioid analgesic agents may be approved if member meets all of the following criteria: • Member has trialed and failed duloxetine (20mg, 30mg, or 60mg) AND has trialed and failed gabapentin OR pregabalin capsule (Failure is defined as lack of efficacy with 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction)		
Pregabalin capsule	GRALISE (gabapentin ER) HORIZANT (gabapentin ER) tablet	Prior authorization will be required for Lyrica (pregabalin) capsule dosages > 600mg per day (maximum of 3 capsules daily) and gabapentin dosages > 3600mg per day.		

SAVELLA (milnacipran) tablet, titration pack	LYRICA (pregabalin) capsule, solution, CR tablet NEURONTIN (gabapentin) capsule, tablet, solution Pregabalin solution	
The	rapeutic Drug Class: NON-OPIOID ANALO	GESIA AGENTS - Topical - Effective 7/1/2021
No PA Required Brand/generic changes effective 1/1/2022 LIDODERM ^{BNR} (lidocaine) patch	PA Required Lidocaine patch ZTLIDO (lidocaine) topical system	Non-preferred topical products require a trial/failure with an adequate 8-week trial of gabapentin AND pregabalin AND duloxetine AND lidocaine patch. Failure is defined as lack of efficacy with an 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction. Prior authorization will be required for lidocaine patch quantities exceeding 90 patches per 30 days (maximum of 3 patches daily).
Therapeutic D	Drug Class: NON-STEROIDAL ANTI-INF	LAMMATORIES (NSAIDS) - Oral - Effective 1/1/2022
No PA Required	PA Required	
Celecoxib capsule Diclofenac potassium tablet Diclofenac sodium EC/DR tablet Ibuprofen suspension, tablet (RX) Indomethacin capsule, ER capsule Ketorolac tablet** Meloxicam tablet Nabumetone tablet Naproxen DR/ER, tablet (RX) *(all manufacturers except Woodward) Naproxen suspension* *(all manufacturers except Acella)	ARTHROTEC (diclofenac sodium/ misoprostol) tablet CELEBREX (celecoxib) capsule DAYPRO (oxaprozin) caplet Diclofenac sodium ER tablets Diclofenac sodium/misoprostol tablet Diflunisal tablet DUEXIS (ibuprofen/famotidine) tablet Etodolac capsule, IR and ER tablet FELDENE (piroxicam) capsule Fenoprofen capsule, tablet Flurbiprofen tablet Ibuprofen/famotidine tablet INDOCIN (indomethacin) susp	 DUEXIS (ibuprofen/famotidine) or VIMOVO (naproxen/esomeprazole) may be approved if the member meets the following criteria: Trial and failure[‡] of all preferred NSAIDs at maximally tolerated doses AND Trial and failure[‡] of three preferred proton pump inhibitors in combination with NSAID within the last 6 months AND Has a documented history of gastrointestinal bleeding All other non-preferred oral agents may be approved following trial and failure[‡] of four preferred agents. ‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions. **Ketorolac tablets quantity limitations: 5-day supply per 30 days and 20 tablets per 30 days

Sulindac tablet		
	Ketoprofen IR, ER capsule	
	Meclofenamate capsule	
	Mefenamic acid capsule	
	Meloxicam suspension	
	Meloxicam (submicronized) capsule	
	MOBIC (meloxicam) tablet	
	NALFON (fenoprofen) capsule, tablet	
	NAPRELAN (naproxen CR) tablet	
	Naproxen EC tablet (Woodward only)	
	Naproxen suspension (Acella only)	
	Naproxen sodium CR, ER, IR tablet	
	Naproxen/esomeprazole DR tablet	
	Oxaprozin tablet	
	Piroxicam capsule	
	QMIIZ (meloxicam) ODT	
	RELAFEN DS (nabumetone) tablet	
	Tolmetin tablet, capsule	
	VIMOVO (naproxen/esomeprazole) DR tablet	
	VIVLODEX (meloxicam, submicronized) capsule	
	ZIPSOR (diclofenac potassium) capsule	
	ZORVOLEX (diclofenac, submicronized) capsule	
Theraneutic Drug	L or Class: NON-STEROIDAL ANTI-INFLAM	MMATORIES (NSAIDS) - Non-Oral - Effective 1/1/2022
No PA Required		SPRIX (ketorolac) may be approved if meeting the following criteria:
•		

Diclofenac 1.5% topical solution	Diclofenac 1.3% topical patch (generic Flector)	Member is unable to tolerate, swallow or absorb oral NSAID formulations
VOLTAREN (diclofenac) 1% gel (Rx) Diclofenac sodium 1% (generic	FLECTOR (diclofenac) 1.3% topical patch Ketorolac nasal spray	 OR Member has trialed and failed three preferred oral or topical NSAID agents (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions) Quantity limit: 5-single day nasal spray bottles per 30 days
Voltaren) gel (Rx)	LICART (diclofenac) 1.3% topical patch	Quantity initia o single day masar spray contres per so days
	PENNSAID (diclofenac solution) 2% Pump	All other non-preferred topical agents may be approved for members who have trialed and failed one preferred agent. Failure is defined as lack of efficacy with 14-day trial,
	SPRIX (ketorolac) nasal spray	allergy, intolerable side effects, or significant drug-drug interaction.
		FLECTOR (diclofenac) patch quantity limit: 2 patches per day
		Diclofenac 3% gel (generic Solaraze) prior authorization criteria can be found in the
		Antineoplastic agents, topical, section of the PDL.
O-2-2-1 H4:12-42 D-12 (1	4!1 -144!! -! -1-) .	

Opioid Utilization Policy (long-acting and short-acting opioids):

It is highly encouraged that the healthcare team utilize the Prescription Drug Monitoring Program (PDMP) to aid in ensuring safe and efficacious therapy for members using controlled substances.

Total Morphine Milligram Equivalent Policy Effective 10/1/17:

- The maximum allowable morphine milligram equivalent (MME) is 200 MME. Prescriptions for short-acting (SA) and long-acting (LA) opioids are cumulatively included in this calculation. The prescription that exceeds the cumulative MME limit of 200 MME for a member will require prior authorization and may require a provider-to-provider telephone consultation with the pain management physician (free of charge and provided by Health First Colorado).
- Prior authorization will be granted to allow for tapering
- Prior authorization for 1 year will be granted for diagnosis of sickle cell anemia
- Prior authorization for 1 year will be granted for admission to or diagnosis of hospice or end of life care
- Prior authorization for 1 year will be granted for pain associated with cancer

MME calculation is conducted using conversion factors from the following website: http://agencymeddirectors.wa.gov/Calculator/DoseCalculator.htm

Only one long-acting opioid agent (including different strengths) and one short-acting opioid agent (including different strengths) will be considered for a prior authorization.

Medicaid provides guidance on the treatment of pain, including tapering, on our webpage under the heading Pain Management Resources and Opioid Use at: https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use

Opioid Naïve Policy Effective 8/1/17 (Update effective 11/27/19 in Italics):

Members who have not filled a prescription for an opioid within the past 180 days will be identified as "opioid treatment naïve" and have the following limitations placed on the initial prescription(s):

- The prescription is limited to short-acting opioid agents or Butrans (buprenorphine) 5mcg patch. Use of other long-acting opioid agents will require prior authorization approval for members identified as opioid treatment naïve.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 7 days, the quantity will be limited to 8 dosage forms per day (tablets, capsules), maximum #56 tablets/capsules for a 7-day supply
- The fourth prescription for an opioid will require prior authorization, filling further opioid prescriptions may require a clinical pharmacist review or provider to provider telephone consultation with a pain management physician (free of charge and provided by Health First Colorado).

• If a member has had an opioid prescription filled within the past 180 days, then this policy would not apply to that member and other opioid policies would apply as applicable.

Dental Prescriptions Opioid Policy Effective 11/15/18 (implemented in the claims system 01/07/19):

Members who receive an opioid prescribed by a dental provider will be subject to day supply limits and quantity per day limits for short acting opioids.

- The prescription is limited to short-acting opioid agents only. Use of long-acting opioid agents and short acting fentanyl agents will require prior authorization approval for members' prescriptions written by a dental provider.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 4 days, the quantity will be limited to 6 dosage forms per day (tablets, capsules), maximum #24 tablets/capsules for a 4-day supply
- The fourth prescription for an opioid will require prior authorization. A prior authorization for the fourth fill may be approved for up to a 7-day supply and the quantity will be limited to 8 dosage forms per day (#56 tablets/capsules) for members with any of the following diagnoses/undergoing any of the following procedures:
 - o Traumatic oro-facial tissue injury with major mandibular/maxillary surgical procedures
 - o Severe cellulitis of facial planes
 - o Severely impacted teeth with facial space infection necessitating surgical management
- Other potential exemptions that exceed the first 3 fill limits (day supply and quantity) may be evaluated with a provider-to-provider telephone consult with a pain management specialist (free of charge and provided by Health First Colorado)

If a member has had an opioid prescription prescribed by a non-dental provider, then this policy would not apply to that member and other opioid policies would apply as applicable. Dental prescriptions do not impact the opioid treatment naïve policy, but the prescriptions will be counted towards the Morphine Milligram Equivalent (MME) daily dose.

Opioid and Benzodiazepine Combination Effective 9/15/19:

Prior authorization will be required for members receiving long-term therapy with an opioid medication who are newly started on a benzodiazepine medication <u>OR</u> for members receiving long-term therapy with a benzodiazepine medication who are newly started on an opioid medication. Prior authorization may be approved if meeting the following:

- The member discontinued or is no longer taking either the opioid or benzodiazepine medication and will not be using these in combination **OR**
- The member will not be taking the prescribed opioid and benzodiazepine medications at the same time based on prescribed dosing interval (such as prn administration) for the regimen <u>AND</u> the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- The prescriber has evaluated the regimen and attests that it is appropriate for the member to continue use of the concomitant opioid and benzodiazepine medication regimen as prescribed AND the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- Prior authorization may be approved for members receiving palliative or hospice care **OR**
- For benzodiazepine prior authorizations, approval may be granted if the benzodiazepine is being prescribed for seizure disorder or convulsions.

*If counseling has not been provided, the prescriber attests that a reasonable effort will be made to contact the member or the member's pharmacy to ensure that counseling is provided.

Opioid and Quetiapine Combination Effective 9/15/19:

Pharmacy claims for members receiving opioid and quetiapine medications in combination will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) related to risk of increased sedation from concomitant use of this drug combination.

Opioid and Buprenorphine-Containing substance use disorder (SUD) Product Combination Effective 06/01/21:

Opioid claims submitted for members currently receiving buprenorphine-containing SUD medications will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) with use of this drug combination.

	Therapeutic Drug Class: OPIOID	S, Short Acting - Effective 7/1/2021

*Preferred codeine and tramadol products do not require prior authorization for adult members (18 years of age or greater) if meeting all other opioid policy criteria. Preferred codeine or tramadol products prescribed for members < 18 years of age must meet the following criteria:

- Preferred tramadol and tramadol-containing products may be approved for members < 18 years of age if meeting the following:
 - Member is 12 years to 17 years of age **AND**
 - Tramadol is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND
 - Member is not obese (BMI-for-age > 95th percentile per CDC guidelines) and does not have obstructive sleep apnea or severe lung disease OR
 - For members < 12 years of age with complex conditions or life-limiting illness who are receiving care under a pediatric specialist, tramadol and tramadolcontaining products may be approved on a case-by-case basis
- Preferred Codeine and codeine-containing products will receive prior authorization approval for members meeting the following criteria may be approved for members < 18 years of age if meeting the following:
 - Member is 12 years to 17 years of age AND
 - Codeine is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND
 - Member is not obese (BMI-for-age > 95th percentile per CDC guidelines) and does not have obstructive sleep apnea or severe lung disease AND
 - Member is not pregnant or breastfeeding AND
 - Renal function is not impaired (GFR > 50 ml/min) AND
 - Member is not receiving strong inhibitors of CYP3A4 (such as erythromycin, clarithromycin, telithromycin, itraconazole, ketoconazole, posaconazole, fluconazole [\ge 200mg daily], voriconazole, delavirdine, and milk thistle) AND
 - Member meets <u>one</u> of the following:
 - Member has trialed codeine or codeine-containing products in the past with no history of allergy or adverse drug reaction to codeine
 - Member has not trialed codeine or codeine-containing products in the past and the prescriber acknowledges reading the following statement: "Approximately 1-2% of the population metabolizes codeine in a manner that exposes them to a much higher potential for toxicity. Another notable proportion of the population may not clinically respond to codeine. We ask that you please have close follow-up with members newly starting codeine and codeine-containing products to monitor for safety and efficacy."

criteria: Morphine concentrated solution, oral syringe Member has history of trial/failure of 7-days utilization of preferred NALOCET (oxycodone/ acetaminophen) product(s)in the last 21 days OR If member does not meet the above criteria, prior authorization approval for NORCO (hydrocodone/acetaminophen) Nucynta IR will require trial and failure of three preferred agents. Failure is defined as lack of efficacy, intolerable side effects, significant drug-drug NUCYNTA** (tapentadol) tablet interaction, allergy‡, or significant adverse drug reaction. Nucynta IR will have a maximum daily quantity of 6 tablets (180 tabs per 30 OXAYDO (oxycodone) tablet days). Oxycodone/aspirin tablet Non-preferred tramadol products may be approved following trial and failure of generic tramadol 50mg tablet AND generic tramadol/acetaminophen tablet. Oxycodone/ibuprofen tablet All other non-preferred short-acting opioid products may be approved following trial and failure of three preferred products. Failure is defined as allergy 1, lack of efficacy, Oxycodone capsule, syringe, conc solution intolerable side effects, or significant drug-drug interaction. Oxymorphone tablet ‡Allergy: hives, maculopapular rash, erythema multiforme, pustular rash, severe Pentazocine/naloxone tablet hypotension, bronchospasm, and angioedema PERCOCET (oxycodone/ acetaminophen) tablet Quantity Limits: Short-acting opioids will be limited to a total of 120 tablets per 30 days (4/day) per member for members who are not included in the opioid treatment ROXICODONE (oxycodone) tablet naive policy. Exceptions will be made for members with a diagnosis of a terminal illness (hospice or palliative care) or sickle cell anemia. For members who are receiving ROXYBOND (oxycodone) tablet more than 120 tablets currently and who do not have a qualifying exemption diagnosis, a 6-month prior authorization can be granted via the prior authorization process for Tramadol 100mg tablet providers to taper members. Please note that if more than one agent is used, the combined total utilization may not exceed 120 units in 30 days. There may be allowed ULTRACET (tramadol/ acetaminophen) certain exceptions to this limit for acute situations (for example: post-operative surgery, fractures, shingles, car accident). ULTRAM (tramadol) Maximum Doses: Tramadol: 400mg/day Codeine: 360mg/day Butorphanol intranasal: 10ml per 30 days (four 2.5ml 10mg/ml package units per 30 days) Therapeutic Drug Class: FENTANYL PREPARATIONS (buccal, intranasal, transmucosal, sublingual) - Effective 7/1/2021 **PA Required** Fentanyl buccal, intranasal, transmucosal, and sublingual products: ABSTRAL (fentanyl citrate) SL tablet Prior authorization approval may be granted for members experiencing breakthrough ACTIQ (fentanyl citrate) lozenge cancer pain and those that have already received and are tolerant to opioid drugs for the cancer pain AND are currently being treated with a long-acting opioid drug. The prior

Fentanyl citrate lozenge, buccal tablet

**Nucynta® IR (tapentadol) may be approved for members who meet the following

authorization may be granted for up to 4 doses per day. For patients in hospice or

	FENTORA (fentanyl citrate) buccal tablet	palliative care, prior authorization will be automatically granted regardless of the number of doses prescribed.			
	Therapeutic Drug Class: OPIOIDS, Long Acting - Effective 7/1/2021				
No PA Required	PA Required				
(*if dose met)	*NUCYNTA ER (tapentadol ER)	*Nucynta ER or Oxycontin may be approved for members who have trialed and failed; treatment with TWO preferred agents.			
BUTRANS ^{BNR} (buprenorphine)	NOCTNIA ER (tapentadoi ER)	laneu, deadheit with I wo preferred agents.			
transdermal patch	*OXYCONTIN (oxycodone ER) tablet	All other non-preferred products may be approved for members who have trialed and failed‡ three preferred products.			
*Fentanyl 12mcg, 25mcg, 50mcg,	BELBUCA (buprenorphine) buccal film				
75mcg, 100mcg transdermal patch	Buprenorphine transdermal patch	‡Failure is defined as lack of efficacy with 14-day trial due to allergy (hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension, bronchospasm, and angioedema), intolerable side effects, or significant drug-drug			
Morphine ER (generic MS Contin) tablet	CONZIP (tramadol ER) capsule	interaction.			
Tramadol ER (generic Ultram ER)		Methadone: Members may receive 30-day approval when prescribed for neonatal abstinence syndrome without requiring trial and failure of preferred agents or opioid prescriber consultation.			
	Hydromorphone ER tablet	Methadone Continuation: Members who have been receiving methadone for pain indications do not have to meet non-preferred criteria. All new starts for methadone will require prior authorization			
	under the non-preferred criteria listed above.				
	KADIAN (morphine ER) capsule	If a prescriber would like to discuss strategies for tapering off methadone or transitioning to other pain management therapies for a Health First Colorado member,			
	Methadone (all forms)	consultation with the Health First Colorado pain management physician is available free of charge by contacting the pharmacy call center helpdesk and requesting an			
	MORPHABOND (morphine ER) tablet	opioid prescriber consult.			
	Morphine ER capsules	Reauthorization: Reauthorization for a non-preferred agent may be approved if the following criteria are			
	MS CONTIN (morphine ER) tablet	met: Provider attests to continued benefit outweighing risk of opioid medication use			
	Oxycodone ER tablet	 AND Member met original prior authorization criteria for this drug class at time of 			
Oxymorphone ER tablet original authorization					
	Tramadol ER (generic Ryzolt/Conzip)	Quantity/Dosing Limits:			
	XTAMPZA ER (oxycodone) capsule	 Oxycontin, Opana ER, Nucynta ER, and Zohydro ER will only be approved for twice daily dosing. 			
	ZOHYDRO ER (hydrocodone) capsule	Hysingla ER will only be approved for once daily dosing.			

		(if using one strength) or 30 patches for 30 days (if using two strengths). For fentanyl patch strengths of 37mcg/hr, 62mcg/hr, and 87mcg/hr, member mutrial and fail two preferred strengths of separate patches that will provide the desired dose (such as 12mcg/hr + 50mcg/hr = 62mcg/hr).
	II. Anti-	nfectives

	TOBI [†] (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period
	TOBI PODHALER (tobramycin)	Age ≥ 6 years	112 mg twice daily	28-day supply per 56-day period
	x			

[†] Limitations apply to brand product formulation only

Members currently stabilized on any inhaled antibiotic agent in this class may receive approval to continue on that agent.

Therapeutic Drug Class: ANTI-HERPETIC AGENTS - Oral -Effective 1/1/2022

No PA Required Acyclovir tablet, capsule Acyclovir suspension (members over 5) Acyclovir suspension (members under 5 years or with a feeding tube) Famciclovir tablet Valacyclovir tablet ZOVIRAX (acyclovir) suspension Valacyclovir tablet

Non-preferred products may be approved for members who have failed an adequate trial with two preferred products with different active ingredients. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drugdrug interaction.

Sitavig (acyclovir) buccal tablet may be approved for diagnosis of recurrent herpes labialis (cold sores) if member meets non-preferred criteria listed above AND has failed trial with oral acyclovir suspension. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.

For members with a diagnosis of Bell's palsy, valacyclovir 1000 mg three times daily may be approved for 7 days if member presents with severe facial palsy.

Acyclovir suspension may be approved for:

- Members under 5 years of age OR
- Members with a feeding tube OR
- Members meeting non-preferred criteria listed above.

Maximum Dose Table		
Adult Pediatric		
Acyclovir	4000 mg daily	3200 mg daily
Valacyclovir	4000 mg daily	Age 2-11 years: 3000mg daily Age ≥ 12 years: 4000mg daily

Therapeutic Drug Class: ANTI-HERPETIC AGENTS- Topical - Effective 1/1/2022			
No PA Required Acyclovir ointment DENAVIR (penciclovir) cream ZOVIRAXBNR (acyclovir) cream	PA Required Acyclovir cream XERESE (acyclovir/ hydrocortisone) cream ZOVIRAX (acyclovir) ointment	Non-Preferred Zovirax and acyclovir ointment/cream formulations may be approved for members who have failed an adequate trial with the preferred topical acyclovir ointment/cream product (diagnosis, dose and duration) as deemed by approved compendium. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) Xerese (acyclovir/hydrocortisone) prior authorization may be approved for members that meet the following criteria: Documented diagnosis of recurrent herpes labialis AND Member is immunocompetent AND Member has failed treatment of at least 10 days with acyclovir (Failure is defined as significant drug-drug interaction, lack of efficacy, contraindication to or intolerable side effects) AND Member has failed treatment of at least one day with famciclovir 1500 mg OR valacyclovir 2 grams twice daily (Failure is defined as significant drug-drug interaction, lack of efficacy, contraindication to or intolerable side effects)	
Therapeutic Drug Class: FLUOROQUINOLONES – Oral -Effective 1/1/2022			
No PA Required (*if meeting eligibility criteria) *CIPRO (ciprofloxacin) oral suspension *Ciprofloxacin oral suspension Ciprofloxacin tablet Levofloxacin tablet	PA Required BAXDELA (delafloxacin) tablet CIPRO (ciprofloxacin) tablet Ciprofloxacin ER tablet Levofloxacin oral solution Moxifloxacin tablet Ofloxacin tablet	*CIPRO (ciprofloxacin) suspension may be approved for members < 5 years of age without prior authorization. For members ≥ 5 years of age, CIPRO (ciprofloxacin) suspension may be approved for members who cannot swallow a whole or crushed tablet. Non-preferred products may be approved for members who have failed an adequate trial (7 days) with at least one preferred product. (Failure is defined as: lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction). Levofloxacin solution may be approved for members < 5 years of age with prescriber attestation that member is unable to take Cipro (ciprofloxacin) crushed tablet or suspension OR for members < 5 years of age for treatment of pneumonia. For members ≥ 5 years of age, levofloxacin solution may be approved for members who require administration via feeding tube OR who have failed an adequate trial (7 days) of ciprofloxacin suspension. Failure is defined as lack of efficacy, allergy, intolerable side effects, significant drug-drug interaction, or contraindication to therapy.	
	<u> </u>	TRUS TREATMENTS - Effective 1/1/2022	
		Harvoni tablet/pellet May be approved for members 3 years and older for GT 1, 4-6 who	

EPCLUSA (sofosbuvir/velpatasvir) 200 mg -50 mg, 150 mg-37.5 mg tablet, pellet pack	EPCLUSA 400 mg-100 mg (sofosbuvir/velpatasvir) tablet HARVONI 90 mg-400 mg		GT 1,4 in combination with ribavirin for liver transplant recipients who are NC, have CC; AND meet the below applicable criteria. Harvoni pellet may be approved for members 3 years of age or older weighing less than 17 kg or members 3 years of age or older that are unable to take/swallow ledipasvir/sofosbuvir oral tablets; AND meet the below applicable criteria.
HARVONI (ledipasvir/sofosbuvir) 45mg-200mg tablet, pellet pack Ledipasvir/Sofosbuvir 90 mg-400 mg tablet (<i>Asequa only</i>)	(ledipasvir/sofosbuvir) tablet SOVALDI (sofosbuvir) tablet, pellet packet VIEKIRA PAK (ombitasvir/paritaprevir/ritonavir/dasabuvir) tablet	Mavyret tablet (glecaprevir/pibrentasvir)	May be approved for members 3 years and older for GT 1-6 who are NC or have CC (Child-Pugh A), OR for members 3 years and older with GT 1 who previously have been treated with a regimen containing an HCV NS5A inhibitor or an NS3/4A protease inhibitor, but not both; AND meet the applicable criteria below regarding initial treatment or re-treatment.
MAVYRET (glecaprevir/pibrentasvir) tablet, pellet pack Sofosbuvir/Velpatasvir 400mg- 100mg (Asequa only)	ZEPATIER (elbasvir/grazoprevir) tablet	Epclusa tablet/pellet (sofosbuvir/velpatasvir)	May be approved for members 3 years and older or weighing at least 17 kg for GT 1-6 who are NC, have CC (Child-Pugh A); or in combination with ribavirin in DC; AND meet the applicable criteria below regarding initial treatment or retreatment. Epclusa pellet may be approved for members ≥ 3 years of age weighing less than 17 kg or members 3 years of age or older that are unable to take/swallow ledipasvir/sofosbuvir oral tablets; AND meet the applicable criteria below regarding initial treatment or retreatment.
VOSEVI ^{2nd Line} tablet (sofosbuvir/velpatasvir/voxilapre vir)		Vosevi tablet ^{2nd Line} (sofosbuvir/velpatasvir/ voxilaprevir)	May be approved for members 18 years or older with chronic HCV infection who are NC, have CC (Child-Pugh A) AND meet one of the following: • GT 1-6 and has previously failed treatment with a regimen containing an NS5A inhibitor (such as ledipasvir, daclatasvir, or ombitasvir) OR • GT 1a or 3 and has previously failed treatment with a regimen containing sofosbuvir without an NS5A inhibitor AND meet the applicable criteria below for re-treatment.
		Initial Treatment (all ag Preferred agents may be a HCV treatment in hepatitis C tre received sufficie medications AN Prescriber attest adherence to ini Physician attests Member RNA v Member	approved for initial treatment if the following criteria are met: is being prescribed either through consultation with an expert eatment OR the primary care provider attests to having ent education to safely prescribe the listed hepatitis C

No PA Requ	ired PA Required	All products are preferred and do not require prior authorization.
	Non-Nucleoside Reverse Tra	anscriptase Inhibitors (NNRTIs)
Effective 01/14/22, oral produc	s indicated for HIV pre-exposure prophylaxis (PrEP) or	post-exposure prophylaxis (PEP) are eligible for coverage with a written prescription by an exist enrollment can be found at https://hcpf.colorado.gov/pharm-serv .

	SOLODYN ER (minocycline)			
	Tetracycline capsule			

Prior authorization for non-preferred tetracycline agents may be approved if member has trialed/failed a preferred doxycycline product AND preferred minocycline. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Prior authorization for liquid oral tetracycline formulations may be approved if member has difficulty swallowing and cannot take solid oral dosage forms.

Nuzyra (omadacycline) prior authorization may be approved if member meets all of the following criteria: the above "non-preferred" prior authorization criteria and the following:

- Member has trialed and failed[†] therapy with a preferred doxycycline product and preferred minocycline OR clinical rationale is provided describing why these medications cannot be trialed (including resistance and sensitivity) AND
- Member has diagnosis of either Community Acquired Bacterial Pneumonia (CABP) or Acute Bacterial Skin and Skin Structure Infection (ABSSSI) or clinical rationale and supporting literature describing/supporting intended use AND one of the following:
 - If member diagnosis is ABSSSI, member must have trial and failure[†]
 of sulfamethoxazole/trimethoprim product in addition to preferred
 tetracyclines OR
 - If member diagnosis is CABP, member must have trial and failure[†] of either a beta-lactam antibiotic (amoxicillin/clavulanic acid) or a macrolide (azithromycin)

L	` , <u>I</u>
L	IPOFEN (fenofibrate) capsule
FI	ENOGLIDE (fenofibrate) tablet
0 1111111111111	enofibric acid tablet
Lofibra/Tricor)	enofibric acid DR capsule
Fenofibrate capsule, tablet (generic A	ANTARA (fenofibrate) capsule

Non-preferred fibrates may be approved if the member has failed treatment with generic gemfibrozil or generic fenofibrate and niacin ER in the last 12 months (failure is defined as lack of efficacy with 4-week trial of each drug, allergy, intolerable side effects or significant drug-drug interactions).

Non-preferred lipotropic agents with a preferred product with same strength, dosage form, and active ingredient will be approved with adequate trial and/or failure of the preferred product with the same ingredient (such as preferred ezetimibe and Zetia) and 2 additional agents. (Failure is defined as: lack of efficacy with 4-week trial, allergy, intolerable side effects or significant drug-drug interactions).

Other Lipotropics

No PA Required	PA Required
Ezetimibe tablet	Icosapent ethyl capsule
Niacin ER tablet	LOVAZA (omega-3 ethyl esters) capsule
*Omega-3 ethyl esters capsule (generic Lovaza)	NEXLETOL (bempedoic acid) tablet
	NEXLIZET (bempedoic acid/ezetimibe) tablet
	NIASPAN ER (niacin ER) tablet
	VASCEPA (icosapent ethyl) capsule
	ZETIA (ezetimibe) tablet

Non-preferred lipotropic agents with a preferred product with same strength, dosage form, and active ingredient will be approved with adequate trial and/or failure of the preferred product with the same ingredient (such as preferred ezetimibe and Zetia) and 2 additional agents. (Failure is defined as: lack of efficacy with 4-week trial, allergy, intolerable side effects or significant drug-drug interactions).

*Omega-3 ethyl esters (generic Lovaza) may be approved for members who have a baseline triglyceride level ≥ 500 mg/dL

Lovaza (brand name) may be approved if meeting the following:

- Member has a baseline triglyceride level > 500 mg/dl AND
- Member has failed an adequate trial of omega-3 Ethyl Esters AND an adequate trial of gemfibrozil or fenofibrate (failure is defined as lack of efficacy with 4-week trial, allergy, intolerable side effects or significant drugdrug interactions)

Vascepa (icosapent ethyl) may be approved if meeting the following:

- Member has a baseline triglyceride level > 500 mg/dl AND
- Member has failed an adequate trial of generic omega-3 ethyl esters AND an adequate trial of gemfibrozil or fenofibrate (failure is defined as lack of efficacy with 4-week trial, allergy, intolerable side effects or significant drugdrug interactions)

Vascepa (icosapent ethyl) is being prescribed to reduce CV risk for members on maximally tolerated statin therapy with triglyceride levels ≥ 150mg/dL and LDL-C levels between 41-100 mg/dL AND member meets one of the following:

Simvastatin tablet	LESCOL XL (fluvastatin ER) tablet LIPITOR (atorvastatin) tablet LIVALO (pitavastatin) tablet PRAVACHOL (pravastatin) tablet ZOCOR (simvastatin) tablet ZYPITAMAG (pitavastatin) tablet Therapeutic Drug Class: STATIN CO PA Required Amlodipine /atorvastatin tablet	OMBINATIONS -Effective 4/1/2021 Non-preferred Statin combinations may be approved following trial and failure of treatment with two preferred products (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions).
Pravastatin tablet Rosuvastatin tablet	EZALLOR (rosuvastatin) sprinkle capsule Fluvastatin capsule, ER tablet	Age Limitations: Altoprev will not be approved for members < 18 years of age. Fluvastatin and lovastatin will not be approved for members < 10 years of age. Livalo will not be approved for members < 8 years of age.
Atorvastatin tablet Lovastatin tablet	ALTOPREV (lovastatin ER) tablet CRESTOR (rosuvastatin) tablet	preferred products (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions).
No PA Required	PA Required	Non-preferred Statins may be approved following trial and failure of treatment with two
	Therapeutic Drug Class: \$7	 Member is ≥ 45 years of age and has established atherosclerotic CV disease (e.g., coronary artery disease, cerebrovascular/carotid disease, peripheral arterial disease) OR Member is ≥ 50 years of age with diabetes mellitus and has one or more of the following additional risk factors for CV disease: Male ≥ 55 years of age or female ≥ 65 years of age Cigarette smoker Hypertension HDL-C ≤ 40 mg/dL for men or ≤ 50 mg/dL for women hsCRP >3.00 mg/L (0.3 mg/dL) CrCl 30 to 59 mL/min Retinopathy Micro- or macroalbuminuria ABI <0.9 without symptoms of intermittent claudication Maximum Dose: Vascepa (icosapent ethyl) 4g daily

	VYTORIN (ezetimibe/simvastatin) tablet	 Vytorin (ezetimibe/simvastatin) will not be approved for members < 18 ye of age. Caduet (amlodipine/atorvastatin) will not be approved for members < 10 y of age.

		Chlordiazepoxide capsule	Adults ≥ 18 years: 300 mg/day Children 6-17 years: up to 40 mg/day (pre-operative apprehension and anxiety)	Total of 9,000 mg (adults) and 120 mg (children, pre-op therapy) from all tablet strengths per 30 days	
		Diazepam Intensol oral concentrate 5 mg/mL	Adults ≥ 18 years: 40 mg/day Children: N/A	Total of 1200 mg from all dosage forms per 30 days	
		Diazepam solution 5 mg/5 mL	A 1 1/2 10 40 /1	T (1 51200 (1 1) 1200	
		Diazepam tablet	Adults ≥ 18 years: 40 mg/day Children 6 months to 18 years: up to 10 mg/day	Total of 1200 mg (adults) and 300 mg (pediatrics) from all dosage forms per 30 days	
		ATIVAN (lorazepam) Intensol concentrate 2 mg/mL ATIVAN (lorazepam) tablet	Adults ≥ 18 years: 10 mg/day	Total of 300 mg from all dosage forms	
		Lorazepam oral concentrated soln 2 mg/mL	Children: N/A	per 30 days	

		Lorazepam tablet			
		Oxazepam capsule		Adults ≥ 18 years: 120 mg/day Children 6-18 years: absolute dosage not established	Total of 3600 mg from all dosage forms per 30 days
Therapeutic Drug Class: ANXIOLYTIC, NON- BENZODIAZEPINES - Effective 4/1/2021					
No PA Required Buspirone tablet	PA Required		Non-preferred products may be approved following trial and failure of buspirone. Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions.		
Therapeutic Drug Class: ATYPICAL ANTI-PSYCHOTICS - Oral and Topical- Effective 4/1/2021 For injectable Atypical Antipsychotics please see Appendix P for criteria					
No PA Required*	PA Required Non-preferred brand name medications do not require a prior authorization when the equivalent generic is preferred and "dispense as written" is indicated on the prescription.		Non-preferred products may be approved for members meeting all of the following: • Medication is being prescribed for an FDA-Approved indication AND • Prescription meets dose and age limitations (Table 1) AND • Member has history of trial and failure of three preferred products with FDA approval for use for the prescribed indication (failure defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, significant drugdrug interactions, or known interacting genetic polymorphism that prevents		
Aripiprazole tablet Clozapine tablet LATUDA (lurasidone) 2 nd line**					
Olanzapine tablet, ODT	ABILIFY (aripiprazole) tablet, I Aripiprazole oral solution****,		safe preferred product dosing)		
Quetiapine IR tablet*** Quetiapine ER tablet	Asenapine SL tablet CAPLYTA (lumateperone) capsule		*Age Limits: All products including preferred products will require a PA for members younger than the FDA approved age for the agent (Table 1). Members younger than the FDA approved age for the agent who are currently stabilized on an atypical antipsychotic will be eligible for grandfathering. Atypical Antipsychotic		
Risperidone tablet, ODT, oral solution	Clozapine ODT	uic	prescriptions for members under 5 years of age may require a provider-provider telephone consult with a child and adolescent psychiatrist (provided at no cost to provider or member).		
Ziprasidone	CLOZARIL (clozapine) tablet, (FANAPT (iloperidone) tablet, p		depression if	**Latuda (lurasidone) may be approved for the treatment of schizophrenia or bip depression if the member has tried and failed treatment with one preferred product	
	FAZACLO (clozapine) ODT		(qualifying diagnosis verified by AutoPA). ***Quetiapine IR when given at sub-therapeutic doses may be restricted for therapy. Low-dose quetiapine (<150mg/day) is only FDA approved as part of a drug titration schedule to aid patients in getting to the target quetiapine dose. PA will be required for quetiapine < 150mg per day except for utilization (when appropriate) in members 65 years or older. PA will be approved for members 10-17 years of age with approved diagnosis (Table 1) stabilized on <150mg quetiapine IR per day.		
	GEODON (ziprasidone) capsule				
	INVEGA ER (paliperidone) tablet				
	NUPLAZID (pimavanserin) capsule, tablet Olanzapine/Fluoxetine capsule Paliperidone ER tablet		****Aripiprazole solution: Aripiprazole <u>tablet</u> quantity limit is 2 tablets/day for pediatric members to allow for incremental dose titration and use of the preferred tablet formulation should be considered for dose titrations when possible and clinically appropriate. If incremental dose cannot be achieved with titration of the aripiprazole		

REXULTI (brexpiprazole) tablet
RISPERDAL (risperidone) tablet, oral solution
SAPHRIS (asenapine) SL tablet
SECUADO (asenapine) patch
SEROQUEL IR (quetiapine IR)*** tablet
SEROQUEL XR (quetiapine ER)*** tablet
SYMBYAX (olanzapine/fluoxetine) capsule
VERSACLOZ (clozapine) suspension
VRAYLAR (cariprazine) capsule
ZYPREXA (olanzapine) tablet
ZYPREXA ZYDIS (olanzapine) ODT

tablet for members < 18 years of age OR for members unable to swallow solid tablet dosage form, aripiprazole solution may be approved. For all other cases, aripiprazole solution is subject to meeting non-preferred product approval criteria listed above.

Nuplazid (pimavanserin tartrate) may be approved for the treatment of hallucinations and delusions associated with Parkinson's Disease psychosis AND following trial and failure of therapy with quetiapine or clozapine (failure will be defined as intolerable side effects, drug-drug interaction, or lack of efficacy).

Abilify MyCite may be approved if meeting all of the following:

- Member has history of adequate trial and failure of 5 preferred agents (one trial must include aripiprazole tablet). Failure is defined as lack of efficacy with 6-week trial on maximally tolerated dose, allergy, intolerable side effects, significant drug-drug interactions AND
- Information is provided regarding adherence measures being recommended by provider and followed by member (such as medication organizer or digital medication reminders) AND
- Member has history of adequate trial and failure of 3 long-acting injectable formulations of atypical antipsychotics, one of which must contain aripiprazole (failure is defined as lack of efficacy with 8-week trial, allergy, intolerable side effects, significant drug-drug interactions) AND
- Abilify MyCite is being used with a MyCite patch and member is using a compatible mobile application. AND
- Medication adherence information is being shared with their provider via a web portal or dashboard.

<u>Quantity Limits</u>: Quantity limits will be applied to all products (Table 1). In order to receive approval for off-label dosing, the member must have an FDA approved indication and must have tried and failed on the FDA approved dosing regimen.

<u>Grandfathering</u>: Members currently stabilized on a non-preferred atypical antipsychotic or Latuda can receive approval to continue therapy with that agent for one year.

Table 1	Table 1 Atypical Antipsychotics – FDA Approved Indication, Age Range, Quantity and Maximum Dose				
Brand	Generic	Approved Indications	Age Range	Maximum Daily Dose by Age/Indication	Quantity and Maximum Dose Limitations
ABILIFY	aripiprazole	Schizophrenia Bipolar I Disorder (adult) Bipolar I Disorder (peds) Irritability w/autistic disorder Tourette's disorder	≥ 13 years ≥ 18 years 10-17 years 6-17 years 6-18 years	30 mg 30 mg 15 mg 15 mg 20 mg	Maximum one tablet per day (maximum of two tablets per day allowable for members < 18 years of age to accommodate for incremental dose changes)
CLOZARIL	clozapine	Treatment-resistant schizophrenia Recurrent suicidal behavior in schizophrenia or schizoaffective disorder	≥ 18 years	900 mg	Maximum dosage of 900mg per day

CAPLYTA	lumateperone	Schizophrenia	≥ 18 years	42 mg	Maximum dosage of 42mg per day
FAZACLO	clozapine	Treatment-resistant Schizophrenia Recurrent suicidal behavior in schizophrenia or schizoaffective disorder	≥ 18 years	900 mg	Maximum dosage of 900mg per day
FANAPT	iloperidone	Schizophrenia	≥ 18 years	24 mg	Maximum two tablets per day
GEODON	ziprasidone	Schizophrenia Bipolar I Disorder	≥ 18 years ≥ 18 years	200 mg 160 mg	Maximum two capsules per day
INVEGA	paliperidone	Schizophrenia & schizoaffective disorder	≥ 12 years and weight ≥ 51 kg ≥ 12 years and weight < 51 kg	12 mg 6 mg	Maximum one capsule per day
LATUDA	lurasidone	Schizophrenia (adult) Schizophrenia (adolescents) Bipolar I disorder (adult) Bipolar I disorder (peds)	≥ 18 years 13-17 years ≥ 18 years 10-17 years	160 mg 80 mg 120 mg 80 mg	Maximum one tablet per day (If dosing 160mg for schizophrenia, then max of two tablets per day)
NUPLAZID	pimavanserin	Parkinson's disease psychosis	≥ 18 years	34 mg	Maximum dosage of 34mg per day
RISPERDAL	risperidone	Schizophrenia (adult) Schizophrenia (adolescents) Bipolar mania (adult & peds) Irritability w/autistic disorder	≥ 18 years 13-17 years ≥ 10 years 5-17 years	12mg 6 mg 6 mg 3 mg	Maximum dosage of 12mg/day
REXULTI	brexpiprazole	Schizophrenia (adult) Adjunctive treatment of MDD	≥ 18 years	4 mg 3 mg	Maximum of 3mg/day for MDD adjunctive therapy, Maximum of 4mg/day for schizophrenia
SAPHRIS	asenapine	Schizophrenia (adult) Bipolar mania or mixed episodes	≥ 18 years ≥ 10 years	20 mg 20 mg	Maximum two tablets per day
SECUADO	asenapine patch	Schizophrenia (adult)	≥ 18 years	7.6 mg/ 24 hours	Maximum 1 patch per day
SEROQUEL	quetiapine	Schizophrenia (adult) Schizophrenia (adolescents) Bipolar I mania or mixed (adult) Bipolar I mania or mixed (peds) Bipolar I depression (adults) Bipolar I Disorder Maintenance	≥ 18 years 13-17 years ≥ 18 years 10-17 years ≥ 18 years ≥ 18 years	750 mg 800 mg 800 mg 600 mg 300 mg 800 mg	Maximum three tablets per day
SEROQUEL XR	quetiapine ER	Schizophrenia (adult/adolescent) Bipolar I mania (adult) Bipolar I mania (peds) Bipolar I depression (adults) Adjunctive treatment of MDD	≥ 13 years ≥ 18 years 10-17 years ≥ 18 years ≥ 18 years	800 mg 800 mg 600 mg 300 mg 300 mg	Maximum one tablet per day (for 300mg & 400mg tablets max 2 tablets per day)
SYMBYAX	olanzapine/ fluoxetine	Acute depression in Bipolar I Disorder Treatment resistant depression (MDD)	≥ 10 years	12 mg olanzapine/ 50 mg fluoxetine	Maximum three capsules per day (18mg olanzapine/75mg fluoxetine)

VRAYLAR	cariprazine	Schizophrenia	≥ 18 years	6 mg	Maximum dosage of 6mg/day
		Acute manic or mixed episodes with Bipolar I	≥ 18 years	6 mg	
		Disorder			
		Depressive episodes with Bipolar I disorder	≥ 18 years	3 mg	
ZYPREXA	olanzapine	Schizophrenia			Maximum one tablet per day
ZYPREXA		Acute manic or mixed episodes with Bipolar I	≥ 13 years	20 mg	
ZYDIS		Disorder			

Therapeutic Drug Class: CALCITONIN GENE – RELATED PEPTIDE INHIBITORS (CGRPis) -Effective 4/1/2021

	ZYPREXA ZYDIS	 	Acute manic or mixed episodes with Bipolar I Disorder			
	Therapeutic Drug Class: CALCITONIN GENE – RELA					
		PA Rec	quired for all agents			
	*AIMOVIG (erenu auto-injector	mab-aooe)	AJOVY (fremanezumab-vfrm) syringe EMGALITY 100mg (galcanezumab-gnlm)			
*EMGALITY 120mg (galcanezumab-gnlm) pen,			syringe			
	syringe		NURTEC (rimegepant) ODT			
			UBRELVY (ubrogepant) tablet			

*Emgality 120mg (galcanezumab) or Aimovig (erenumab) may be approved for members meeting Migraine Prevention Prior Authorization Criteria below.

Migraine Prevention Prior Authorization Criteria (must meet all of the following):

- Member is 18 years of age or older AND
- Member is in need of preventative therapy for episodic or chronic migraine AND
- Member has diagnosis of migraine with or without aura AND
- Member has tried and failed 2 oral preventative pharmacological agents listed
 as Level A per American Headache Society/American Academy of Neurology
 (such as divalproex, topiramate, metoprolol, propranolol). Failure is defined as
 lack of efficacy, allergy, intolerable side effects, or significant drug-drug
 interaction AND
- Headache count: If prescribed for episodic migraine member has history of 4-14 migraine days per month OR if prescribed for chronic migraine member has history of 15 or more headache days per month where 8 or more were migraine days for three or more months AND
- Member does not have history of MI, stroke, TIA, unstable angina, coronary artery bypass surgery, or other revascularization procedures within previous 12 months AND
- Prescription meets one of the following:
 - Medication <u>is not</u> prescribed for chronic migraine with medication overuse headache OR
 - Member is prescribed Aimovig for chronic migraine with medication overuse headache resulting from taking triptans ≥ 10 days/month, non-narcotic analgesics ≥ 15 days/month (such as acetaminophen, NSAID), or a combination of analgesics ≥ 10 days/month (including non-narcotic, ergot, opioid, butalbital)

AND

- Initial authorization will be limited to the following:
 - For episodic migraine: Initial authorization will be for 6 months. Continuation (12-month authorization) will require documentation of clinically significant improvement after 4 months use (and documentation of number of migraine days per month)
 - For chronic migraine: Initial authorization will be for 4 months. Continuation (12-month authorization) will require documentation of

clinically significant improvement after 3 months use (and documentation of number of migraine days per month)

Non-Preferred Medications for Migraine Prevention:

Non-preferred medications for migraine prevention may be approved if the member meets the Migraine Prevention Prior Authorization Criteria above AND the member has history of adequate trial and failure of Emgality 120mg AND Aimovig therapy (failure is defined as lack of efficacy with 4-week trial, allergy, intolerable side effects, or significant drug-drug interaction).

Members taking a non-preferred agent for migraine prevention that have not shown clinically significant improvement for 4 months for acute episodic migraine treatment or 3 months for chronic migraine treatment will be allowed to transition to a preferred CGRP agent without meeting the "headache count" criteria listed above.

Non-Preferred Medications for Acute Migraine Treatment or Cluster Headache Treatment:

Non-preferred medications for acute migraine treatment may be approved for members meeting all of the following:

- Member is 18 years of age or older AND
- Medication is being prescribed to treat migraine headache with moderate to severe pain AND
- Member is not receiving an injectable form of CGRP medication for any indication AND
- Member has history of trial and failure of all of the following (failure is defined as lack of efficacy with 4-week trial, contraindication, allergy, intolerable side effects, or significant drug-drug interaction):
 - Three triptansAND
 - $\circ \quad \text{Two NSAID agents} \\$

Non-preferred medications for treatment of cluster headache may be approved for members meeting all of the following:

- Member is 19-65 years of age AND
- Member meets diagnostic criteria for episodic cluster headache (has had no more than 8 attacks per day, a minimum of one attack every other day, and at least 4 attacks during the week prior to this medication being prescribed) AND
- Member is not taking other preventative medications to reduce the frequency of cluster headache attacks AND
- Member has history of trial and failure of all of the following (failure is defined as lack of efficacy with 4-week trial, contraindication, allergy, intolerable side effects, or significant drug-drug interaction):
 - o Oxygen therapy AND
 - o Sumatriptan subcutaneous or intranasal AND

		 Zolmitriptan intranasal AND Member is not prescribed this medication for medication overuse headache AND Member does not have ECG abnormalities compatible with acute cardiovascular event or conduction delay AND Member does not have a history within the last 6 months of myocardial infarction, unstable angina, percutaneous coronary intervention, coronary artery bypass grafting, deep vein thrombosis, or pulmonary embolism AND Member does not have a history of stroke, intracranial or carotid aneurysm, intracranial hemorrhage, or vasospastic angina, clinical evidence of peripheral vascular disease, or diagnosis of Raynaud's AND Initial authorization will be limited to 8 weeks. Continuation (12-month authorization) will require documentation of clinically relevant improvement with no less than 30% reduction in headache frequency in a 4-week period. Maximum Dosing: Aimovig (erenumab): 140mg per 30 days Emgality 120mg (galcanezumab): 240mg once as first loading dose then 120mg monthly Emgality 100mg (galcanezumab): 300mg per 30 days Ajovy (fremanezumab): 225mg monthly or 675mg every three months Ubrelvy 50mg (ubrogepant): 16 tablets/30 days (800mg per 30 days) Ubrelvy 100mg (ubrogepant): 16 tablets/30 days (1600mg per 30 days) Nurtec (rimegepant): 15 tablets/30 days (1125mg per 30 days)
		HIUM AGENTS -Effective 4/1/2021
No PA Required Lithium Carbonate capsule Lithium Carbonate tablet Lithium ER tablet Non-preferred brand name medications do not require a prior authorization when the equivalent generic is preferred and "dispense as written" is indicated on the prescription. LithoBID ER (lithium ER) tablet		is significant drug-drug interactions, intolerance to dosage form).
Lithium Citrate soln		
		TIVE DISORDER AGENTS -Effective 4/1/2021
*Must meet eligibility criteria PA Required		
*Donepezil 5mg, 10mg tablet		*Eligibility criteria for Preferred Agents – All preferred products may be approved without PA if the member has a diagnosis of neurocognitive disorder which can be verified by SMART PA.
*Donepezil ODT *Memantine IR tablets	Donepezil 23mg tablet EXELON (rivastigmine) patch	Non-preferred products may be approved if the member has failed treatment with one of the preferred products in the last 12 months. (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions)

*Rivastigmine capsule, patch	Galantamine IR tablet, solution
	Galantamine ER capsule
	Memantine ER capsule, IR solution
	MESTINON (pyridostigmine) tablet, syrup
	NAMENDA (memantine) tablet
	NAMENDA XR (memantine ER) capsule
	NAMZARIC (memantine/donepezil ER) capsule
	RAZADYNE ER (galantamine) capsule

Members currently stabilized on a non-preferred product may receive approval to continue on that agent for one year if medically necessary and if there is a diagnosis of neurocognitive disorder.

Dexmethylphenidate IR tablet		ancinative dosing with preferred tablet and capsule formulations.
	Dextroamphetamine ER capsule, solution, tablet	CUNOCI (solvion fotal) major outh original and the solving of the
Dexmethylphenidate ER capsule	1 , , , , , , , , , , , , , , , , , , ,	SUNOSI (solriamfetol) prior authorization may be approved if member meets the
	DYANAVEL XR (amphetamine) solution	following criteria:
Guanfacine ER tablet	1,	 Member is 18 years of age or older AND
	EVEKEO (amphetamine) ODT, tablet	 Member has diagnosis of either narcolepsy or obstructive sleep apnea
Methylphenidate (generic Ritalin)		(OSA) and is experiencing excessive daytime sleepiness AND
tablet	FOCALIN (dexmethylphenidate) tablet	 Member does not have end stage renal disease AND
	, , , , , , , , , , , , , , , , , , ,	• If Sunosi is being prescribed for OSA, member has 1 month trial of CPAP
Methylphenidate 36mg ER tablet	FOCALIN XR (dexmethylphenidate) capsule	AND
(generic Concerta) - Patriot		 Member has trial and failure[‡] of modafinil AND armodafinil AND one
Only-	INTUNIV (guanfacine ER) tablet	other agent in stimulant PDL class.
N. 1. C. 11. 11.		
Modafinil tablet	JORNAY PM (methylphenidate) capsule	WAKIX (pitolisant) prior authorization may be approved if member meets the
		following criteria:
	<u> </u>	10

VYVANSE (lisdexamfetamine)	Methamphetamine tablet
capsule	METHYLIN (methylphenidate) suspension
	Methylphenidate solution
	Methylphenidate CD/ER capsule, 18mg, 27mg, 54mg ER tablet,
	Methylphenidate 36mg ER tablet (generic Concerta) – all other manufacturers-
	MYDAYIS ER (dextroamphetamine/ amphetamine) capsule
	NUVIGIL (armodafinil) tablet
	PROCENTRA (dextroamphetamine) solution
	PROVIGIL (modafinil) tablet
	QELBREE (viloxazine ER) capsule
	QUILLICHEW ER (methylphenidate) chewable tablet
	QUILLIVANT XR (methylphenidate) suspension
	RELEXXII (methylphenidate ER) tablet
	RITALIN (methylphenidate) tablet
	RITALIN LA (methylphenidate ER) capsule
	STRATTERA (atomoxetine) capsule
	SUNOSI (solriamfetol) tablet
	VYVANSE (lisdexamfetamine) chewable tablet
	WAKIX (pitolisant) tablet

ZENZEDI (dextroamphetamine) tablet

- Member is 18 years of age or older **AND**
- Member has diagnosis of narcolepsy and is experiencing excessive daytime sleepiness AND
- Member does not have end stage renal disease (eGFR <15 mL/minute)
- Member does not have severe hepatic impairment **AND**
- Member does not have a history of QT interval prolongation AND
- Member has trial and failure[‡] of modafinil **AND** armodafinil **AND** one other agent in the stimulant PDL class AND
- Member has been counseled that Wakix may reduce the efficacy of hormonal contraceptives and regarding use an alternative non-hormonal method of contraception during Wakix therapy and for at least 21 days after discontinuing treatment.

Maximum Dose (all products): See Table 2

Exceeding Max Dose: Prior authorization may be approved for doses that are higher than the listed maximum dose (Table 2) for members meeting the following criteria:

- Member is taking medication for indicated use listed in Table 1 AND
- Member has 30-day trial and failure[‡] of three different preferred or nonpreferred agents at maximum doses listed in Table 2 AND
- Documentation of member's symptom response to maximum doses of three other agents is provided AND
- Member is not taking a sedative hypnotic medication (such as temazepam, triazolam, or zolpidem from the Sedative Hypnotic PDL class).

‡Failure is defined as: lack of efficacy with 4-week trial, allergy, intolerable side effects, or significant drug-drug interaction.

- Approval for medically accepted indications <u>not</u> listed in Table 1 may be given with prior authorization review and may require submission of peer-reviewed literature or medical compendia showing safety and efficacy of the medication used for the prescribed indication.
- Preferred medications may also receive approval for off-label use for fatigue associated with multiple sclerosis if meeting all other criteria for approval.

Bolded drug names are preferred (subject to preferential coverage changes for brand/generic equivalents)

Drug	Orug Indication/Age	
Stimulants-Immediate Release		
Amphetamine sulfate (EVEKEO)	ADHD (Age ≥ 3 years), Narcolepsy (Age ≥ 6 years)	
Dexmethylphenidate IR (FOCALIN)	ADHD (Age ≥ 6 years)	
Dextroamphetamine IR (ZENZEDI)	ADHD (Age 3 to≤ 16 years), Narcolepsy (Age ≥ 6 years)	
Dextroamphetamine solution (PROCENTRA)	ADHD (Age 3 to ≤ 16 years), Narcolepsy (Age ≥ 6 years)	
Methamphetamine (DESOXYN)	ADHD (Age ≥ 6 years)	
methylphenidate IR (generic METHYLIN, RITALIN)	 ADHD (Age ≥ 6 years[†]), Narcolepsy (Age ≥ 6 years), OSA. [†]Prior Authorization for members 4-6 years of age with a diagnosis of ADHD may be approved with prescriber attestation to the following: Member's symptoms have not significantly improved despite adequate behavior interventions AND Member experiences moderate-to-severe continued disturbance in functioning AND Prescriber has determined that the potential benefits of starting methylphenidate before the age of 6 years outweigh the potential harm of delaying treatment. 	
Mixed amphetamine salts IR (generic ADDERALL)	ADHD (Age ≥ 3 years), Narcolepsy (Age ≥ 6 years)	
	Stimulants –Extended-Release	
Amphetamine ER (ADZENYS XR-ODT and ADZENYS ER suspension)	ADHD (Age ≥ 6 years)	
Amphetamine ER (DYANAVEL XR)	ADHD (Age ≥ 6 years)	
Mixed-amphetamine salts ER (ADDERALL XR)	ADHD (Age ≥ 6 years)	
Dexmethylphenidate ER (generic Focalin XR)	ADHD (Age ≥ 6 years)	
Dextroamphetamine ER (DEXEDRINE)	ADHD (Age 6 to ≤ 16 years), Narcolepsy (Age ≥ 6 years)	
Dextroamphetamine ER/amphetamine ER (MYDAYIS ER)	ADHD (Age ≥ 13 years)	
Dextroamphetamine IR and ER (DEXTROSTAT) Lisdexamfetamine dimesylate (VYVANSE capsule, Vyvanse chewable)	ADHD and Narcolepsy (IR \geq 3 years, ER \geq 6 years) ADHD (Age \geq 6 years), Moderate to severe binge eating disorder in adults (Age \geq 18 years)	
Methylphenidate ER OROS (CONCERTA)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years), OSA	
Methylphenidate patch (DAYTRANA)	ADHD (Age ≥ 6 years)	
Methylphenidate SR (METADATE ER)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)	
Methylphenidate ER (METADATE CD)	ADHD (Age ≥ 6 years)	
Methylphenidate ER (QUILLICHEW ER)	ADHD (Age 6 years to ≤ 65 years), Narcolepsy (Age ≥ 6 years)	
Methylphenidate ER (QUILLIVANT XR)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)	

Methylphenidate ER (RITALIN LA)	ADHD (Age \geq 6 years)	
Methylphenidate ER (ADHANSIA XR)	ADHD (Age ≥ 6 years)	
	Non-Stimulants	
Atomoxetine (generic STRATTERA)	ADHD (Age \geq 6 years)	
Clonidine ER (KAPVAY) ADHD (Age ≥ 6 years), Treatment of ADHD as adjunct to stimulants		
Guanfacine ER (generic INTUNIV)	ADHD (Age \geq 6 years), Treatment of ADHD as adjunct to stimulants	
Viloxazine ER (QELBREE)	ADHD (Age 6 years to \leq 17 years)	
Wakefulness-promoting Agents		
Armodafinil (generic NUVIGIL)	Excessive sleepiness associated with narcolepsy, OSA, and SWD (Age ≥ 18 years)	
Modafinil (PROVIGIL)	Excessive sleepiness associated with narcolepsy, OSA, SWD, and adjunct therapy to treat fatigue and sleepiness in patients with major depressive disorder (MDD) (Age ≥ 18 years)	
Pitolisant (WAKIX)	Excessive sleepiness associated with narcolepsy (Age ≥ 18 years)	
Solriamfetol (SUNOSI)	Excessive sleepiness associated with narcolepsy, OSA (Age ≥ 18 years)	

attention-deficit/hyperactivity disorder, **OSA**-obstructive sleep apnea, **SWD**-shift work disorder

Drug	Maximum Daily Dose
ADDERALL	60 mg
ADDERALL XR	60 mg
ADHANSIA XR	85 mg
ADZENYS XR ODT	18.8 mg (age 6-12)
ADZENYS ER SUSPENSION	12.5 mg (age \ge 13)
AMPHETAMINE SALTS	40 mg
APTENSIO XR	60 mg
CONCERTA	54 mg (age 6-12) or 72 mg (≥ age 13)
COTEMPLA XR-ODT	51.8 mg

V. Dermatological

Therapeutic Drug Class: ACNE AGENTS— Topical -Effective 7/1/2021		
No PA Required (if age and	PA Required	Authorization for all acne agents prescribed solely for cosmetic purposes will not be
diagnosis criteria are met*)		approved.
	ACANYA (clindamycin/benzoyl peroxide) gel,	
Brand/generic changes	pump	Preferred topical clindamycin and erythromycin products may be approved by AutoPA
effective 8/10/21		verification of ICD-10 diagnosis code for acne vulgaris, psoriasis, cystic acne,
3,500,700,21	ACZONE (dapsone) pump	comedonal acne, disorders of keratinization, neoplasms, folliculitis, hidradenitis
*ACZONE (dapsone) gel		suppurativa, or perioral dermatitis (erythromycin only). Approval of preferred topical
(, 8	Adapalene cream, gel pump, solution	clindamycin and erythromycin products for other medically accepted indications may
*Adapalene gel		be considered following clinical prior authorization review by a call center pharmacist.
8	AKLIEF (trifarotene) cream	
*Adapalene/benzoyl peroxide		All other preferred topical acne agents may be approved if meeting the following
(generic Epiduo)	AKTIPAK (erythromycin/benzoyl peroxide)	criteria:
	1. TDT. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1.	• For members > 25 years of age, may be approved following prescriber
*Clindamycin phosphate solution,	ALTRENO (tretinoin) lotion	verification that the medication is not being utilized for cosmetic purposes
medicated swab	ANGERO (: 1:) C	AND prescriber verification that the indicated use is for acne vulgaris,
	AMZEEQ (minocycline) foam	psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal

*Clindamycin/benzoyl peroxide gel jar (generic Benzaclin) *Clindamycin/benzoyl peroxide	ARAZLO (tazarotene) lotion ATRALIN (tretinoin) gel
(generic Duac)	AVITA (tretinoin)
*Dapsone gel	AZELEX (azelaic acid) cream
*DIFFERIN ^{BNR} (adapalene) gel pump	BENZACLIN (clindamycin/benzoyl peroxide) (all products)
*Erythromycin solution	BENZAMYCIN (erythromycin) gel
*Erythromycin / Benzoyl peroxide *Sulfacetamide sodium suspension	CLEOCIN (clindamycin) gel, lotion, pledgets, solution
*RETIN-A ^{BNR} (tretinoin) cream,	CLINDACIN (clindamycin phosphate)
gel (tretinoin) cream,	CLINAGEL (clindamycin phosphate) gel
	Clindamycin phosphate gel, lotion, foam
	Clindamycin/tretinoin
	Dapsone pump
	DIFFERIN (adapalene) cream, lotion
	EPIDUO FORTE (adapalene/benzoyl peroxide)
	ERY/ERYGEL (erythromycin/ethanol)
	Erythromycin gel, med swab
	EVOCLIN (clindamycin) foam
	FABIOR (tazarotene) foam
	KLARON (sulfacetamide) suspension
	NEUAC (clindamycin/benzoyl peroxide) gel
	ONEXTON (clindamycin/benzoyl peroxide)

RETIN-A MICRO (tretinoin) (all products)

- acne. These medications are only eligible for prior authorization approval for the aforementioned diagnoses.
- For members ≤ 25 years of age, may be approved for a diagnosis of acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. Diagnosis will be verified through automated verification (AutoPA) of the appropriate corresponding ICD-10 diagnosis code related to the indicated use of the medication.

Non-preferred topical products may be approved for members meeting all of the following criteria:

- Member has trialed/failed three preferred topical products with different mechanisms (such as tretinoin, antibiotic). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Prescriber verification that the medication is being prescribed for one of the following diagnoses: acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne.

	Sulfacetamide sodium cleansing gel, lotion, shampoo, wash	
	Sulfacetamide sodium/ sulfur cleanser, cream, pad, suspension, wash	
	SUMADAN (sulfacetamide sodium/sulfur) kit, wash	
	SUMAXIN (sulfacetamide sodium/sulfur kit, pads, suspension, wash	
	Tazarotene cream	
	TAZORAC (tazarotene) cream, gel	
	Tretinoin (all products)	
	Tretinoin microspheres (all products)	
	ZIANA (clindamycin/tretinoin) gel	
,	Therapeutic Drug Class: ACNE AGENTS-	ORAL ISOTRETINOIN -Effective 7/1/2021
PA Ro	equired for all agents	Preferred product criteria update (effective 1/1/22): Preferred products may be
AMNESTEEM capsule	ABSORICA capsule	approved for adults and children ≥ 12 years of age for treating severe acne vulgaris or for treating moderate acne vulgaris in members unresponsive to conventional therapy.
CLARAVIS capsule	ABSORICA LD capsule	
	Isotretinoin capsule	Non-preferred products may be approved for members meeting the following: • Member has trialed/failed two preferred agents (failure is defined as lack of
	MYORISAN capsule	efficacy, allergy, intolerable side effects, or significant drug-drug interaction) AND
	ZENATANE capsule	 Member is an adult or child ≥ 12 years of age with severe, recalcitrant nodulocystic acne and has been unresponsive to conventional therapy.

Methyltestosterone capsule

NATESTO (testosterone) nasal spray

TESTIM (testosterone) gel

TESTRED (methyltestosterone) capsule

Testosterone gel, packet, pump

Testosterone enanthate IM injection

VOGELXO (testosterone)

XYOSTED (testosterone enanthate) SC injection

- If the member is > 40 years of age, has prostate-specific antigen (PSA) < 4 ng/mL or has no palpable prostate nodule AND
- Member has baseline hematocrit < 50%

Reauthorization Criteria (requests for renewal of a currently expiring prior authorization for a preferred product may be approved for members meeting the following criteria):

- Member is a male patient \geq 16 years of age with a documented diagnosis of hypogonadotropic or primary hypogonadism $OR \geq 12$ years of age with a diagnosis of hypogonadotropic or primary hypogonadism secondary to Klinefelter Syndrome AND
- Serum testosterone is being regularly monitored (at least annually) to achieve total testosterone level in the middle tertile of the normal reference range AND
- Member does not have a diagnosis of breast or prostate cancer AND
- Member has a hematocrit < 54%

Gender Transition/Affirming Hormone Therapy:

Preferred androgenic drugs may be approved for members meeting the following:

- 1. Female sex assigned at birth > 16 years of age AND
- 2. Is undergoing female to male transition AND
- 3. Has a negative pregnancy test prior to initiation AND
- 4. Has baseline hematocrit < 50% or hematocrit < 54% for continuation of therapy.

Non-Preferred Products:

Non-preferred **topical** androgenic agents may be approved for patients meeting the above criteria with trial and failed‡ therapy with two preferred topical androgen formulations.

Non-preferred **injectable** androgenic agents may be approved for patients meeting the above criteria with trial and failed‡ therapy with a preferred injectable androgenic drug.

Prior authorization for **oral** androgen agents (tablet, capsule, buccal) may be approved if member has trialed and failed‡ therapy with a preferred topical agent AND testosterone cypionate injection.

‡Failure is defined as lack of efficacy with 8 week trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction.

For all agents and diagnoses, members < 16 years of age will require a manual prior authorization review by a pharmacist (with exception of members \ge 12 years of age with a diagnosis of hypogonadotropic or primary hypogonadism secondary to Klinefelter Syndrome).

Therapeutic D	Prug Class: BONE RESORPTION SUPPR	ESSION AND RELATED AGENTS -Effective 10/1/2021	
Bisphosphonates			
No PA Required Alendronate tablet, solution Ibandronate tablet	PA Required ACTONEL (risedronate) tablet ATELVIA (risedronate) tablet BONIVA (ibandronate) tablet FOSAMAX (alendronate) tablet	Non-preferred bisphosphonates may be approved for members who have failed treatment with one preferred product at treatment dose. Failure is defined as lack of efficacy with a 12-month trial, allergy, intolerable side effects, or significant drug-drug interaction. For members who have a low risk of fracture, discontinuation of bisphosphonate therapy and drug holiday should be considered following 5 years of treatment. Low risk is defined as having a bone mineral density, based on the most recent T-score, of greater than (better than) -2.5 AND no history of low trauma or fragility fracture.	
	FOSAMAX plus D (alendronate/vit D) tablet Risedronate tablet		
	Non-Bisph	nosphonates	
	PA Required Calcitonin salmon nasal spray FORTEO (teriparatide) SC pen Raloxifene tablet Teriparatide SC pen TYMLOS (abaloparatide) SC pen	CALCITONIN SALMON (nasal) may be approved if the member meets the following criteria: • Member has a diagnosis of post-menopausal osteoporosis (BMD T-scores of - 2.5 or less) AND • Has trial and failure of preferred bisphosphonate for 12 months (failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) OR • Member cannot swallow solid oral dosage forms or has a feeding tube. Quantity limit: One spray daily RALOXIFENE may be approved if the member meets the following criteria: • Diagnosis of postmenopausal osteoporosis (BMD T-scores of -2.5 or less) AND • Has trial and failure of preferred bisphosphonate for one year (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) Maximum dose: 60mg daily FORTEO (teriparatide) or generic teriparatide may be approved if the member meets the following criteria: • Member has one of the following diagnoses: • Osteoporosis, (BMD T-scores of -2.5 or less) primary or hypogonadal in men • Osteoporosis due to corticosteroid use • Postmenopausal osteoporosis	

- Member is post-menopausal with very high risk for fracture* OR member has
 history of trial and failure of a preferred bisphosphonate for one year. Failure
 is defined as lack of efficacy, allergy, intolerable side effects, or significant
 drug-drug interaction AND
- For brand FORTEO, member has trialed and failed generic teriparatide. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction **AND**
- Prior authorization will be given for one year and total exposure of parathyroid hormone analogs (Forteo and Tymlos) shall not exceed two years

Maximum dose: 20mcg daily

TYMLOS (abaloparatide) may be approved if the member meets the following criteria:

- Member has a diagnosis of postmenopausal osteoporosis (BMD T-scores of -2.5 or less) AND
- Member is post-menopausal with very high risk for fracture* OR member has
 history of trial and failure of a preferred bisphosphonate for one year (Failure
 is defined as: lack of efficacy, allergy, intolerable side effects, or significant
 drug-drug interaction) AND
- Prior authorization will be given for one year and total exposure of parathyroid hormone analogs (Forteo and Tymlos) shall not exceed two years.

Maximum dose: 80 mcg daily

All other non-preferred non-bisphosphonates may be approved for members who have failed treatment with one preferred bisphosphonate product at treatment dose. Failure is defined as lack of efficacy with a 12-month trial, allergy, unable to use oral therapy, intolerable side effects, or significant drug-drug interaction.

*Members at very high risk for fracture: Members will be considered at very high risk for fracture if they meet <u>one</u> of the following:

- A history of fracture within the past 12 months **OR**
- Fractures experienced while receiving guideline-supported osteoporosis therapy **OR**
- A history of multiple fractures **OR**
- A history of fractures experienced while receiving medications that cause skeletal harm (such as long-term glucocorticoids) **OR**
- A very low T-score (less than -3.0) **OR**
- A high risk for falls or a history of injurious falls **OR**
- A very high fracture probability by FRAX (> 30% for a major osteoporosis fracture or > 4.5% for hip fracture)

Note: Prior authorization criteria for Prolia (denosumab) and other injectable bone resorption and related agents are listed on Appendix P.

Therapeutic Drug Class: CONTRACEPTIVES - Oral Effective 10/1/2021

Effective 01/14/22, oral contraceptive products are eligible for coverage with a written prescription by an enrolled pharmacist. Additional information regarding pharmacist enrollment can be found at https://hcpf.colorado.gov/pharm-serv.

Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction. Dronabinol prior authorization may be approved for members meeting above non-preferred criteria OR via AutoPA for members with documented HIV diagnosis.	
	Therapeutic Drug Class: ANTI-EMI	ETICS, Non-Oral -Effective 1/1/2022	
No PA Required	PA Required		
Prochlorperazine suppository Promethazine 12.5 mg, 25 mg suppository	COMPRO (prochlorperazine) suppository PROMETHEGAN 50 mg (Promethazine) suppository	Non-preferred products may be approved for members who have trialed and failed treatment with two preferred products. Failure is defined as lack of efficacy with 14-c trial, allergy, intolerable side effects, or significant drug-drug interaction.	
Scopolamine patch	SANCUSO (granisetron) patch		
	TRANSDERM-SCOP patch (scopolamine)		
		ITY, CHRONIC -Effective 10/1/2021	
•	ed for all agents in this class	All agents will only be approved for FDA labeled indications and up to FDA approved maximum doses listed below.	
AMITIZA ^{BNR} (lubiprostone) capsule	Alosetron tablet LOTRONEX (alosetron) tablet	Preferred agents may be approved if the member meets the following criteria: • Has diagnosis of Irritable Bowel Syndrome – Constipation (IBS-C),	
LINZESS (linaclotide) capsule	Lubiprostone capsule	Chronic Idiopathic Constipation (CIC), or Opioid Induced Constipation (OIC) in patients with opioids prescribed for noncancer pain AND	

MOVANTIK (naloxegol) tablet	MOTEGRITY (prucalopride) tablet
	RELISTOR (methylnaltrexone) tablet, syringe
	SYMPROIC (naldemedine) tablet
	TRULANCE (plecanatide) tablet
	VIBERZI (eluxadoline) tablet

- Member does not have a diagnosis of GI obstruction AND
- For indication of OIC, member opioid use must exceed 4 weeks of treatment
- For indications of CIC, OIC, IBS-C; member must have documentation of adequate trial of two or more over-the-counter motility agents (polyethylene glycol, docusate or bisocodyl, for example). OR If the member cannot take oral medications, then the member must fail a 7-day trial with a nonphosphate enema (docusate or bisocodyl enema). Failure is defined as a lack of efficacy for a 7 day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction AND
- For indication of IBS-D, must have documentation of adequate trial and failure with loperamide and trial and failure with dicyclomine or hyoscyamine. Failure is defined as a lack of efficacy for a 7-day trial, allergy, intolerable side effects, contraindication to, or significant drugdrug interaction.

Non-preferred agents may be approved if the member meets the following criteria:

- Member meets all listed criteria for preferred agents AND
- Member has trialed and failed two preferred agents OR if the indication is
 OIC caused by methadone, then a non-preferred agent may be approved
 after an adequate trial of MOVANTIK (naloxegol). Failure is defined as a
 lack of efficacy for a 7-day trial, allergy, intolerable side effects,
 contraindication to, or significant drug-drug interaction AND
- If prescribed Viberzi (eluxadoline) or Lotronex (alosetron), member meets the additional criteria for those agents listed below.

VIBERZI (**eluxadoline**) may be approved for members who meet the following additional criteria:

- Diagnosis of Irritable Bowel Syndrome Diarrhea (IBS-D) **AND**
- Member has a gallbladder **AND**
- Member does not have severe hepatic impairment (Child-Pugh C), history
 of severe constipation, known mechanical gastrointestinal obstruction,
 biliary duct obstruction, history of pancreatitis or structural disease of the
 pancreas AND
- Member does not drink more than 3 alcoholic drinks per day

LOTRONEX (alosetron) and generic alosetron may be approved for members who meet the following additional criteria:

- Member is a female with Irritable Bowel Syndrome Diarrhea (IBS-D) with symptoms lasting 6 months or longer AND
- Member does not have severe hepatic impairment (Child-Pugh C), history of severe constipation or ischemic colitis, hypercoagulable state, Crohn's disease or ulcerative colitis, or known mechanical gastrointestinal

	obstruction.	

Medication FDA approved indication		FDA Max Dose
Amitiza (lubiprostone)	IBS-C (females only), CIC, OIC (not caused by methadone)	48mcg/day
Linzess (linaclotide)	IBS-C, CIC	290mcg/day
Movantik (naloxegol)	OIC	25mg/day
Viberzi (eluxadoline)	IBS-D	200mg/day
Relistor syringe (methylnaltrexone)	OIC	12mg SQ/day
Relistor oral (methylnaltrexone)	OIC	450mg/day
Lotronex (alosetron)	IBS-D (females only)	2mg/day (females only)
Symproic (Naldemedine)	OIC	0.2mg/day
Trulance (plecanatide)	CIC, IBS-C	3mg/day
Motegrity (prucalopride)	CIC	2mg/day

CIC – chronic idiopathic constipation, OIC – opioid induced constipation, IBS – irritable bowel syndrome, D – diarrhea predominant, C – constipation predominant

	Omeprazole DR tablet (OTC), ODT (OTC)	
		Qualifying Diagnoses:
	Pantoprazole packet for oral suspension	Barrett's esophagus, duodenal ulcer, erosive esophagitis, gastric ulcer, GERD, GI
		Bleed, H. pylori infection, hypersecretory conditions (Zollinger-Ellison), NSAID-
	PREVACID (lansoprazole) capsule, Solutab,	induced ulcer, pediatric esophagitis, requiring mechanical ventilation, requiring a
	suspension	feeding tube
	PRILOSEC (omeprazole) suspension	Quantity Limits:
		All agents will be limited to once daily dosing except when used for the following
	PROTONIX (pantoprazole DR) tablet, packet for	diagnoses: Barrett's esophagus, GI Bleed, H. pylori, hypersecretory conditions
	oral suspension	(Zollinger-Ellison), or members who have spinal cord injury with associated acid
		reflux.
	Rabeprazole tablet	
		Adult members with GERD on once daily, high-dose PPI therapy who continue to
	ZEGERID (omeprazole/Na bicarbonate) capsule,	experience symptoms may receive initial prior authorization approval for a 4-week
	packet for oral suspension	trial of twice daily, high-dose PPI therapy. Continuation of the twice daily dosing
	_	regimen for GERD beyond 4 weeks will require additional prior authorization
		approval verifying adequate member response to the dosing regimen and approval
		may be placed for one year. If a member with symptomatic GERD does not respond
		to twice daily, high-dose PPI therapy, this should be considered a treatment failure.

		Pediatric members (< 18 years of age) on once daily dosing of a PPI who continue to experience symptoms may receive one-year prior authorization approval for twice daily PPI therapy. Age Limits: Nexium 24H and Zegerid will not be approved for members less than 18 years of age.
		Prevacid Solutab may be approved for members < 2 years of age OR for members ≥ 2 years of age with a feeding tube.
Therapeut	ic Drug Class: NON-BIOLOGIC ULCERA	ATIVE COLITIS AGENTS- Oral -Effective 1/1/2022
No PA Required	PA Required	
APRISO BNR (mesalamine ER) capsule	ASACOL HD (mesalamine DR) tablet	Prior authorization for non-preferred oral formulations will require trial and failure of two preferred oral products with different active ingredients AND one preferred rectal product. If inflammation is not within reach of topical therapy, trial of preferred rectal
LIALDA BNR (mesalamine DR)	AZULFIDINE (sulfasalazine) Entab, tablet	product is not required. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
tablet	Balsalazide capsule	Uceris (budesonide) tablet: Prior authorization may be approved following trial and
PENTASA (mesalamine) capsule	Budesonide DR tablet	failure of one preferred oral product AND one preferred rectal product. If inflammation is not within reach of topical therapy, trial of preferred rectal product is not required.
Sulfasalazine IR and DR tablet	COLAZAL (balsalazide) capsule	Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. Approval will be placed for 8 weeks. Further prior authorization
	DELZICOL (mesalamine DR) capsule	may be approved if 7 days of steroid-free time has elapsed and member continues to meet the above criteria.
	DIPENTUM (olsalazine) capsule	meet the above criteria.
	Mesalamine DR tablet (generic Asacol HD, Lialda)	
	Mesalamine DR/ER capsule (generic Apriso, Delzicol)	
	UCERIS (budesonide) tablet	
1		TIVE COLITIS AGENTS- Rectal -Effective 1/1/2022
No PA Required	PA Required	
Mesalamine suppository	CANASA (mesalamine) suppository	Prior authorization for non-preferred rectal formulations will require trial and failure of one preferred rectal formulation and one preferred oral formulation (Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction).
Mesalamine 4gm/60 ml enema	Mesalamine enema, kit	
(generic SF ROWASA)	ROWASA/SF ROWASA enema, kit (mesalamine)	Uceris (budesonide) foam: If the above criteria are met, Uceris (budesonide) foam prior authorization may be approved for 6 weeks. Further prior authorization may be approved if 7 days of steroid-free time has elapsed and member continues to meet the above criteria.
	UCERIS (budesonide) foam	

VIII. Hematological		
Therapeutic Drug Class: ANTICOAGULANTS- Oral -Effective 10/1/2021		
No PA Required	PA Required	· · · · · · · · · · · · · · · · · · ·
1	1	BEVYXXA (betrixaban) may be approved if all the following criteria have been met:
ELIQUIS (apixaban) tablet	BEVYXXA (betrixaban) tablet	• The member has trialed and failed therapy with two preferred agents. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant
PRADAXA (dabigatran) capsule	SAVAYSA (edoxaban) tablet	drug-drug interaction) AND • Member is not on dialysis AND
Warfarin tablet	XARELTO (rivaroxaban) 2.5 mg tablet	The member is need of prophylaxis for DVT following hospitalization for an acute medical illness who are at risk for thromboembolic events due to limited
XARELTO (rivaroxaban) 10 mg,		mobility AND
15 mg, 20 mg tablet, dose pack		The member does not have a mechanical prosthetic heart valve
		 SAVAYSA (edoxaban) may be approved if all the following criteria have been met: The member has failed therapy with two preferred agents. (Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) AND
		 Member is not on dialysis AND
		• Member does not have CrCl > 95 mL/min AND
		 The member has a diagnosis of deep vein thrombosis (DVT), pulmonary embolism (PE) OR
		The member has a diagnosis of non-valvular atrial fibrillation AND
		The member does not have a mechanical prosthetic heart valve
		XARELTO 2.5mg (rivaroxaban) may be approved for members meeting all of the following criteria:
		 Xarelto 2.5mg is being prescribed to reduce major CV events in members diagnosis of chronic coronary artery disease (CAD) or peripheral artery disease AND
		 Xarelto 2.5mg is being taken twice daily and in combination with aspirin 75- 100mg daily AND
		 Member must not be receiving dual antiplatelet therapy, other non-aspirin antiplatelet therapy, or other oral anticoagulant AND
		Member must not have had an ischemic, non-lacunar stroke within the past month AND
		Member must not have had a hemorrhagic or lacunar stroke at any time
		All other non-preferred oral agents require trial and failure of two preferred oral agents. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
		Continuation of Care: Members with current prior authorization approval on file for a non-preferred <u>oral</u> anticoagulant medication may continue to receive approval for that medication

medication

Therapeutic Drug Class: ANTICOAGULANTS- Parenteral -Effective 10/1/2021				
No PA Required	PA Required ARIXTRA (fondaparinux) syringe	Non-preferred parenteral anticoagulants may be approved if member has trial and failure of one preferred parenteral agent. Failure is defined as lack of efficacy, allergy,		
Enoxaparin syringe	ARIATRA (Tondaparinux) syringe	intolerable side effects, or significant drug-drug interaction		
Enoxaparin vial	Fondaparinux (generic Arixtra)	ARIXTRA (fondaparinux) may be approved if the following criteria have been met:		
	FRAGMIN (dalteparin) vial, syringe	 Member is 18 years of age or older AND Member has a CrCl > 30 ml/min AND 		
	LOVENOX (enoxaparin) syringe, vial	 Member weighs > 50 kg AND Member has a documented history of heparin induced-thrombocytopenia 		
		OR Member has a contraindication to enoxaparin		
		Members currently stabilized on fondaparinux (Arixtra) or dalteparin (Fragmin) may receive prior authorization approval to continue receiving that medication.		
	Therapeutic Drug Class: ANTI-P	LATELETS -Effective 10/1/2021		
No PA Required	PA Required			
AGGRENOX (ASA/dipyridamole) capsule	EFFIENT (prasugrel) tablet	Patients taking Brilinta (ticagrelor) must also be taking a maintenance dose of aspirin not exceeding 100 mg/day.		
-	PLAVIX (clopidogrel) tablet	Zontivity (vorapaxar) may be approved for patients with a diagnosis of myocardial		
ASA/dipyridamole ER capsule	ZONTIVITY (vorapaxar) tablet	infarction or peripheral artery disease without a history of stroke, transient ischemic attack, intracranial bleeding, or active pathological bleeding. Patients must also be		
BRILINTA (tigacrelor) tablet		taking aspirin and/or clopidogrel concomitantly.		
Cilostazol tablet		Non-preferred products without criteria will be reviewed on a case-by-case basis.		
Clopidogrel tablet				
Dipyridamole tablet				
Pentoxifylline ER tablet				
Prasugrel tablet				
	Therapeutic Drug Class: COLONY STIMU	ULATING FACTORS -Effective 10/1/2021		
PA Required	for all agents in this class*	*Prior authorization for preferred agents may be approved if meeting the following		
NEUPOGEN (filgrastim) vial,	FULPHILA (pegfilgrastim-jmdb)	criteria: • Medication is being used for one of the following indications:		
syringe UDENYCA (pegfilgrastim-cbqv)	GRANIX (tbo-filgrastim)	 Cancer patient receiving myelosuppressive chemotherapy –to reduce incidence of infection (febrile neutropenia) (Either the post nadir ANC is 		
ODENT ON (posinistastini-cody)	LEUKINE (sargramostim)			

ZIEXTENZO (pegfilgrastim- bmez)	NEULASTA (pegfilgrastim) syringe
	NIVESYM (filgrastim-aafi)
	ZARXIO (filgrastim-sndz)

- less than 10,000 cells/mm3 or the risk of neutropenia for the member is calculated to be greater than 20%)
- O Acute Myeloid Leukemia (AML) patients receiving chemotherapy
- o Bone Marrow Transplant (BMT)
- Peripheral Blood Progenitor Cell Collection and Therapy
- o Hematopoietic Syndrome of Acute Radiation Syndrome
- Severe Chronic Neutropenia (Evidence of neutropenia infection exists or ANC is below 750 cells/mm3)

AND

- For Udenyca (pegfilgrastim-cbqv) or Ziextenzo (pegfilgrastim-bmez), the member meets the following criteria:
 - Member has trial and failure of Neupogen. Failure is defined as lack of efficacy, intolerable side effects, drug-drug interaction, or contraindication to Neupogen therapy. Trial and failure of Neupogen will not be required if meeting one of the following:
 - Member has limited access to caregiver or support system for assistance with medication administration **OR**
 - Member has inadequate access to healthcare facility or home care interventions.

Prior authorization for non-preferred agents may be approved if meeting the following criteria:

- Medication is being used for one of the following indications:
 - Cancer patient receiving myelosuppressive chemotherapy –to reduce incidence of infection (febrile neutropenia) (Either the post nadir ANC is less than 10,000 cells/mm3 or the risk of neutropenia for the member is calculated to be greater than 20%)
 - Acute Myeloid Leukemia (AML) patients receiving chemotherapy
 - o Bone Marrow Transplant (BMT)
 - Peripheral Blood Progenitor Cell Collection and Therapy
 - o Hematopoietic Syndrome of Acute Radiation Syndrome
 - Severe Chronic Neutropenia (Evidence of neutropenia infection exists or ANC is below 750 cells/mm3)

AND

- Member has history of trial and failure of Neupogen AND one other preferred agent. Failure is defined as a lack of efficacy with a 3-month trial, allergy, intolerable side effects, significant drug-drug interactions, or contraindication to therapy. Trial and failure of Neupogen will not be required if meeting one of the following:
 - Member has limited access to caregiver or support system for assistance with medication administration OR
 - Member has inadequate access to healthcare facility or home care interventions.

Members currently receiving a preferred or non-preferred immunoglobulin product may receive approval to continue therapy with that product at prescribed doses not exceeding maximum (Table 1).

	,	TION ANTIHISTAMINES -Effective 1/1/2022
No PA Required	PA Required	Non-preferred single agent antihistamine products may be approved for members who
Cetirizine (OTC) tablet, syrup/solution (OTC/RX)	Cetirizine (OTC) chewable tablet, softgel	have failed treatment with two preferred products in the last 6 months. For members with respiratory allergies, an additional trial of an intranasal corticosteroid will be
Desloratadine tablet (RX)	CLARINEX (desloratadine) tablet	required in the last 6 months.
Levocetirizine tablet (RX/OTC)	Desloratadine ODT (RX)	Failure is defined as lack of efficacy with a 14 day trial, allergy, intolerable side effects, or significant drug-drug interaction.
Loratadine tablet (OTC),	Fexofenadine tablet (OTC), suspension (OTC)	
syrup/solution (OTC)	Levocetirizine solution (RX)	
	Loratadine chewable (OTC), ODT (OTC)	
Therapeu		NGESTANT COMBINATIONS - Effective 1/1/2022
No PA Required	PA Required	
Loratadine-D (OTC) tablet	Cetirizine-PSE (OTC)	Non-preferred antihistamine/decongestant combinations may be approved for members who have failed treatment with two preferred products in the last 6 months. For members with respiratory allergies, an additional trial of an intranasal corticosteroid
	CLARINEX-D (desloratadine-D)	will be required in the last 6 months.
	Fexofenadine/PSE (OTC)	Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
	Therapeutic Drug Class: INTRANASAL	A RHINITIS AGENTS -Effective 1/1/2022
No PA Required	PA Required	
Azelastine 0.15%, 137 mcg	Azelastine/Fluticasone	Non-preferred products may be approved following trial and failure of treatment with three preferred products (failure is defined as lack of efficacy with a 2-week trial, allergy, intolerable side effects or significant drug-drug interactions).
Budesonide (OTC)	BECONASE AQ (beclomethasone dipropionate)	Non-preferred combination agents may be approved following trial of individual
Fluticasone (RX)	DYMISTA (azelastine/ fluticasone)	products with same active ingredients AND trial and failure of one additional preferred agent (failure is defined as lack of efficacy with 2-week trial, allergy, intolerable side
Ipratropium	Flunisolide 0.025%	effects or significant drug-drug interactions).
Triamcinolone acetonide (OTC)	Fluticasone (OTC)	
	Mometasone	
	NASONEX (mometasone)	

T

	Olopatadine OMNARIS (ciclesonide) PATANASE (olopatadine) QNASL (beclomethasone) XHANCE (fluticasone) ZETONNA (ciclesonide)	
		OTRIENE MODIFIERS -Effective 1/1/2022
No PA Required Montelukast tablet, chewable	PA Required ACCOLATE (zafirlukast) tablet Montelukast granules SINGULAIR (montelukast) tablet, chewabi granules Zafirlukast tablet Zileuton ER tablet ZYFLO (zileuton) tablet	Non-preferred products may be approved if meeting the following criteria: • Member has trialed and failed treatment with one preferred product (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions) AND • Member has a diagnosis of asthma. le, Montelukast granules may be approved if a member has tried and failed montelukast chewable tablets AND has difficulty swallowing.
	Therapeutic Drug Class: METH (OTREXATE PRODUCTS -Effective 1/1/2022
No PA Required	PA Required	OTREXUP, REDITREX or RASUVO may be approved if meeting the following criteria:
Methotrexate oral tablet, vial	OTREXUP (methotrexate) auto-injector RASUVO (methotrexate) auto-injector REDITREX (methotrexate) syringe TREXALL (methotrexate) oral tablet	 Member has diagnosis of severe, active rheumatoid arthritis OR active polyarticular juvenile idiopathic arthritis (pJIA) OR inflammatory bowel disease (IBD) AND Member has trialed and failed preferred methotrexate tablet formulation (failure is defined as lack of efficacy, allergy, intolerable side effects, or inability to take oral product formulation) AND Member is unable to administer preferred methotrexate vial formulation due to limited functional ability (such as vision impairment, limited manual dexterity and/or limited hand strength).
	XATMEP (methotrexate) oral solution	 TREXALL may be approved if meeting the following criteria: Member has trialed and failed preferred methotrexate tablet formulation. Failure is defined as allergy or intolerable side effects.

XATMEP may be approved for members who meet the following criteria:

- Member is < 18 years of age
- Member has a diagnosis of acute lymphoblastic leukemia **OR**
- Member has a diagnosis of active polyarticular juvenile idiopathic arthritis (pJIA) and has had an insufficient therapeutic response to, or is intolerant to, an adequate trial of first-line therapy including full dose non-steroidal anti-inflammatory agents (NSAIDs)
 AND
- Member has a documented swallowing difficulty due to young age and/or a medical condition and is unable to use the preferred methotrexate tablet formulation

Methotrexate can cause serious embryo-fetal harm when administered during pregnancy and it is contraindicated for use during pregnancy for the treatment of non-malignant diseases. Advise members of reproductive potential to use effective contraception during and after treatment with methotrexate, according to FDA product labeling.

Members currently stabilized on a non-preferred methotrexate product may receive approval to continue on that agent.

Therapeutic Drug Class: MULTIPLE SCLEROSIS AGENTS -Effective 4/1/2021

Disease Modifying Therapies

No PA Required (unless indicated*)

Brand/generic changes effective 1/27/2022

AVONEX (interferon beta 1a) injection

BETASERON (interferon beta 1b) injection

COPAXONE^{BNR} (glatiramer) 20MG injection

*AUBAGIO (teriflunomide) tablet**2nd Line**

*Dimethyl fumarate tablet **2nd Line**

*GILENYA (fingolimod) 0.5 mg tablet (30-ct bottle)**2nd Line**

PA Required

BAFIERTAM (monomethyl fumarate DR) capsule

COPAXONE (glatiramer) 40MG injection

Dimethyl fumarate tablet

EXTAVIA (interferon beta 1b) vial

GLATOPA (glatiramer) injection

Glatiramer 20mg, 40mg injection

GILENYA (fingolimod) 0.25 mg, 0.5 mg tablet (7-ct box)

KESIMPTA (ofatumumab) pen

MAVENCLAD (cladribine) tablet

*Second-line preferred agents (**Gilenya**, **Tecfidera**, **Aubagio**) may be approved if meeting the following:

- Member has documented diagnosis of multiple sclerosis made by neurologist in the last 3 years OR member has history of diagnosis made by a neurologist > 3 years ago but is naïve to all medications indicated for the treatment of relapsing forms of multiple sclerosis AND
- Documentation is provided by prescribing neurologist (or name of neurologist consulted may be indicated) supporting marked functional decline as demonstrated by MRI or medical record documentation supporting increased burden of disease AND
- Prescriber attests to shared decision making with respect to risks versus benefits of medical treatment AND
- Additional safety criteria for prescribed agent are met (Table 1).

For members NOT meeting above criteria, second-line preferred agents (Gilenya, Tecfidera, Aubagio) may be approved if meeting all of the following:

- Member has a diagnosis of a relapsing form of multiple sclerosis confirmed on MRI by presence of new spinal lesions, cerebellar lesions, brain stem lesions, or change in brain atrophy AND
- Medication is being prescribed by a neurologist or in consultation with a neurologist AND
- Member has trialed and failed treatment with Avonex (interferon beta 1a) OR
 Betaseron (interferon beta 1b) OR with Copaxone (glatiramer). Failure is defined as
 intolerable side effects, drug-drug interaction, or lack of efficacy. AND
- On clinical exam, member has signs and symptoms consistent with functional limitations due to multiple sclerosis that have lasted one month or longer AND

MAYZENT (siponimod) tablet, pack

PLEGRIDY (peg-interferon beta 1a) syringe, pen

REBIF (interferon beta 1a) syringe

TECFIDERA (dimethyl fumarate) tablet

VUMERITY (diroximel DR) capsules

ZEPOSIA (ozanimod) capsule

• Additional safety criteria for prescribed agent met (Table 1).

Non-Preferred Products:

Non-preferred products may be approved following trial and failure with three preferred products. **Mayzent** (simponimod), **Mavenclad** (cladribine), **Vumerity** (dioroxemel fumerate), and **Bafiertam** (monomethyl fumarate DR) must meet specific criteria listed for those agents below. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Copaxone (glatiramer) 40mg may be approved for members who have severe intolerable injection site reactions to <u>brand</u> Copaxone 20mg (such as pain requiring local anesthetic, oozing, lipoatrophy, swelling, or ulceration).

Mayzent (simponimod) may be approved if meeting all of the following:

- Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Member does not have diagnosis of macular degeneration AND
- Member has no evidence of relapse in the 3 months preceding initiation of therapy AND
- Member has previous trial and failure of three preferred agents, one of which must be Gilenya (fingolimod). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. AND
- Additional safety criteria for prescribed agent are met (Table 1) AND
- Initial authorization will be limited to 3 months. Continuation (12-month authorization) may be approved with provider attestation that member's symptoms are stable or there is documented clinical improvement.

Mavenclad (cladribine) may be approved if meeting all of the following:

- Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Member has history of ≥ 1 relapse in the 12 months preceding initiation of therapy AND
- Member has previous trial and failure of three other therapies for relapsing forms of
 multiple sclerosis (failure is defined as lack of efficacy with 3-month trial, allergy,
 intolerable side effects, or significant drug-drug interactions) AND
- Additional safety criteria for prescribed agent are met (Table 1).

Vumerity (diroximel fumarate) or **Bafiertam (monomethyl fumarate DR)** may be approved if meeting all of the following:

- Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Additional safety criteria for prescribed agent are met (Table 1) AND
- Member has previous trial and failure of three preferred agents, one of which must be Tecfidera (dimethyl fumarate). Failure is defined as lack of efficacy, allergy,

 intolerable side effects [if GI adverse events, must meet additional criteria below], or significant drug-drug interactions) AND If Vumerity (diroximel fumarate) or Bafiertam (monomethyl fumarate DR) is being prescribed due to GI adverse events with Tecfidera (dimethyl fumarate) therapy (and no other reason for failure of Tecfidera is given), then the following additional criteria must be met: Member has trialed a temporary dose reduction of Tecfidera (with maintenance dose being resumed within 4 weeks) AND Member has trialed taking Tecfidera (dimethyl fumarate) with food AND GI adverse events remain significant despite maximized use of
gastrointestinal symptomatic therapies (such as calcium carbonate, bismuth

subsalicylate, PPIs, H2 blockers, anti-bloating/anti-constipation agents, anti-diarrheal, and centrally acting anti-emetics) AND

Initial authorization will be limited to 3 months. Continuation (12-month authorization) will require documentation of clinically significant reduction in GI adverse events with Vumerity (diroximel fumarate) therapy or Bafiertam (monomethyl fumarate DR).

Grandfathering: Members currently stabilized on a preferred second-line product or a non-preferred product may receive approval to continue therapy with that agent.

Maximum dose	14 mg per day	190 mg twice a day	Age and weight based ^d	60 mg per 30 days	Not exceeding 3.5mg/kg during full treatment course	240 mg twice a day	924 mg per day

- a including herpes zoster or other active acute serious infections or chronic infections such as hepatitis, tuberculosis and HIV
- b ULN: upper limit of normal
- c plus at 2 and 6 months post-drug therapy initiation and periodically thereafter
- d GILENYA maximum dose: ≥ 10 years of age and > 40 kg body weight: 0.5 mg once daily, ≥ 10 years of age and ≤ 40 kg body weight: 0.25 mg once daily
- e PML: progressive multifocal leukoencephalopathy
- f No history of MI, CVA, TIA, unstable angina, decompensated HF requiring hospitalization, NYHA Class III-IV HF AND no Mobitz type II second-degree, third-degree AV block, or sick sinus syndrome, unless patient has a functioning pacemaker
- g Lymphocytes must be within normal limits (WNL) before initiating the first treatment course and ≥ 800 cells per microliter before initiating the second treatment course

Symptom Management Therapies

PA Required AMPYRA ER (dalfampridine) tablet Dalfampridine ER tablet

Ampyra (dalfampridine) prior authorization may be approved if all of the following criteria are met:

- Member has a diagnosis of MS; Member is ambulatory and has established a
 baseline which is defined as ambulating between 8-45 seconds Timed 25-foot
 Walk (T25FW) assessment OR has established a baseline activities of daily living
 (ADL) AND
- Member has no history of seizure disorder AND

		 Member has no history of moderate to severe renal dysfunction (CrCl > 50 ml/min) AND Prescriber is a neurologist or is prescribed in consultation with a neurologist AND The prescribed dose does not exceed 10 mg twice daily.
		Reauthorization of Ampyra (dalfampridine) may be approved if medical record documentation indicates that member's symptoms are stable or there is improvement in ambulation (measured by T25FW assessment) or improvement in ADLs.
	REL (etanercept); HUMIRA (adalimumab); OT	MUNE MODULATORS -Effective 1/1/2022 EZLA (apremilast) tablet; KEVZARA (sarilumab); TALTZ (ixekizumab); tofacitinib) tablet

	Therapeutic Drug Class: EPINEPHR	INE PRODUCTS -Effective 1/1/2022
No PA Required EPIPEN ^{BNR} 0.3 mg/0.3 ml (epinephrine) auto-injector EPIPEN JR ^{BNR} 0.15 mg/0.15 ml, (epinephrine) auto-injector	PA Required Epinephrine 0.15mg/0.15ml, 0.3mg/0.3ml auto- injector (generic Adrenaclick, Epipen) SYMJEPI 0.15mg/0.3ml, 0.3mg/0.3ml (epinephrine) syringe	Non-preferred products may be approved if the member has failed treatment with one of the preferred products. Failure is defined as allergy to ingredients in product or intolerable side effects. Quantity limit: 4 auto injectors per year unless used / damaged / lost
		ANGIOEDEMA PRODUCTS -Effective 1/1/2022
PA Require	d for all agents in this class	Medications Indicated for Routine Prophylaxis:
Prophylaxis: HAEGARDA (C1 esterase inhibitor) vial	Prophylaxis: CINRYZE (C1 esterase inhibitor) kit ORLADEYO (berotralstat) oral capsule	Members are restricted to coverage of one medication for <u>routine prophylaxis</u> at one time. Prior authorization approval will be for one year. HAEGARDA (C1 esterase inhibitor (human)) may be approved for members meeting the following criteria:
Treatment: BERINERT (C1 esterase inhibitor) kit Icatibant syringe (generic FIRAZYR)	TAKHZYRO (lanadelumab-flyo) vial Treatment: FIRAZYR (icatibant acetate) syringe RUCONEST (C1 esterase inhibitor, recomb) vial	 Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND Member meets at least one of the following: Haegarda is being used for short-term prophylaxis to undergo a surgical procedure or major dental work OR Haegarda is being used for long-term prophylaxis and member meets one of the following:

- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
 - Member has received hepatitis A and hepatitis B vaccination AND
 - Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV

Maximum Dose: 60 IU/kg Minimum Age: 10 years

CINRYZE (C1 esterase inhibitor (human)) may be approved for members meeting the following criteria:

- o Member has history of trial and failure of Haegarda. Failure is defined as lack of efficacy allergy, intolerable side effects, or a significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member meets at least one of the following:
 - Cinryze is being used for short-term prophylaxis to undergo a surgical procedure or major dental work **OR**
 - Cinryze is being used for long-term prophylaxis and member meets one of the following:
 - o History of ≥1 attack per month resulting in documented ED admission or hospitalization **OR**
 - History of laryngeal attacks **OR**
 - History of ≥ 2 attacks per month involving the face, throat, or abdomen AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
- Member has received hepatitis A and hepatitis B vaccination AND
- Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV.

Minimum age: 6 years Maximum dose: 100 Units/kg

ORLADEYO (berotralstat) may be approved for members meeting the following criteria:

- Member has history of trial and failure of HAEGARDA. Failure is defined as 0 lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to

severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema **AND**

- ORLADEYO is prescribed by or in consultation with an allergist or immunologist AND
- Appropriate drug interaction interventions will be made for members using concomitant medications that may require dose adjustments (such as cyclosporine, fentanyl, pimozide, digoxin) **AND**
- o Member meets at least one of the following:
 - ORLADEYO is being used for short-term prophylaxis to undergo a surgical procedure or major dental work
 - ORLADEYO is being used for long-term prophylaxis and member meets one of the following:
 - History of ≥ 1 attack per month resulting in documented ED admission or hospitalization OR
 - History of laryngeal attacks **OR**
 - History of ≥ 2 attacks per month involving the face, throat, or abdomen **AND**
 - Member is not taking medications that may exacerbate HAE, including ACE inhibitors and estrogen-containing medications

Minimum age:12 years

Maximum dose: 150 mg once daily

TAKHZYRO (lanadelumab-flyo) may be approved for members meeting the following criteria:

- Member has history of trial and failure of Haegarda. Failure is defined as: lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) **AND**
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
- o Member has received hepatitis A and hepatitis B vaccination.

Minimum age: 12 years

Maximum dose: The recommended starting dose is 300mg every 2 weeks. A dosing interval of 300 mg every 4 weeks is also effective and may be considered if the patient is well-controlled (attack free) for more than 6 months

Medications Indicated for Treatment of Acute Attacks:

Members are restricted to coverage of one medication for <u>treatment of acute attacks</u> at one time. Prior authorization approval will be for one year.

FIRAZYR (icatibant acetate) may be approved for members meeting the following criteria:

- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications

Minimum age: 18 years Maximum dose: 30mg

BERINERT (C1 esterase inhibitor (human)) may be approved for members meeting the following criteria:

- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
- Member has received hepatitis A and hepatitis B vaccination AND
- Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV

Minimum age: 6 years Max dose: 20 IU/kg

RUCONEST (C1 esterase inhibitor (recombinant)) may be approved for members meeting the following criteria:

- Member has a history of trial and failure of Firazyr OR Berinert. Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling,

	Thereas aut is Dance Classes BHOCDE	airway swelling) in the absence of hives or a medication known to cause angioedema AND Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND Member has received hepatitis A and hepatitis B vaccination AND Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV. Minimum age: 13 years Maximum dose: 4200 Units/dose All other non-preferred agents may be approved if the member has trialed and failed at least two preferred agents with the same indicated role in therapy as the prescribed medication (prophylaxis or treatment). Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction.
		IATE BINDERS -Effective 7/1/2021

XII. Renal/Genitourinary Therapeutic Drug Class: BENIGN PROSTATIC HYPERPLASIA (BPH) AGENTS -Effective 7/1/2021

The apeutic Diag class. Delition 1 ROSTATIC HTT Ext LASIA (DIII) AGENTS -Effective 7/1/2021		
No PA Required	PA Required	
Alfuzosin ER tablet	AVODART (dutasteride)	Prior authorization for non-preferred products in this class may be approved if member meets all of the following criteria:
Doxazosin tablet	CARDURA (doxazosin)	 Member has tried and failed‡ three preferred agents AND For combinations agents, member has tried and failed‡ each of the individual agents within the combination agent and one other preferred agent.
Dutasteride capsule	CARDURA XL (doxazosin ER)	agents within the combination agent and one other preferred agent.
Finasteride tablet	*CIALIS (tadalafil) 2.5 mg, 5 mg	‡Failure is defined as lack of efficacy with 8-week trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction.
Tamsulosin capsule	Dutasteride/tamsulosin	*CIALIS (tadalafil) may be approved for members with a documented diagnosis of
Terazosin capsule	FLOMAX (tamsulosin)	BPH who have failed a trial of finasteride (at least 3 months in duration) AND either a trial of a nonselective alpha blocker (therapeutic dose for at least two months) OR a
	JALYN (dutasteride/tamsulosin)	trial of tamsulosin (therapeutic dose for at least one month). Documentation of BPH diagnosis will require BOTH of the following:
	PROSCAR (finasteride)	 AUA Prostate Symptom Score ≥ 8 AND Results of a digital rectal exam.
	1	

	RAPAFLO (silodosin)	Cialis (tadalafil) will not be approved for any patient continuing alpha-blocker therapy
	Silodosin capsule	as this combination is contraindicated in this population. Doses exceeding 5mg per day of Cialis (tadalafil) will not be approved.
	-	Boses exceeding only per day of Claims (addition) will not be approved.
	*Tadalafil 2.5 mg, 5 mg Therapeutic Drug Class: ANTI-HYP	ERURICEMICS -Effective 1/1/2022
No PA Required	PA Required	Non-preferred xanthine oxidase inhibitor products (allopurinol or febuxostat
Brand/generic changes effective 1/27/2022	Colchicine capsule	formulations) may be approved following trial and failure of preferred allopurinol. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. If member has tested positive for the HLA-B*58:01 allele, it is
Allopurinol tablet	COLCRYS (colchicine) tablet	not recommended that they trial allopurinol. A positive result on this genetic test will count as a failure of allopurinol.
	Febuxostat tablet	Prior authorization for all other non-preferred agents (non-xanthine oxidase inhibitors)
Colchicine tablet	GLOPERBA (colchicine) oral solution	may be approved after trial and failure of two preferred products. Failure is defined as
Probenecid tablet	MITIGARE (colchicine) capsule	lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
Probenecid/Colchicine tablet	ULORIC (febuxostat) tablet	GLOPERBA (colchicine) oral solution may be approved for members who require individual doses <0.6 mg OR for members who have documented swallowing difficulty due to young age and/or a medical condition (preventing use of solid oral dosage form).
	ZYLOPRIM (allopurinol) tablet	
		Colchicine tablet quantity limits: • Chronic hyperuricemia/gout prophylaxis: 60 tablets per 30 days • Familial Mediterranean Fever: 120 tablets per 30 days
	Therapeutic Drug Class: OVERACTIVE I	BLADDER AGENTS -Effective 10/1/2021
No PA Required	PA Required	
GELNIQUE (oxybutynin) gel	Darifenacin ER tablet	Non-preferred products may be approved for members who have failed treatment with two preferred products. Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
MYRBETRIQ (mirabegron) tablet	DETROL (tolterodine)	
Oxybutynin IR, ER tablets, syrup	DETROL LA (tolterodine ER)	Members with hepatic failure can receive approval for trospium (Sanctura) or trospium extended release (Sanctura XR) products without a trial on a Preferred product.
Oxybutynin ER tablets	DITROPAN (brand)	
Solifenacin tablet	DITROPAN XL (brand)	
TOVIAZ (fesoterodine ER)	ENABLEX (darifenacin)	
	Flavoxate	
	GELNIQUE (oxybutynin) gel pump

SPIRIVA RESPIMAT is intended to be used by members whose asthma is not controlled with regular use of a combination medium-dose inhaled corticosteroid and long-acting beta agonist (LABA). *SPIRIVA RESPIMAT (tiotropium) 2.5 mcg may be approved for members with a diagnosis of COPD who have trialed and failed SPIRIVA HANDIHALER. Failure is defined as intolerable side effects or inability to use dry powder inhaler (DPI) formulation. LONHALA MAGNAIR (glycopyrrolate) may be approved for members ≥ 18 years of age with a diagnosis of COPD including chronic bronchitis and emphysema who have trialed and failed‡ treatment with two preferred anticholinergic agents. Non-preferred single agent anticholinergic agents may be approved for members with a diagnosis of COPD including chronic bronchitis and/or emphysema who have trialed and failed‡ treatment with two preferred agents, one of which must be SPIRIVA HANDIHALER. ‡Failure is defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, or significant drug-drug interaction.
	Inhaled Antichol	linergic Combinations
No PA Required Solutions Albuterol/ipratropium solution	PA Required Solutions	

Short-Acting Inhalation Devices COMBIVENT RESPIMAT (albuterol/ipratropium) Long-Acting Inhalation Devices ANORO ELLIPTA (umeclidinium/vilanterol)	Short-Acting Inhalation Devices	BREZTRI AEROSPHERE (budesonide/glycopyrrolate/formoterol) may be approved for members ≥ 18 years of age with a diagnosis of COPD who have trialed and failed‡ treatment with two preferred anticholinergic-containing agents. DUAKLIR PRESSAIR (aclidinium/formoterol) may be approved for members ≥ 18 years of age with a diagnosis of COPD who have trialed and failed‡ treatment with two preferred anticholinergic-containing agents. All other non-preferred inhaled anticholinergic combination agents may be approved for members with a diagnosis of COPD including chronic bronchitis and/or emphysema who have trialed and failed‡ treatment with two preferred inhaled anticholinergic combination agents OR three preferred inhaled anticholinergic-containing agents (single ingredient or combination). Members who are currently stabilized on Bevespi Aerosphere may receive approval to continue therapy with that product. ‡Failure is defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, or significant drug-drug interaction.		
Inhaled Beta2 Agonists (short acting)				
No PA Required Solutions Albuterol solution, for nebulizer Inhalers PROAIR BNR HFA (albuterol) VENTOLIN BNR HFA (albuterol)	PA Required Solutions Levalbuterol solution XOPENEX (levalbuterol) solution Inhalers Albuterol HFA Levalbuterol HFA PROAIR DIGIHALER, RESPICLICK (albuterol) PROVENTIL (albuterol) HFA inhaler XOPENEX (levalbuterol) Inhaler	Non-preferred, short acting beta2 agonists may be approved for members who have failed treatment with one preferred agent. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. MDI formulation quantity limits: 2 inhalers / 30 days		
Inhaled Beta2 Agonists (long acting)				
*Must meet eligibility criteria <u>Solutions</u>	PA Required Solutions BROVANA (arformoterol) solution	*SEREVENT (salmeterol) may be approved for members with moderate to very severe COPD. Serevent will not be approved for treatment of asthma in members needing addon therapy due to safety risks associated with monotherapy.		

PERFOROMIST (formoterol) solution

Inhalers *SEREVENT DISKUS (salmeterol) inhaler	Inhalers STRIVERDI RESPIMAT (olodaterol)	Non-preferred agents may be approved for members with moderate to severe COPD, AND members must have failed a trial of Serevent. Failure is defined as lack of efficacy with a 6-week trial, allergy, intolerable side effects, or significant drug-drug interaction. For treatment of members with diagnosis of asthma needing add-on therapy, please refer to preferred agents in combination Long-Acting Beta Agonist/Inhaled Corticosteroid therapeutic class.		
Inhaled Corticosteroids				
No PA Required	PA Required			
Solutions Budesonide nebules	Solutions PULMICORT (budesonide) nebules	Non-preferred inhaled corticosteroids may be approved in members with asthma who have failed an adequate trial of two preferred agents. An adequate trial is defined as at least 6 weeks. (Failure is defined as: lack of efficacy with a 6-week trial, allergy, contraindication to, intolerable side effects, or significant drug-drug interactions.) Maximum Dose: Pulmicort (budesonide) nebulizer suspension: 2mg/day		
Inhalers ASMANEX Twisthaler (mometasone)	Inhalers ALVESCO (ciclesonide) inhaler			
FLOVENT DISKUS (fluticasone)	ARMONAIR DIGIHALER (fluticasone propionate)
