

Colorado Department of Health Care Policy and Financing Preferred Drug List (PDL)

Effective January 1, 2024

<u>Prior Authorization Forms:</u> Available online at https://www.colorado.gov/hcpf/pharmacy-resources

Prior Authorization (PA) Requests: Colorado Pharmacy Call Center Phone Number: 800-424-5725 | Fax Number: 800-424-5881

Electronic Prior Authorization (ePA): Real Time Prior Authorization via Electronic Health Record (EHR)

The PDL applies to Medicaid fee-for-service members. It does not apply to members enrolled in Rocky Mountain Health HMO or Denver Health Medicaid Choice.

<u>Initiation of pharmaceutical product subject to Prior Authorization:</u> Please note that starting the requested drug, including a non-preferred drug, prior to a PA request being reviewed and approved, through either inpatient use, by using office "samples," or by any other means, does not necessitate Medicaid approval of the PA request.

<u>Covid-19 Related Treatment Override</u>: Providers may call the Magellan Help Desk at 1-800-424-5725 to request a prior authorization override if a medication is related to the treatment or prevention of COVID-19 or the treatment of a condition that may seriously complicate the treatment of COVID-19.

Health First Colorado, at 25.5-5-501, requires the generic of a brand name drug be prescribed if the generic is therapeutically equivalent to the brand name drug. Exceptions to this rule are: 1) If the brand name drug is more cost effective than the generic as determined by the Department, 2) If the patient has been stabilized on a brand name drug and the prescriber believes that transition to a generic would disrupt care, and 3) If the drug is being used for treatment of mental illness, cancer, epilepsy, or human immunodeficiency virus and acquired immune deficiency syndrome.

Please see the **Brand Favored Product List** for a list of medications where the brand name drug is more cost effective than the generic drug.

Brand Name Required = BNR, Prior Authorization = PA, AutoPA = authorization can be automated at the point-of-sale transaction if criteria are met Preferred drug list applies only to prescription (RX) products, unless specified.

Preferred Agents	Non-preferred Agents	Prior Authorization Criteria
		(All Non-preferred products will be approved for one year unless
		otherwise stated.)
	I. Ana	algesics
,	Therapeutic Drug Class: NON-OPIOID ANA	ALGESIA AGENTS - Oral - Effective 4/1/2023
No PA Required	PA Required	
		Non-preferred oral non-opioid analgesic agents may be approved if member meets all of
Duloxetine 20 mg, 30 mg, 60	CYMBALTA (duloxetine) capsule	the following criteria:
mg capsule		 Member has trialed and failed duloxetine (20mg, 30mg, or 60mg) AND has
	DRIZALMA (duloxetine DR) sprinkle capsules	trialed and failed gabapentin OR pregabalin capsule (Failure is defined as lack

Gabapentin capsule, tablet, solution	Duloxetine 40 mg capsule	of efficacy with 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction)
Pregabalin capsule	GRALISE (gabapentin ER) tablet	Prior authorization will be required for Lyrica (pregabalin) capsule dosages > 600mg per
SAVELLA (milnacipran) tablet,	HORIZANT (gabapentin ER) tablet	day (maximum of 3 capsules daily) and gabapentin dosages > 3600mg per day.
titration pack	LYRICA (pregabalin) capsule, solution, CR tablet	
	NEURONTIN (gabapentin) capsule, tablet, solution	
	Pregabalin solution, ER tablet	
TI	peraneutic Drug Class: NON-OPIOID ANAI	GESIA AGENTS - Topical - Effective 4/1/2023
No PA Required	PA Required	John Holling Topical Effective 1/1/2025
Lidocaine patch LIDODERM (lidocaine) patch	ZTLIDO (lidocaine) topical system	Non-preferred topical products require a trial/failure with an adequate 8-week trial of gabapentin AND pregabalin AND duloxetine AND Lidoderm patch. Failure is defined as lack of efficacy with an 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction.
	Drug Class: NON STEPOIDAL ANTLINE	Prior authorization will be required for lidocaine patch quantities exceeding 90 patches per 30 days (maximum of 3 patches daily). FLAMMATORIES (NSAIDS) - Oral - Effective 4/1/2023
No PA Required	PA Required	ELAMINIA FORTES (NSAIDS) - OTAI - Effective 4/1/2025
_	r A Required	DUEXIS (ibuprofen/famotidine) or VIMOVO (naproxen/esomeprazole) may be
Generic changes effective 07/31/2023	ANAPROX DS (naproxen) tablet	approved if the member meets the following criteria: • Trial and failure [‡] of all preferred NSAIDs at maximally tolerated doses AND
Celecoxib capsule	ARTHROTEC (diclofenac sodium/ misoprostol) tablet	Trial and failure [‡] of three preferred proton pump inhibitors in combination with NSAID within the last 6 months AND
Diclofenac potassium 50 mg tablet	CELEBREX (celecoxib) capsule	Has a documented history of gastrointestinal bleeding
Diclofenac sodium EC/DR	DAYPRO (oxaprozin) caplet	Diclofenac potassium 25 mg immediate-release tablets may be approved if the following criteria are met:
tablet	Diclofenac potassium capsule, powder pack	• Member is ≥ 18 years of age AND
Ibuprofen suspension, tablet		Member does not have any of the following medical conditions:
(RX)	Diclofenac potassium 25 mg tablet*	History of recent coronary artery bypass graft (CABG) surgery
Indomethacin capsule, ER capsule	Diclofenac sodium ER/SR tablet	 History of myocardial infarction Severe heart failure
Ketorolac tablet**	Diclofenac sodium/misoprostol tablet	Advanced renal diseaseHistory of gastrointestinal bleeding
Meloxicam tablet	Diflunisal tablet	AND

Nabumetone tablet	DUEXIS (ibuprofen/famotidine) tablet	Member has trial and failure [‡] of four preferred oral NSAIDs at maximally tolerated doses
Naproxen DR/ER, tablet (RX)	ELYXYB (celecoxib) solution	All other non-preferred oral agents may be approved following trial and failure [‡] of four
Naproxen EC tablet (RX) (all manufacturers except	Etodolac capsule; IR, ER tablet	preferred agents. [‡] Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions.
Woodward)	FELDENE (piroxicam) capsule	**Ketorolac tablets quantity limits: 5-day supply per 30 days and 20 tablets per 30 days
Naproxen suspension	Fenoprofen capsule, tablet	
Sulindac tablet	Flurbiprofen tablet	
	Ibuprofen/famotidine tablet	
	Ketoprofen IR, ER capsule	
	Meclofenamate capsule	
	Mefenamic acid capsule	
	Meloxicam suspension	
	Meloxicam (submicronized) capsule	
	NALFON (fenoprofen) capsule, tablet	
	NAPRELAN (naproxen CR) tablet	
	NAPROSYN (naproxen) EC tablet, suspension, tablet	
	Naproxen EC tablet (Woodward only)	
	Naproxen sodium CR, ER, IR tablet	
	Naproxen/esomeprazole DR tablet	
	Oxaprozin tablet	
	Piroxicam capsule	
	RELAFEN DS (nabumetone) tablet	
	Tolmetin tablet	

	VIMOVO (naproxen/esomeprazole) DR tablet	
Therapeutic D	orug Class: NON-STEROIDAL ANTI-INFL	AMMATORIES (NSAIDS) - Non-Oral - Effective 4/1/2023
No PA Required	PA Required	SPRIX (ketorolac) may be approved if meeting the following criteria:
Diclofenac 1.5% topical solution Diclofenac sodium 1% gel (OTC/Rx)	Diclofenac 1.3% topical patch, 2% pump FLECTOR (diclofenac) 1.3% topical patch Ketorolac nasal spray LICART (diclofenac) 1.3% topical patch PENNSAID (diclofenac solution) 2% pump	 Member is unable to tolerate, swallow or absorb oral NSAID formulations OR Member has trialed and failed three preferred oral or topical NSAID agents (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions) Quantity limit: 5-single day nasal spray bottles per 30 days All other non-preferred topical agents may be approved for members who have trialed and failed one preferred agent. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.
		Diclofenac topical patch quantity limit: 2 patches per day
Onicid Utilization Policy (long o		Diclofenac 3% gel (generic Solaraze) prior authorization criteria can be found in the Antineoplastic agents, topical, section of the PDL.

Opioid Utilization Policy (long-acting and short-acting opioids):

It is highly encouraged that the healthcare team utilize the Prescription Drug Monitoring Program (PDMP) to aid in ensuring safe and efficacious therapy for members using controlled substances.

Total Morphine Milligram Equivalent Policy Effective 10/1/17:

- The maximum allowable morphine milligram equivalent (MME) is 200 MME. Prescriptions for short-acting (SA) and long-acting (LA) opioids are cumulatively included in this calculation. The prescription that exceeds the cumulative MME limit of 200 MME for a member will require prior authorization and may require a provider-to-provider telephone consultation with the pain management physician (free of charge and provided by Health First Colorado).
- Prior authorization will be granted to allow for tapering
- Prior authorization for 1 year will be granted for diagnosis of sickle cell anemia
- Prior authorization for 1 year will be granted for admission to or diagnosis of hospice or end of life care
- Prior authorization for 1 year will be granted for pain associated with cancer

MME calculation is conducted using conversion factors from the following link: https://pharmacypmp.az.gov/resources/mme-calculator

Only one long-acting opioid agent (including different strengths) and one short-acting opioid agent (including different strengths) will be considered for a prior authorization.

Medicaid provides guidance on the treatment of pain, including tapering, on our webpage under the heading Pain Management Resources and Opioid Use at: https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use

Opioid Naïve Policy Effective 8/1/17 (*Update effective 04/01/23 in Italics*):

Members who have not filled a prescription for an opioid within the past 180 days will be identified as "opioid treatment naïve" and have the following limitations placed on the initial prescription(s):

- The prescription is limited to short-acting opioid agents or Butrans (buprenorphine). Use of other long-acting opioid agents will require prior authorization approval for members identified as opioid treatment naïve.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 7 days, the quantity will be limited to 8 dosage forms per day (tablets, capsules), maximum #56 tablets/capsules for a 7-day supply
- The fourth prescription for an opioid will require prior authorization, filling further opioid prescriptions may require a clinical pharmacist review or provider to provider telephone consultation with a pain management physician (free of charge and provided by Health First Colorado).
- If a member has had an opioid prescription filled within the past 180 days, then this policy would not apply to that member and other opioid policies would apply as applicable.

Dental Prescriptions Opioid Policy Effective 11/15/18 (implemented in the claims system 01/07/19):

Members who receive an opioid prescribed by a dental provider will be subject to day supply limits and quantity per day limits for short acting opioids.

- The prescription is limited to short-acting opioid agents only. Use of long-acting opioid agents and short acting fentanyl agents will require prior authorization approval for members' prescriptions written by a dental provider.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 4 days, the quantity will be limited to 6 dosage forms per day (tablets, capsules), maximum #24 tablets/capsules for a 4-day supply
- The fourth prescription for an opioid will require prior authorization. A prior authorization for the fourth fill may be approved for up to a 7-day supply and the quantity will be limited to 8 dosage forms per day (#56 tablets/capsules) for members with any of the following diagnoses/undergoing any of the following procedures:
 - o Traumatic oro-facial tissue injury with major mandibular/maxillary surgical procedures
 - Severe cellulitis of facial planes
 - o Severely impacted teeth with facial space infection necessitating surgical management
- Other potential exemptions that exceed the first 3 fill limits (day supply and quantity) may be evaluated with a provider-to-provider telephone consult with a pain management specialist (free of charge and provided by Health First Colorado)

If a member has had an opioid prescription prescribed by a non-dental provider, then this policy would not apply to that member and other opioid policies would apply as applicable. Dental prescriptions do not impact the opioid treatment naïve policy, but the prescriptions will be counted towards the Morphine Milligram Equivalent (MME) daily dose.

Opioid and Benzodiazepine Combination Effective 9/15/19:

Prior authorization will be required for members receiving long-term therapy with an opioid medication who are newly started on a benzodiazepine medication <u>OR</u> for members receiving long-term therapy with a benzodiazepine medication who are newly started on an opioid medication. Prior authorization may be approved if meeting the following:

- The member discontinued or is no longer taking either the opioid or benzodiazepine medication and will not be using these in combination OR
- The member will not be taking the prescribed opioid and benzodiazepine medications at the same time based on prescribed dosing interval (such as prn administration) for the regimen <u>AND</u> the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- The prescriber has evaluated the regimen and attests that it is appropriate for the member to continue use of the concomitant opioid and benzodiazepine medication regimen as prescribed AND the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- Prior authorization may be approved for members receiving palliative or hospice care **OR**
- For benzodiazepine prior authorizations, approval may be granted if the benzodiazepine is being prescribed for seizure disorder or convulsions.

*If counseling has not been provided, the prescriber attests that a reasonable effort will be made to contact the member or the member's pharmacy to ensure that counseling is provided.

Opioid and Quetiapine Combination Effective 9/15/19:

Pharmacy claims for members receiving opioid and quetiapine medications in combination will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) related to risk of increased sedation from concomitant use of this drug combination.

Opioid and Buprenorphine-Containing substance use disorder (SUD) Product Combination Effective 06/01/21:

Opioid claims submitted for members currently receiving buprenorphine-containing SUD medications will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) with use of this drug combination.

*Preferred codeine and tramadol products do not require prior authorization for adult members (18 years of age or greater) if meeting all other opioid policy criteria.

Preferred codeine or tramadol products prescribed for members < 18 years of age must meet the following criteria:

- **Preferred tramadol and tramadol-containing products** may be approved for members < 18 years of age if meeting the following:
 - o Member is 12 years to 17 years of age **AND**
 - Tramadol is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND
 - Member's BMI-for-age is not > 95th percentile per CDC guidelines AND
 - Member does not have obstructive sleep apnea or severe lung disease OR
 - For members < 12 years of age with complex conditions or life-limiting illness who are receiving care under a pediatric specialist, tramadol and tramadolcontaining products may be approved on a case-by-case basis
- Preferred Codeine and codeine-containing products will receive prior authorization approval for members meeting the following criteria may be approved for members < 18 years of age if meeting the following:
 - Member is 12 years to 17 years of age AND
 - Codeine is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND
 - Member's BMI-for-age is not > 95th percentile per CDC guidelines AND
 - Member does not have obstructive sleep apnea or severe lung disease AND
 - Member is not pregnant, or breastfeeding AND
 - Renal function is not impaired (GFR > 50 ml/min) AND
 - Member is not receiving strong inhibitors of CYP3A4 (such as erythromycin, clarithromycin, itraconazole, ketoconazole, posaconazole, fluconazole [\ge 200mg daily], voriconazole, delayirdine, and milk thistle) AND
 - o Member meets one of the following:
 - Member has trialed codeine or codeine-containing products in the past with no history of allergy or adverse drug reaction to codeine
 - Member has not trialed codeine or codeine-containing products in the past and the prescriber acknowledges reading the following statement: "Approximately 1-2% of the population metabolizes codeine in a manner

Hydromorphone solution

Levorphanol tablet

LORTAB (hydrocodone/acetaminophen) elixir

Meperidine solution, tablet

Morphine concentrated solution, oral syringe

NALOCET (oxycodone/acetaminophen) tablet

Oxycodone capsule, syringe, concentrated solution

Oxymorphone tablet

Oxycodone/acetaminophen solution

Oxycodone/acetaminophen tablet (generic PROLATE)

Pentazocine/naloxone tablet

PERCOCET (oxycodone/ acetaminophen) tablet

ROXICODONE (oxycodone) tablet

ROXYBOND (oxycodone) tablet

SEGLENTIS (tramadol/celecoxib) tablet

Tramadol 100mg tablet

Tramadol solution

that exposes them to a much higher potential for toxicity. Another notable proportion of the population may not clinically respond to codeine. We ask that you please have close follow-up with members newly starting codeine and codeine-containing products to monitor for safety and efficacy."

Non-preferred tramadol products may be approved following trial and failure of generic tramadol 50mg tablet AND generic tramadol/acetaminophen tablet.

All other non-preferred short-acting opioid products may be approved following trial and failure of three preferred products. Failure is defined as allergy‡, lack of efficacy, intolerable side effects, or significant drug-drug interaction.

‡Allergy: hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension, bronchospasm, and angioedema

Quantity Limits: Short-acting opioids will be limited to a total of 120 tablets per 30 days (4/day) per member for members who are not included in the opioid treatment naive policy.

- **Nucynta IR will have a maximum daily quantity of 6 tablets (180 tabs per 30 days).
- Exceptions will be made for members with a diagnosis of a terminal illness (hospice or palliative care) or sickle cell anemia.
- For members who are receiving more than 120 tablets currently and who do not have a qualifying exemption diagnosis, a 6-month prior authorization can be granted via the prior authorization process for providers to taper members.
- Please note that if more than one agent is used, the combined total utilization may not exceed 120 units in 30 days. There may be allowed certain exceptions to this limit for acute situations (for example: post-operative surgery, fractures, shingles, car accident).

Maximum Doses:

Tramadol: 400mg/day Codeine: 360mg/day

Butorphanol intranasal: 10ml per 30 days (four 2.5ml 10mg/ml package units per 30

days)

Theraneuti	c Drug Class: FENTANVI, PREPARATION	IS (buccal, transmucosal, sublingual) - Effective 4/1/2023
Therapeut	PA Required	buccai, transmucosai, submiguai) - Effective 4/1/2023
	ACTIQ (fentanyl citrate) lozenge Fentanyl citrate lozenge, buccal tablet FENTORA (fentanyl citrate) buccal tablet	Fentanyl buccal, intranasal, transmucosal, and sublingual products: Prior authorization approval may be granted for members experiencing breakthrough cancer pain and those that have already received and are tolerant to opioid drugs for the cancer pain AND are currently being treated with a long-acting opioid drug. The prior authorization may be granted for up to 4 doses per day. For patients in hospice or palliative care, prior authorization will be automatically granted regardless of the number of doses prescribed.
	Therapeutic Drug Class: OPIOID	S, Long Acting - Effective 4/1/2023
Preferred	Non-Preferred	
No PA Required (*if dose met)	PA Required	**Oxycontin may be approved for members who have trialed and failed‡ treatment with TWO preferred agents.
	**OXYCONTIN (oxycodone ER) tablet	
BUTRANS ^{BNR} (buprenorphine) transdermal patch	BELBUCA (buprenorphine) buccal film	All other non-preferred products may be approved for members who have trialed and failed‡ three preferred products.
*Fentanyl 12mcg, 25mcg, 50mcg, 75mcg, 100mcg	Buprenorphine buccal film, transdermal patch	‡Failure is defined as lack of efficacy with 14-day trial due to allergy (hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension,
transdermal patch	CONZIP (tramadol ER) capsule	bronchospasm, and angioedema), intolerable side effects, or significant drug-drug interaction.
Morphine ER (generic MS Contin) tablet	Fentanyl 37mcg, 62mcg, 87mcg transdermal patch Hydrocodone ER capsule, tablet	Methadone: Members may receive 30-day approval when prescribed for neonatal abstinence syndrome without requiring trial and failure of preferred agents or opioid
*NUCYNTA ER (tapentadol ER)	Hydromorphone ER tablet	prescriber consultation.
Tramadol ER (generic Ultram	HYSINGLA (hydrocodone ER) tablet	Methadone Continuation: Members who have been receiving methadone for pain indications do not have to meet
ER) tablet	KADIAN (morphine ER) capsule	non-preferred criteria. All new starts for methadone will require prior authorization under the non-preferred criteria listed above.
	Methadone (all forms)	If a prescriber would like to discuss strategies for tapering off methadone or transitioning to other pain management therapies for a Health First Colorado member,
	Morphine ER capsule	consultation with the Health First Colorado pain management physician is available free of charge by contacting the pharmacy call center helpdesk and requesting an opioid
	MS CONTIN (morphine ER) tablet	prescriber consult.
	Oxycodone ER tablet	Reauthorization: Reauthorization for a non-preferred agent may be approved if the following criteria are
	Oxymorphone ER tablet	met:
	Tramadol ER (generic Ryzolt/Conzip)	Provider attests to continued benefit outweighing risk of opioid medication use AND Manhor met original prior outborization priority for this drug class at time of
	XTAMPZA ER (oxycodone) capsule	 Member met original prior authorization criteria for this drug class at time of original authorization

		 Ouantity/Dosing Limits: Oxycontin, Nucynta ER, and Hydrocodone ER (generic Zohydro ER) will only be approved for twice daily dosing. Hysingla will only be approved for once daily dosing. Fentanyl patches will require a PA for doses of more than 15 patches/30 days (if using one strength) or 30 patches for 30 days (if using two strengths). For fentanyl patch strengths of 37mcg/hr, 62mcg/hr, and 87mcg/hr, member must trial and fail two preferred strengths of separate patches that will provide the desired dose (such as 12mcg/hr + 50mcg/hr = 62mcg/hr).
		Infectives
Des Course I		TICS, INHALED -Effective 1/1/2024
Preferred No PA Required (*Must meet eligibility	Non-Preferred PA Required	*CAYSTON (aztreonam) inhalation solution may be approved if the following criteria are met:
criteria)	ARIKAYCE (amikacin liposomal) inhalation vial	Member has a history of trial and failure of preferred tobramycin solution for inhalation (failure is defined as lack of efficacy with a 4-week trial, intolerable
Tobramycin inhalation solution (generic TOBI)	BETHKIS (tobramycin) inhalation ampule	side effects, or significant drug-drug interactions) OR provider attests that member cannot use preferred tobramycin solution for inhalation due to
*CAYSTON (aztreonam)	KITABIS (tobramycin) nebulizer pak	documented allergy or contraindication to therapy AND
inhalation solution	TOBI (tobramycin) inhalation solution	The member has known colonization of <i>Pseudomonas aeruginosa</i> in the lungs AND
	TOBI PODHALER (tobramycin) inhalation capsule	 The member has been prescribed an inhaled beta agonist to use prior to nebulization of Cayston (aztreonam).
	Tobramycin inhalation ampule (generic Bethkis)	
	Tobramycin nebulizer pak (generic Kitabis)	 ARIKAYCE (amikacin) may be approved if the following criteria are met: Member has refractory mycobacterium avium complex (MAC) lung disease with limited or no alternative treatment options available AND Member has trialed and failed 6 months of therapy with a 3-drug regimen that includes a macrolide (failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions).
		All other non-preferred inhaled antibiotic agents may be approved if the following criteria are met:
		 The member has a diagnosis of cystic fibrosis with known colonization of <i>Pseudomonas aeruginosa</i> in the lungs AND
		 Member has history of trial and failure of preferred tobramycin solution for inhalation (failure is defined as lack of efficacy with a 4-week trial, contraindication to therapy, allergy, intolerable side effects or significant drug- drug interactions).

Table 1: Minimum Age, Maximum Dose, and Quantity Limitations				
Drug Name	Minimum Age	Maximum Dose	Quantity Limit (Based on day supply limitation for pack size dispensed)	
ARIKAYCE (amikacin)	≥ 18 years	590 mg once daily	Not applicable	
BETHKIS (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period	
CAYSTON (aztreonam)	≥7 years	75 mg three time daily	28-day supply per 56-day period	
KITABIS PAK (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period	
TOBI [†] (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period	
TOBI PODHALER (tobramycin)	Age ≥ 6 years	112 mg twice daily	28-day supply per 56-day period	

[†] Limitations apply to brand product formulation only

Members currently stabilized on any inhaled antibiotic agent in this class may receive approval to continue that agent.

Therapeutic Drug Class: ANTI-HERPETIC AGENTS - Oral - Effective 1/1/2024

No PA Required Acyclovir tablet, capsule *Acyclovir suspension (members under 18 years or cannot swallow a solid dosage form) Famciclovir tablet Valacyclovir tablet Therapeutic Drug Class: ANT1-1 PA Required Acyclovir suspension (all other members) SITAVIG (acyclovir) buccal tablet VALTREX (valacyclovir) tablet Valacyclovir tablet

Non-preferred products may be approved for members who have failed an adequate trial with two preferred products with different active ingredients. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.

Sitavig (acyclovir) buccal tablet may be approved for diagnosis of recurrent herpes labialis (cold sores) if member meets non-preferred criteria listed above AND has failed trial with oral acyclovir suspension. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.

*Acyclovir suspension does not require prior authorization for members < 18 years of age and may be approved for members ≥ 18 years of age who cannot swallow an oral dosage form.

				Maximur	m Dose Table	
				Adult	Pediatric	
			Acyclovir	4,000 mg/day	3,200 mg/day	
			Famciclovir	2,000 mg/day		
			Valacyclovir	4,000 mg/day	Age 2-11 years: 3,000mg/day Age ≥ 12 years: 4,000mg/day

No PA Required	PA Required					
Acyclovir cream (<i>Teva only</i>) Acyclovir ointment	Acyclovir cream (all other manufacturers) Penciclovir cream XERESE (acyclovir/ hydrocortisone) cream		Non-Preferred Zovirax and acyclovir ointment/cream formulations may be approved for members who have failed an adequate trial with the preferred topical acyclovir ointment/cream product (diagnosis, dose and duration) as deemed by approved compendium. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) Xerese (acyclovir/hydrocortisone) prior authorization may be approved for members that meet the following criteria: Documented diagnosis of recurrent herpes labialis AND Member is immunocompetent AND Member has failed treatment of at least 10 days with acyclovir (Failure is defined as significant drug-drug interaction, lack of efficacy, contraindication to or intolerable side effects) AND Member has failed treatment of at least one day with famciclovir 1500 mg OR valacyclovir 2 grams twice daily (Failure is defined as significant drug-drug interaction, lack of efficacy, contraindication to or intolerable side effects)			
DENAVIR BNR (penciclovir) cream						
	Therapeutic Drug Class: FL	UOROQU	INOLONES -	Oral - Effective	e 1/1/2024	
Preferred No PA Required (*if meeting eligibility criteria)	Non-Preferred PA Required	*CIPRO su		require prior auth	orization for members < 18 years of ago	e and may be
*CIPRO (ciprofloxacin) oral suspension ^{BNR}	BAXDELA (delafloxacin) tablet CIPRO (ciprofloxacin) tablet	at least one preferred product. (Failur		red products may be approved for members who have failed an adequate trial (7 days) we preferred product. (Failure is defined as: lack of efficacy, contraindication to therapy, colerable side effects, or significant drug-drug interaction).		
Ciprofloxacin tablet	Ciprofloxacin oral suspension	Levofloxacin solution may be approved for members with prescriber attestation that member: • is unable to take Cipro (ciprofloxacin) crushed tablet or suspension OR		ember:		
Levofloxacin tablet	Levofloxacin oral solution	 is < 5 years of age and being treated for pneumonia OR has failed† an adequate trial (7 days) of ciprofloxacin suspension †Failure is defined as lack of efficacy, allergy, intolerable side effects, significant drug-drug interaction, or contraindication to therapy. 				
Moxifloxacin tablet	Ofloxacin tablet				drug	

Therapeutic Drug Class: **HEPATITIS C VIRUS TREATMENTS** - Effective 1/1/2024

Direct Acting Antivirals (DAAs)

Preferred No PA Required for initial treatment (*must meet eligibility criteria)

EPCLUSA

(sofosbuvir/velpatasvir) 200 mg -50 mg, 150 mg-37.5 mg tablet, pellet pack

HARVONI

(ledipasvir/sofosbuvir) 45mg-200mg tablet, pellet pack

Ledipasvir/Sofosbuvir 90 mg-400 mg tablet (*Asegua only*)

MAVYRET

(glecaprevir/pibrentasvir) tablet, pellet pack

Sofosbuvir/Velpatasvir 400mg-100mg (*Asegua only*)

*VOSEVI tablet (sofosbuvir/velpatasvir/voxila previr)

Non-Preferred PA Required

EPCLUSA 400 mg-100 mg (sofosbuvir/velpatasvir) tablet

HARVONI 90 mg-400 mg (ledipasvir/sofosbuvir) tablet

SOVALDI (sofosbuvir) tablet, pellet packet

VIEKIRA PAK (ombitasvir/paritaprevir/ ritonavir/dasabuvir) tablet

ZEPATIER (elbasvir/grazoprevir) tablet

Pharmacy claims for **preferred products** prescribed for initial treatment will be eligible for up to a 90-day supply fill allowing for the appropriate days' duration for completing the initial treatment regimen (with no PA required). Subsequent fills will require prior authorization meeting re-treatment criteria below.

*Second line preferred agents (Vosevi) may be approved for members 18 years of age or older with chronic HCV infection who are non-cirrhotic or have compensated cirrhosis (Child-Pugh A) AND meet the following criteria:

- GT 1-6 and has previously failed treatment with a regimen containing an NS5A inhibitor (such as ledipasvir, daclatasvir, or ombitasvir) **OR**
- GT 1a or 3 and has previously failed treatment with a regimen containing sofosbuvir without an NS5A inhibitor

AND

• Request meets the applicable criteria below for re-treatment.

Re-treatment:

All requests for HCV re-treatment for members who have failed therapy with a DAA will be reviewed on a case-by-case basis. Additional information may be requested for re-treatment requests including:

- Assessment of member readiness for re-treatment
- Previous regimen medications and dates treated
- Genotype of previous HCV infection
- Any information regarding adherence to previously trialed regimen(s) and current chronic medications
- Adverse effects experienced from previous treatment regimen
- Concomitant therapies during previous treatment regimen
- Vosevi regimens will require verification that member has been tested for evidence of active hepatitis B virus (HBV) infection and for evidence of prior HBV infection prior to initiating treatment.

Non-preferred agents may be approved if documentation is provided indicating an acceptable rationale for not prescribing a preferred treatment regimen (acceptable rationale may include patient-specific medical contraindications to a preferred treatment or cases where a member has initiated treatment on a non-preferred drug and needs to complete therapy).

Members currently receiving treatment with a non-preferred agent will receive approval to finish their treatment regimen, provided required documentation is sent via normal prior authorization request process.

*Age Limits: All products including preferred products will require a PA for members younger than the FDA approved age for the agent (Table 1). Members younger than the FDA approved age for the agent who are currently stabilized on an atypical antipsychotic will be eligible for approval.

Atypical Antipsychotic prescriptions for members under 5 years of age may require a provider-provider telephone consult with a child and adolescent psychiatrist (provided at no cost to provider or member).

***Quetiapine IR when given at subtherapeutic doses may be restricted for therapy. Low-dose quetiapine (<150mg/day) is only FDA approved as part of a drug titration schedule to aid patients in getting to the target quetiapine dose. PA will be required for quetiapine < 150mg per day except for utilization (when appropriate) in members 65 years or older. PA will be approved for members 10-17 years of age with approved diagnosis (Table 1) stabilized on <150mg quetiapine IR per day.

****Aripiprazole solution: Aripiprazole <u>tablet</u> quantity limit is 2 tablets/day for pediatric members to allow for incremental dose titration and use of the preferred tablet formulation should be considered for dose titrations when possible and clinically appropriate. If incremental dose cannot be achieved with titration of the aripiprazole tablet for members < 18 years of age OR for members unable to swallow solid tablet dosage form, aripiprazole solution may be approved. For all other cases, aripiprazole solution is subject to meeting non-preferred product approval criteria listed above.

Nuplazid (**pimavanserin tartrate**) may be approved for the treatment of hallucinations and delusions associated with Parkinson's Disease psychosis AND following trial and failure of therapy with quetiapine or clozapine (failure will be defined as intolerable side effects, drug-drug interaction, or lack of efficacy).

Abilify MyCite may be approved if meeting all of the following:

- Member has history of adequate trial and failure of 5 preferred agents (one trial must include aripiprazole tablet). Failure is defined as lack of efficacy with 6week trial on maximally tolerated dose, allergy, intolerable side effects, significant drug-drug interactions AND
- Information is provided regarding adherence measures being recommended by provider and followed by member (such as medication organizer or digital medication reminders) AND
- Member has history of adequate trial and failure of 3 long-acting injectable formulations of atypical antipsychotics, one of which must contain aripiprazole (failure is defined as lack of efficacy with 8-week trial, allergy, intolerable side effects, significant drug-drug interactions) AND
- Abilify MyCite is being used with a MyCite patch and member is using a compatible mobile application. AND
- Medication adherence information is being shared with their provider via a web portal or dashboard.

Quantity Limits: Quantity limits will be applied to all products (Table 1). In order to receive approval for off-label dosing, the member must have an FDA approved indication and must have tried and failed on the FDA approved dosing regimen.

Members currently stabilized on a non-preferred atypical antipsychotic may receive approval to continue therapy with that agent for one year.

Brand	Generic Approved Indications		Age Range	Maximum Daily	imum Daily Quantity and Maximum Dose	
		F.F.	6 6.	Dose by Age/Indication	Limitations

		LITHIU	JM AGENTS -Effective 4/1/2023
No PA Required	PA Required		Non-preferred products may be approved with trial and failure of one preferred agent
Lithium carbonate capsule, tablet	Non-preferred brand name medications do not require a prior authorization when the equivalent generic is preferred and "dispense as written" is		(failure is defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, significant drug-drug interactions, intolerance to dosage form).
Lithium ER tablet	indicated on the prescription.		Members currently stabilized on a non-preferred product may receive approval to continue therapy with that product.

	LITHOBID ER (lithium ER) tablet		
	Therapeutic Drug Class: NEUROCOG	NITIVE DISORDER AGENTS -Effective 4/1/2023	
Preferred *Must meet eligibility criteria	Non-Preferred PA Required	*Eligibility criteria for Preferred Agents – Preferred products may be approved for a diagnosis of neurocognitive disorder (eligible for AutoPA automated approval).	
*Donepezil 5mg, 10mg tablet	ADLARITY (donepezil) patch		
*Donepezil ODT	ARICEPT (donepezil) tablet	Non-preferred products may be approved if the member has failed treatment with one of the preferred products in the last 12 months. (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions)	
*Galantamine IR tablet	Donepezil 23mg tablet		
*Memantine IR tablet, dose pack	EXELON (rivastigmine) patch	Members currently stabilized on a non-preferred product may receive approval to continue on that agent for one year if medically necessary and if there is a diagnosis of neurocognitive disorder.	
	Galantamine solution, ER capsule	of neuroeogna, of disorder.	
* Memantine ER capsule	Memantine IR solution		
*Rivastigmine capsule, patch	MESTINON (pyridostigmine) IR/ER tablet, sy	rup	
	NAMENDA (memantine) tablet, dose pack		
	NAMENDA XR (memantine ER) capsule		
	NAMZARIC (memantine/donepezil ER) capsu pack	le, dose	
	Pyridostigmine syrup, IR/ER tablet		
	RAZADYNE ER (galantamine) capsule		
	Theraneutic Drug Class: SET	ATIVE HYPNOTICS -Effective 4/1/2023	
		n-Benzodiazepines	
Preferred No PA Required* (Unless age, dose, or	Non-Preferred PA Required Non-preferred non-benzodiazepine sedative hypnotics may be approved for members who h failed treatment with two preferred non-benzodiazepine agents (failure is defined as lack of		
duplication criteria apply)	AMBIEN (zolpidem) tablet	efficacy with a 2-week trial, allergy, intolerable side effects, or significant drug-drug interaction	
Eszopiclone tablet	AMBIEN CR (zolpidem ER) tablet	<u>Children:</u> Prior authorization will be required for all agents for children < 18 years of age.	
Ramelteon tablet	BELSOMRA (suvorexant) tablet		

Zaleplon capsule	DAYVIGO (lemoborexant) tablet
Zolpidem IR tablet	Doxepin tablet
Zolpidem ER tablet	EDLUAR (zolpidem) SL tablet
	HETLIOZ (tasimelteon) capsule
	HETLIOZ LQ (tasimelteon) suspension
	LUNESTA (eszopiclone) tablet
	QUVIVIQ (daridorexant) tablet
	ROZEREM (ramelteon) tablet
	SILENOR (doxepin) tablet
	Tasimelteon capsule
	Zolpidem SL tablet

<u>Duplications</u>: Only one agent in the sedative hypnotic drug class will be approved at a time (concomitant use of agents in the same sedative hypnotic class or differing classes will not be approved).

All sedative hypnotics will require prior authorization for members \geq 65 years of age when exceeding 90 days of therapy.

Belsomra (suvorexant) may be approved for adult members that meet the following:

- Member has trialed and failed therapy with two preferred agents (failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) AND
- Member is not receiving strong inhibitors (such as erythromycin, clarithromycin, telithromycin, itraconazole, ketoconazole, posaconazole, fluconazole, voriconazole, delavirdine, and milk thistle) or inducers (such as carbamazepine, oxcarbazepine, phenobarbital, phenytoin, rifampin, rifabutin, rifapentine, dexamethasone, efavirenz, etravirine, nevirapine, darunavir/ritonavir, ritonavir, and St John's Wort) of CYP3A4 AND
- Member does not have a diagnosis of narcolepsy

Dayvigo (lemborexant) may be approved for adult member that meet the following:

- Member has trialed and failed therapy with two preferred agents AND Belsomra (surovexant). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Member is not receiving strong inhibitors (such as erythromycin, clarithromycin, telithromycin, itraconazole, ketoconazole, posaconazole, fluconazole, voriconazole, delavirdine, and milk thistle) or inducers (such as carbamazepine, oxcarbazepine, phenobarbital, phenytoin, rifampin, rifabutin, rifapentine, dexamethasone, efavirenz, etravirine, nevirapine, darunavir/ritonavir, ritonavir, and St John's Wort) of CYP3A4 AND
- Member does not have a diagnosis of narcolepsy

Hetlioz (tasimelteon) capsules may be approved for members meeting the following criteria:

- Member is ≥18 years of age and has a documented diagnosis of Non-24-hour sleep wake disorder (Non-24) OR
- Member is ≥16 years of age and has a documented diagnosis of nighttime sleep disturbances in Smith-Magenis syndrome (SMS)
 AND
- The requested medication is being prescribed by a sleep specialist or a practitioner who has sufficient education and experience to safely prescribe tasimelteon

Hetlioz LQ (tasimelteon) oral suspension may be approved for members meeting the following criteria:

• Member is 3 to 15 years of age and has a documented diagnosis of nighttime sleep disturbances in Smith-Magenis Syndrome (SMS)

		 AND the requested medication is being prescribed by a sleep specialist or a practitioner who has sufficient education and experience to safely prescribe tasimelteon. Silenor (doxepin) may be approved for adult members that meet ONE of the following criteria: Member has tried and failed two preferred oral sedative hypnotics (Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) OR Provider attests to the medical necessity of prescribing individual doxepin doses of less than 10 mg, OR Member's age is ≥ 65 years
		Member's age is ≥ 65 years
		Prior authorization will be required for prescribed doses exceeding maximum (Table 1) below.
D 4 1	N D 0	Benzodiazepines
Preferred No PA Required* (Unless age, dose, or duplication criteria apply)	Non-Preferred PA Required DORAL (quazepam) tablet	Non-preferred benzodiazepine sedative hypnotics may be approved for members who have trialed and failed therapy with two preferred benzodiazepine agents (failure is defined as lack of efficacy with a 2-week trial, allergy, intolerable side effects, or significant drug-drug interaction).
Temazepam 15mg, 30mg capsule	Estazolam tablet	Temazepam 22.5 mg may be approved if the member has trialed and failed temazepam 15mg or 30mg AND one other preferred product (failure is defined as lack of efficacy with a 2-week trial, allergy, intolerable side effects, or significant drug-drug interaction).
Triazolam tablet	Flurazepam capsule HALCION (triazolam) tablet	Temazepam 7.5 mg may be approved if provider attests to the medical necessity of prescribing individual temazepam doses of less than 15 mg.
	Quazepam tablet RESTORIL (temazepam) capsule	<u>Children:</u> Prior authorization will be required for all sedative hypnotic agents when prescribed for children < 18 years of age.
	Temazepam 7.5mg, 22.5mg capsule	<u>Duplications:</u> Only one agent in the sedative hypnotic drug class will be approved at a time (concomitant use of agents in the same sedative hypnotic class or differing classes will not be approved).
		All sedative hypnotics will require prior authorization for member's \geq 65 years of age when exceeding 90 days of therapy.
		Members currently stabilized on a non-preferred benzodiazepine medication may receive authorization to continue that medication.
		Prior authorization will be required for prescribed doses exceeding maximum (Table 1).

Dexmethylphenidate IR tablet	DESOXYN (methamphetamine) tablet	Adderall XR, or any other preferred product that can be taken without
Dexmethylphenidate ER capsule	DEXEDRINE (dextroamphetamine) Spansule	the need to swallow a whole capsule.
Guanfacine ER tablet	Dextroamphetamine ER capsule, solution, tablet	SUNOSI (solriamfetol) prior authorization may be approved if member meets the following criteria:
Methylphenidate (generic Methylin/Ritalin) solution,	DYANAVEL XR (amphetamine) suspension	 Member is 18 years of age or older AND Member has diagnosis of either narcolepsy or obstructive sleep apnea (OSA)
tablet	EVEKEO (amphetamine) ODT, tablet	 and is experiencing excessive daytime sleepiness AND Member does not have end stage renal disease AND
Madafinil tablet	FOCALIN (devmethylphenidate) tablet XR cansule	If Sunosi is being prescribed for OSA member has 1 month trial of CDAD AND

If Sunosi is being prescribed for OSA, member has 1 month trial of CPAP AND

FOCALIN (dexmethylphenidate) tablet, XR capsule

Modafinil tablet

VYVANSE ^{BNR}	
(lisdexamfetamine) capsule	

INTUNIV (guanfacine ER) tablet

JORNAY PM (methylphenidate) capsule

Methamphetamine tablet

METHYLIN (methylphenidate) solution

Methylphenidate CD/ER/LA capsule, tablet, chewable tablet, ER tablet (generic Relexxi/Ritalin), ER tablet (generic Concerta), patch

MYDAYIS ER (dextroamphetamine/ amphetamine) capsule

NUVIGIL (armodafinil) tablet

PROCENTRA (dextroamphetamine) solution

PROVIGIL (modafinil) tablet

QELBREE (viloxazine ER) capsule

QUILLICHEW ER (methylphenidate) chewable tablet, XR suspension

RELEXXII (methylphenidate ER) tablet

RITALIN (methylphenidate) IR/ER tablet, ER capsule

STRATTERA (atomoxetine) capsule

SUNOSI (solriamfetol) tablet

VYVANSE (lisdexamfetamine) chewable tablet

WAKIX (pitolisant) tablet

XELSTRYM (dextroamphetamine) patch

ZENZEDI (dextroamphetamine) tablet

 Member has trial and failure[‡] of modafinil AND armodafinil AND one other agent in stimulant PDL class.

WAKIX (pitolisant) prior authorization may be approved if member meets the following criteria:

- Member is 18 years of age or older **AND**
- Member has diagnosis of narcolepsy and is experiencing excessive daytime sleepiness **AND**
- Member does not have end stage renal disease (eGFR <15 mL/minute) **AND**
- Member does not have severe hepatic impairment AND
- Member has trial and failure[‡] of modafinil AND armodafinil AND one other agent in the stimulant PDL class AND
- Member has been counseled that Wakix may reduce the efficacy of hormonal contraceptives and regarding use an alternative non-hormonal method of contraception during Wakix therapy and for at least 21 days after discontinuing treatment.

Maximum Dose (all products): See Table 2

Exceeding Max Dose: Prior authorization may be approved for doses that are higher than the listed maximum dose (Table 2) for members meeting the following criteria:

- Member is taking medication for indicated use listed in Table 1 AND
- Member has 30-day trial and failure[‡] of three different preferred or nonpreferred agents at maximum doses listed in Table 2 **AND**
- Documentation of member's symptom response to maximum doses of three other agents is provided AND
- Member is not taking a sedative hypnotic medication (such as temazepam, triazolam, or zolpidem from the Sedative Hypnotic PDL class).

‡Failure is defined as: lack of efficacy with 4-week trial, allergy, intolerable side effects, or significant drug-drug interaction.

Table 1: Diagnosis and Age Limitations

- Approval for medically accepted indications <u>not</u> listed in Table 1 may be given with prior authorization review and may require submission of peer-reviewed literature or medical compendia showing safety and efficacy of the medication used for the prescribed indication.
- Preferred medications may also receive approval for off-label use for fatigue associated with multiple sclerosis if meeting all other criteria for approval.

• **Bolded drug names are preferred** (subject to preferential coverage changes for brand/generic equivalents)

Bolded drug names are preferred (subject to preferential Drug	l coverage changes for brand/generic equivalents) Diagnosis and Age Limitations			
Stimulants-Immediate Release				
Amphetamine sulfate (EVEKEO)	ADHD (Age ≥ 3 years), Narcolepsy (Age ≥ 6 years)			
Dexmethylphenidate IR (FOCALIN)	ADHD (Age \geq 6 years)			
Dextroamphetamine IR (ZENZEDI)	ADHD (Age 3 to≤ 16 years), Narcolepsy (Age ≥ 6 years)			
Dextroamphetamine solution (PROCENTRA)	ADHD (Age 3 to \leq 16 years), Narcolepsy (Age \geq 6 years)			
Methamphetamine (DESOXYN)	ADHD (Age \geq 6 years)			
methylphenidate IR (generic METHYLIN, RITALIN)	 ADHD (Age ≥ 6 years[†]), Narcolepsy (Age ≥ 6 years), OSA. [†]Prior Authorization for members 3-6 years of age with a diagnosis of ADHD may be approved with prescriber attestation to the following: Member's symptoms have not significantly improved despite adequate behavior interventions AND Member experiences moderate-to-severe continued disturbance in functioning AND Prescriber has determined that the potential benefits of starting methylphenidate before the age of 6 years outweigh the potential harm of delaying treatment. 			
Mixed amphetamine salts IR (generic ADDERALL)	ADHD (Age ≥ 3 years), Narcolepsy (Age ≥ 6 years)			
	Stimulants –Extended-Release			
Amphetamine ER (ADZENYS XR-ODT and ADZENYS ER suspension)	ADHD (Age \geq 6 years)			
Amphetamine ER (DYANAVEL XR)	ADHD (Age \geq 6 years)

Failure is def as lack of efficacy with 4-week trial, allergy, intolerable side effects, significant drugdrug interaction, or documented inability to take alternative dosage form. All other non-preferred products may be approved for members who have trialed and failed one preferred non-oral triptan product AND one preferred oral triptan product. Failure is defined as lack of efficacy with 4-week trial, allergy, intolerable side effects significant drug-drug interactions, documented inability to tolerate dosage form. Quantity Limits: Dihydroergotamine mesylate vial 1mg/mL
Preferred No PA Required (if age and diagnosis criteria are met*) *Adapalene gel	Therapeutic Drug Class: ACNE A Non-Preferred PA Required ACANYA (clindamycin/benzoyl peroxide) gel, pump	medication. Tatological GENTS— Topical -Effective 7/1/2023 Authorization for all acne agents prescribed solely for cosmetic purposes will not be approved. Preferred topical clindamycin and erythromycin products may be approved by AutoP. verification of ICD-10 diagnosis code for acne vulgaris, psoriasis, cystic acne, comedonal acne, disorders of keratinization, neoplasms, folliculitis, hidradenitis
*Adapalene/benzoyl peroxide gel (generic Epiduo)	Adapalene (Pangayi Pangayi da gal pump	suppurativa, or perioral dermatitis (erythromycin only). Approval of preferred topical clindamycin and erythromycin products for other medically accepted indications may

considered following clinical prior authorization review by a call center pharmacist.

All other preferred topical acne agents may be approved if meeting the following criteria:

Adapalene/Benzoyl Peroxide gel pump

ALTRENO (tretinoin) lotion

*Clindamycin phosphate solution, medicated	AMZEEQ (minocycline) foam
swab/pledget	ARAZLO (tazarotene) lotion
*Clindamycin/benzoyl peroxide gel jar (generic Benzaclin)	ATRALIN (tretinoin) gel
*Clindamycin/benzoyl peroxide gel tube (generic Duac)	BENZACLIN (clindamycin/benzoyl peroxide) gel, pump
*Dapsone gel	BENZAMYCIN (erythromycin/benzoyl peroxide) gel
*Erythromycin solution *Erythromycin/Benzoyl	BP (sulfacetamide sodium/sulfur/urea) cleansing wash
peroxide gel (generic Benzamycin)	CLEOCIN (clindamycin) lotion
*Sulfacetamide sodium suspension	CLINDACIN ETZ/PAC (clindamycin phosphate) kit
*RETIN-A ^{BNR} (tretinoin) cream,	Clindamycin phosphate foam, gel, lotion
gel	Clindamycin/Benzoyl peroxide gel pump
	Clindamycin/tretinoin gel
	Dapsone pump
	ERY/ERYGEL (erythromycin/ethanol) gel, medicated swabs/pads
	Erythromycin gel
	EVOCLIN (clindamycin) foam
	FABIOR (tazarotene) foam
	KLARON (sulfacetamide) suspension
	NEUAC (clindamycin/benzoyl peroxide/emollient) kit
	ONEXTON (clindamycin/benzoyl peroxide) gel, ge

pump

- For members > 25 years of age, may be approved following prescriber verification that the medication is not being utilized for cosmetic purposes AND prescriber verification that the indicated use is for acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. These medications are only eligible for prior authorization approval for the aforementioned diagnoses.
- For members ≤ 25 years of age, may be approved for a diagnosis of acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. Diagnosis will be verified through automated verification (AutoPA) of the appropriate corresponding ICD-10 diagnosis code related to the indicated use of the medication.

Non-preferred topical products may be approved for members meeting all of the following criteria:

- Member has trialed/failed three preferred topical products with different mechanisms (such as tretinoin, antibiotic). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Prescriber verification that the medication is being prescribed for one of the following diagnoses: acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne.

	RETIN-A MICRO (tretinoin) (all products)	
	ROSULA (sulfacetamide sodium/sulfur) cloths, wash	
	SSS 10-5 (sulfacetamide sodium/sulfur) foam	
	Sulfacetamide sodium cleanser, cleansing gel, lotion, shampoo, wash	
	Sulfacetamide sodium/sulfur cleanser, cream, pad, suspension, wash	
	SUMADAN/XLT (sulfacetamide sodium/sulfur) kit, wash	
	SUMAXIN/ CP/TS (sulfacetamide sodium/sulfur) kit, pads, suspension, wash	
	Tazarotene cream, foam	
	Tretinoin (all products)	
	Tretinoin microspheres (all products)	
	WINLEVI (clascoterone) cream	
	ZIANA (clindamycin/tretinoin) gel

 Provider has evaluated, and member has received, all age-appropriate vaccinations as recommended by current immunization guidelines prior to initiating treatment with HYFTOR

<u>Initial approval</u>: 6 months

<u>Reauthorization</u>: An additional 6 months may be approved based on provider attestation that symptoms improved during the initial 6 months of treatment and the provider has assessed use of all vaccinations recommended by current immunization guidelines.

Maximum dose: one 10-gram tube/28 days

Veregen (sinecatechins) may be approved if the following criteria are met:

- Member has a diagnosis of external genital and/or perianal warts (Condylomata acuminata) AND
- Member is ≥ 18 years of age AND Member is immunocompetent AND
- Member has tried and failed two preferred products. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Zyclara (imiquimod) **2.5% cream** may be approved if the following criteria are met:

- Member has a diagnosis of clinically typical visible or palpable actinic keratoses (AK) of the full face or balding scalp AND
- Member is \geq 18 years of age AND
- Member is immunocompetent AND
- Member has tried and failed one preferred product in the Antineoplastic Agents class (such as diclofenac gel or fluorouracil) AND the preferred imiquimod (generic Aldara) product. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Zyclara (imiquimod) **3.75% cream** may be approved for:

- Treatment of clinically typical visible or palpable, actinic keratoses (AK) of the full face or balding scalp if the following criteria are met:
 - Member is \geq 18 years of age AND
 - Member is immunocompetent AND
 - Member has tried and failed one preferred product from the Antineoplastic Agents class (such as diclofenac gel or fluorouracil) AND the preferred imiquimod (generic Aldara) product. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

OR

- Treatment of external genital and/or perianal warts (Condylomata acuminata) if the following criteria are met:
 - Member is ≥ 12 years of age AND

No PA Required	PA Required	defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. All other non-preferred products may be approved for members who have trialed and failed all preferred products that are FDA-approved for use for the prescribed indication. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. Quantity Limits: Aldara (imiquimod) cream has a quantity limit of 12 packets/28 days. Th	Therapeutic Drug Class: ANDROGENIC AGENTS, Topical, Injectable, Oral -Effective 10/1/2023		
PA Requ	ired for all agents in this class		
Preferred	Non-Preferred	Hypogonadotropic or Primary Hypogonadism (may be secondary to Klinefelter Syndrome):	
ANDRODERM (testosterone)	ANDROGEL (testosterone) gel packet	Preferred products may be approved for members meeting the following:	
Testosterone cypionate IM injection	ANDROGEL (testosterone) gel 1.62% pump ANDROID (methyltestosterone) capsule	 Member is a male patient ≥ 16 years of age with a documented diagnosis of hypogonadotropic or primary hypogonadism OR ≥ 12 years of age with a diagnosis of hypogonadotropic or hypogonadism secondary to Klinefelter Syndrome (all other diagnoses will require manual review) AND Member has two documented low serum testosterone levels below the lower 	
Testosterone gel packet Testosterone 1.62% gel pump	DEPO-TESTOSTERONE (testosterone cypionate) IM injection FORTESTA (testosterone) gel pump	 limit of normal range for testing laboratory prior to initiation of therapy AND Member does not have a diagnosis of breast or prostate cancer AND If the member is > 40 years of age, has prostate-specific antigen (PSA) < 4 ng/mL or has no palpable prostate nodule AND 	
	METHITEST (methyltestosterone) tablet	 Member has baseline hematocrit < 50% 	

Injectable testosterone cypionate is a pharmacy	Methyltestosterone capsule
benefit when self- administered. Administration	NATESTO (testosterone) nasal spray
in an office setting is a medical benefit.	TESTIM (testosterone) gel
	Testosterone 1% gel tube, 30 mg/1.5 ml pump
	Testosterone enanthate IM injection
	TLANDO (testosterone undecanoate) capsules
	VOGELXO (testosterone) packet, pump
	XYOSTED (testosterone enanthate) SC injection

Reauthorization Criteria (requests for renewal of a currently expiring prior authorization for a preferred product may be approved for members meeting the following criteria):

- Member is a male patient \geq 16 years of age with a documented diagnosis of hypogonadotropic or primary hypogonadism $OR \geq 12$ years of age with a diagnosis of hypogonadotropic or hypogonadism secondary to Klinefelter Syndrome AND
- Serum testosterone is being regularly monitored (at least annually) to achieve total testosterone level in the middle tertile of the normal reference range AND
- Member does not have a diagnosis of breast or prostate cancer AND
- Member has a hematocrit < 54%

Gender Transition/Affirming Hormone Therapy:

Preferred androgenic drugs may be approved for members meeting the following:

- 1. Female sex assigned at birth and has reached Tanner stage 2 of puberty AND
- 2. Is undergoing female to male transition AND
- 3. Has a negative pregnancy test prior to initiation AND
- 4. Hematocrit (or hemoglobin) is being monitored.

Non-Preferred Products:

Non-preferred **topical** androgenic agents may be approved for patients meeting the above criteria with trial and failed; therapy with two preferred topical androgen formulations.

Non-preferred **injectable** androgenic agents may be approved for patients meeting the above criteria with trial and failed! therapy with a preferred injectable androgenic drug.

Prior authorization for **oral** androgen agents (tablet, capsule, buccal) may be approved if member has trialed and failed‡ therapy with a preferred topical agent AND testosterone cypionate injection.

‡Failure is defined as lack of efficacy with 8 week trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction.

For all agents and diagnoses, members < 16 years of age will require a manual prior authorization review by a pharmacist (with exception of members \ge 12 years of age with a diagnosis of hypogonadotropic or hypogonadism secondary to Klinefelter Syndrome).

Therapeutic Drug Class: BONE RESORPTION SUPPRESSION AND RELATED AGENTS - Effective 10/1/2	<i>923</i>

Bisphosphonates		
No PA Required	PA Required	
Alendronate tablet, solution	ACTONEL (risedronate) tablet	Non-preferred bisphosphonates may be approved for members who have failed treatment with one preferred product at treatment dose. Failure is defined as lack of efficacy with a 12-month trial, allergy, intolerable side effects, or significant drug-drug interaction.
Ibandronate tablet	ATELVIA (risedronate) tablet	For members who have a low risk of fracture, discontinuation of bisphosphonate therapy
Risedronate tablet	BONIVA (ibandronate) tablet	and drug holiday should be considered following 5 years of treatment. Low risk is

FOSAMAX (alendronate) tablet FOSAMAX plus D (alendronate/vit D) tal	defined as having a bone mineral density, based on the most recent T-score, of greater than (better than) -2.5 AND no history of low trauma or fragility fracture.
	Non-Bisphosphonates
PA Required	
Calcitonin salmon nasal spray	• Member has a diagnosis of post-menopausal osteoporosis (BMD T-scores of -2.5 or less) AND
FORTEO (teriparatide) SC pen	 Has trial and failure of preferred bisphosphonate for 12 months (failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) OR
Raloxifene tablet	Member cannot swallow solid oral dosage forms or has a feeding tube.
Teriparatide SC pen	Quantity limit: One spray daily
TYMLOS (abaloparatide) SC pen	 RALOXIFENE may be approved if the member meets the following criteria: Diagnosis of postmenopausal osteoporosis (BMD T-scores of -2.5 or less) AND Has trial and failure of preferred bisphosphonate for one year (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) Maximum dose: 60mg daily
	FORTEO (teriparatide) or generic teriparatide may be approved if the member meets the following criteria: • Member has one of the following diagnoses: • Male primary or hypogonadal osteoporosis (BMD T-scores of -2.5 or less). • Osteoporosis due to corticosteroid use • Postmenopausal osteoporosis AND • Member is at very high risk for fracture* OR member has history of trial and failure of a
	preferred bisphosphonate for one year. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND • For brand FORTEO, member has trialed and failed generic teriparatide. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND • Prior authorization will be given for one year and total exposure of parathyroid hormone analogs (Forteo and Tymlos) shall not exceed two years Maximum dose: 20mcg daily TYMLOS (abaloparatide) may be approved if the member meets the following criteria:

Member has a diagnosis of postmenopausal osteoporosis (BMD T-scores of -2.5 or less)
 AND

• Member is post-menopausal with very high risk for fracture* OR member has history of trial and failure of a preferred bisphosphonate for one year (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) **AND**

• Prior authorization will be given for one year and total exposure of parathyroid hormone analogs (Forteo and Tymlos) shall not exceed two years.

Maximum dose: 80 mcg daily

All other non-preferred non-bisphosphonates may be approved for members who have failed treatment with one preferred bisphosphonate product at treatment dose. Failure is defined as lack of efficacy with a 12-month trial, allergy, unable to use oral therapy, intolerable side effects, or significant drug-drug interaction.

*Members at very high risk for fracture: Members will be considered at very high risk for fracture if they meet one of the following:

- A history of fracture within the past 12 months **OR**
- Fractures experienced while receiving guideline-supported osteoporosis therapy **OR**
- A history of multiple fractures **OR**
- A history of fractures experienced while receiving medications that cause skeletal harm (such as long-term glucocorticoids) **OR**
- A very low T-score (less than -3.0) **OR**
- A high risk for falls or a history of injurious falls **OR**
- A very high fracture probability by FRAX (> 30% for a major osteoporosis fracture or > 4.5% for hip fracture)

Note: Prior authorization criteria for Prolia (denosumab) and other injectable bone resorption and related agents are listed on Appendix P.

Therapeutic Drug Class: **CONTRACEPTIVES - Topical** *Effective* 10/1/2023

Effective 01/14/22, topical contraceptive patch products are eligible for coverage with a written prescription by an enrolled pharmacist. Additional information regarding pharmacist enrollment can be found at https://hcpf.colorado.gov/pharm-serv.

No PA Required	PA Required	
ANNOVERA (segesterone acetate/EE) vaginal ring	ELURYNG (Etonorgestrel/EE) vaginal ring	Non-preferred topical contraceptive products may be approved following a trial and failure of one preferred topical contraceptive product. Failure is defined as lack of
NUVARING ^{BNR}	Etonorgestrel/EE vaginal ring	efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
(etonorgestrel/EE) vaginal ring	Haloette vaginal ring	Effective 7/1/2022: Prescriptions are eligible to be filled for up to a twelve-month
	ZAFEMY (norelgestromin/EE) TD patch	supply.

Therapeutic Drug Class: BILE SALTS -Effective 7/1/2023		
No PA Required	PA Required	Chenodal (chenodiol) and Actigall (ursodiol) may be approved for members who meet
		the following criteria:
Ursodiol capsule	BYLVAY (odevixibat) capsule, pellet	 Member is ≥ 18 years of age AND
Ursodiol tablet	CHENODAL (chenodiol) tablet	 Member has tried and failed therapy with a 12-month trial of a preferred ursodiol product (failure is defined as lack of efficacy, allergy, intolerable side effects or
	CHOLBAM (cholic acid) capsule	significant drug-drug interactions).
	LIVMARLI (maralixibat) solution	 Cholbam (cholic acid) may be approved for members who meet the following criteria: Bile acid synthesis disorders:
	OCALIVA (obeticholic acid) tablet	 Member age must be greater than 3 weeks old AND Member has a diagnosis for bile acid synthesis disorder due to single
	RELTONE (ursodiol) capsule	enzyme defect (Single Enzyme-Defect Disorders: Defective sterol nucleus synthesis, 3β-hydroxy-Δ-c27-steroid oxidoreductase deficiency,
	URSO (ursodiol) tablet	AKR1D1 deficiency, CYP7A1 deficiency, Defective side-chain synthesis, CYP27A1 deficiency (cerebrotendinous xanthomatosis), 2-
	URSO FORTE (ursodiol) tablet	methylacyl-CoA racemase deficiency (AMACR), 25-hydroxylation pathway (Smith–Lemli-Opitz).
		 Peroxisomal disorder including Zellweger spectrum disorders:
		 Member age must be greater than 3 weeks old AND
		 Member has diagnosis of peroxisomal disorders (PDs) including
		Zellweger spectrum disorders AND

 Member has manifestations of liver disease, steatorrhea or complications from decreased fat-soluble vitamin absorption.

Ocaliva (obeticholic acid) may be approved for members meeting the following criteria:

- Member is \geq 18 years of age AND
- Medication is prescribed by or in consultation with a gastroenterologist, hepatologist, or liver transplant provider AND
- Member has the diagnosis of primary biliary cholangitis without cirrhosis OR a diagnosis of primary biliary cholangitis with compensated cirrhosis with no evidence of portal hypertension AND
- Member has failed treatment with a preferred ursodiol product for at least 6 months due to an inadequate response, intolerable side effects, drug-drug interaction, or allergy to preferred ursodiol formulations.

Reltone (ursodiol) may be approved for members meeting the following criteria:

- Member is \geq 18 years of age AND
- The requested medication is prescribed by or in consultation with a gastroenterologist, hepatologist, or liver transplant provider AND
- The requested medication is being prescribed for one of the following:
 - Treatment of radiolucent, noncalcified gallbladder stones < 20 mm in greatest diameter AND elective cholecystectomy would be undertaken except for the presence of increased surgical risk due to systemic disease, advanced age, idiosyncratic reaction to general anesthesia, or for those patients who refuse surgery OR
 - Prevention of gallstone formation in obese patients experiencing rapid weight loss

AND

- No compelling reasons for the member to undergo cholecystectomy exist, including unremitting acute cholecystitis, cholangitis, biliary obstruction, gallstone pancreatitis, or biliary-gastrointestinal fistula, **AND**
- Member has trialed and failed treatment with a preferred ursodiol product for at least 6 months due to an inadequate response, intolerable side effects, drug-drug interaction, or allergy to inactive ingredients contained in the preferred ursodiol formulations.

Initial approval: 1 year

<u>Reauthorization:</u> May be reauthorized for 1 additional year with provider attestation that partial or complete stone dissolution was observed after completion of the initial year of Reltone therapy. Maximum cumulative approval per member is 24 months.

Urso (ursodiol) and **Urso Forte** (ursodiol) may be approved for members meeting the following criteria:

- Member is \geq 18 years of age AND
- Medication is prescribed by or in consultation with a gastroenterologist, hepatologist, or liver transplant provider AND

		Member has the diagnosis of Primary Biliary Cholangitis as evidenced by two
		of the following at the time of diagnosis:
		 Requests for drug products that are FDA-indicated for the treatment of nonalcoholic steatohepatitis (NASH) may be approved if meeting the following: A diagnosis of NASH has been confirmed through liver biopsy AND Member meets the FDA-labeled minimum age requirement for the prescribed product AND Member does not have significant liver disease other than NASH, AND The requested medication is being prescribed for use for the FDA-labeled indication and as outlined in product package labeling AND Medication is prescribed by or in consultation with a gastroenterologist, hepatologist, or liver transplant provider. Non-preferred products prescribed for FDA-labeled indications not identified above may receive approval for use as outlined in product package labeling.
	Therapeutic Drug Class: ANTLI	EMETICS, Oral -Effective 7/1/2023
No PA Required	PA Required	ETTES, Oral -Lijective 7/1/2025
DICLEGIS DR ^{BNR} tablet (doxylamine/pyridoxine)	AKYNZEO (netupitant/palonosetron) capsule ANTIVERT (meclizine) 50 mg tablet	Emend (aprepitant) TriPack or Emend (aprepitant) powder kit may be approved following trial and failure of two preferred products AND Emend (aprepitant) <u>capsule</u> . Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.
Meclizine (Rx) 12.5 mg, 25 mg tablet	Aprepitant capsule, tripack	Doxylamine/pyridoxine tablet (generic) or Bonjesta (doxylamine/pyridoxine) may be approved for 9 months if meeting the following criteria:
Metoclopramide solution, tablet	BONJESTA ER (doxylamine/pyridoxine) tablet	Member has nausea and vomiting associated with pregnancy AND
Ondansetron ODT, tablet	Doxylamine/pyridoxine tablet (generic Diclegis)	Member has trialed and failed DICLEGIS DR tablet AND one of the following (failure is defined as lack of efficacy with a 7-day trial, allergy, intolerable side offects, or significant drug drug interaction).
Ondansetron oral suspension/ solution	Dronabinol capsule	effects, or significant drug-drug interaction): o Antihistamine (such as diphenhydramine, dimenhydrinate, meclizine) OR
Prochlorperazine tablet	EMEND (aprepitant) capsule, powder for suspension, dose/tri-pack Granisetron tablet	 Dopamine antagonist (such as metoclopramide, prochlorperazine, promethazine) OR Serotonin antagonist (ondansetron, granisetron)

Promethazine syrup, tablet		
Trimethobenzamide capsule	MARINOL (dronabinol) capsule	All other non-preferred products may be approved for members who have trialed and failed treatment with two preferred products. Failure is defined as lack of efficacy with
Trimethobenzamide capsule	Metoclopramide ODT	14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.
	REGLAN (metoclopramide) tablet	Dronabinol prior authorization may be approved for members meeting above non-
	TIGAN (trimethobenzamide) capsule	preferred criteria OR via AutoPA for members with documented HIV diagnosis.
		Promethazine product formulations require prior authorization for members < 2 years of
	ZOFRAN (ondansetron) tablet	age due to risk of fatal respiratory depression.
	<u>, </u>	IETICS, Non-Oral -Effective 7/1/2023

		glycol, docusate or bisacodyl, for example). OR If the member cannot take oral medications, then the member must fail a 7-day trial with a nonphosphate enema
	SYMPROIC (naldemedine) tablet	glycol, docusate or bisacodyl, for example). OR If the member cannot take oral medications, then the member must fail a 7-day trial with a nonphosphate enema (docusate or bisacodyl enema). Failure is defined as a lack of efficacy for a 7-day trial, allergy, intolerable side effects, contraindication to, or significant drugdrug interaction AND • For indication of IBS-D, must have documentation of adequate trial and failure
	SYMPROIC (naldemedine) tablet TRULANCE (plecanatide) tablet	glycol, docusate or bisacodyl, for example). OR If the member cannot take oral medications, then the member must fail a 7-day trial with a nonphosphate enema (docusate or bisacodyl enema). Failure is defined as a lack of efficacy for a 7-day trial, allergy, intolerable side effects, contraindication to, or significant drugdrug interaction AND

Non-preferred agents may be approved if the member meets the following criteria:

- Member meets all listed criteria for preferred agents **AND**
- Member has trialed and failed two preferred agents OR if the indication is OIC caused by methadone, then a non-preferred agent may be approved after an adequate trial of MOVANTIK (naloxegol). Failure is defined as a lack of efficacy for a 7-day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction **AND**
- If prescribed Viberzi (eluxadoline) or Lotronex (alosetron), member meets the additional criteria for those agents listed below.

VIBERZI (**eluxadoline**) may be approved for members who meet the following additional criteria:

- Diagnosis of Irritable Bowel Syndrome Diarrhea (IBS-D) **AND**
- Member has a gallbladder **AND**
- Member does not have severe hepatic impairment (Child-Pugh C), history of severe constipation, known mechanical gastrointestinal obstruction, biliary duct obstruction, history of pancreatitis or structural disease of the pancreas AND
- Member does not drink more than 3 alcoholic drinks per day

LOTRONEX (alosetron) and generic alosetron may be approved for members who meet the following additional criteria:

- Member is a female with Irritable Bowel Syndrome Diarrhea (IBS-D) with symptoms lasting 6 months or longer **AND**
- Member does not have severe hepatic impairment (Child-Pugh C), history of severe constipation or ischemic colitis, hypercoagulable state, Crohn's disease or ulcerative colitis, or known mechanical gastrointestinal obstruction.

Medication	FDA approved indication	FDA Max Dose
Amitiza (lubiprostone)	IBS-C (females only), CIC, OIC (not caused by methadone)	48mcg/day
Linzess (linaclotide)	IBS-C, CIC	290mcg/day
Movantik (naloxegol)	OIC	25mg/day
Viberzi (eluxadoline)	IBS-D	200mg/day
Relistor subcutaneous injection (methylnaltrexone)	OIC	12mg/day
Relistor oral (methylnaltrexone)	OIC	450mg/day
Lotronex (alosetron)	IBS-D (females only)	2mg/day (females only)
Symproic (Naldemedine)	OIC	0.2mg/day
Trulance (plecanatide)	CIC, IBS-C	3mg/day
Motegrity (prucalopride)	CIC	2mg/day

CIC – chronic idiopathic constipation, OIC – opioid induced constipation, IBS – irritable bowel syndrome, D – diarrhea	ı predominant,
C – constipation predominant

Prior authorization for non-preferred oral formulations will require trial and failure of two preferred oral products with different active ingredients AND one preferred rectal product. If inflammation is not within reach of topical therapy, trial of preferred rectal product is not required. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Uceris (budesonide) tablet: Prior authorization may be approved following trial and failure of one preferred oral product AND one preferred rectal product. If inflammation is not within reach of topical therapy, trial of preferred rectal product is not required. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drugdrug interaction. Approval will be placed for 8 weeks. Further prior authorization may be approved if 7 days of steroid-free time has elapsed and member continues to meet the above criteria.

Therapeutic Drug Class: NON-BIOLOGIC ULCERATIVE COLITIS AGENTS- Rectal -Effective 7/1/2023

No PA Required	PA Required	Prior authorization for non-preferred rectal formulations will require trial and failure of
Mesalamine suppository	CANASA (mesalamine) suppository	one preferred rectal formulation and one preferred oral formulation (Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction).
Mesalamine 4gm/60 ml enema (generic SF ROWASA)	Mesalamine enema, kit	Uceris (budesonide) foam: If the above criteria are met, Uceris (budesonide) foam prior authorization may be approved for 6 weeks. Further prior authorization may be approved
	ROWASA/SF ROWASA enema, kit (mesalamine)	if 7 days of steroid-free time has elapsed, and member continues to meet the above criteria.
	UCERIS (budesonide) foam	Citicina.

VIII. Hematological

Inerapeutic Drug Class: ANTICOAGULANTS- Oral -Effective //1/2023			
No PA Required	PA Required		
FIJOUIG ('1) (-1-1-(D.L. days and L.	SAVAYSA (edoxaban) may be approved if all the following criteria have been met:	
ELIQUIS (apixaban) tablet	Dabigatran capsule	The member has failed therapy with two preferred agents. (Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug	
PRADAXA ^{BNR} (dabigatran)	PRADAXA (dabigatran) pellet	interaction) AND	
capsule		 Member is not on dialysis AND 	
	SAVAYSA (edoxaban) tablet	• Member does not have CrCl > 95 mL/min AND	
Warfarin tablet		The member has a diagnosis of deep vein thrombosis (DVT), pulmonary	
	XARELTO (rivaroxaban) 2.5 mg tablet	embolism (PE) OR	
		The member has a diagnosis of non-valvular atrial fibrillation AND	

XARELTO (rivaroxaban)	XARELTO (rivaroxaban) oral suspension	The member does not have a mechanical prosthetic heart valve
10 mg, 15 mg, 20 mg tablet, dose pack		 XARELTO 2.5mg (rivaroxaban) may be approved for members meeting all of the following criteria: Xarelto 2.5mg is being prescribed to reduce major CV events in members diagnosis of chronic coronary artery disease (CAD) or peripheral artery disease AND Xarelto 2.5mg is being taken twice daily and in combination with aspirin 75-100mg daily AND Member must not be receiving dual antiplatelet therapy, other non-aspirin antiplatelet therapy, or other oral anticoagulant AND Member must not have had an ischemic, non-lacunar stroke within the past month AND Member must not have had a hemorrhagic or lacunar stroke at any time XARELTO (rivaroxaban) oral suspension may be approved without prior authorization for members <18 years of age who require a rivaroxaban dose of less than 10 mg OR with prior authorization verifying the member is unable to use the solid oral dosage form. All other non-preferred oral agents require trial and failure of two preferred oral agents. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drugdrug interaction. Continuation of Care: Members with current prior authorization approval on file for a non-preferred oral anticoagulant medication may continue to receive approval for that
		medication
	Therapeutic Drug Class: ANTICOAGU	ULANTS- Parenteral -Effective 7/1/2023
No PA Required	PA Required	Non-preferred parenteral anticoagulants may be approved if member has trial and failure
Enoxaparin syringe	ARIXTRA (fondaparinux) syringe	of one preferred parenteral agent. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction
Enoxaparin vial	Fondaparinux syringe FRAGMIN (dalteparin) vial, syringe LOVENOX (enoxaparin) syringe, vial	 ARIXTRA (fondaparinux) may be approved if the following criteria have been met: Member is 18 years of age or older AND Member has a CrCl > 30 ml/min AND Member weighs > 50 kg AND Member has a documented history of heparin induced-thrombocytopenia OR Member has a contraindication to enoxaparin
		Members currently stabilized on fondaparinux (Arixtra) or dalteparin (Fragmin) may receive prior authorization approval to continue receiving that medication.
	Therapeutic Drug Class: ANTI-	PLATELETS -Effective 7/1/2023

No PA Required Aspirin/dipyridamole ER capsule BRILINTA (tigacrelor) tablet Cilostazol tablet Clopidogrel tablet Dipyridamole tablet Pentoxifylline ER tablet Prasugrel tablet	PA Required EFFIENT (prasugrel) tablet PLAVIX (clopidogrel) tablet ZONTIVITY (vorapaxar) tablet	Zontivity (vorapaxar) may be approved for patients with a diagnosis of myocardial infarction or peripheral artery disease without a history of stroke, transient ischemic attack, intracranial bleeding, or active pathological bleeding. Patients must also be taking aspirin and/or clopidogrel concomitantly. Non-preferred products without criteria will be reviewed on a case-by-case basis.
DA D		IMULATING FACTORS -Effective 7/1/2023
PA Requi	ired for all agents in this class* Non-Preferred	*Prior authorization for preferred agents may be approved if meeting the following
NEUPOGEN (filgrastim) vial, syringe NYVEPRIA (pegfilgrastimapgf) syringe	FULPHILA (pegfilgrastim-jmdb) syringe GRANIX (tbo-filgrastim) syringe, vial LEUKINE (sargramostim) vial NEULASTA (pegfilgrastim) kit, syringe NIVESYM (filgrastim-aafi) syringe, vial RELEUKO (filgrastim-ayow) syringe, vial	 criteria: Medication is being used for one of the following indications: Patient with cancer receiving myelosuppressive chemotherapy –to reduce incidence of infection (febrile neutropenia) (Either the post nadir ANC is less than 10,000 cells/mm3 or the risk of neutropenia for the member is calculated to be greater than 20%) Acute Myeloid Leukemia (AML) patients receiving chemotherapy Bone Marrow Transplant (BMT) Peripheral Blood Progenitor Cell Collection and Therapy Hematopoietic Syndrome of Acute Radiation Syndrome Severe Chronic Neutropenia (Evidence of neutropenia infection exists or ANC is below 750 cells/mm3)
	UDENYCA (pegfilgrastim-cbqv) syringe ZARXIO (filgrastim-sndz) syringe ZIEXTENZO (pegfilgrastim-bmez) syringe	 For Nyvepria (pegfilgrastim-apgf), the member meets the following criteria: Member has trial and failure of Neupogen. Failure is defined as lack of efficacy, intolerable side effects, drug-drug interaction, or contraindication to Neupogen therapy. Trial and failure of Neupogen will not be required if meeting one of the following:

Prior authorization for non-preferred agents may be approved if meeting the following criteria:

interventions.

 Member has limited access to caregiver or support system for assistance with medication administration OR

Member has inadequate access to healthcare facility or home care

		Medication is being used for one of the following indications: Patient with cancer receiving myelosuppressive chemotherapy –to reduce incidence of infection (febrile neutropenia) (Either the post nadir ANC is less than 10,000 cells/mm3 or the risk of neutropenia for the member is calculated to be greater than 20%) Acute Myeloid Leukemia (AML) patients receiving chemotherapy Bone Marrow Transplant (BMT) Peripheral Blood Progenitor Cell Collection and Therapy Hematopoietic Syndrome of Acute Radiation Syndrome Severe Chronic Neutropenia (Evidence of neutropenia infection exists or ANC is below 750 cells/mm3) AND Member has history of trial and failure of Neupogen AND one other preferred agent. Failure is defined as a lack of efficacy with a 3-month trial, allergy, intolerable side effects, significant drug-drug interactions, or contraindication to therapy. Trial and failure of Neupogen will not be required if meeting one of the following: Member has limited access to caregiver or support system for assistance with medication administration OR Member has inadequate access to healthcare facility or home care interventions.
7	Therapeutic Drug Class: ERYTHROPOIESIS	STIMULATING AGENTS Effective 7/1/2023
	red for all agents in this class*	*Prior Authorization is required for all products and may be approved if meeting the
Preferred	Non-Preferred	following:

 For any non-preferred product, member has trialed and failed treatment with one preferred product. Failure is defined as lack of efficacy with a 6-week trial, allergy, intolerable side effects, or significant drug-drug interaction.
†Hemoglobin results must be from the last 30 days.

		†Hemoglobin results must be from the last 30 days.

BAFIERTAM (monomethyl fumarate DR) capsule

EXTAVIA (interferon beta 1b) kit, vial

GLATOPA (glatiramer) injection

Glatiramer 20mg, 40mg injection

GILENYA (fingolimod) 0.5 mg capsule

MAVENCLAD (cladribine) tablet

MAYZENT (siponimod) tablet, pack

PLEGRIDY (peg-interferon beta 1a) syringe, pen

PONVORY (ponesimod) tablet, pack

REBIF (interferon beta 1a) syringe

TECFIDERA (dimethyl fumarate) tablet, pack

VUMERITY (diroximel DR) capsule

ZEPOSIA (ozanimod) capsule, kit

*Kesimpta (ofatumumab) may be approved if member has trialed and failed treatment with one preferred agent (failure is defined as intolerable side effects, contraindication to therapy, drug-drug interaction, or lack of efficacy).

Non-Preferred Products:

Non-preferred products may be approved if meeting the following:

- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Member has previous trial and failure with three preferred agents. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drugdrug interaction AND
- Prescribed dose does not exceed the maximum FDA-approved dose for the medication being ordered AND
- If indicated in the product labeling, a negative pre-treatment pregnancy test has been documented. AND
- If indicated in the product labeling, an ophthalmologic examination has been performed and documented prior to medication initiation, AND
- The request meets additional criteria listed for any of the following:

Mayzent (siponimod):

- Member has no evidence of relapse in the 3 months preceding initiation of therapy AND
- Member has previous trial and failure of three preferred agents, one of which must be Gilenya (fingolimod). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Mavenclad (cladribine):

- Member has history of ≥ 1 relapse in the 12 months preceding initiation of therapy AND
- Member has previous trial and failure of three other therapies for relapsing forms of multiple sclerosis (failure is defined as lack of efficacy with 3-month trial, allergy, intolerable side effects, or significant drug-drug interactions)

Vumerity (diroximel fumarate) or Bafiertam (monomethyl fumarate DR):

- Member has previous trial and failure of three preferred agents, one of which must be Tecfidera (dimethyl fumarate). Failure is defined as lack of efficacy, allergy, significant drug-drug interactions, intolerable side effects (if GI adverse events, must meet additional criteria below) AND
- If the requested medication is being prescribed due to GI adverse events with Tecfidera therapy (and no other reason for failure of Tecfidera is given), then the following additional criteria must be met:
 - Member has trialed a temporary dose reduction of Tecfidera (with maintenance dose being resumed within 4 weeks) AND
 - o Member has trialed taking Tecfidera with food AND

		 GI adverse events remain significant despite maximized use of gastrointestinal symptomatic therapies (such as calcium carbonate, bismuth subsalicylate, PPIs, H2 blockers, anti-bloating/anti-constipation agents, anti-diarrheal, and centrally acting anti-emetics) AND Initial authorization will be limited to 3 months. Continuation (12-month authorization) will require documentation of clinically significant reduction in GI adverse events. Members currently stabilized on a preferred second line (Kesimpta) or non-preferred product (may receive approval to continue therapy with that agent.
	Symptom Mana	agement Therapies
No PA Required Dalfampridine ER tablet	PA Required AMPYRA ER (dalfampridine) tablet	Non-preferred products may be approved with prescriber attestation that there is clinical rationale supporting why the preferred brand/generic equivalent product formulation is unable to be used. *TALTZ (ixekizumab)	HULIO (adalimumab-fkjp) syringe	 COSENTYX (secukinumab) may receive approval for: FDA-labeled indications following trial and failure; of all indicated preferred agents OR
XELJANZ IR (tofacitinib) tablet	HYRIMOZ (adalimumab-adaz) pen, syringe	 Treatment of enthesitis-related arthritis if meeting the following: Member is ≥ 4 years of age and weighs ≥ 15 kg AND
	IDACIO (adalimumab-aacf) pen, syringe	o memori is _ 1 years of age and weights _ 15 kg min

ILARIS (canakinumab) vial

KINERET (anakinra) syringe

OLUMIANT (baricitinib) tablet

ORENCIA (abatacept) clickject, syringe

RINVOQ (upadacitinib) tablet

SIMPONI (golimumab) pen, syringe

XELJANZ (tofacitinib) solution

XELJANZ XR (tofacitinib ER) tablet

YUFLYMA (adalimumab-aaty) auto-injector

YUSIMRY (adalimumab-aqvh) pen

Note: Product formulations in the physician administered drug (PAD) category are located on Appendix P

 Member has had trialed and failed! NSAID therapy AND ENBREL AND HADLIMA/HUMIRA

KINERET (anakinra) may receive approval for:

- FDA-labeled indications following trial and failure; of HADLIMA/HUMIRA **OR** ENBREL AND XELJANZ IR **OR**
- Treatment of systemic juvenile idiopathic arthritis (sJIA) or Adult-Onset Still's Disease (AOSD)

ILARIS (canakinumab) may receive approval if meeting the following:

- Medication is being prescribed for systemic juvenile idiopathic arthritis (sJIA) or Adult-Onset
 Still's Disease (AOSD), AND
- Member has trialed and failed: ACTEMRA (tocilizumab)

XELJANZ (**tofacitinib**) **XR** approval will require verification of the clinically relevant reason for use of the XELJANZ XR formulation versus the XELJANZ IR formulation, in addition to meeting non-preferred criteria listed below.

XELJANZ (tofacitinib) oral solution may be approved when the following criteria are met:

- Member has a diagnosis of polyarticular course juvenile idiopathic arthritis (pJIA) who require a weight-based dose for <40 kg following trial and failure; of HADLIMA/HUMIRA OR ENBREL OR
- Member cannot swallow a tofacitinib tablet

All other non-preferred agents may receive approval for FDA-labeled indications following trial and failure; of all preferred agents that are FDA-indicated or have strong evidence supporting use for the prescribed indication from clinically recognized guideline compendia (only one preferred adalimumab product trial required).

Non-preferred agents that are being prescribed per FDA-label to treat non-radiographic axial spondyloarthritis (nr-axSpA) will require trial and failure; of preferred agents that are FDA-labeled for treating an axial spondyloarthritis condition, including ankylosing spondylitis (AS) or nr-axSpA.

Members currently taking COSENTYX or XELJANZ oral solution may receive approval to continue on that agent.

‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction. Note that trial and failure of preferred TNF inhibitors will not be required when prescribed to treat polyarticular juvenile idiopathic arthritis (pJIA) in members with documented clinical features of lupus.

		The Department would like to remind providers that many products are associated with patient-centered programs that are available to assist with drug administration, education, and emotional support related to our members' various disease states.
		Arthritis

	YUFLYMA (adalimumab-aaty) auto-injector YUSIMRY (adalimumab-aqvh) pen Note: Product formulations in the physician administered drug (PAD) category are located on Appendix P	 Prior authorization approval may be given for an initial 16-week supply and authorization approval for continuation may be provided based on clinical response. XELJANZ (tofacitinib) XR approval will require verification of the clinically relevant reason for use of the XELJANZ XR formulation versus the XELJANZ IR formulation, in addition to meeting non-preferred criteria listed below. All other non-preferred agents may receive approval for FDA-labeled indications if meeting the following: The requested medication is being prescribed for treating moderately-to-severely active Crohn's disease or moderately-to-severely active Ulcerative Colitis in alignment with indicated use outlined in FDA-approved product labeling AND The requested medication meets FDA-labeled indicated age for prescribed use AND For treatment of moderately-to-severely active Crohn's disease, member has trial and failure‡ of one preferred adalimumab product OR for treatment of moderately-to-severely active ulcerative colitis, member has trial and failure‡ of one preferred adalimumab product and XELJANZ IR. Members currently taking COSENTYX may receive approval to continue on that agent. ‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction. Note that trial and failure of Xeljanz IR will not be required when prescribed for ulcerative colitis for members ≥ 50 years of age that have an additional CV risk factor. The Department would like to remind providers that many products are associated with
		patient-centered programs that are available to assist with drug administration, education, and emotional support related to our members' various disease states.
		thma
Preferred PA Required (*Must meet eligibility criteria)	Non-Preferred PA Required	*Preferred products (Dupixent, Fasenra, Tezspire, Xolair) may receive approval if meeting the following: DUPIXENT (dupilumab):
*DUPIXENT (dupilumab) pen, syringe *FASENRA (benralizumab) pen *TEZSPIRE (tezepelumabekko) pen	NUCALA (mepolizumab) auto-injector, syringe Note: Product formulations in the physician administered drug (PAD) category are located on Appendix P	 Member is 6 years of age or older AND Member has an FDA-labeled indicated use for treating one of the following: Moderate to severe asthma (on medium to high dose inhaled corticosteroid and a long-acting beta agonist) with eosinophilic phenotype based on a blood eosinophil level of ≥ 150/mcL OR Oral corticosteroid dependent asthma AND

*XOLAIR (omalizumab) syringe

- Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND
- Medication is being prescribed as add-on therapy to existing asthma regimen.

Quantity Limit: 2 syringes every 28 days after initial 14 days of therapy (first dose is twice the regular scheduled dose)

TEZSPIRE (tezepelumab-ekko):

- Member is ≥ 12 years of age **AND**
- Member has a diagnosis of severe asthma AND
- Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND
- The requested medication is being prescribed as add-on therapy to existing asthma regimen.

Quantity Limit: Four 210 mg unit dose packs every 28 days

XOLAIR (omalizumab) syringe:

- Member is \geq 6 years of age **AND**
- Member has an FDA-labeled indicated use for treating asthma AND
- Member has a positive skin test or in vitro reactivity to a perennial inhaled allergen or has a pre-treatment IgE serum concentration ≥ 30 IU/mL **AND**
- Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND
- The requested medication is being prescribed as add-on therapy to existing asthma regimen.

Quantity Limit:

- 300 mg: Four unit dose packs every 28 days
- All other strengths: Two unit dose packs of the same mg strength every 28 days

FASENRA (benralizumab):

- Member is ≥ 12 years of age **AND**
- Member has an FDA-labeled indicated use for treating severe asthma with an eosinophilic phenotype based on a blood eosinophil level of ≥ 150/mcL **AND**
- Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies **AND**
- The requested medication is being prescribed as add-on therapy to existing asthma regimen.

Quantity Limit: One 30 mg unit dose pack every 28 days for the first 3 doses and then every 8 weeks thereafter

Non-Preferred Agents:

Non-preferred FDA-indicated biologic agents for asthma may receive approval if meeting the following:

• The requested medication is being prescribed for treating asthma in align

- The requested medication is being prescribed for treating asthma in alignment with indicated use outlined in FDA-approved product labeling (including asthma type and severity) **AND**
- If prescribed for use for asthma with eosinophilic phenotype, member has a blood eosinophil count ≥ 150 cells/mcL **AND**
- The requested medication meets FDA-labeled indicated age for prescribed use
 AND
- Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND
- The requested medication is being prescribed as add-on therapy to existing asthma regimen **AND**
- Member has trialed and failed‡ two preferred agents.

Quantity Limits:

Non-preferred medications will be subject to quantity limitations in alignment with FDA-approved dosing per product package labeling.

Nucala (**mepolizumab**) is limited to 100mg every 4 weeks (members \geq 12 years of age) or 40mg every 4 weeks (members 6-11 years of age).

‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.

Members currently taking a preferred agent may receive approval to continue therapy with that agent.

Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with the prescribed agent.

Atopic Dermatitis

(*Must meet eligibility criteria)

Preferred

*ADBRY (tralokinumab-ldrm) syringe

*DUPIXENT (dupilumab) pen, syringe

Non-Preferred PA Required

CIBINQO (abrocitinib) tablet

RINVOQ (upadacitinib) tablet

Note: Product formulations in the physician administered drug (PAD) category are located on <u>Appendix P</u>

*Preferred products (Adbry and Dupixent) may receive approval if meeting the following:

ADBRY (tralokinumab-ldrm):

- The requested drug is being prescribed for moderate-to-severe atopic dermatitis
 AND
- Member has trialed and failed‡ the following agents:
 - One medium potency to very-high potency topical corticosteroid (such as mometasone furoate, betamethasone dipropionate) **AND**
 - One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)

Maximum Dose: 600 mg/2 weeks

Quantity Limit: Four 150 mg/mL prefilled syringes/2 weeks

Approval: One year

DUPIXENT (dupilumab):

- Member has a diagnosis of moderate to severe atopic dermatitis AND
- Member has trialed and failed‡ the following agents:
 - One medium potency to very-high potency topical corticosteroid [such as mometasone furoate, betamethasone dipropionate, or fluocinonide (see PDL for list of preferred products) AND
 - One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)

Quantity Limit: 2 syringes every 28 days after initial 14 days of therapy (first dose is twice the regular scheduled dose)

Approval: One year

Non-Preferred Agents:

Non-preferred agents indicated for the treatment of atopic dermatitis may receive approval if meeting the following:

- Member has a diagnosis of moderate to severe chronic atopic dermatitis AND
- Member has trialed and failed; therapy with two preferred agents for the prescribed indication AND
- Member has trialed and failed‡ the following agents:
 - One medium potency to very-high potency topical corticosteroid (such as mometasone furoate, betamethasone dipropionate, or fluocinonide)
 - One topical calcineurin inhibitor (such as pimecrolimus and tacrolimus)

AND

• The medication is being prescribed by or in consultation with a dermatologist, allergist, immunologist, or rheumatologist.

Approval: One year

‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.

Members currently taking a preferred agent may receive approval to continue therapy with that agent.

Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with the prescribed agent.

rhinosinusitis with nasal polyps (CRSwNP) in adult patients 18 years of age and older with inadequate response to nasal corticosteroids AND Member has tried and failed‡ therapy with at least two intranasal corticosteroid regimens Chronic Idiopathic Urticaria (CIU): Member is 12 years of age or older AND Member is diagnosed with chronic idiopathic urticaria AND Member is symptomatic despite H1 antihistamine treatment AND Member has tried and failed: at least three of the following: High-dose second generation H1 antihistamine H2 antihistamine o First-generation antihistamine Leukotriene receptor antagonist Hydroxyzine or doxepin (must include) **AND** Prescriber attests that the need for continued therapy will be periodically reassessed (as the appropriate duration of Xolair therapy for CIU has currently not been evaluated). All other preferred agents (HADLIMA, HUMIRA, ENBREL, OTEZLA, KEVZARA) may receive approval for use for FDA-labeled indications. **Non-Preferred Agents: ARCALYST** (**rilonacept**) may receive approval if meeting the following: Medication is being prescribed for one of the following autoinflammatory periodic fever syndromes (approval for all other indications is subject to meeting non-preferred criteria listed below): o Cryopyrin-associated Autoinflammatory Syndrome (CAPS), including: Familial Cold Autoinflammatory Syndrome (FCAS) Muckle-Wells Syndrome (MWS) Maintenance of remission of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) in adults and pediatric patients weighing at least 10

prescribed indication:

Chronic Rhinosinusitis with Nasal Polyps:

Member is 18 years of age or older **AND**

*XOLAIR (omalizumab) may receive approval if meeting the following based on

Medication is being prescribed as add-on maintenance treatment of chronic

in adults and children ≥ 12 years of age **AND** Member has trialed and failed‡ colchicine AND continuation will be provided based on clinical response. **ILARIS** (canakinumab) may receive approval if meeting the following: Familial Mediterranean Fever (FMF) Hyperimmunoglobulinemia D syndrome (HIDS) Mevalonate Kinase Deficiency (MKD) one year approval) AND Member has trialed and failed‡ colchicine. **KINERET** (anakinra) may receive approval if meeting the following:

Treatment of recurrent pericarditis and reduction in risk of recurrence

Initial approval will be given for 12 weeks and authorization approval for

- Medication is being prescribed for one of the following (approval for all other indications is subject to meeting non-preferred criteria listed below):
 - Neonatal onset multisystem inflammatory disease (NOMID)
 - TNF Receptor Associated Periodic Syndrome (TRAPS)
 - Cryopyrin-associated Autoinflammatory Syndrome (including Familial Cold Autoinflammatory Syndrome and Muckle-Wells Syndrome)
 - Symptomatic treatment of adult patients with gout flares in whom NSAIDs and colchicine are contraindicated, are not tolerated, or do not provide an adequate response, and in whom repeated courses of corticosteroids are not appropriate (limited to four 150mg doses per

- Medication is being prescribed for one of the following indications (approval for all other indications is subject to meeting non-preferred criteria below):
 - Neonatal onset multisystem inflammatory disease (NOMID).
 - Familial Mediterranean Fever (FMF)

AND

Member has trialed and failed! colchicine.

NUCALA (mepolizumab) may receive approval if meeting the following based on prescribed indication (for any FDA-labeled indications in this subclass category that are not listed, approval is subject to meeting non-preferred criteria listed below):

Chronic Rhinosinusitis with Nasal Polyps:

• Member is 18 years of age or older **AND**

- Medication is being prescribed as an add-on maintenance treatment in adult patients with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP) AND
 Member has a baseline bilateral endoscopic nasal polyps score (NPS; scale 0-8) AND nasal congestion/obstruction score (NC; scale 0-3) averaged over 28-day period AND
 - Member has trialed and failed‡ therapy with three intranasal corticosteroids (see PDL Class) **AND**
 - Medication is being prescribed by or in consultation with a rheumatologist, allergist, ear/nose/throat specialist or pulmonologist **AND**
 - Initial authorization will be for 24 weeks, for additional 12-month approval member must meet the following criteria:
 - NC and NPS scores are provided and show a 20% reduction in symptoms from baseline AND
 - Member continues to use primary therapies such as intranasal corticosteroids.

Eosinophilic Granulomatosis with polyangiitis (EGPA):

- Member is 18 years of age or older AND
- Member has been diagnosed with relapsing or refractory EGPA at least 6 months prior to request as demonstrated by ALL the following:
 - o Member has a diagnosis of asthma AND
 - Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL or a blood eosinophil level of 10%

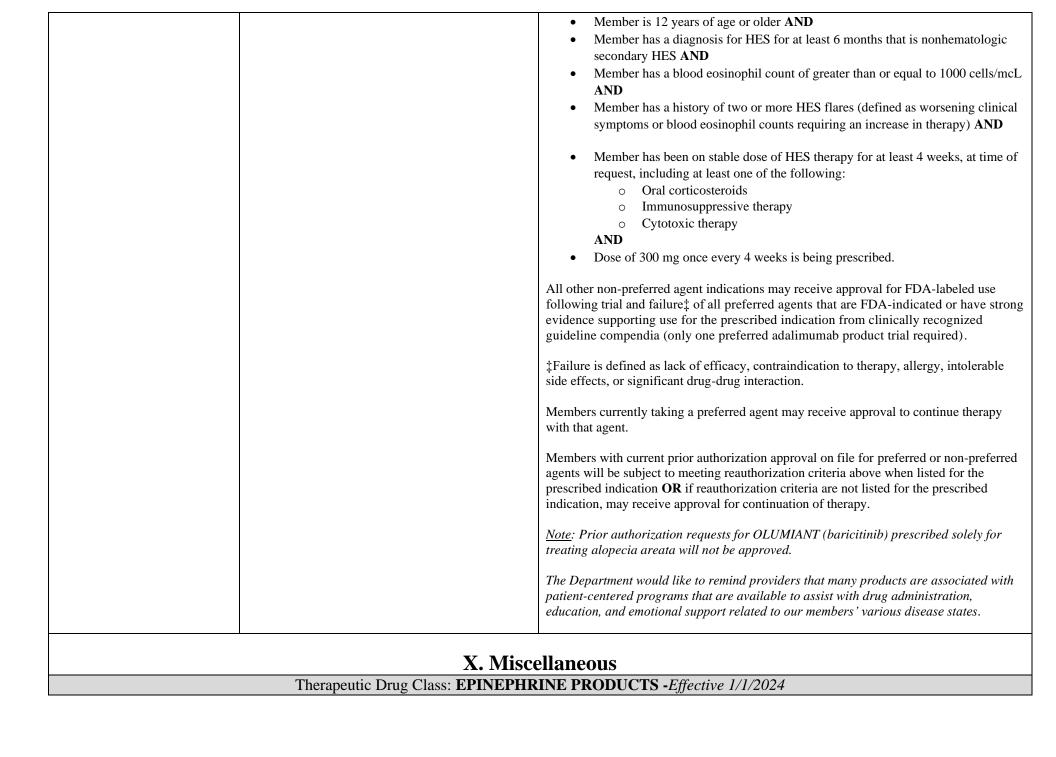

AND

- Member has the presence of two of the following EGPA characteristics:
 - O Histopathological evidence of eosinophilic vasculitis, perivascular eosinophilic infiltration, or eosinophil-rich granulomatous inflammation
 - Neuropathy
 - Pulmonary infiltrates
 - Sinonasal abnormality
 - o Cardiomyopathy
 - o Glomerulonephritis
 - Alveolar hemorrhage
 - Palpable purpura
 - o Antineutrophil cytoplasmic antibody (ANCA) positive

AND

- Member is on a stable dose of corticosteroids for at least 4 weeks prior to request AND
- Dose of 300 mg once every 4 week is being prescribed.

Hypereosinophilic Syndrome (HES):

CINRYZE (C1 esterase inhibitor - human) may be approved for members meeting the following criteria:

- Member has history of trial and failure of Haegarda. Failure is defined as lack of efficacy allergy, intolerable side effects, or a significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- o Member meets at least one of the following:
 - Cinryze is being used for <u>short-term prophylaxis</u> to undergo a surgical procedure or major dental work **OR**
 - Cinryze is being used for <u>long-term prophylaxis</u> and member meets one of the following:
 - History of ≥1 attack per month resulting in documented ED admission or hospitalization OR
 - History of laryngeal attacks **OR**
 - History of ≥2 attacks per month involving the face, throat, or abdomen AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
- Member has received hepatitis A and hepatitis B vaccination AND
- o Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV.

Minimum age: 6 years Maximum dose: 100 Units/kg

ORLADEYO (berotralstat) may be approved for members meeting the following criteria:

- Member has history of trial and failure of HAEGARDA. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- ORLADEYO is prescribed by or in consultation with an allergist or immunologist **AND**
- Appropriate drug interaction interventions will be made for members using concomitant medications that may require dose adjustments (such as cyclosporine, fentanyl, pimozide, digoxin) AND

- Minimum age:12 years criteria: interaction AND AND Minimum age: 2 years
 - Member meets at least one of the following:
 - ORLADEYO is being used for short-term prophylaxis to undergo a surgical procedure or major dental work
 - ORLADEYO is being used for long-term prophylaxis and member meets one of the following:
 - History of ≥ 1 attack per month resulting in documented ED admission or hospitalization OR
 - History of larvngeal attacks **OR**
 - History of ≥ 2 attacks per month involving the face, throat, or abdomen AND
 - Member is not taking medications that may exacerbate HAE, including ACE inhibitors and estrogen-containing medications

Maximum dose: 150 mg once daily

TAKHZYRO (lanadelumab-flyo) may be approved for members meeting the following

- o Member has history of trial and failure of Haegarda. Failure is defined as: lack of efficacy, allergy, intolerable side effects, or a significant drug-drug
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
- Member has received hepatitis A and hepatitis B vaccination.

Maximum dose: The recommended starting dose is 300mg every 2 weeks. A dosing interval of 300 mg every 4 weeks is also effective and may be considered if the patient is well-controlled (attack free) for more than 6 months

Medications Indicated for Treatment of Acute Attacks:

Members are restricted to coverage of one medication for treatment of acute attacks at one time. Prior authorization approval will be for one year.

FIRAZYR (icatibant acetate) may be approved for members meeting the following criteria:

> o Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND

O Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND O Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications Minimum age: 18 years Maximum dose: 30mg
BERINERT (C1 esterase inhibitor - human) may be approved for members meeting the following criteria: O Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND O Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND O Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND O Member has received hepatitis A and hepatitis B vaccination AND O Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV Minimum age: 6 years Max dose: 20 IU/kg
 RUCONEST (C1 esterase inhibitor - recombinant) may be approved for members meeting the following criteria: Member has a history of trial and failure of Firazyr OR Berinert. Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction AND Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level)

	The group antic Days Classes BMOCDY	o Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV. Minimum age: 13 years Maximum dose: 4,200 Units/dose All other non-preferred agents may be approved if the member has trialed and failed at least two preferred agents with the same indicated role in therapy as the prescribed medication (prophylaxis or treatment). Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction.
