

Colorado Department of Health Care Policy and Financing Preferred Drug List (PDL)

Effective January 1, 2024

Prior Authorization Forms: Available online at https://www.colorado.gov/hcpf/pharmacy-resources

Prior Authorization (PA) Requests: Colorado Pharmacy Call Center Phone Number: 800-424-5725 | Fax Number: 800-424-5881
Electronic Prior Authorization (ePA): Real Time Prior Authorization via Electronic Health Record (EHR)

The PDL applies to Medicaid fee-for-service members. It does not apply to members enrolled in Rocky Mountain Health HMO or Denver Health Medicaid Choice.

Initiation of pharmaceutical product subject to Prior Authorization: Please note that starting the requested drug, including a non-preferred drug, prior to a PA request being reviewed and approved, through either inpatient use, by using office "samples," or by any other means, does not necessitate Medicaid approval of the PA request.

<u>Covid-19 Related Treatment Override</u>: Providers may call the Magellan Help Desk at 1-800-424-5725 to request a prior authorization override if a medication is related to the treatment or prevention of COVID-19 or the treatment of a condition that may seriously complicate the treatment of COVID-19.

Health First Colorado, at 25.5-5-501, requires the generic of a brand name drug be prescribed if the generic is therapeutically equivalent to the brand name drug. Exceptions to this rule are: 1) If the brand name drug is more cost effective than the generic as determined by the Department, 2) If the patient has been stabilized on a brand name drug and the prescriber believes that transition to a generic would disrupt care, and 3) If the drug is being used for treatment of mental illness, cancer, epilepsy, or human immunodeficiency virus and acquired immune deficiency syndrome.

Please see the **Brand Favored Product List** for a list of medications where the brand name drug is more cost effective than the generic drug.

Brand Name Required = BNR, Prior Authorization = PA, AutoPA = authorization can be automated at the point-of-sale transaction if criteria are met Preferred drug list applies only to prescription (RX) products, unless specified.

Preferred Agents	Non-preferred Agents	Prior Authorization Criteria (All Non-preferred products will be approved for one year unless otherwise stated.)			
	I. Analgesics				
	Therapeutic Drug Class: NON-OPIOID ANA	ALGESIA AGENTS - Oral - Effective 4/1/2023			
No PA Required	PA Required				
Duloxetine 20 mg, 30 mg, 60 mg capsule	CYMBALTA (duloxetine) capsule	 Non-preferred oral non-opioid analgesic agents may be approved if member meets all of the following criteria: Member has trialed and failed duloxetine (20mg, 30mg, or 60mg) AND has 			
	DRIZALMA (duloxetine DR) sprinkle capsules	trialed and failed gabapentin OR pregabalin capsule (Failure is defined as lack			

Gabapentin capsule, tablet,		of efficacy with 8-week trial, allergy, intolerable side effects, or significant
solution	Duloxetine 40 mg capsule	drug-drug interaction)
Pregabalin capsule	GRALISE (gabapentin ER) tablet	Prior authorization will be required for Lyrica (pregabalin) capsule dosages > 600mg per day (maximum of 3 capsules daily) and gabapentin dosages > 3600mg per day.
SAVELLA (milnacipran) tablet, titration pack	HORIZANT (gabapentin ER) tablet	
-	LYRICA (pregabalin) capsule, solution, CR tablet	
	NEURONTIN (gabapentin) capsule, tablet, solution	
	Pregabalin solution, ER tablet	
T	herapeutic Drug Class: NON-OPIOID ANAL	GESIA AGENTS - Topical - Effective 4/1/2023
No PA Required	PA Required	
Lidocaine patch	ZTLIDO (lidocaine) topical system	Non-preferred topical products require a trial/failure with an adequate 8-week trial of gabapentin AND pregabalin AND duloxetine AND Lidoderm patch. Failure is defined as lack of efficacy with an 8-week trial, allergy, intolerable side effects, or significant
LIDODERM (lidocaine) patch		drug-drug interaction.
		Prior authorization will be required for lidocaine patch quantities exceeding 90 patches per 30 days (maximum of 3 patches daily).
	c Drug Class: NON-STEROIDAL ANTI-INI	ELAMMATORIES (NSAIDS) - Oral - <i>Effective 4/1/2023</i>
No PA Required	PA Required	
Generic changes effective 07/31/2023	ANAPROX DS (naproxen) tablet	 DUEXIS (ibuprofen/famotidine) or VIMOVO (naproxen/esomeprazole) may be approved if the member meets the following criteria: Trial and failure[‡] of all preferred NSAIDs at maximally tolerated doses AND
Celecoxib capsule	ARTHROTEC (diclofenac sodium/ misoprostol) tablet	• Trial and failure [‡] of three preferred proton pump inhibitors in combination with NSAID within the last 6 months AND
Diclofenac potassium 50 mg tablet	CELEBREX (celecoxib) capsule	Has a documented history of gastrointestinal bleeding
Diclofenac sodium EC/DR tablet	DAYPRO (oxaprozin) caplet	Diclofenac potassium 25 mg immediate-release tablets may be approved if the following criteria are met:
tablet	Diclofenac potassium capsule, powder pack	• Member is ≥ 18 years of age AND
Ibuprofen suspension, tablet (RX)	Diclofenac potassium 25 mg tablet*	 Member does not have any of the following medical conditions: o History of recent coronary artery bypass graft (CABG) surgery
Indomethacin capsule, ER capsule	Diclofenac sodium ER/SR tablet	 History of myocardial infarction Severe heart failure
Ketorolac tablet**	Diclofenac sodium/misoprostol tablet	 Advanced renal disease History of gastrointestinal bleeding
Meloxicam tablet	Diflunisal tablet	AND

Nabumetone tablet	DUEXIS (ibuprofen/famotidine) tablet	• Member has trial and failure [‡] of four preferred oral NSAIDs at maximally tolerated doses
Naproxen DR/ER, tablet (RX)	ELYXYB (celecoxib) solution	All other non-preferred oral agents may be approved following trial and failure [‡] of four
Naproxen EC tablet (RX) (all manufacturers except	Etodolac capsule; IR, ER tablet	preferred agents. [‡] Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions.
Woodward)	FELDENE (piroxicam) capsule	**Ketorolac tablets quantity limits: 5-day supply per 30 days and 20 tablets per 30 days
Naproxen suspension	Fenoprofen capsule, tablet	
Sulindac tablet	Flurbiprofen tablet	
	Ibuprofen/famotidine tablet	
	Ketoprofen IR, ER capsule	
	Meclofenamate capsule	
	Mefenamic acid capsule	
	Meloxicam suspension	
	Meloxicam (submicronized) capsule	
	NALFON (fenoprofen) capsule, tablet	
	NAPRELAN (naproxen CR) tablet	
	NAPROSYN (naproxen) EC tablet, suspension, tablet	
	Naproxen EC tablet (Woodward only)	
	Naproxen sodium CR, ER, IR tablet	
	Naproxen/esomeprazole DR tablet	
	Oxaprozin tablet	
	Piroxicam capsule	
	RELAFEN DS (nabumetone) tablet	
	Tolmetin tablet	

Thoropoutic	VIMOVO (naproxen/esomeprazole) DR tablet	AMMATORIES (NSAIDS) - Non-Oral - Effective 4/1/2023
No PA Required	PA Required	SPRIX (ketorolac) may be approved if meeting the following criteria:
Diclofenac 1.5% topical solution Diclofenac sodium 1% gel (OTC/Rx)	Diclofenac 1.3% topical patch, 2% pump FLECTOR (diclofenac) 1.3% topical patch Ketorolac nasal spray LICART (diclofenac) 1.3% topical patch PENNSAID (diclofenac solution) 2% pump	 Member is unable to tolerate, swallow or absorb oral NSAID formulations OR Member has trialed and failed three preferred oral or topical NSAID agents (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions) Quantity limit: 5-single day nasal spray bottles per 30 days All other non-preferred topical agents may be approved for members who have trialed and failed one preferred agent. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.
		Diclofenac topical patch quantity limit: 2 patches per day
		Diclofenac 3% gel (generic Solaraze) prior authorization criteria can be found in the Antineoplastic agents, topical, section of the PDL.

Opioid Utilization Policy (long-acting and short-acting opioids):

It is highly encouraged that the healthcare team utilize the Prescription Drug Monitoring Program (PDMP) to aid in ensuring safe and efficacious therapy for members using controlled substances.

Total Morphine Milligram Equivalent Policy Effective 10/1/17:

- The maximum allowable morphine milligram equivalent (MME) is 200 MME. Prescriptions for short-acting (SA) and long-acting (LA) opioids are cumulatively included in this calculation. The prescription that exceeds the cumulative MME limit of 200 MME for a member will require prior authorization and may require a provider-to-provider telephone consultation with the pain management physician (free of charge and provided by Health First Colorado).
- Prior authorization will be granted to allow for tapering
- Prior authorization for 1 year will be granted for diagnosis of sickle cell anemia
- Prior authorization for 1 year will be granted for admission to or diagnosis of hospice or end of life care
- Prior authorization for 1 year will be granted for pain associated with cancer

MME calculation is conducted using conversion factors from the following link: <u>https://pharmacypmp.az.gov/resources/mme-calculator</u>

Only one long-acting opioid agent (including different strengths) and one short-acting opioid agent (including different strengths) will be considered for a prior authorization.

Medicaid provides guidance on the treatment of pain, including tapering, on our webpage under the heading Pain Management Resources and Opioid Use at: https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use

Opioid Naïve Policy Effective 8/1/17 (Update effective 04/01/23 in Italics):

Members who have not filled a prescription for an opioid within the past 180 days will be identified as "opioid treatment naïve" and have the following limitations placed on the initial prescription(s):

- The prescription is limited to short-acting opioid agents or Butrans (buprenorphine). Use of other long-acting opioid agents will require prior authorization approval for members identified as opioid treatment naïve.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 7 days, the quantity will be limited to 8 dosage forms per day (tablets, capsules), maximum #56 tablets/capsules for a 7-day supply
- The fourth prescription for an opioid will require prior authorization, filling further opioid prescriptions may require a clinical pharmacist review or provider to provider telephone consultation with a pain management physician (free of charge and provided by Health First Colorado).
- If a member has had an opioid prescription filled within the past 180 days, then this policy would not apply to that member and other opioid policies would apply as applicable.

Dental Prescriptions Opioid Policy Effective 11/15/18 (implemented in the claims system 01/07/19):

Members who receive an opioid prescribed by a dental provider will be subject to day supply limits and quantity per day limits for short acting opioids.

- The prescription is limited to short-acting opioid agents only. Use of long-acting opioid agents and short acting fentanyl agents will require prior authorization approval for members' prescriptions written by a dental provider.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 4 days, the quantity will be limited to 6 dosage forms per day (tablets, capsules), maximum #24 tablets/capsules for a 4-day supply
- The fourth prescription for an opioid will require prior authorization. A prior authorization for the fourth fill may be approved for up to a 7-day supply and the quantity will be limited to 8 dosage forms per day (#56 tablets/capsules) for members with any of the following diagnoses/undergoing any of the following procedures:
 - Traumatic oro-facial tissue injury with major mandibular/maxillary surgical procedures
 - Severe cellulitis of facial planes
 - Severely impacted teeth with facial space infection necessitating surgical management
- Other potential exemptions that exceed the first 3 fill limits (day supply and quantity) may be evaluated with a provider-to-provider telephone consult with a pain management specialist (free of charge and provided by Health First Colorado)

If a member has had an opioid prescription prescribed by a non-dental provider, then this policy would not apply to that member and other opioid policies would apply as applicable. Dental prescriptions do not impact the opioid treatment naïve policy, but the prescriptions will be counted towards the Morphine Milligram Equivalent (MME) daily dose.

Opioid and Benzodiazepine Combination Effective 9/15/19:

Prior authorization will be required for members receiving long-term therapy with an opioid medication who are newly started on a benzodiazepine medication <u>OR</u> for members receiving long-term therapy with a benzodiazepine medication who are newly started on an opioid medication. Prior authorization may be approved if meeting the following:

- The member discontinued or is no longer taking either the opioid or benzodiazepine medication and will not be using these in combination **OR**
- The member will not be taking the prescribed opioid and benzodiazepine medications at the same time based on prescribed dosing interval (such as prn administration) for the regimen <u>AND</u> the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- The prescriber has evaluated the regimen and attests that it is appropriate for the member to continue use of the concomitant opioid and benzodiazepine medication regimen as prescribed <u>AND</u> the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- Prior authorization may be approved for members receiving palliative or hospice care **OR**
- For benzodiazepine prior authorizations, approval may be granted if the benzodiazepine is being prescribed for seizure disorder or convulsions.

*If counseling has not been provided, the prescriber attests that a reasonable effort will be made to contact the member or the member's pharmacy to ensure that counseling is provided.

Opioid and Quetiapine Combination Effective 9/15/19:

Pharmacy claims for members receiving opioid and quetiapine medications in combination will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) related to risk of increased sedation from concomitant use of this drug combination.

Opioid and Buprenorphine-Containing substance use disorder (SUD) Product Combination Effective 06/01/21:

Opioid claims submitted for members currently receiving buprenorphine-containing SUD medications will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) with use of this drug combination.

Therapeutic Drug Class: OPIOIDS, Short Acting - <i>Effective 4/1/2023</i>						
Preferred	Non-Preferred	*Preferred codeine and tramadol products do not require prior authorization for adult				
No PA Required*	PA Required	members (18 years of age or greater) if meeting all other opioid policy criteria.				
(If criteria and quantity limit						
are met)		Preferred codeine or tramadol products prescribed for members < 18 years of age must				
	Acetaminophen / codeine elixir	meet the following criteria:				
*Acetaminophen/codeine tablets		• Preferred tramadol and tramadol-containing products may be approved for				
	APADAZ (benzhydrocodone/ acetaminophen) tablet	members < 18 years of age if meeting the following:				
Hydrocodone/acetaminophen		• Member is 12 years to 17 years of age AND				
solution, tablet	ASCOMP WITH CODEINE (codeine/	• Tramadol is NOT being prescribed for post-surgical pain following tonsil or				
	butalbital/aspirin/caffeine)	adenoid procedure AND				
Hydromorphone tablet		• Member's BMI-for-age is not $> 95^{\text{th}}$ percentile per CDC guidelines AND				
	Benzhydrocodone/acetaminophen tablet	• Member does not have obstructive sleep apnea or severe lung disease OR				
Morphine IR solution, tablet		• For members < 12 years of age with complex conditions or life-limiting illness				
	*Butalbital/caffeine/acetaminophen/codeine capsule	who are receiving care under a pediatric specialist, tramadol and tramadol-				
**NUCYNTA (tapentadol)		containing products may be approved on a case-by-case basis				
tablet	Butalbital/caffeine/aspirin/codeine capsule	• Preferred Codeine and codeine-containing products will receive prior				
Oxycodone solution, tablet		authorization approval for members meeting the following criteria may be approved				
Oxycodolie solution, tablet	Butalbital compound/codeine	for members < 18 years of age if meeting the following:				
Oxycodone/acetaminophen		• Member is 12 years to 17 years of age AND				
tablet	Butorphanol tartrate (nasal) spray	 Codeine is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND 				
ublet		 Member's BMI-for-age is not > 95th percentile per CDC guidelines AND 				
*Tramadol 50mg	Carisoprodol/aspirin/codeine	 Member does not have obstructive sleep apnea or severe lung disease AND 				
Trainador Comg		 Member does not have obstructive steep aprice of severe lang disease AND Member is not pregnant, or breastfeeding AND 				
*Tramadol/acetaminophen tablet	Codeine tablet	• Renal function is not impaired (GFR $> 50 \text{ ml/min}$) AND				
1		 Member is not receiving strong inhibitors of CYP3A4 (such as erythromycin, 				
	Dihydrocodeine/acetaminophen/caffeine tablet	clarithromycin, itraconazole, ketoconazole, posaconazole, fluconazole				
		[\geq 200mg daily], voriconazole, delavirdine, and milk thistle) AND				
	DILAUDID (hydromorphone) solution, tablet	• Member meets <u>one</u> of the following:				
	FIORICET/CODEINE (codeine/	• Member has trialed codeine or codeine-containing products in the past				
	butalbital/acetaminophen/caffeine) capsule	with no history of allergy or adverse drug reaction to codeine				
	outaronal/acetaniniophen/carrenie/capsule	• Member has not trialed codeine or codeine-containing products in the past				
	Hydrocodone/ibuprofen tablet	and the prescriber acknowledges reading the following statement:				
		"Approximately 1-2% of the population metabolizes codeine in a manner				

Hydromorphone solution	that exposes them to a much higher potential for toxicity. Another notable proportion of the population may not clinically respond to codeine. We ask that you please have close follow-up with members newly starting codeine					
Levorphanol tablet	and codeine-containing products to monitor for safety and efficacy."					
LORTAB (hydrocodone/acetaminophen) elixir	Non-preferred tramadol products may be approved following trial and failure of generic tramadol 50mg tablet AND generic tramadol/acetaminophen tablet.					
Meperidine solution, tablet	All other non-preferred short-acting opioid products may be approved following trial and					
Morphine concentrated solution, oral syringe	failure of three preferred products. Failure is defined as allergy [‡] , lack of efficacy, intolerable side effects, or significant drug-drug interaction.					
NALOCET (oxycodone/acetaminophen) tablet	‡Allergy: hives, maculopapular rash, erythema multiforme, pustular rash, severe					
Oxycodone capsule, syringe, concentrated solution	hypotension, bronchospasm, and angioedema					
Oxymorphone tablet	<u>Quantity Limits</u> : Short-acting opioids will be limited to a total of 120 tablets per 30 days (4/day) per member for members who are not included in the opioid treatment naive					
Oxycodone/acetaminophen solution	 policy. **Nucynta IR will have a maximum daily quantity of 6 tablets (180 tabs per 30 					
Oxycodone/acetaminophen tablet (generic PROLATE)	 days). Exceptions will be made for members with a diagnosis of a terminal illness (hospice or palliative care) or sickle cell anemia. 					
Pentazocine/naloxone tablet	• For members who are receiving more than 120 tablets currently and who do not have a qualifying exemption diagnosis, a 6-month prior authorization can be					
PERCOCET (oxycodone/ acetaminophen) tablet	granted via the prior authorization process for providers to taper members.Please note that if more than one agent is used, the combined total utilization					
ROXICODONE (oxycodone) tablet	may not exceed 120 units in 30 days. There may be allowed certain exceptions to this limit for acute situations (for example: post-operative surgery, fractures,					
ROXYBOND (oxycodone) tablet	shingles, car accident).					
SEGLENTIS (tramadol/celecoxib) tablet	Maximum Doses: Tramadol: 400mg/day					
Tramadol 100mg tablet	Codeine: 360mg/day Butorphanol intranasal: 10ml per 30 days (four 2.5ml 10mg/ml package units per 30					
Tramadol solution	days)					

Therapeuti	c Drug Class: FENTANYL PREPARATION	S (buccal, transmucosal, sublingual) - Effective 4/1/2023
	PA Required ACTIQ (fentanyl citrate) lozenge Fentanyl citrate lozenge, buccal tablet FENTORA (fentanyl citrate) buccal tablet	Fentanyl buccal, intranasal, transmucosal, and sublingual products: Prior authorization approval may be granted for members experiencing breakthrough cancer pain and those that have already received and are tolerant to opioid drugs for the cancer pain AND are currently being treated with a long-acting opioid drug. The prior authorization may be granted for up to 4 doses per day. For patients in hospice or palliative care, prior authorization will be automatically granted regardless of the number of doses prescribed.
	Therapeutic Drug Class: OPIOID	S, Long Acting - Effective 4/1/2023
Preferred No PA Required (*if dose met) BUTRANS ^{BNR} (buprenorphine)	Non-Preferred PA Required **OXYCONTIN (oxycodone ER) tablet	** Oxycontin may be approved for members who have trialed and failed‡ treatment with TWO preferred agents. All other non-preferred products may be approved for members who have trialed and
transdermal patch	BELBUCA (buprenorphine) buccal film	failed [‡] three preferred products.
*Fentanyl 12mcg, 25mcg, 50mcg, 75mcg, 100mcg transdermal patch	Buprenorphine buccal film, transdermal patch CONZIP (tramadol ER) capsule	‡Failure is defined as lack of efficacy with 14-day trial due to allergy (hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension, bronchospasm, and angioedema), intolerable side effects, or significant drug-drug
Morphine ER (generic MS Contin) tablet	Fentanyl 37mcg, 62mcg, 87mcg transdermal patch	interaction. <u>Methadone:</u> Members may receive 30-day approval when prescribed for neonatal
*NUCYNTA ER (tapentadol ER)	Hydrocodone ER capsule, tablet Hydromorphone ER tablet	abstinence syndrome without requiring trial and failure of preferred agents or opioid prescriber consultation. Methadone Continuation:
Tramadol ER (generic Ultram ER) tablet	HYSINGLA (hydrocodone ER) tablet KADIAN (morphine ER) capsule	Members who have been receiving methadone for pain indications do not have to meet non-preferred criteria. All new starts for methadone will require prior authorization under the non-preferred criteria listed above.
	Methadone (all forms)	If a prescriber would like to discuss strategies for tapering off methadone or transitioning to other pain management therapies for a Health First Colorado member,
	Morphine ER capsule MS CONTIN (morphine ER) tablet	consultation with the Health First Colorado pain management physician is available free of charge by contacting the pharmacy call center helpdesk and requesting an opioid prescriber consult.
	Oxycodone ER tablet	<u>Reauthorization:</u> Reauthorization for a non-preferred agent may be approved if the following criteria are
	Oxymorphone ER tablet	 Provider attests to continued benefit outweighing risk of opioid medication use
	Tramadol ER (generic Ryzolt/Conzip)	 AND Member met original prior authorization criteria for this drug class at time of
	XTAMPZA ER (oxycodone) capsule	original authorization

		 Quantity/Dosing Limits: Oxycontin, Nucynta ER, and Hydrocodone ER (generic Zohydro ER) will only be approved for twice daily dosing. Hysingla will only be approved for once daily dosing. Fentanyl patches will require a PA for doses of more than 15 patches/30 days (if using one strength) or 30 patches for 30 days (if using two strengths). For fentanyl patch strengths of 37mcg/hr, 62mcg/hr, and 87mcg/hr, member must trial and fail two preferred strengths of separate patches that will provide the desired dose (such as 12mcg/hr + 50mcg/hr = 62mcg/hr).
	II. Anti-	Infectives
		TICS, INHALED -Effective 1/1/2024
Preferred No PA Required (*Must meet eligibility criteria) Tobramycin inhalation solution (generic TOBI) *CAYSTON (aztreonam) inhalation solution	Non-Preferred PA Required ARIKAYCE (amikacin liposomal) inhalation vial BETHKIS (tobramycin) inhalation ampule KITABIS (tobramycin) nebulizer pak TOBI (tobramycin) inhalation solution TOBI PODHALER (tobramycin) inhalation capsule Tobramycin inhalation ampule (generic Bethkis) Tobramycin nebulizer pak (generic Kitabis)	 *CAYSTON (aztreonam) inhalation solution may be approved if the following criteria are met: Member has a history of trial and failure of preferred tobramycin solution for inhalation (failure is defined as lack of efficacy with a 4-week trial, intolerable side effects, or significant drug-drug interactions) OR provider attests that member cannot use preferred tobramycin solution for inhalation due to documented allergy or contraindication to therapy AND The member has known colonization of <i>Pseudomonas aeruginosa</i> in the lungs AND The member has been prescribed an inhaled beta agonist to use prior to nebulization of Cayston (aztreonam). ARIKAYCE (amikacin) may be approved if the following criteria are met: Member has refractory mycobacterium avium complex (MAC) lung disease with limited or no alternative treatment options available AND Member has trialed and failed 6 months of therapy with a 3-drug regimen that includes a macrolide (failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions). All other non-preferred inhaled antibiotic agents may be approved if the following criteria are met: The member has a diagnosis of cystic fibrosis with known colonization of <i>Pseudomonas aeruginosa</i> in the lungs AND Member has history of trial and failure of preferred tobramycin solution for inhalation (failure is defined as lack of efficacy with a 4-week trial, contraindication to therapy, allergy, intolerable side effects or significant drug-drug interactions).

		Table 1: Mini	mum Age, Ma	ximum Dose, and Q	uantity Limitations
		Drug Name	Minimum Age	Maximum Dose	Quantity Limit (Based on day supply limitation for pack size dispensed)
		ARIKAYCE (amikacin)	\geq 18 years	590 mg once daily	Not applicable
		BETHKIS (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period
		CAYSTON (aztreonam)	\geq 7 years	75 mg three time daily	28-day supply per 56-day period
		KITABIS PAK (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period
		TOBI [†] (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period
		TOBI PODHALER (tobramycin)	Age ≥ 6 years	112 mg twice daily	28-day supply per 56-day period

Therapeutic Drug Class: HEPATITIS C VIRUS TREATMENTS - Effective 1/1/2024 Direct Acting Antivirals (DAAs)					
Preferred No PA Required for initial treatment (*must meet eligibility criteria)	Non-Preferred PA Required EPCLUSA 400 mg-100 mg (sofosbuvir/velpatasvir) tablet	Pharmacy claims for preferred products prescribed for initial treatment will be eligible for up to a 90-day supply fill allowing for the appropriate days' duration for completing the initial treatment regimen (with no PA required). Subsequent fills will require prior authorization meeting re-treatment criteria below.			
EPCLUSA (sofosbuvir/velpatasvir) 200 mg -50 mg, 150 mg-37.5 mg tablet, pellet pack HARVONI (ledipasvir/sofosbuvir) 45mg-200mg tablet, pellet pack Ledipasvir/Sofosbuvir 90 mg-	HARVONI 90 mg-400 mg (ledipasvir/sofosbuvir) tablet SOVALDI (sofosbuvir) tablet, pellet packet VIEKIRA PAK (ombitasvir/paritaprevir/ ritonavir/dasabuvir) tablet ZEPATIER (elbasvir/grazoprevir) tablet	 *Second line preferred agents (Vosevi) may be approved for members 18 years of age or older with chronic HCV infection who are non-cirrhotic or have compensated cirrhosis (Child-Pugh A) AND meet the following criteria: GT 1-6 and has previously failed treatment with a regimen containing an NS5A inhibitor (such as ledipasvir, daclatasvir, or ombitasvir) OR GT 1a or 3 and has previously failed treatment with a regimen containing sofosbuvir without an NS5A inhibitor AND Request meets the applicable criteria below for re-treatment. 			
400 mg tablet (<i>Asegua only</i>) MAVYRET (glecaprevir/pibrentasvir) tablet, pellet pack Sofosbuvir/Velpatasvir 400mg- 100mg (<i>Asegua only</i>) *VOSEVI tablet (sofosbuvir/velpatasvir/voxila previr)		 All requests for HCV re-treatment for members who have failed therapy with a DAA will be reviewed on a case-by-case basis. Additional information may be requested for re-treatment requests including: Assessment of member readiness for re-treatment Previous regimen medications and dates treated Genotype of previous HCV infection Any information regarding adherence to previously trialed regimen(s) and current chronic medications Adverse effects experienced from previous treatment regimen Concomitant therapies during previous treatment regimen Vosevi regimens will require verification that member has been tested for evidence of active hepatitis B virus (HBV) infection and for evidence of prior HBV infection prior to initiating treatment. 			
		 Non-preferred agents may be approved if documentation is provided indicating an acceptable rationale for not prescribing a preferred treatment regimen (acceptable rationale may include patient-specific medical contraindications to a preferred treatment or cases where a member has initiated treatment on a non-preferred drug and needs to complete therapy). Members currently receiving treatment with a non-preferred agent will receive approval to finish their treatment regimen, provided required documentation is sent via normal prior authorization request process. 			

Ribavirin Products

	VASCEPA (icosapent ethyl) capsule	• Member has a baseline triglyceride level \geq 500 mg/dl AND
	ZETIA (ezetimibe) tablet	• Member has failed an adequate trial of omega-3 Ethyl Esters AND an adequate trial of gemfibrozil or fenofibrate (failure is defined as lack of efficacy with 4-week trial, allergy, intolerable side effects or significant drug-drug interactions)
		Nexletol (bempedoic acid) or Nexlizet (bempedoic acid/ezetimibe) may be approved if meeting the following criteria:
		• Member is ≥ 18 years of age AND
		• Member is not pregnant AND
		 Member is not receiving concurrent simvastatin > 20 mg daily or pravastatin > 40 mg daily AND
		Member has a diagnosis of either heterozygous familial hypercholesterolemia or established atherosclerotic cardiovascular disease (see definition below), AND
		Conditions Which Define Clinical Atherosclerotic Cardiovascular Disease Acute Coronary Syndrome
		Acute Coronary Syndrome History of Myocardial Infarction
		Stable or Unstable Angina
		Coronary or other Arterial Revascularization
		• Stroke
		Transient Ischemic Attack Derinkersel Arterial Disease of Atheneselenetic Origin
		Peripheral Arterial Disease of Atherosclerotic Origin
		• Member is concurrently adherent (> 80% of the past 180 days) on a maximally tolerated dose of a high intensity statin therapy (atorvastatin ≥ 40 mg daily OR

	Therapeutic Drug Class:	 rosuvastatin ≥ 20 mg daily [as a single-entity or as a combination product]) AND ezetimibe (as a single-entity or as a combination product) concomitantly for ≥ 8 continuous weeks), AND If intolerant to a statin due to side effects, member must have a one month documented trial with at least two other maximally dosed statins in addition to ezetimibe. For members with a past or current incidence of rhabdomyolysis, a one-month trial and failure of a statin is not required, AND Member has a treated LDL > 70 mg/dL for a clinical history of ASCVD OR LDL > 100 mg/dL if familial hypercholesterolemia Initial Approval: 1 year Reauthorization: Reauthorization may be approved for 1 year with provider attestation of medication safety and efficacy during the initial treatment period Vascepa (icosapent ethyl) may be approved if meeting the following: Member has failed an adequate trial of generic omega-3 ethyl esters AND an adequate trial of gemfibrozil of fenofibrate (failure is defined as lack of efficacy with 4-week trial, allergy, intolerable side effects or significant drug-drug interactions) OR Member has is being prescribed to reduce CV risk for members on maximally tolerated statin therapy with triglyceride levels ≥ 150mg/dL and LDL-C levels between 41-100 mg/dL AND member meets <u>one</u> of the following: Member is ≥ 45 years of age and has established atherosclerotic CV disease (e.g., coronary artery disease, cerebrovascular/carotid disease, peripheral arterial disease) OR Member is ≥ 50 years of age with diabetes mellitus and has <u>one or</u> <u>more</u> of the following additional risk factors for CV disease: Male ≥ 55 years of age or female ≥ 65 years of age

(insuexamiletainine) capsule		WAKIX (pitolisant) prior authorization may be approved if member meets the following
	Methamphetamine tablet	 Criteria: Member is 18 years of age or older AND
	METHYLIN (methylphenidate) solution	 Member has diagnosis of narcolepsy and is experiencing excessive daytime sleepiness AND
	Methylphenidate CD/ER/LA capsule, tablet, chewable tablet, ER tablet (generic Relexxi/Ritalin), ER tablet (generic Concerta), patch	 Member does not have end stage renal disease (eGFR <15 mL/minute) AND Member does not have severe hepatic impairment AND Member has trial and failure[‡] of modafinil AND armodafinil AND one other agent in the stimulant PDL class AND
	MYDAYIS ER (dextroamphetamine/ amphetamine) capsule	• Member has been counseled that Wakix may reduce the efficacy of hormonal contraceptives and regarding use an alternative non-hormonal method of contraception during Wakix therapy and for at least 21 days after discontinuing treatment.
	NUVIGIL (armodafinil) tablet	Maximum Dose (all products): See Table 2
	PROCENTRA (dextroamphetamine) solution	Maximum Dose (an products). See Table 2
	PROVIGIL (modafinil) tablet	Exceeding Max Dose: Prior authorization may be approved for doses that are higher than the listed maximum dose (Table 2) for members meeting the following criteria:
	QELBREE (viloxazine ER) capsule	 Member is taking medication for indicated use listed in Table 1 AND Member has 30-day trial and failure[‡] of three different preferred or non-
	QUILLICHEW ER (methylphenidate) chewable tablet, XR suspension	 preferred agents at maximum doses listed in Table 2 AND Documentation of member's symptom response to maximum doses of three other agents is provided AND
	RELEXXII (methylphenidate ER) tablet	• Member is not taking a sedative hypnotic medication (such as temazepam, triazolam, or zolpidem from the Sedative Hypnotic PDL class).
	RITALIN (methylphenidate) IR/ER tablet, ER capsule	[‡] Failure is defined as: lack of efficacy with 4-week trial, allergy, intolerable side effects, or significant drug-drug interaction.
	STRATTERA (atomoxetine) capsule	or significant drug-drug interaction.
	SUNOSI (solriamfetol) tablet	
	VYVANSE (lisdexamfetamine) chewable tablet	
	WAKIX (pitolisant) tablet	
	XELSTRYM (dextroamphetamine) patch	
	ZENZEDI (dextroamphetamine) tablet	

Table 1: Diagnosis and Age Limitations

- Approval for medically accepted indications <u>not</u> listed in Table 1 may be given with prior authorization review and may require submission of peer-reviewed literature or medical compendia showing safety and efficacy of the medication used for the prescribed indication.
- Preferred medications may also receive approval for off-label use for fatigue associated with multiple sclerosis if meeting all other criteria for approval.
- Bolded drug names are preferred (subject to preferential coverage changes for brand/generic equivalents)

• Bolded drug names are preferred (subject to preferenti Drug	Diagnosis and Age Limitations		
Stimulants-Immediate Release			
Amphetamine sulfate (EVEKEO)	ADHD (Age \geq 3 years), Narcolepsy (Age \geq 6 years)

V. Dermatological

	Therapeutic Drug Class: ACNE AGENTS– Topical -Effective 7/1/2023		
Preferred	Non-Preferred	Authorization for all acne agents prescribed solely for cosmetic purposes will not be	
No PA Required (if age and	PA Required	approved.	
diagnosis criteria are met*)			
	ACANYA (clindamycin/benzoyl peroxide) gel,	Preferred topical clindamycin and erythromycin products may be approved by AutoPA	
*Adapalene gel	pump	verification of ICD-10 diagnosis code for acne vulgaris, psoriasis, cystic acne,	
		comedonal acne, disorders of keratinization, neoplasms, folliculitis, hidradenitis	
*Adapalene/benzoyl peroxide	Adapalene cream, gel pump, solution	suppurativa, or perioral dermatitis (erythromycin only). Approval of preferred topical	
gel (generic Epiduo)		clindamycin and erythromycin products for other medically accepted indications may be	
	Adapalene/Benzoyl Peroxide gel pump	considered following clinical prior authorization review by a call center pharmacist.	
	ALTRENO (tretinoin) lotion	All other preferred topical acne agents may be approved if meeting the following criteria:	

 *Clindamycin phosphate solution, medicated swab/pledget *Clindamycin/benzoyl peroxide gel jar (generic Benzaclin) *Clindamycin/benzoyl peroxide gel tube (generic Duac) *Dapsone gel 	AMZEEQ (minocycline) foam ARAZLO (tazarotene) lotion ATRALIN (tretinoin) gel BENZACLIN (clindamycin/benzoyl peroxide) gel, pump BENZAMYCIN (erythromycin/benzoyl peroxide)	 For members > 25 years of age, may be approved following prescriber verification that the medication is not being utilized for cosmetic purposes AND prescriber verification that the indicated use is for acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. These medications are only eligible for prior authorization approval for the aforementioned diagnoses. For members ≤ 25 years of age, may be approved for a diagnosis of acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. Diagnosis will be verified through automated verification (AutoPA) of the appropriate corresponding ICD-10 diagnosis code related to the indicated use of the medication.
*Erythromycin solution *Erythromycin/Benzoyl peroxide gel (generic Benzamycin) *Sulfacetamide sodium suspension	gel BP (sulfacetamide sodium/sulfur/urea) cleansing wash CLEOCIN (clindamycin) lotion CLINDACIN ETZ/PAC (clindamycin phosphate) kit	 Non-preferred topical products may be approved for members meeting all of the following criteria: Member has trialed/failed three preferred topical products with different mechanisms (such as tretinoin, antibiotic). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND Prescriber verification that the medication is being prescribed for one of the following diagnoses: acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne.
*RETIN-A ^{BNR} (tretinoin) cream, gel	Clindamycin phosphate foam, gel, lotion Clindamycin/Benzoyl peroxide gel pump Clindamycin/tretinoin gel Dapsone pump ERY/ERYGEL (erythromycin/ethanol) gel, medicated swabs/pads Erythromycin gel EVOCLIN (clindamycin) foam FABIOR (tazarotene) foam KLARON (sulfacetamide) suspension NEUAC (clindamycin/benzoyl peroxide/emollient) kit ONEXTON (clindamycin/benzoyl peroxide) gel, gel pump	

	RETIN-A MICRO (tretinoin) (all products)	
	ROSULA (sulfacetamide sodium/sulfur) cloths, wash	
	SSS 10-5 (sulfacetamide sodium/sulfur) foam	
	Sulfacetamide sodium cleanser, cleansing gel, lotion, shampoo, wash	
	Sulfacetamide sodium/sulfur cleanser, cream, pad, suspension, wash	
	SUMADAN/XLT (sulfacetamide sodium/sulfur) kit, wash	
	SUMAXIN/ CP/TS (sulfacetamide sodium/sulfur) kit, pads, suspension, wash	
	Tazarotene cream, foam	
	Tretinoin (all products)	
	Tretinoin microspheres (all products)	
	WINLEVI (clascoterone) cream	
	ZIANA (clindamycin/tretinoin) gel	
		ORAL ISOTRETINOIN -Effective 7/1/2023
	Required for all agents	Preferred products may be approved for adults and children ≥ 12 years of age for treating
Preferred	Non-Preferred	severe acne vulgaris or for treating moderate acne vulgaris in members unresponsive to conventional therapy.
AMNESTEEM capsule	ABSORICA capsule	
CLARAVIS capsule	ABSORICA LD capsule	 Non-preferred products may be approved for members meeting the following: Member has trialed/failed one preferred agent (failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction)
Isotretinoin 10 mg, 20 mg, 30 mg, 40 mg capsule (<i>all</i> <i>manufacturers except</i>	Isotretinoin 10 mg, 20 mg, 30 mg, 40 mg capsule (<i>Amneal</i>)	 AND Member is an adult or child ≥ 12 years of age with severe, recalcitrant nodulocystic acne and has been unresponsive to conventional therapy.
Amneal)	Isotretinoin 25 mg, 35 mg capsule	noutrocystic acric and has been unresponsive to conventional therapy.
	MYORISAN capsule	
	ZENATANE capsule	
	Therapeutic Drug Class: ANTI-PSO	RIATICS - Oral -Effective 7/1/2023

No PA Required	PA Required	
Acitretin capsule	Methoxsalen capsule	Prior authorization for non-preferred oral agents may be approved with failure of two preferred anti-psoriatic agents, one of which must be a preferred oral agent. Failure is defined as lack of efficacy of a 4-week trial, allergy, intolerable side effects or significant
	SORIATANE (acitretin) capsule	drug-drug interaction.
	Therapeutic Drug Class: ANTI-PSO	RIATICS -Topical -Effective 7/1/2023
No PA Required	PA Required	
Calcipotriene cream, solution	Calcipotriene foam, ointment	Prior authorization for non-preferred topical agents may be approved with failure of two preferred topical agents. If non-preferred topical agent being requested is a combination product, trial of two preferred agents must include a preferred combination agent.
DOVONEX (calcipotriene) cream	Calcipotriene/betamethasone dipropionate ointment, suspension	Failure is defined as lack of efficacy of a 4-week trial, allergy, intolerable side effects or significant drug-drug interaction.
TACLONEX SCALP ^{BNR} (calcipotriene/betamethasone)	Calcitriol ointment DUOBRII (halobetasol/tazarotene) lotion	Preferred and non-preferred products that contain a corticosteroid ingredient (such as betamethasone) will be limited to 4 weeks of therapy. Continued use will require one week of steroid-free time in between treatment periods.
suspension		week of steroid-free time in between treatment periods.
TACLONEX ^{BNR} (calcipotriene/betamethasone)	ENSTILAR (calcipotriene/betamethasone) foam	Members with >30% of their body surface area affected may not use Enstilar (calcipotriene/betamethasone DP) foam or Taclonex (calcipotriene/betamethasone DP)
ointment	SORILUX (calcipotriene) foam	ointment products as safety and efficacy have not been established.
	Therapeutic Drug Class: IMMUNOMODU	JLATORS, TOPICAL – Effective 7/1/2023
	Atopic I	Dermatitis
No PA Required	PA Required	 EUCRISA (crisaborole) may be approved if the following criteria are met: Member is at least 3 months of age and older AND
ELIDEL ^{BNR} (pimecrolimus) cream	EUCRISA (crisaborole) ointment	 Member has a diagnosis of mild to moderate atopic dermatitis AND Member has a history of failure, contraindication, or intolerance to at least two
PROTOPIC (tacrolimus)	OPZELURA (ruxolitinib) cream	medium-to high-potency topical corticosteroids for a minimum of 2 weeks OR
ointment	Pimecrolimus cream	is not a candidate for topical corticosteroids ANDMember must have tried and failed pimecrolimus and tacrolimus. Failure is
Tacrolimus ointment		defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions. AND
		• Eucrisa (crisaborole) must be prescribed by or in consultation with a dermatologist or allergist/immunologist.
		 OPZELURA (ruxolitinib) may be approved if the following criteria are met: Member is ≥ 12 years of age AND
		Member is immunocompetent AND
		• Member has a diagnosis of mild to moderate atopic dermatitis AND
		• Member has a history of failure, contraindication, or intolerance to at least two medium-to high-potency topical corticosteroids for a minimum of 2 weeks OR
		is not a candidate for topical corticosteroids AND

		 Member must have trialed and/or failed pimecrolimus and tacrolimus. Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions AND Must be prescribed by or in consultation with a dermatologist or allergist/immunologist. Quantity limit: 60 grams/week All other non-preferred topical immunomodulator products may be approved for atopic dermatitis following adequate trial and failure‡ of one prescription topical corticosteroid AND two preferred agents. ‡Failure is defined as a lack of efficacy with one month trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions. For members under 18 years of age, must be prescribed by or in consultation with a dermatologist or allergist/immunologist. Note: Prior authorization requests for Opzelura (ruxolitinib) prescribed solely for treating nonsegmental vitiligo will not be approved.
		lastic Agents
Preferred No PA Required (Unless indicated*) *Diclofenac 3% gel (generic Solaraze) Fluorouracil 5% cream (generic Efudex) Fluorouracil 2%, 5% solution	Non-Preferred PA Required CARAC (fluorouracil) cream EFUDEX (fluorouracil) cream Fluorouracil 0.5% (generic Carac) cream PANRETIN (alitretinoin) gel TARGRETIN (bexarotene) gel TOLAK (fluorouracil) cream VALCHLOR (mechlorethamine) gel	 *Diclofenac 3% gel (generic Solaraze) may be approved if the member has a diagnosis of actinic keratosis (AK). TARGRETIN (bexarotene) gel or VALCHLOR (mechlorethamine) gel may be approved for members who meet the following criteria: Member is ≥ 18 years of age AND Member has been diagnosed with Stage IA or IB cutaneous T-cell lymphoma (CTCL) AND Member has refractory or persistent CTCL disease after other therapies OR has not tolerated other therapies AND Member and partners have been counseled on appropriate use of contraception Non-preferred agents may be approved for members who have failed an adequate trial of all preferred products FDA-approved for that indication. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
		er Agents
No PA Required CONDYLOX (podofilox) gel	PA Required ALDARA (imiquimod) cream HYFTOR (sirolimus) gel	 Hyftor (sirolimus) gel Member has a diagnosis of facial angiofibroma associated with tuberous sclerosis AND Member is ≥ 6 years of age AND

\mathbf{X} : : 1/ : A11		
Imiquimod (generic Aldara) cream	Imiquimod cream pump	• Provider has evaluated, and member has received, all age-appropriate vaccinations as recommended by current immunization guidelines prior to initiating treatment with HYFTOR
Podofilox solution	VEREGEN (sinecatechins) ointment	Initiating treatment with HTFTOR
		Initial approval: 6 months
	ZYCLARA (imiquimod) cream, cream pump	
		Reauthorization: An additional 6 months may be approved based on provider attestation
		that symptoms improved during the initial 6 months of treatment and the provider has assessed use of all vaccinations recommended by current immunization guidelines.
		Maximum dose: one 10-gram tube/28 days
		Veregen (sinecatechins) may be approved if the following criteria are met:
		 Member has a diagnosis of external genital and/or perianal warts (Condylomata acuminata) AND
		• Member is ≥ 18 years of age AND
		Member is immunocompetent AND
		• Member has tried and failed two preferred products. Failure is defined as lack of
		efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
		Zyclara (imiquimod) 2.5% cream may be approved if the following criteria are met:
		• Member has a diagnosis of clinically typical visible or palpable actinic keratoses
		(AK) of the full face or balding scalp AND
		• Member is ≥ 18 years of age AND
		Member is immunocompetent AND
		• Member has tried and failed one preferred product in the Antineoplastic Agents
		class (such as diclofenac gel or fluorouracil) AND the preferred imiquimod
		(generic Aldara) product. Failure is defined as lack of efficacy, allergy,
		intolerable side effects, or significant drug-drug interaction. Zyclara (imiquimod) 3.75% cream may be approved for:
		 Treatment of clinically typical visible or palpable, actinic keratoses (AK) of the
		full face or balding scalp if the following criteria are met:
		• Member is \geq 18 years of age AND
		 Member is immunocompetent AND
		 Member has tried and failed one preferred product from the
		Antineoplastic Agents class (such as diclofenac gel or fluorouracil)
		AND the preferred imiquimod (generic Aldara) product. Failure is
		defined as lack of efficacy, allergy, intolerable side effects, or
		significant drug-drug interaction.
		OR
		• Treatment of external genital and/or perianal warts (Condylomata acuminata) if
		the following criteria are met:
		• Member is ≥ 12 years of age AND

		MemberMember	der including Zellweger spec age must be greater than 3 w has diagnosis of peroxisoma r spectrum disorders AND	eeks old AND

• Member has manifestations of liver disease, steatorrhea or
complications from decreased fat-soluble vitamin absorption.
Ocaliva (obeticholic acid) may be approved for members meeting the following criteria:
 Member is <u>>18</u> years of age AND
• Medication is prescribed by or in consultation with a gastroenterologist,
hepatologist, or liver transplant provider AND
• Member has the diagnosis of primary biliary cholangitis without cirrhosis OR a
diagnosis of primary biliary cholangitis with compensated cirrhosis with no
evidence of portal hypertension AND
 Member has failed treatment with a preferred ursodiol product for at least 6
months due to an inadequate response, intolerable side effects, drug-drug
interaction, or allergy to preferred ursodiol formulations.
interaction, of anergy to preferred disociol formulations.
Poltona (ursodial) may be approved for members meeting the following criteria:
Reltone (ursodiol) may be approved for members meeting the following criteria:
• Member is \geq 18 years of age AND
• The requested medication is prescribed by or in consultation with a
gastroenterologist, hepatologist, or liver transplant provider AND
• The requested medication is being prescribed for one of the following:
• Treatment of radiolucent, noncalcified gallbladder stones < 20 mm in
greatest diameter AND elective cholecystectomy would be undertaken
except for the presence of increased surgical risk due to systemic
disease, advanced age, idiosyncratic reaction to general anesthesia, or
for those patients who refuse surgery OR
• Prevention of gallstone formation in obese patients experiencing rapid
weight loss
AND
 No compelling reasons for the member to undergo cholecystectomy exist,
including unremitting acute cholecystitis, cholangitis, biliary obstruction,
gallstone pancreatitis, or biliary-gastrointestinal fistula, AND
• Member has trialed and failed treatment with a preferred ursodiol product for at
least 6 months due to an inadequate response, intolerable side effects, drug-drug
interaction, or allergy to inactive ingredients contained in the preferred ursodiol
formulations.
Initial approval: 1 year
Reauthorization: May be reauthorized for 1 additional year with provider attestation that
partial or complete stone dissolution was observed after completion of the initial year of
Reltone therapy. Maximum cumulative approval per member is 24 months.
Urso (ursodiol) and Urso Forte (ursodiol) may be approved for members meeting the
following criteria:
• Member is ≥ 18 years of age AND
 Medication is prescribed by or in consultation with a gastroenterologist,
• Medication is prescribed by of in consultation with a gastroenterologist, hepatologist, or liver transplant provider AND

		 Member has the diagnosis of Primary Biliary Cholangitis as evidenced by two of the following at the time of diagnosis: Evidence of cholestasis with an alkaline phosphatase elevation of at least 1.5 times the upper limit of normal Presence of antimitochondrial antibody with titer of 1:40 or higher Histologic evidence of nonsuppurative destruction cholangitis and destruction of interlobular bile ducts AND Member has failed treatment with a preferred ursodiol product for at least 6 months due to an inadequate response, intolerable side effects, drug-drug interaction, or allergy to inactive ingredients contained in the preferred ursodiol formulations. Requests for drug products that are FDA-indicated for the treatment of nonalcoholic steatohepatitis (NASH) may be approved if meeting the following: A diagnosis of NASH has been confirmed through liver biopsy AND Member meets the FDA-labeled minimum age requirement for the prescribed product AND Member does not have significant liver disease other than NASH, AND The requested medication is being prescribed for use for the FDA-labeled indication and as outlined in product package labeling AND Medication is prescribed by or in consultation with a gastroenterologist, hepatologist, or liver transplant provider.

	Therapeutic Drug Class: GI MOTI	LITY, CHRONIC -Effective 7/1/2023
PA Requi	red for all agents in this class	All agents will only be approved for FDA labeled indications and up to FDA approved
Preferred	Non-Preferred	– maximum doses listed below.
AMITIZA ^{BNR} (lubiprostone) capsule	Alosetron tablet	 Preferred agents may be approved if the member meets the following criteria: Has diagnosis of Irritable Bowel Syndrome – Constipation (IBS-C), Chronic
LINZESS (linaclotide) capsule	LOTRONEX (alosetron) tablet	Idiopathic Constipation (CIC), or Opioid Induced Constipation (OIC) in patients with opioids prescribed for noncancer pain AND
	Lubiprostone capsule	• Member does not have a diagnosis of GI obstruction AND
MOVANTIK (naloxegol) tablet	MOTEGRITY (prucalopride) tablet	 For indication of OIC, member opioid use must exceed 4 weeks of treatment For indications of CIC, OIC, IBS-C; member must have documentation of
	RELISTOR (methylnaltrexone) tablet, syringe	adequate trial of two or more over-the-counter motility agents (polyethylene glycol, docusate or bisacodyl, for example). OR If the member cannot take oral
	SYMPROIC (naldemedine) tablet	medications, then the member must fail a 7-day trial with a nonphosphate enema (docusate or bisacodyl enema). Failure is defined as a lack of efficacy for a 7-
	TRULANCE (plecanatide) tablet	day trial, allergy, intolerable side effects, contraindication to, or significant drug- drug interaction AND
	VIBERZI (eluxadoline) tablet	• For indication of IBS-D, must have documentation of adequate trial and failure with loperamide and trial and failure with dicyclomine or hyoscyamine. Failure is defined as a lack of efficacy for a 7-day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction.

 Non-preferred agents may be approved if the member meets the following criteria: Member meets all listed criteria for preferred agents AND Member has trialed and failed two preferred agents OR if the indication is OIC caused by methadone, then a non-preferred agent may be approved after an adequate trial of MOVANTIK (naloxegol). Failure is defined as a lack of efficacy for a 7-day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction AND If prescribed Viberzi (eluxadoline) or Lotronex (alosetron), member meets the additional criteria for those agents listed below.
 VIBERZI (eluxadoline) may be approved for members who meet the following additional criteria: Diagnosis of Irritable Bowel Syndrome – Diarrhea (IBS-D) AND Member has a gallbladder AND Member does not have severe hepatic impairment (Child-Pugh C), history of severe constipation, known mechanical gastrointestinal obstruction, biliary duct obstruction, history of pancreatitis or structural disease of the pancreas AND Member does not drink more than 3 alcoholic drinks per day
 LOTRONEX (alosetron) and generic alosetron may be approved for members who meet the following additional criteria: Member is a female with Irritable Bowel Syndrome – Diarrhea (IBS-D) with symptoms lasting 6 months or longer AND Member does not have severe hepatic impairment (Child-Pugh C), history of severe constipation or ischemic colitis, hypercoagulable state, Crohn's disease or ulcerative colitis, or known mechanical gastrointestinal obstruction.

Medication	Medication FDA approved indication	
Amitiza (lubiprostone)	IBS-C (females only), CIC, OIC (not caused by methadone)	48mcg/day
Linzess (linaclotide)	IBS-C, CIC	290mcg/day
Movantik (naloxegol)	OIC	25mg/day
Viberzi (eluxadoline)	IBS-D	200mg/day
Relistor subcutaneous injection (methylnaltrexone)	OIC	12mg/day
Relistor oral (methylnaltrexone)	OIC	450mg/day
Lotronex (alosetron)	IBS-D (females only)	2mg/day (females only)
Symproic (Naldemedine)	OIC	0.2mg/day
Trulance (plecanatide)	CIC, IBS-C	3mg/day
Motegrity (prucalopride)	CIC	2mg/day

CIC – chronic idiopathic constipation, OIC – opioid induced constipation, IBS – irritable bowel syndrome, D – diarrhea predominant, C – constipation predominant

PA Requi	red for all agents in this class*	*Prior authorization for preferred agents may be approved if meeting the following
Preferred	Non-Preferred	criteria:
NEUPOGEN (filgrastim) vial, syringe NYVEPRIA (pegfilgrastim- apgf) syringe	FULPHILA (pegfilgrastim-jmdb) syringe GRANIX (tbo-filgrastim) syringe, vial LEUKINE (sargramostim) vial NEULASTA (pegfilgrastim) kit, syringe NIVESYM (filgrastim-aafi) syringe, vial RELEUKO (filgrastim-ayow) syringe, vial UDENYCA (pegfilgrastim-cbqv) syringe ZARXIO (filgrastim-sndz) syringe ZIEXTENZO (pegfilgrastim-bmez) syringe	 Medication is being used for one of the following indications: Patient with cancer receiving myelosuppressive chemotherapy -to reduce incidence of infection (febrile neutropenia) (Either the post nadir ANC is less than 10,000 cells/mm3 or the risk of neutropenia for the member is calculated to be greater than 20%) Acute Myeloid Leukemia (AML) patients receiving chemotherapy Bone Marrow Transplant (BMT) Peripheral Blood Progenitor Cell Collection and Therapy Hematopoietic Syndrome of Acute Radiation Syndrome Severe Chronic Neutropenia (Evidence of neutropenia infection exists or ANC is below 750 cells/mm3) AND For Nyvepria (pegfilgrastim-apgf), the member meets the following criteria: Member has trial and failure of Neupogen. Failure is defined as lack of efficacy, intolerable side effects, drug-drug interaction, or contraindication to Neupogen therapy. Trial and failure of Neupogen will not be required if meeting one of the following:
		Prior authorization for non-preferred agents may be approved if meeting the following criteria:

	Ι	
		• Medication is being used for one of the following indications:
		• Patient with cancer receiving myelosuppressive chemotherapy -to reduce
		incidence of infection (febrile neutropenia) (Either the post nadir ANC is
		less than 10,000 cells/mm3 or the risk of neutropenia for the member is
		calculated to be greater than 20%)
		 Acute Myeloid Leukemia (AML) patients receiving chemotherapy
		• Bone Marrow Transplant (BMT)
		 Peripheral Blood Progenitor Cell Collection and Therapy
		 Hematopoietic Syndrome of Acute Radiation Syndrome
		• Severe Chronic Neutropenia (Evidence of neutropenia infection exists or
		ANC is below 750 cells/mm3)
		AND
		• Member has history of trial and failure of Neupogen AND one other preferred agent.
		Failure is defined as a lack of efficacy with a 3-month trial, allergy, intolerable side
		effects, significant drug-drug interactions, or contraindication to therapy. Trial and
		failure of Neupogen will not be required if meeting one of the following:
		• Member has limited access to caregiver or support system for assistance
		with medication administration OR
		• Member has inadequate access to healthcare facility or home care
		interventions.
		S STIMULATING AGENTS Effective 7/1/2023
	red for all agents in this class*	*Prior Authorization is required for all products and may be approved if meeting the
Preferred	Non-Preferred	following:
		• Medication is being administered in the member's home or in a long-term care
EPOGEN (epoetin alfa) vial	ARANESP (darbepoetin alfa) syringe, vial	facility AND
DETACDIT (ana stin alfa anha)	MIDCEDA (motherware expecting hote) anninge	• Member meets <u>one</u> of the following:
RETACRIT (epoetin alfa-epbx)	MIRCERA (methoxy peg-epoetin beta) syringe	 A diagnosis of cancer, currently receiving chemotherapy, with chemotherapy-induced anemia, and hemoglobin[†] of 10g/dL or lower
(Pfizer only)	PROCRIT (epoetin alfa) vial	OR
	r Kocki i (cpochi ana) via	 A diagnosis of chronic renal failure, and hemoglobin[†] below 10g/dL
		OR
		• A diagnosis of hepatitis C, currently taking ribavirin and failed
		response to a reduction of ribavirin dose, and hemoglobin [†] less than
		10g/dL (or less than 11g/dL if symptomatic) OR
		• A diagnosis of HIV, currently taking zidovudine, hemoglobin [†] less
		than 10g/dL, and serum erythropoietin level of 500 mU/mL or less OR
		• Member is undergoing elective, noncardiac, nonvascular surgery and
		medication is given to reduce receipt of allogenic red blood cell
		transfusions, hemoglobin [†] is greater than 10g/dL, but less than or equal
		transfusions, hemoglobin ^{\dagger} is greater than 10g/dL, but less than or equal to 13g/dL and high risk for perioperative blood loss. Member is not
		transfusions, hemoglobin [†] is greater than 10g/dL, but less than or equal

		 For any non-preferred product, member has trialed and failed treatment with one preferred product. Failure is defined as lack of efficacy with a 6-week trial, allergy, intolerable side effects, or significant drug-drug interaction. [†]Hemoglobin results must be from the last 30 days.

*DUPIXENT (dupilumab) pen, syringe *FASENRA (benralizumab) pen *TEZSPIRE (tezepelumab-	NUCALA (mepolizumab) auto-injector, syringe Note: Product formulations in the physician administered drug (PAD) category are located on <u>Appendix P</u>	 Member is 6 years of age or older AND Member has an FDA-labeled indicated use for treating one of the following: Moderate to severe asthma (on medium to high dose inhaled corticosteroid and a long-acting beta agonist) with eosinophilic phenotype based on a blood eosinophil level of ≥ 150/mcL OR Oral corticosteroid dependent asthma AND

r	
*XOLAIR (omalizumab) syringe	 Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND Medication is being prescribed as add-on therapy to existing asthma regimen.
	Quantity Limit: 2 syringes every 28 days after initial 14 days of therapy (first dose is twice the regular scheduled dose)
	 TEZSPIRE (tezepelumab-ekko): Member is ≥ 12 years of age AND Member has a diagnosis of severe asthma AND Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND The requested medication is being prescribed as add-on therapy to existing asthma regimen.
	Quantity Limit: Four 210 mg unit dose packs every 28 days
	 XOLAIR (omalizumab) syringe: Member is ≥ 6 years of age AND Member has an FDA-labeled indicated use for treating asthma AND Member has a positive skin test or in vitro reactivity to a perennial inhaled allergen or has a pre-treatment IgE serum concentration ≥ 30 IU/mL AND Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND The requested medication is being prescribed as add-on therapy to existing asthma regimen.
	 Quantity Limit: 300 mg: Four unit dose packs every 28 days All other strengths: Two unit dose packs of the same mg strength every 28 days
	 FASENRA (benralizumab): Member is ≥ 12 years of age AND Member has an FDA-labeled indicated use for treating severe asthma with an eosinophilic phenotype based on a blood eosinophil level of ≥ 150/mcL AND Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND The requested medication is being prescribed as add-on therapy to existing asthma regimen.
	Quantity Limit: One 30 mg unit dose pack every 28 days for the first 3 doses and then every 8 weeks thereafter
	Non-Preferred Agents:

		 Non-preferred FDA-indicated biologic agents for asthma may receive approval if meeting the following: The requested medication is being prescribed for treating asthma in alignment with indicated use outlined in FDA-approved product labeling (including asthma type and severity) AND If prescribed for use for asthma with eosinophilic phenotype, member has a blood eosinophil count ≥ 150 cells/mcL AND The requested medication meets FDA-labeled indicated age for prescribed use AND Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND The requested medication is being prescribed as add-on therapy to existing asthma regimen AND Member has trialed and failed‡ two preferred agents. Ouantity Limits: Non-preferred medications will be subject to quantity limitations in alignment with FDA-approved dosing per product package labeling. Nucala (mepolizumab) is limited to 100mg every 4 weeks (members ≥ 12 years of age) or 40mg every 4 weeks (members 6-11 years of age). ‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.
		Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with the prescribed agent.
	Atopic I	Dermatitis
Preferred (*Must meet eligibility	Non-Preferred PA Required	*Preferred products (Adbry and Dupixent) may receive approval if meeting the following:
criteria)		ADBRY (tralokinumab-ldrm):
*ADBRY (tralokinumab-ldrm)	CIBINQO (abrocitinib) tablet	• The requested drug is being prescribed for moderate-to-severe atopic dermatitis AND
syringe	RINVOQ (upadacitinib) tablet	• Member has trialed and failed [‡] the following agents:
*DUPIXENT (dupilumab) pen, syringe	Note: Product formulations in the physician administered drug (PAD) category are located on	 One medium potency to very-high potency topical corticosteroid (such as mometasone furoate, betamethasone dipropionate) AND
	<u>Appendix P</u>	• One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)
		Maximum Dose: 600 mg/2 weeks
L		

Quantity Limit: Four 150 mg/mL prefilled syringes/2 weeks

Approval: One year

DUPIXENT (dupilumab):

- Member has a diagnosis of moderate to severe atopic dermatitis AND
- Member has trialed and failed[‡] the following agents:
 - One medium potency to very-high potency topical corticosteroid [such as mometasone furoate, betamethasone dipropionate, or fluocinonide (see PDL for list of preferred products) **AND**
 - One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)

<u>Quantity Limit</u>: 2 syringes every 28 days after initial 14 days of therapy (first dose is twice the regular scheduled dose)

Approval: One year

Non-Preferred Agents:

Non-preferred agents indicated for the treatment of atopic dermatitis may receive approval if meeting the following:

- Member has a diagnosis of moderate to severe chronic atopic dermatitis AND
- Member has trialed and failed‡ therapy with two preferred agents for the prescribed indication **AND**
- Member has trialed and failed[‡] the following agents:
 - One medium potency to very-high potency topical corticosteroid (such as mometasone furoate, betamethasone dipropionate, or fluocinonide)
 - One topical calcineurin inhibitor (such as pimecrolimus and tacrolimus)

AND

• The medication is being prescribed by or in consultation with a dermatologist, allergist, immunologist, or rheumatologist.

Approval: One year

‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.

Members currently taking a preferred agent may receive approval to continue therapy with that agent.

Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with the prescribed agent.

	Other in	ndications
Preferred	Non-Preferred	*DUPIXENT (dupilumab) may receive approval if meeting the following based on
(If diagnosis met, No PA required)	PA Required	prescribed indication:
(Must meet eligibility criteria*)	ACTEMRA (tocilizumab) syringe, Actpen	
*DUPIXENT (dupilumab) pen,	ARCALYST (rilonacept) injection	• Medication is being prescribed as an add-on maintenance treatment in adult
syringe	CIMZIA (certolizumab pegol) syringe	patients with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP) AND
ENBREL (etanercept)	COSENTYX (secukinumab) syringe, pen-injector	Member has trialed and failed [‡] therapy with at least two intranasal corticosteroid regimens
HUMIRA (adalimumab)	CYLTEZO (adalimumab-adbm) pen, syringe	Eosinophilic Esophagitis (EoE):
OTEZLA (apremilast) tablet	ILARIS (canakinumab) vial	 Member is ≥ 12 years of age AND Member weighs at least 40 kg AND
XELJANZ IR (tofacitinib) tablet	KINERET (anakinra) syringe	• Member has a diagnosis of eosinophilic esophagitis (EoE) with ≥ 15 intraepithelial eosinophils per high-power field (eos/hpf), with or without a

	YUFLYMA (adalimumab-aaty) auto-injector	 gastroenterologist, allergist or immunologist AND Member has trialed and failed[‡] one of the following treatment options for
	Note: Product formulations in the physician administered drug (PAD) category are located on <u>Appendix P</u>	 EoE: Proton pump inhibitor trial of at least eight weeks in duration if reflux is a contributing factor OR Minimum four-week trial of local therapy with fluticasone (using a metered dose inhaler) sprayed into the mouth and then swallowed or budesonide slurry.
		Prurigo Nodularis:
		• Member is \geq 18 years of age AND
		 Medication is being prescribed as treatment for prurigo nodularis AND Member has trialed and failed[‡] therapy with at least two corticosteroid regimens (topical or intralesional injection).

*XOLAIR (omalizumab) may receive approval if meeting the following based on prescribed indication:
 <u>Chronic Rhinosinusitis with Nasal Polyps</u>: Member is 18 years of age or older AND Medication is being prescribed as add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult patients 18 years of age and older with inadequate response to nasal corticosteroids AND Member has tried and failed[‡] therapy with at least two intranasal corticosteroid regimens
 <u>Chronic Idiopathic Urticaria (CIU)</u>: Member is 12 years of age or older AND Member is diagnosed with chronic idiopathic urticaria AND Member is symptomatic despite H1 antihistamine treatment AND Member has tried and failed‡ at least three of the following:
 High-dose second generation H1 antihistamine H2 antihistamine First-generation antihistamine Leukotriene receptor antagonist Hydroxyzine or doxepin (must include) AND • Prescriber attests that the need for continued therapy will be periodically reassessed (as the appropriate duration of Xolair therapy for CIU has currently not been evaluated).
All other preferred agents (HADLIMA, HUMIRA, ENBREL, OTEZLA, KEVZARA) may receive approval for use for FDA-labeled indications.
Non-Preferred Agents:
 ARCALYST (rilonacept) may receive approval if meeting the following: Medication is being prescribed for one of the following autoinflammatory periodic fever syndromes (approval for all other indications is subject to meeting non-preferred criteria listed below): Cryopyrin-associated Autoinflammatory Syndrome (CAPS), including: Familial Cold Autoinflammatory Syndrome (FCAS) Muckle-Wells Syndrome (MWS) Maintenance of remission of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) in adults and pediatric patients weighing at least 10 kg

 Treatment of recurrent pericarditis and reduction in risk of recurrence in adults and children ≥ 12 years of age AND Member has trialed and failed‡ colchicine AND Initial approval will be given for 12 weeks and authorization approval for continuation will be provided based on clinical response.
 ILARIS (canakinumab) may receive approval if meeting the following: Medication is being prescribed for one of the following (approval for all other indications is subject to meeting non-preferred criteria listed below): Familial Mediterranean Fever (FMF) Hyperimmunoglobulinemia D syndrome (HIDS) Mevalonate Kinase Deficiency (MKD) Neonatal onset multisystem inflammatory disease (NOMID) TNF Receptor Associated Periodic Syndrome (TRAPS) Cryopyrin-associated Autoinflammatory Syndrome (including Familial Cold Autoinflammatory Syndrome and Muckle-Wells Syndrome) Symptomatic treatment of adult patients with gout flares in whom NSAIDs and colchicine are contraindicated, are not tolerated, or do not provide an adequate response, and in whom repeated courses of corticosteroids are not appropriate (limited to four 150mg doses per one year approval)
 KINERET (anakinra) may receive approval if meeting the following: Medication is being prescribed for one of the following indications (approval for all other indications is subject to meeting non-preferred criteria below):
not listed, approval is subject to meeting non-preferred criteria listed below): <u>Chronic Rhinosinusitis with Nasal Polyps</u> : • Member is 18 years of age or older AND

 Medication is being prescribed as an add-on maintenance treatment in adult patients with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP) AND Member has a baseline bilateral endoscopic nasal polyps score (NPS; scale 0-8) AND nasal congestion/obstruction score (NC; scale 0-3) averaged over 28-day period AND Member has trialed and failed‡ therapy with three intranasal corticosteroids (see PDL Class) AND Medication is being prescribed by or in consultation with a rheumatologist, allergist, ear/nose/throat specialist or pulmonologist AND Initial authorization will be for 24 weeks, for additional 12-month approval member must meet the following criteria: NC and NPS scores are provided and show a 20% reduction in symptoms from baseline AND Member continues to use primary therapies such as intranasal corticosteroids.
 Eosinophilic Granulomatosis with polyangiitis (EGPA): Member is 18 years of age or older AND Member has been diagnosed with relapsing or refractory EGPA at least 6 months prior to request as demonstrated by ALL the following: Member has a diagnosis of asthma AND Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL or a blood eosinophil level of 10% AND Member has the presence of two of the following EGPA characteristics: Histopathological evidence of eosinophilic vasculitis, perivascular eosinophilic infiltration, or eosinophilic vasculitis, perivascular eosinophilic infiltrates Sinonasal abnormality Cardiomyopathy Glomerulonephritis Alveolar hemorrhage Palpable purpura Antineutrophil cytoplasmic antibody (ANCA) positive Member is on a stable dose of corticosteroids for at least 4 weeks prior to request AND Dose of 300 mg once every 4 week is being prescribed.

	• Member is 12 years of age or older AND
	• Member has a diagnosis for HES for at least 6 months that is nonhematologic secondary HES AND
	 Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL AND
	• Member has a history of two or more HES flares (defined as worsening clinical symptoms or blood eosinophil counts requiring an increase in therapy) AND
	 Member has been on stable dose of HES therapy for at least 4 weeks, at time of
	request, including at least one of the following:
	 Oral corticosteroids Immunosuppressive therapy
	• Cytotoxic therapy AND
	 Dose of 300 mg once every 4 weeks is being prescribed.
	All other non-preferred agent indications may receive approval for FDA-labeled use following trial and failure‡ of all preferred agents that are FDA-indicated or have strong evidence supporting use for the prescribed indication from clinically recognized guideline compendia (only one preferred adalimumab product trial required).
	‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction.
	Members currently taking a preferred agent may receive approval to continue therapy with that agent.
	Members with current prior authorization approval on file for preferred or non-preferred agents will be subject to meeting reauthorization criteria above when listed for the prescribed indication OR if reauthorization criteria are not listed for the prescribed indication, may receive approval for continuation of therapy.
	<u>Note</u> : Prior authorization requests for OLUMIANT (baricitinib) prescribed solely for treating alopecia areata will not be approved.
	The Department would like to remind providers that many products are associated with patient-centered programs that are available to assist with drug administration, education, and emotional support related to our members' various disease states.

X. Miscellaneous	
Therapeutic Drug Class: EPINEPHRINE PRODUCTS -Effective 1/1/2024	

No PA Required	PA Required	
EPIPEN ^{BNR} 0.3 mg/0.3 ml (epinephrine) auto-injector EPIPEN JR ^{BNR} 0.15 mg/0.15 ml, (epinephrine) auto-injector	 AUVI-Q (epinephrine) auto-injector Epinephrine 0.15mg/0.15ml, 0.3mg/0.3ml auto- injector (generic Adrenaclick, Epipen) SYMJEPI 0.15mg/0.3ml, 0.3mg/0.3ml (epinephrine) syringe 	Non-preferred products may be approved if the member has failed treatment with one of the preferred products. Failure is defined as allergy to ingredients in product or intolerable side effects. Quantity limit: 4 auto injectors per year unless used / damaged / lost
Thera	apeutic Drug Class: NEWER HEREDITARY	ANGIOEDEMA PRODUCTS -Effective 1/1/2024
PA Requi	ired for all agents in this class	Medications Indicated for Routine Prophylaxis:
Preferred	Non-Preferred	
Prophylaxis:	<u>Prophylaxis:</u>	Members are restricted to coverage of one medication for <u>routine prophylaxis</u> at one time. Prior authorization approval will be for one year.
HAEGARDA (C1 esterase inhibitor) vial	CINRYZE (C1 esterase inhibitor) kit	HAEGARDA (C1 esterase inhibitor - human) may be approved for members meeting the following criteria:
	ORLADEYO (berotralstat) oral capsule	• Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
	TAKHZYRO (lanadelumab-flyo) syringe, vial	 Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway
<u>Treatment:</u>	<u>Treatment:</u>	swelling) in the absence of hives or a medication known to cause angioedema AND
BERINERT (C1 esterase inhibitor) kit, vial	RUCONEST (C1 esterase inhibitor, recomb) vial	 Member meets at least one of the following: Haegarda is being used for short-term prophylaxis to undergo a
FIRAZYR (icatibant acetate) syringe ^{BNR}		 surgical procedure or major dental work OR Haegarda is being used for long-term prophylaxis and member meets one of the following:
Icatibant syringe (generic FIRAZYR)		 o History of ≥1 attack per month resulting in documented ED admission or hospitalization OR o History of laryngeal attacks OR
		 O History of ≥2 attacks per month involving the face, throat, or abdomen AND
		 Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND Member has received hepatitis A and hepatitis B vaccination AND
		 Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV
		Maximum Dose: 60 IU/kg Minimum Age: 6 years

CINRYZE (C1 esterase inhibitor - human) may be approved for members meeting the
following criteria:
• Member has history of trial and failure of Haegarda. Failure is defined as lack of
efficacy allergy, intolerable side effects, or a significant drug-drug interaction
AND
• Member has a diagnosis of HAE confirmed by laboratory tests obtained on two
separate instances at least one month apart (C4 level, C1-INH level) AND
• Member has a documented history of at least one symptom of a moderate to
severe HAE attack (moderate to severe abdominal pain, facial swelling, airway
swelling) in the absence of hives or a medication known to cause
angioedema AND
• Member meets at least one of the following:
 Cinryze is being used for <u>short-term prophylaxis</u> to undergo a surgical
procedure or major dental work OR
 Cinryze is being used for <u>long-term prophylaxis</u> and member meets
one of the following:
• History of ≥ 1 attack per month resulting in documented ED
admission or hospitalization OR
• History of laryngeal attacks OR
• History of ≥ 2 attacks per month involving the face, throat, or
abdomen AND
• Member is not taking medications that may exacerbate HAE including ACE
inhibitors and estrogen-containing medications AND
• Member has received hepatitis A and hepatitis B vaccination AND
• Provider attests to performing annual testing or screening (as appropriate) for
HBV, HCV, and HIV.
Minimum age: 6 years
Maximum dose: 100 Units/kg
ORLADEYO (berotralstat) may be approved for members meeting the following
criteria:
• Member has history of trial and failure of HAEGARDA. Failure is defined as
lack of efficacy, allergy, intolerable side effects, or significant drug-drug
interaction AND
• Member has a diagnosis of HAE confirmed by laboratory tests obtained on two
separate instances at least one month apart (C4 level, C1-INH level) AND
• Member has a documented history of at least one symptom of a moderate to
severe HAE attack (moderate to severe abdominal pain, facial swelling, airway
swelling) in the absence of hives or a medication known to cause angioedema
AND
• ORLADEYO is prescribed by or in consultation with an allergist or
immunologist AND
 Appropriate drug interaction interventions will be made for members using
concomitant medications that may require dose adjustments (such as
cyclosporine, fentanyl, pimozide, digoxin) AND
Jerospornie, renarry, prinožide, argovini) Artu
