

# Colorado Department of Health Care Policy and Financing Preferred Drug List (PDL)

Effective April 1, 2025

Prior Authorization Forms: Available online at https://hcpf.colorado.gov/pharmacy-resources

Prior Authorization (PA) Requests: Colorado Pharmacy Call Center Phone Number: 800-424-5725 | Fax Number: 800-424-5881

Electronic Prior Authorization (ePA): Electronic Prior Authorization Requests are supported by CoverMyMeds and may be submitted via Electronic Health Record (EHR) systems or through the CoverMyMeds provider portal.

The PDL applies to Medicaid fee-for-service members. It does not apply to members enrolled in Rocky Mountain Health HMO or Denver Health Medicaid Choice.

**Initiation of pharmaceutical product subject to Prior Authorization:** Please note that starting the requested drug, including a non-preferred drug, prior to a PA request being reviewed and approved, through either inpatient use, by using office "samples," or by any other means, does not necessitate Medicaid approval of the PA request.

Health First Colorado, at section 25.5-5-501, C.R.S., requires the generic of a brand name drug be prescribed if the generic is therapeutically equivalent to the brand name drug. Exceptions to this rule are: 1) If the brand name drug is more cost effective than the generic as determined by the Department, 2) If the patient has been stabilized on a brand name drug and the prescriber believes that transition to a generic would disrupt care, and 3) If the drug is being used for treatment of mental illness, cancer, epilepsy, or human immunodeficiency virus and acquired immune deficiency syndrome.

Please see the **Brand Favored Product List** for a list of medications where the brand name drug is more cost effective than the generic drug.

A provider may request a step therapy exception for the treatment of a serious or complex medical condition pursuant to section 25.5-4-428, C.R.S. Serious or complex medical condition means the following medical conditions: serious mental illness, cancer, epilepsy, multiple sclerosis, or human immunodeficiency virus (HIV)/ acquired immune deficiency syndrome (AIDS), or a condition requiring medical treatment to avoid death, hospitalization, or a worsening or advancing of disease progression resulting in significant harm or disability. The step therapy exception request form is available by visiting <a href="https://hcpf.colorado.gov/pharmacy-resources">https://hcpf.colorado.gov/pharmacy-resources</a>

Brand Name Required = BNR, Prior Authorization = PA, AutoPA = authorization can be automated at the point-of-sale transaction if criteria are met Preferred drug list applies only to prescription (RX) products, unless specified.

Preferred Agents	Non-preferred Agents	Prior Authorization Criteria (All Non-preferred products will be approved for one year unless otherwise stated.)				
т	I. Analgesics Therapeutic Drug Class: NON-OPIOID ANALGESIA AGENTS - Oral - Effective 4/1/2025					
No PA Required	PA Required	JOURNAVX (suzetrigine) may be approved if the following criteria are met:				
Duloxetine 20 mg, 30 mg, 60 mg capsule Gabapentin capsule, tablet, solution	CYMBALTA (duloxetine) capsule DRIZALMA (duloxetine DR) sprinkle capsules	<ul> <li>Member is ≥ 18 years of age AND</li> <li>Member is being prescribed suzetrigine for up to 14 days of treatment for moderate-to- severe acute pain AND</li> <li>Prescriber attests that the member's pain is unable to be managed with an NSAID, acetaminophen, or other non-opioid analgesic AND</li> </ul>				
Pregabalin capsule	Duloxetine 40 mg capsule GRALISE (gabapentin ER) tablet	<ul> <li>Journavx (suzetrigine) is not being prescribed to treat chronic pain AND</li> <li>The medication is not being prescribed to treat pain associated with migraine AND</li> <li>Member does not have severe hepatic impairment (Child-Pugh Class C) AND</li> </ul>				
SAVELLA (milnacipran) tablet, titration pack	Gabapentin ER tablet HORIZANT (gabapentin ER) tablet JOURNAVX (suzetrigine) tablet LYRICA (pregabalin) capsule, solution, CR tablet NEURONTIN (gabapentin) capsule, tablet, solution	<ul> <li>Member has been counseled to avoid food or drink containing grapefruit during treatment with Journavx (suzetrigine) AND</li> <li>Member is not concurrently taking a strong CYP3A inhibitor (such as ketoconazole, itraconazole, posaconazole, ritonavir, indinavir, saquinavir, clarithromycin, fluvoxamine) AND</li> <li>Member is not concurrently taking a strong or moderate CYP3A inducer (such as carbamazepine, phenytoin, rifampin, efavirenz, rifabutin, St. John's Wort) · Members using hormonal contraceptives containing progestins other than levonorgestrel and norethindrone have been counseled regarding alternative or additional contraception, if appropriate, per product labeling.</li> </ul>				
	Pregabalin solution, ER tablet	<ul> <li><u>Duration of Approval:</u> 3 months     </li> <li><u>Dosing Limit:</u> One 14-day course per approval on file     </li> <li><u>Quantity limit:</u> 29 tablets/14 days</li> <li>All other non-preferred oral non-opioid analgesic agents may be approved if member     meets all of the following criteria:         <ul> <li>Member has trialed and failed duloxetine (20mg, 30mg, or 60mg) AND has             trialed and failed gabapentin OR pregabalin capsule (Failure is defined as lack             of efficacy with 8-week trial, allergy, intolerable side effects, or significant             drug-drug interaction)</li> </ul> </li> </ul>				
Th	erapeutic Drug Class: NON-OPIOID ANA	Prior authorization will be required for Lyrica (pregabalin) capsule dosages > 600mg per day (maximum of 3 capsules daily) and gabapentin dosages > 3600mg per day. LGESIA AGENTS - Topical - <i>Effective 4/1/2025</i>				
No PA Required	PA Required	$\mathbf{LODSIA} \mathbf{AOE(1)} = \mathbf{L} \mathbf{J} \mathbf{c} \mathbf{u} \mathbf{v} \mathbf{e} 4 / 1 / 20 2 \mathbf{J}$				
Lidocaine patch	Lidocaine patch (Puretek)	Non-preferred topical products require a trial/failure with an adequate 8-week trial of gabapentin AND pregabalin AND duloxetine AND a preferred lidocaine 5% patch.				

LIDODERM (lideocine) noteh	7TLIDO (lidagaing) tanigal system	Failure is defined as lack of efficacy with an 8-week trial, allergy, intolerable side
LIDODERM (lidocaine) patch	ZTLIDO (lidocaine) topical system	effects, or significant drug-drug interaction.
		Lidocaine 5% patch (Puretek manufacturer only) may be approved if the following
		criteria are met:
		• Member is $\geq 18$ years of age <b>AND</b>
		• Member has had an adequate 8-week trial and failure of: gabapentin AND
		pregabalin AND duloxetine AND a preferred lidocaine 5% patch. Failure is defined
		as lack of efficacy with an 8-week trial, allergy, intolerable side effects, or
		significant drug-drug interaction AND
		• Prescriber has provided a justification of clinical necessity indicating that an
	Des Class NON STEDOIDAL ANTLIN	alternative generic lidocaine 5% patch formulation cannot be used.
		FLAMMATORIES (NSAIDS) - Oral - Effective 4/1/2025
No PA Required	PA Required	DUEXIS (ibuprofen/famotidine) or VIMOVO (naproxen/esomeprazole) may be
		approved if the member meets the following criteria:
Celecoxib capsule	ARTHROTEC (diclofenac sodium/ misoprostol)	• Trial and failure <sup>‡</sup> of all preferred NSAIDs at maximally tolerated doses <b>AND</b>
	tablet	• Trial and failure <sup>‡</sup> of three preferred proton pump inhibitors in combination with
Diclofenac potassium 50 mg		NSAID within the last 6 months <b>AND</b>
tablet	CELEBREX (celecoxib) capsule	Has a documented history of gastrointestinal bleeding
Diclofenac sodium EC/DR tablet	DAYPRO (oxaprozin) caplet	
		Diclofenac potassium 25 mg immediate-release tablets may be approved if the following
Ibuprofen suspension, tablet (RX)	Diclofenac potassium capsule, powder pack	criteria are met:
Indomethacin capsule, ER	Dislafanaa mataasiwa 25 ma tahlat	• Member is $\geq 18$ years of age <b>AND</b>
capsule	Diclofenac potassium 25 mg tablet	• Member does not have any of the following medical conditions:
1	Diclofenac sodium ER/SR tablet	• History of recent coronary artery bypass graft (CABG) surgery
Ketorolac tablet*		• History of myocardial infarction
	Diclofenac sodium/misoprostol tablet	• Severe heart failure
Meloxicam tablet		<ul> <li>Advanced renal disease</li> <li>History of costrolitational blooding</li> </ul>
Nabumetone tablet	Diflunisal tablet	<ul> <li>History of gastrointestinal bleeding</li> <li>AND</li> </ul>
	DUEXIS (ibuprofen/famotidine) tablet	<ul> <li>Member has trial and failure<sup>‡</sup> of four preferred oral NSAIDs at maximally tolerated</li> </ul>
Naproxen DR/ER, tablet (RX)	DOLAIS (Ioupioicii/Tamotiunic) tablet	
	ELYXYB (celecoxib) solution	doses
Naproxen suspension		ELYXYB (celecoxib) oral solution may be approved if the following criteria are met:
Sulindac tablet	Etodolac capsule; IR, ER tablet	• Member is $\geq$ 18 years of age AND
		<ul> <li>Requested medication is being prescribed for acute treatment of migraine (with</li> </ul>
	FELDENE (piroxicam) capsule	or without aura) AND
	Fenoprofen capsule, tablet	• Member does <u>not</u> have any of the following medical conditions:
		• History of asthma, urticaria, or other allergic-type reactions after
	Flurbiprofen tablet	taking aspirin or other NSAIDs
	-	• History of recent coronary artery bypass graft (CABG) surgery

	Ibuprofen/famotidine tablet Ketoprofen IR, ER capsule LOFENA (diclofenac) tablet Meclofenamate capsule Mefenamic acid capsule Meloxicam submicronized capsule, suspension	<ul> <li>History of allergic-type reactions to sulfonamides</li> <li>Severe heart failure</li> <li>History of myocardial infarction</li> <li>History of gastrointestinal bleeding</li> <li>Advanced renal disease</li> <li>Pregnancy past 30 weeks gestation</li> </ul> AND <ul> <li>Member is unable to take an alternative NSAID in a solid oral dosage form AND</li> <li>Member has tried and failed<sup>†</sup> one preferred NSAID oral liquid AND</li> <li>Member is unable to use celecoxib capsules, opened and sprinkled into applesauce or other soft food</li> </ul>
	NALFON (fenoprofen) capsule, tablet NAPRELAN (naproxen CR) tablet	<sup>+</sup> Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions.
	Naproxen sodium CR, ER, IR tablet	Maximum dose: 120 mg/day All other non-preferred oral agents may be approved following trial and failure <sup>‡</sup> of four
	Naproxen/esomeprazole DR tablet Oxaprozin tablet	preferred agents. <sup>‡</sup> Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions.
	Piroxicam capsule	*Ketorolac tablets quantity limit: 5-day supply per 30 days and 20 tablets per 30 days
	RELAFEN DS (nabumetone) tablet Tolmetin tablet	
Thereneutic Dr	VIMOVO (naproxen/esomeprazole) DR tablet	AMMATORIES (NSAIDS) - Non-Oral - Effective 4/1/2025
No PA Required Diclofenac 1.5% topical solution	PA Required Diclofenac 1.3% topical patch, 2% pump	<ul> <li>SPRIX (ketorolac) may be approved if meeting the following criteria:</li> <li>Member is unable to tolerate, swallow or absorb oral NSAID formulations OR</li> <li>Member has trialed and failed three preferred oral or topical NSAID agents</li> </ul>
Diclofenac sodium 1% gel (OTC/Rx)	FLECTOR (diclofenac) 1.3% topical patch	<ul> <li>(failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions)</li> <li>Quantity limit: 5-single day nasal spray bottles per 30 days</li> </ul>
	Ketorolac nasal spray LICART (diclofenac) 1.3% topical patch	All other non-preferred topical agents may be approved for members who have trialed and failed one preferred agent. Failure is defined as lack of efficacy with 14-day trial,
	PENNSAID (diclofenac solution) 2% pump, 2% solution packet	allergy, intolerable side effects, or significant drug-drug interaction.
	1 1	Diclofenac topical patch quantity limit: 2 patches per day

Diclofenac 3% gel (generic Solaraze) prior authorization criteria can be found in the
Antineoplastic agents, topical, section of the PDL.

**Opioid Utilization Policy (long-acting and short-acting opioids):** 

It is highly encouraged that the healthcare team utilize the Prescription Drug Monitoring Program (PDMP) to aid in ensuring safe and efficacious therapy for members using controlled substances.

Total Morphine Milligram Equivalent Policy Effective 10/1/17:

- The maximum allowable morphine milligram equivalent (MME) is 200 MME. Prescriptions for short-acting (SA) and long-acting (LA) opioids are cumulatively included in this calculation. The prescription that exceeds the cumulative MME limit of 200 MME for a member will require prior authorization and may require a provider-to-provider telephone consultation with the pain management physician (free of charge and provided by Health First Colorado).
- Prior authorization will be granted to allow for tapering
- Prior authorization for 1 year will be granted for diagnosis of sickle cell anemia
- Prior authorization for 1 year will be granted for admission to or diagnosis of hospice or end of life care
- Prior authorization for 1 year will be granted for pain associated with cancer

MME calculation is conducted using conversion factors from the following link: <u>https://pharmacypmp.az.gov/resources/mme-calculator</u>

Only one long-acting opioid agent (including different strengths) and one short-acting opioid agent (including different strengths) will be considered for a prior authorization.

Medicaid provides guidance on the treatment of pain, including tapering, on our webpage under the heading Pain Management Resources and Opioid Use at: <a href="https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use">https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use</a>

#### Opioid Naïve Policy Effective 8/1/17 (Update effective 04/01/23 in Italics):

Members who have not filled a prescription for an opioid within the past 180 days will be identified as "opioid treatment naïve" and have the following limitations placed on the initial prescription(s):

- The prescription is limited to short-acting opioid agents or Butrans (buprenorphine). Use of other long-acting opioid agents will require prior authorization approval for members identified as opioid treatment naïve.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 7 days, the quantity will be limited to 8 dosage forms per day (tablets, capsules), maximum #56 tablets/capsules for a 7-day supply
- The fourth prescription for an opioid will require prior authorization, filling further opioid prescriptions may require a clinical pharmacist review or provider to provider telephone consultation with a pain management physician (free of charge and provided by Health First Colorado).
- If a member has had an opioid prescription filled within the past 180 days, then this policy would not apply to that member and other opioid policies would apply as applicable.

# Dental Prescriptions Opioid Policy Effective 11/15/18 (implemented in the claims system 01/07/19):

Members who receive an opioid prescribed by a dental provider will be subject to day supply limits and quantity per day limits for short acting opioids.

- The prescription is limited to short-acting opioid agents only. Use of long-acting opioid agents and short acting fentanyl agents will require prior authorization approval for members' prescriptions written by a dental provider.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 4 days, the quantity will be limited to 6 dosage forms per day (tablets, capsules), maximum #24 tablets/capsules for a 4-day supply
- The fourth prescription for an opioid will require prior authorization. A prior authorization for the fourth fill may be approved for up to a 7-day supply and the quantity will be limited to 8 dosage forms per day (#56 tablets/capsules) for members with any of the following diagnoses/undergoing any of the following procedures:
  - Traumatic oro-facial tissue injury with major mandibular/maxillary surgical procedures
  - Severe cellulitis of facial planes
  - Severely impacted teeth with facial space infection necessitating surgical management

• Other potential exemptions that exceed the first 3 fill limits (day supply and quantity) may be evaluated with a provider-to-provider telephone consult with a pain management specialist (free of charge and provided by Health First Colorado)

If a member has had an opioid prescription prescribed by a non-dental provider, then this policy would not apply to that member and other opioid policies would apply as applicable. Dental prescriptions do not impact the opioid treatment naïve policy, but the prescriptions will be counted towards the Morphine Milligram Equivalent (MME) daily dose.

#### Opioid and Benzodiazepine Combination Effective 9/15/19:

Prior authorization will be required for members receiving long-term therapy with an opioid medication who are newly started on a benzodiazepine medication <u>OR</u> for members receiving long-term therapy with a benzodiazepine medication who are newly started on an opioid medication. Prior authorization may be approved if meeting the following:

- The member discontinued or is no longer taking either the opioid or benzodiazepine medication and will not be using these in combination **OR**
- The member will not be taking the prescribed opioid and benzodiazepine medications at the same time based on prescribed dosing interval (such as prn administration) for the regimen <u>AND</u> the prescriber attests that the member has received appropriate counseling\* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- The prescriber has evaluated the regimen and attests that it is appropriate for the member to continue use of the concomitant opioid and benzodiazepine medication regimen as prescribed <u>AND</u> the prescriber attests that the member has received appropriate counseling\* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- Prior authorization may be approved for members receiving palliative or hospice care **OR**
- For benzodiazepine prior authorizations, approval may be granted if the benzodiazepine is being prescribed for seizure disorder or convulsions.

\*If counseling has not been provided, the prescriber attests that a reasonable effort will be made to contact the member or the member's pharmacy to ensure that counseling is provided.

# Opioid and Quetiapine Combination Effective 9/15/19:

Pharmacy claims for members receiving opioid and quetiapine medications in combination will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) related to risk of increased sedation from concomitant use of this drug combination.

# Opioid and Buprenorphine-Containing substance use disorder (SUD) Product Combination Effective 06/01/21:

Opioid claims submitted for members currently receiving buprenorphine-containing SUD medications will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) with use of this drug combination.

	Therapeutic Drug Class: <b>OPIOIDS, Short Acting -</b> Effective 4/1/2025					
Preferred	Non-Preferred	*Preferred codeine and tramadol products do not require prior authorization for adult				
No PA Required*	PA Required	members (18 years of age or greater) if meeting all other opioid policy criteria.				
(If criteria and quantity limit						
are met)		Preferred codeine or tramadol products prescribed for members < 18 years of age must				
		meet the following criteria:				
*Acetaminophen/codeine tablets	Acetaminophen / codeine elixir	• Preferred tramadol and tramadol-containing products may be approved for				
		members $< 18$ years of age if meeting the following:				
Hydrocodone/acetaminophen	ASCOMP WITH CODEINE	• Member is 12 years to 17 years of age AND				
solution, tablet	(codeine/butalbital/aspirin/caffeine)	• Tramadol is NOT being prescribed for post-surgical pain following tonsil or				
		adenoid procedure AND				
Hydromorphone tablet	*Butalbital/caffeine/acetaminophen/codeine	$\circ$ Member's BMI-for-age is not > 95 <sup>th</sup> percentile per CDC guidelines AND				
	capsule	• Member does not have obstructive sleep apnea or severe lung disease OR				

Morphine IR solution, tablet	Butalbital/caffeine/aspirin/codeine capsule	• For members < 12 years of age with complex conditions or life-limiting illness who are receiving care under a pediatric specialist, tramadol and tramadol-				
Oxycodone solution, tablet		containing products may be approved on a case-by-case basis				
Oxycodone/acetaminophen tablet	Butalbital compound/codeine	• <b>Preferred Codeine and codeine-containing products</b> will receive prior authorization approval for members meeting the following criteria may be approved				
*Tramadol 25mg, 50mg	Butorphanol tartrate (nasal) spray	for members < 18 years of age if meeting the following: • Member is 12 years to 17 years of age AND				
*Tramadol/acetaminophen tablet	Carisoprodol/aspirin/codeine	<ul> <li>Codeine is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND</li> </ul>				
	Codeine tablet	<ul> <li>Member's BMI-for-age is not &gt; 95<sup>th</sup> percentile per CDC guidelines AND</li> <li>Member does not have obstructive sleep apnea or severe lung disease AND</li> </ul>				
	Dihydrocodeine/acetaminophen/caffeine tablet	<ul> <li>Member is not pregnant, or breastfeeding AND</li> <li>Renal function is not impaired (GFR &gt; 50 ml/min) AND</li> </ul>				
	DILAUDID (hydromorphone) solution, tablet	• Member is not receiving strong inhibitors of CYP3A4 (such as erythromycin, clarithromycin, itraconazole, ketoconazole, posaconazole, fluconazole				
	FIORICET/CODEINE (codeine/	<ul> <li>[≥200mg daily], voriconazole, delavirdine, and milk thistle) AND</li> <li>o Member meets one of the following:</li> </ul>				
	butalbital/acetaminophen/caffeine) capsule	Member has trialed codeine or codeine-containing products in the past				
	Hydrocodone/ibuprofen tablet	<ul> <li>with no history of allergy or adverse drug reaction to codeine</li> <li>Member has not trialed codeine or codeine-containing products in the past</li> </ul>				
	Hydromorphone solution	and the prescriber acknowledges reading the following statement: "Approximately 1-2% of the population metabolizes codeine in a manner				
	Levorphanol tablet	that exposes them to a much higher potential for toxicity. Another notable proportion of the population may not clinically respond to codeine. We ask				
	Meperidine solution, tablet	that you please have close follow-up with members newly starting codeine and codeine-containing products to monitor for safety and efficacy."				
	Morphine concentrated solution, oral syringe	Non-preferred tramadol products may be approved following trial and failure of generic				
	NALOCET (oxycodone/acetaminophen) tablet	tramadol 50mg tablet AND generic tramadol/acetaminophen tablet.				
	Oxycodone capsule, syringe, concentrated solution	All other non-preferred short-acting opioid products may be approved following trial failure of three preferred products. Failure is defined as allergy <sup>‡</sup> , lack of efficacy,				
	Oxycodone/acetaminophen solution	intolerable side effects, or significant drug-drug interaction.				
	Oxycodone/acetaminophen tablet (generic PROLATE)	‡Allergy: hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension, bronchospasm, and angioedema				
	Oxymorphone tablet	<u>Quantity Limits</u> : Short-acting opioids will be limited to a total of 120 tablets per 30 days (4/day) per member for members who are not included in the opioid treatment naive				
	Pentazocine/naloxone tablet	<ul> <li>Policy.</li> <li>Exceptions will be made for members with a diagnosis of a terminal illness</li> </ul>				
	PERCOCET (oxycodone/ acetaminophen) tablet	<ul><li>(hospice or palliative care) or sickle cell anemia.</li><li>For members who are receiving more than 120 tablets currently and who do not</li></ul>				
	ROXICODONE (oxycodone) tablet	have a qualifying exemption diagnosis, a 6-month prior authorization can be granted via the prior authorization process for providers to taper members.				
	ROXYBOND (oxycodone) tablet					

	SEGLENTIS (tramadol/celecoxib) tablet Tramadol 100mg tablet Tramadol solution	<ul> <li>Please note that if more than one agent is used, the combined total utilization may not exceed 120 units in 30 days. There may be allowed certain exceptions to this limit for acute situations (for example: post-operative surgery, fractures, shingles, car accident).</li> <li><u>Maximum Doses:</u> Tramadol: 400mg/day Codeine: 360mg/day Butorphanol intranasal: 10ml per 30 days (four 2.5ml 10mg/ml package units per 30 days)</li> </ul>
Therapeutic		S (buccal, transmucosal, sublingual) - Effective 4/1/2025
	PA Required ACTIQ (fentanyl citrate) lozenge Fentanyl citrate lozenge, buccal tablet FENTORA (fentanyl citrate) buccal tablet	Fentanyl buccal, intranasal, transmucosal, and sublingual products: Prior authorization approval may be granted for members experiencing breakthrough cancer pain and those that have already received and are tolerant to opioid drugs for the cancer pain AND are currently being treated with a long-acting opioid drug. The prior authorization may be granted for up to 4 doses per day. For patients in hospice or palliative care, prior authorization will be automatically granted regardless of the number of doses prescribed.
	· · · · · · · · · · · · · · · · · · ·	S, Long Acting - Effective 4/1/2025
Preferred No PA Required (unless indicated by * criteria) BELBUCA <sup>BNR</sup> (buprenorphine) buccal film	Non-Preferred PA Required **OXYCONTIN (oxycodone ER) tablet Buprenorphine buccal film, transdermal patch	<b>*Belbuca (buprenorphine)</b> buccal film may be approved for members who have trialed and failed <sup>‡</sup> treatment with Butrans (buprenorphine) patch at a dose of 20 mcg/hr <b>OR</b> with prescriber confirmation that the maximum dose of Butrans 20 mcg/hr will not provide adequate analgesia. <u>Quantity limit</u> : 60 films/30 days.
BUTRANS <sup>BNR</sup> (buprenorphine) transdermal patch *Fentanyl 12mcg, 25mcg, 50mcg, 75mcg, 100mcg tempedarmal	CONZIP (tramadol ER) capsule Fentanyl 37mcg, 62mcg, 87mcg transdermal patch	Oxycontin (oxycodone ER) may be approved for members who have trialed and failed‡ treatment with TWO preferred agents. All other non-preferred products may be approved for members who have trialed and failed‡ three preferred products may be approved for members who have trialed and failed‡
75mcg, 100mcg transdermal patch Morphine ER (generic MS Contin) tablet	Hydrocodone ER capsule, tablet Hydromorphone ER tablet HYSINGLA (hydrocodone ER) tablet	failed <sup>‡</sup> three preferred products. <sup>‡</sup> Failure is defined as lack of efficacy with 14-day trial, allergy (hives, maculopapular rash, erythema multiforme, pustular rash, intolerable application site skin reactions, severe hypotension, bronchospasm, and angioedema), intolerable side effects, or significant drug-drug interaction.
Tramadol ER (generic Ultram ER) tablet	Methadone (all forms) Morphine ER capsule MS CONTIN (morphine ER) tablet	<u>Methadone:</u> Members may receive 30-day approval when prescribed for neonatal abstinence syndrome without requiring trial and failure of preferred agents or opioid prescriber consultation.

		Methadone Continuation:
	Oxycodone ER tablet	Members who have been receiving methadone for pain indications do not have to meet
	· ·	non-preferred criteria. All new starts for methadone will require prior authorization under
	Oxymorphone ER tablet	the non-preferred criteria listed above.
	Tramadol ER capsule	If a prescriber would like to discuss strategies for tapering off methadone or transitioning to other pain management therapies for a Health First Colorado member, consultation with the Health First Colorado pain management physician is available free of charge by contacting the pharmacy call center helpdesk and requesting an opioid prescriber consult.
		<ul> <li><u>Reauthorization:</u> Reauthorization for a non-preferred agent may be approved if the following criteria are met:</li> <li>Provider attests to continued benefit outweighing risk of opioid medication use AND</li> <li>Member met original prior authorization criteria for this drug class at time of original authorization</li> <li><u>Quantity/Dosing Limits:</u></li> <li>Oxycontin and Hydrocodone ER (generic Zohydro ER) will only be approved for twice daily dosing.</li> <li>Hysingla will only be approved for once daily dosing.</li> <li>Fentanyl patches will require a PA for doses of more than 15 patches/30 days (if using one strength) or 30 patches for 30 days (if using two strengths). For fentanyl patch strengths of 37mcg/hr, 62mcg/hr, and 87mcg/hr, member must trial and fail two preferred strengths of separate patches that will provide the desired dose (such as 12mcg/hr + 50mcg/hr = 62mcg/hr).</li> </ul>
	II Anti	Infectives
	1 0	TICS, INHALED -Effective 1/1/2025
Preferred	<b>Non-Preferred</b>	
No PA Required	PA Required	*CAYSTON (aztreonam) inhalation solution may be approved if the following criteria
(*Must meet eligibility criteria)		are met:
	ARIKAYCE (amikacin liposomal) inhalation vial	• Member has a history of trial and failure of preferred tobramycin solution for
Tobramycin inhalation solution (generic TOBI)	BETHKIS (tobramycin) inhalation ampule	inhalation (failure is defined as lack of efficacy with a 4-week trial, intolerable side effects, or significant drug-drug interactions) <b>OR</b> provider attests that
*CAYSTON (aztreonam) inhalation solution	KITABIS (tobramycin) nebulizer pak	member cannot use preferred tobramycin solution for inhalation due to documented allergy or contraindication to therapy <b>AND</b>
	TOBI (tobramycin) inhalation solution	The member has known colonization of <i>Pseudomonas aeruginosa</i> in the lungs <b>AND</b>
	<u> </u>	<u> </u>

	Therapeutic Drug Class: <b>ANTI-PSO</b>	<b>PRIATICS - Oral -</b> <i>Effective 7/1/2024</i>
No PA Required	PA Required	
Acitretin capsule	Methoxsalen capsule	Prior authorization for non-preferred oral agents may be approved with failure of two preferred anti-psoriatic agents, one of which must be a preferred oral agent. Failure is

		defined as lack of efficacy of a 4-week trial, allergy, intolerable side effects or significant drug-drug interaction.
	Therapeutic Drug Class: ANTI-PSO	RIATICS - Topical - Effective 7/1/2024
No PA Required Calcipotriene cream, solution	PA Required Calcipotriene foam, ointment	<b>ZORYVE</b> ( <b>roflumilast</b> ) may receive approval if meeting the following based on prescribed indication:
TACLONEX SCALP <sup>BNR</sup> (calcipotriene/betamethasone) suspension	Calcipotriene/betamethasone dipropionate ointment, suspension	Seborrheic dermatitis $(0.3\%)$ foam formulation• Member is $\geq 9$ years of age AND
TACLONEX (calcipotriene/betamethasone)	Calcitriol ointment DUOBRII (halobetasol/tazarotene) lotion	<ul> <li>Member has a diagnosis of seborrheic dermatitis AND</li> <li>Member does not have moderate or severe hepatic impairment (Child-Pugh B or Child Diagnosis)</li> </ul>
ointment	ENSTILAR (calcipotriene/betamethasone) foam	<ul><li>C) AND</li><li>Medication is being prescribed by or in consultation with a dermatologist AND</li></ul>
	SORILUX (calcipotriene) foam	• If the affected area is limited to the scalp:
	VTAMA (tapinarof) cream ZORYVE 0.3% (roflumilast) cream	<ul> <li>Prescriber attests that member has been counseled regarding alternative treatment options, including over-the-counter (OTC) antifungal shampoo (such as selenium sulfide, zinc pyrithione) and OTC coal tar shampoo, when appropriate)</li> </ul>
		<ul> <li>AND         <ul> <li>Member has documented trial and failure (with a minimum 2-week treatment period) of at least one prescription product for seborrheic dermatitis, such as ketoconazole 2% antifungal shampoo or a topical corticosteroid. Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction.</li> </ul> </li> <li>If the affected area includes the face or body:</li> </ul>
		Member has documented trial and failure (with a minimum 2-week treatment period) with at least one product from ALL of the following categories (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug- drug interaction): • Topical antifungal (such as ketoconazole, ciclopirox)
		<ul> <li>Topical corticosteroid</li> <li>Topical calcineurin inhibitor (such as pimecrolimus, tacrolimus)</li> </ul>
		<ul> <li>AND</li> <li>Member has been counseled that Zoryve foam is flammable. Fire, flame, or smoking during and immediately following application must be avoided.</li> </ul>

1]
<ul> <li><u>Plaque psoriasis</u> (0.3% cream formulation)</li> <li>Member is ≥ 6 years of age AND</li> </ul>
Member has a diagnosis of plaque psoriasis AND
• Member has body surface area (BSA) involvement of ≤20% AND
• Member does not have moderate or severe hepatic impairment (Child-Pugh B or C) AND
• Medication is being prescribed by or in consultation with a dermatologist AND
• If the affected area is limited to the scalp:
<ul> <li>Prescriber attests that member has been counseled regarding alternative treatment options, including over-the-counter (OTC) emollients, vitamin D analogs, and coal tar shampoo when appropriate</li> </ul>
<ul> <li>AND         <ul> <li>Member has documented trial and failure (with a minimum 2-week treatment period) of a topical corticosteroid. Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction.</li> </ul> </li> <li>If the affected area includes the face or body:</li> </ul>
<ul> <li>Member has documented trial and failure (with a minimum 2-week treatment period) of at least one product from ALL of the following categories. (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction):</li> </ul>
Topical corticosteroid
<ul> <li>Topical calcineurin inhibitor (such as pimecrolimus, tacrolimus)</li> </ul>
<u>Quantity limit</u> : Foam or cream - 60 grams/30 days
<u>Initial approval:</u> Foam or cream: 8 weeks
<u>Reauthorization</u> : Reauthorization for one year may be approved based on provider attestation that member's symptoms improved during the initial 8 weeks of treatment and continuation of therapy is justified.

		<ul> <li>Prior authorization for all other non-preferred topical agents may be approved with failure of two preferred topical agents. If non-preferred topical agent being requested is a combination product, trial of two preferred agents must include a preferred combination agent. Failure is defined as lack of efficacy of a 4-week trial, allergy, intolerable side effects or significant drug-drug interaction.</li> <li>Preferred and non-preferred products that contain a corticosteroid ingredient (such as betamethasone) will be limited to 4 weeks of therapy. Continued use will require one week of steroid-free time in between treatment periods.</li> <li>Members with &gt;30% of their body surface area affected may not use Enstilar (calcipotriene/betamethasone DP) foam or Taclonex (calcipotriene/betamethasone DP) ointment products as safety and efficacy have not been established. Members may not apply Zoryve (roflumilast) cream to &gt;20% of affected body surface area, as safety and efficacy have not been established.</li> </ul>
		DULATORS, TOPICAL – Effective 7/1/2024
		Dermatitis
No PA Required ELIDEL (pimecrolimus) cream <sup>BNR</sup> Tacrolimus ointment	PA Required EUCRISA (crisaborole) ointment OPZELURA (ruxolitinib) cream Pimecrolimus cream ZORYVE (tapinarof) 0.15% cream, foam	<ul> <li>EUCRISA (crisaborole) may be approved if the following criteria are met:</li> <li>Member is at least 3 months of age and older AND</li> <li>Member has a diagnosis of mild to moderate atopic dermatitis AND</li> <li>Member has a history of failure, contraindication, or intolerance to at least two medium-to high-potency topical corticosteroids for a minimum of 2 weeks OR is not a candidate for topical corticosteroids AND</li> <li>Member must have tried and failed pimecrolimus and tacrolimus. Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions. AND</li> <li>Eucrisa (crisaborole) must be prescribed by or in consultation with a dermatologist or allergist/immunologist.</li> </ul> OPZELURA (ruxolitinib) cream may be approved if the following criteria are met based on prescribed indication:

• Member is $\geq$ 12 years of age AND
Member is immunocompetent AND
• Member has a diagnosis of mild to moderate atopic dermatitis AND
• Member has body surface area (BSA) involvement of ≤20% AND
• Medication is being prescribed by or in consultation with a dermatologist
or allergist/immunologist AND
• Member has a history of failure, contraindication, or intolerance to at least two medium-to high
potency topical corticosteroids for a minimum of 2 weeks OR is not a candidate for topical corticosteroids AND
• Member must have trialed and failed twice-daily pimecrolimus and tacrolimus. Failure is
defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction AND
<ul> <li>Member is not using Opzelura (ruxolitinib) cream along with a strong</li> </ul>
inhibitor of CYP3A4 (such as fluconazole $\geq 200 \text{ mg/day}$ , ketoconazole,
itraconazole, voriconazole, ritonavir) due to the potential for increased
systemic exposure to ruxolitinib.
Nonsegmental Vitiligo
• Member is $\geq$ 12 years of age AND
Member is immunocompetent AND
• Member has a diagnosis of stable nonsegmental vitiligo, defined as no
increase in the size of existing lesions and the absence of new lesions in the
previous 3 to 6 months, AND
• Medication is being prescribed by or in consultation with a dermatologist AND
<ul> <li>Member will be applying Opzelura (ruxolitinib) to ≤10% of body surface area (BSA) per application AND</li> </ul>
• Member has a history of failure, contraindication, or intolerance to at least
two medium-to high-potency topical corticosteroids for a minimum of 2
weeks OR is not a candidate for topical corticosteroids AND
<ul> <li>Member must have trialed and failed twice-daily pimecrolimus OR</li> </ul>
tacrolimus. Failure is defined as a lack of efficacy, allergy, intolerable side
effects, contraindication to, or significant drug-drug interaction AND
• Member is not using Opzelura (ruxolitinib) cream along with a strong
inhibitor of CYP3A4 (such as fluconazole $\geq 200 \text{ mg/day}$ , ketoconazole,
itraconazole, voriconazole, ritonavir) due to the potential for increased
systemic exposure to ruxolitinib.
Quantity limit: 60 grams/week

		All other non-preferred topical immunomodulator products may be approved for atopic dermatitis following adequate trial and failure‡ of one prescription topical corticosteroid AND two preferred agents. ‡Failure is defined as a lack of efficacy with one month trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.

		• The requested medication is being prescribed as add-on therapy to existing		
		asthma regimen.		
		Non-Preferred Agents:		
		<ul> <li>Non-preferred FDA-indicated biologic agents for asthma may receive approval if meeting the following: <ul> <li>The requested medication is being prescribed for treating asthma in alignment with indicated use outlined in FDA-approved product labeling (including asthma type and severity) AND</li> <li>If prescribed for use for asthma with eosinophilic phenotype, member has a blood eosinophil count ≥ 150 cells/mcL AND</li> <li>The requested medication meets FDA-labeled indicated age for prescribed use AND</li> <li>Member's asthma has been refractory to recommended evidence-based, guideline-supported pharmacologic therapies AND</li> <li>The requested medication is being prescribed as add-on therapy to existing asthma regimen AND</li> <li>Member has trialed and failed‡ two preferred agents.</li> </ul> </li> <li>Ouantity Limits: <ul> <li>Non-preferred medications will be subject to quantity limitations in alignment with FDA-approved dosing per product package labeling.</li> <li>Nucala (mepolizumab) is limited to 100mg every 4 weeks (members ≥ 12 years of age) or 40mg every 4 weeks (members 6-11 years of age).</li> <li>‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.</li> <li>Continuation of therapy: Members currently taking a preferred agent may receive approval to continue therapy with that agent. Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with that agent.</li> </ul> </li> </ul>		
Atopic Dermatitis				
Preferred	Non-Preferred PA Required	*Preferred products (Adbry and Dupixent) may receive approval if meeting the following:		
(*Must meet eligibility criteria)	The required			
*ADBRY (tralokinumab-ldrm) syringe, autoinjector	CIBINQO (abrocitinib) tablet	<ul> <li>ADBRY (tralokinumab-ldrm):</li> <li>The requested drug is being prescribed for moderate-to-severe atopic dermatitis AND</li> </ul>		
*DUPIXENT (dupilumab) pen, syringe	RINVOQ (upadacitinib) tablet	• Member has trialed and failed <sup>‡</sup> the following agents:		

Note: Product formulations in the physician	• One medium potency to very-high potency topical corticosteroid (such
administered drug (PAD) category are located on	as mometasone furoate, betamethasone dipropionate) AND
<u>Appendix P</u>	• One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)
	Maximum Dose: 600 mg/2 weeks
	Quantity Limit: Four 150 mg/mL prefilled syringes/2 weeks
	<ul> <li>DUPIXENT (dupilumab):         <ul> <li>Member has a diagnosis of moderate to severe atopic dermatitis AND</li> <li>Member has trialed and failed‡ the following agents:                 <ul> <li>One medium potency to very-high potency topical corticosteroid [such as mometasone furoate, betamethasone dipropionate, or fluocinonide (see PDL for list of preferred products) AND</li> <li>One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)</li> </ul> </li> </ul> </li> <li>Ouantity Limit: 2 syringes every 28 days after initial 14 days of therapy (first dose is twice the regular scheduled dose)</li> </ul>
	Non-Preferred Agents:
	Non-1 referred Agents.
	<ul> <li>Non-preferred agents indicated for the treatment of atopic dermatitis may receive approval if meeting the following: <ul> <li>Member has a diagnosis of moderate to severe chronic atopic dermatitis AND</li> <li>Member has trialed and failed‡ therapy with two preferred agents for the prescribed indication AND</li> <li>Member has trialed and failed‡ the following agents: <ul> <li>One medium potency to very-high potency topical corticosteroid (such as mometasone furoate, betamethasone dipropionate, or fluocinonide)</li> <li>One topical calcineurin inhibitor (such as pimecrolimus and tacrolimus)</li> </ul> </li> <li>AND</li> <li>The medication is being prescribed by or in consultation with a dermatologist, allergist, immunologist, or rheumatologist.</li> </ul></li></ul>
	Approval: One year
	‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.
	<u>Continuation of therapy</u> : Members currently taking a preferred agent may receive approval to continue therapy with that agent. Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with the prescribed agent.

0	Minimum four-week trial of local therapy with a corticosteroid
	medication

## Prurigo Nodularis:

- Member is  $\geq 18$  years of age AND
- Medication is being prescribed as treatment for prurigo nodularis AND
- Member has trialed and failed<sup>‡</sup> therapy with at least two corticosteroid regimens (topical or intralesional injection).

**\*FASENRA** (benralizumab) may be approved for the treatment of adult patients with eosinophilic granulomatosis with polyangiitis (EGPA).

**\*KEVZARA** (sarilumab) treatment of adult patients with polymyalgia rheumatica who have had an inadequate response to corticosteroids or who cannot tolerate corticosteroid taper.

**TYENNE** (tocilizumab-aazg) may receive approval for use for FDA-label indications following trial and failure<sup>‡</sup> of a preferred adalimumab product or ENBREL

**\*XOLAIR (omalizumab)** may receive approval if meeting the following based on prescribed indication:

Chronic Rhinosinusitis with Nasal Polyps:

- Member is 18 years of age or older AND
- Medication is being prescribed as add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult patients 18 years of age and older with inadequate response to nasal corticosteroids **AND**
- Member has tried and failed<sup>‡</sup> therapy with at least two intranasal corticosteroid regimens

Chronic Idiopathic Urticaria (CIU):

- Member is 12 years of age or older AND
- Member is diagnosed with chronic idiopathic urticaria AND
- Member is symptomatic despite H1 antihistamine treatment AND
- Member has tried and failed<sup>‡</sup> at least three of the following:
  - High-dose second generation H1 antihistamine
  - H2 antihistamine
  - First-generation antihistamine
  - o Leukotriene receptor antagonist
  - Hydroxyzine or doxepin (must include)
  - AND

• Prescriber attests that the need for continued therapy will be periodically reassessed (as the appropriate duration of Xolair therapy for CIU has currently not been evaluated).
<ul> <li><u>IgE-Mediated Food Allergy</u>:</li> <li>Medication is being prescribed for reduction of allergic reactions (Type I),</li> </ul>
including anaphylaxis, that may occur with accidental exposure to one or more foods in adult and pediatric patients aged 1 year and older with IgE-mediated food allergy.
All other preferred agents (preferred adalimumab products, ENBREL, OTEZLA) may receive approval for use for FDA-labeled indications.
Non-Preferred Agents:
<ul> <li>ARCALYST (rilonacept) may receive approval if meeting the following:         <ul> <li>Medication is being prescribed for one of the following autoinflammatory periodic fever syndromes (approval for all other indications is subject to meeting non-preferred criteria listed below):                 <ul> <li>Cryopyrin-associated Autoinflammatory Syndrome (CAPS), including:</li> <ul> <li>Familial Cold Autoinflammatory Syndrome (FCAS)</li> <li>Muckle-Wells Syndrome (MWS)</li> <ul></ul></ul></ul></li></ul></li></ul>
<ul> <li>ILARIS (canakinumab) may receive approval if meeting the following:</li> <li>Medication is being prescribed for one of the following (approval for all other indications is subject to meeting non-preferred criteria listed below):</li> <li>Familial Mediterranean Fever (FMF)</li> </ul>
<ul> <li>Hyperimmunoglobulinemia D syndrome (HIDS)</li> <li>Mevalonate Kinase Deficiency (MKD)</li> <li>Neonatal onset multisystem inflammatory disease (NOMID)</li> <li>TNF Receptor Associated Periodic Syndrome (TRAPS)</li> </ul>
<ul> <li>Cryopyrin-associated Autoinflammatory Syndrome (including Familial Cold Autoinflammatory Syndrome and Muckle-Wells Syndrome)</li> </ul>
<ul> <li>Symptomatic treatment of adult patients with gout flares in whom NSAIDs and colchicine are contraindicated, are not tolerated, or do not</li> </ul>

provide an adequate response, and in whom repeated courses of corticosteroids are not appropriate (limited to four 150mg doses per one year approval)

## AND

- Member has trialed and failed<sup>‡</sup> colchicine.
- Quantity Limits:
  - Cryopyrin-associated periodic syndrome: 600mg (4mL) every 8 weeks
  - All other indications: 300mg (2mL) every 4 weeks

**KINERET** (anakinra) may receive approval if meeting the following:

- Medication is being prescribed for one of the following indications (approval for all other indications is subject to meeting non-preferred criteria below):
  - Neonatal onset multisystem inflammatory disease (NOMID).
  - Familial Mediterranean Fever (FMF)

AND

• Member has trialed and failed‡ colchicine.

**NUCALA (mepolizumab)** may receive approval if meeting the following based on prescribed indication (for any FDA-labeled indications in this subclass category that are not listed, approval is subject to meeting non-preferred criteria listed below):

Chronic Rhinosinusitis with Nasal Polyps:

- Member is 18 years of age or older AND
- Medication is being prescribed as an add-on maintenance treatment in adult patients with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP) **AND**
- Member has a baseline bilateral endoscopic nasal polyps score (NPS; scale 0-8) AND nasal congestion/obstruction score (NC; scale 0-3) averaged over 28-day period AND
- Member has trialed and failed‡ therapy with three intranasal corticosteroids (see PDL Class) **AND**
- Medication is being prescribed by or in consultation with a rheumatologist, allergist, ear/nose/throat specialist or pulmonologist **AND**
- Initial authorization will be for 24 weeks, for additional 12-month approval member must meet the following criteria:
  - NC and NPS scores are provided and show a 20% reduction in symptoms from baseline **AND**
  - Member continues to use primary therapies such as intranasal corticosteroids.

Eosinophilic Granulomatosis with polyangiitis (EGPA):

• Member is 18 years of age or older AND

<ul> <li>Member has been diagnosed with relapsing or refractory EGPA at least 6 months prior to request as demonstrated by ALL the following:         <ul> <li>Member has a diagnosis of asthma AND</li> <li>Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL or a blood eosinophil level of 10%</li> </ul> </li> <li>AND</li> <li>Member has the presence of two of the following EGPA characteristics:         <ul> <li>Histopathological evidence of eosinophilic vasculitis, perivascular eosinophilic infiltration, or eosinophil-rich granulomatous inflammation</li> <li>Neuropathy</li> <li>Pulmonary infiltrates</li> <li>Sinonasal abnormality</li> <li>Cardiomyopathy</li> <li>Glomerulonephritis</li> <li>Alveolar hemorrhage</li> <li>Palpable purpura</li> <li>Antineutrophil cytoplasmic antibody (ANCA) positive</li> </ul> </li> <li>Member has trialed and failed<sup>‡</sup> Fasenra (benralizumab) AND</li> <li>Dose of NUCALA (mepolizumab) 300 mg once every 4 weeks is being</li> </ul>
<ul> <li>prescribed.</li> <li><u>Hypereosinophilic Syndrome (HES):</u> <ul> <li>Member is 12 years of age or older AND</li> <li>Member has a diagnosis for HES for at least 6 months that is nonhematologic secondary HES AND</li> <li>Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL AND</li> <li>Member has a history of two or more HES flares (defined as worsening clinical symptoms or blood eosinophil counts requiring an increase in therapy) AND</li> <li>Member has been on stable dose of HES therapy for at least 4 weeks, at time of request, including at least one of the following: <ul> <li>Oral corticosteroids</li> <li>Immunosuppressive therapy</li> <li>Cytotoxic therapy</li> </ul> </li> <li>AND</li> <li>Dose of 300 mg once every 4 weeks is being prescribed.</li> </ul> </li> <li>All other non-preferred agent indications may receive approval for FDA-labeled use following trial and failure; of all preferred agents that are FDA-indicated or have strong</li> </ul>

evidence supporting use for the prescribed indication from clinically recognized guideline compendia (only one preferred adalimumab product trial required).
‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction.
<u>Continuation of therapy</u> : Members currently taking a preferred agent may receive approval to continue therapy with that agent. Members with current prior authorization approval on file for a non-preferred agent will be subject to meeting reauthorization criteria above when listed for the prescribed indication, or if reauthorization criteria are not listed for the prescribed indication, may receive approval for continuation of therapy.
<u>Note</u> : Prior authorization requests for OLUMIANT (baricitinib) prescribed solely for treating alopecia areata will not be approved.
The Department would like to remind providers that many products are associated with patient-centered programs that are available to assist with drug administration, education, and emotional support related to our members' various disease states.

## X. Miscellaneous
