

### Colorado Department of Health Care Policy and Financing Preferred Drug List (PDL)

Effective July 1, 2024

Prior Authorization Forms: Available online at <a href="https://hcpf.colorado.gov/pharmacy-resources">https://hcpf.colorado.gov/pharmacy-resources</a>

Prior Authorization (PA) Requests: Colorado Pharmacy Call Center Phone Number: 800-424-5725 | Fax Number: 800-424-5881

Electronic Prior Authorization (ePA): Electronic Prior Authorization Requests are supported by CoverMyMeds and may be submitted via Electronic Health Record (EHR) systems or through the CoverMyMeds provider portal.

The PDL applies to Medicaid fee-for-service members. It does not apply to members enrolled in Rocky Mountain Health HMO or Denver Health Medicaid Choice.

<u>Initiation of pharmaceutical product subject to Prior Authorization:</u> Please note that starting the requested drug, including a non-preferred drug, prior to a PA request being reviewed and approved, through either inpatient use, by using office "samples," or by any other means, does not necessitate Medicaid approval of the PA request.

<u>Covid-19 Related Treatment Override</u>: Providers may call the Magellan Help Desk at 1-800-424-5725 to request a prior authorization override if a medication is related to the treatment or prevention of COVID-19 or the treatment of a condition that may seriously complicate the treatment of COVID-19.

Health First Colorado, at section 25.5-5-501, C.R.S., requires the generic of a brand name drug be prescribed if the generic is therapeutically equivalent to the brand name drug. Exceptions to this rule are: 1) If the brand name drug is more cost effective than the generic as determined by the Department, 2) If the patient has been stabilized on a brand name drug and the prescriber believes that transition to a generic would disrupt care, and 3) If the drug is being used for treatment of mental illness, cancer, epilepsy, or human immunodeficiency virus and acquired immune deficiency syndrome.

Please see the **Brand Favored Product List** for a list of medications where the brand name drug is more cost effective than the generic drug.

A provider may request a step therapy exception for the treatment of a serious or complex medical condition pursuant to section 25.5-4-428, C.R.S. Serious or complex medical condition means the following medical conditions: serious mental illness, cancer, epilepsy, multiple sclerosis, or human immunodeficiency virus (HIV)/ acquired immune deficiency syndrome (AIDS), or a condition requiring medical treatment to avoid death, hospitalization, or a worsening or advancing of disease progression resulting in significant harm or disability. The step therapy exception request form is available by visiting <a href="https://hcpf.colorado.gov/pharmacy-resources">https://hcpf.colorado.gov/pharmacy-resources</a>

Brand Name Required = BNR, Prior Authorization = PA, AutoPA = authorization can be automated at the point-of-sale transaction if criteria are met Preferred drug list applies only to prescription (RX) products, unless specified.

Preferred Agents	Non-preferred Agents	Prior Authorization Criteria (All Non-preferred products will be approved for one year unless otherwise stated.)
		algesics
	, i v	ALGESIA AGENTS - Oral - Effective 4/1/2024
No PA Required  Duloxetine 20 mg, 30 mg, 60 mg	PA Required  CYMBALTA (duloxetine) capsule	Non-preferred oral non-opioid analgesic agents may be approved if member meets all of the following criteria:
capsule Gabapentin capsule, tablet,	DRIZALMA (duloxetine DR) sprinkle capsules	<ul> <li>Member has trialed and failed duloxetine (20mg, 30mg, or 60mg) AND has trialed and failed gabapentin OR pregabalin capsule (Failure is defined as lack of efficacy with 8-week trial, allergy, intolerable side effects, or significant</li> </ul>
solution	Duloxetine 40 mg capsule	drug-drug interaction)
Pregabalin capsule	GRALISE (gabapentin ER) tablet	Prior authorization will be required for Lyrica (pregabalin) capsule dosages > 600mg per day (maximum of 3 capsules daily) and gabapentin dosages > 3600mg per day.
SAVELLA (milnacipran) tablet, titration pack	Gabapentin ER tablet	
	HORIZANT (gabapentin ER) tablet	
	LYRICA (pregabalin) capsule, solution, CR tablet	
	NEURONTIN (gabapentin) capsule, tablet, solution	
	Pregabalin solution, ER tablet	
		LGESIA AGENTS - Topical - Effective 4/1/2024
No PA Required	PA Required	Non-preferred topical products require a trial/failure with an adequate 8-week trial of
Lidocaine patch	Lidocaine patch (Puretek)	gabapentin AND pregabalin AND duloxetine AND a preferred lidocaine patch. Failure is defined as lack of efficacy with an 8-week trial, allergy, intolerable side effects, or
LIDODERM (lidocaine) patch	ZTLIDO (lidocaine) topical system	significant drug-drug interaction.
		<ul> <li>Lidocaine patch (<i>Puretek manufacturer only</i>) may be approved if the following criteria are met:</li> <li>Member is ≥ 18 years of age AND</li> <li>Member has had an adequate 8-week trial and failure of: gabapentin AND pregabalin AND duloxetine AND a preferred lidocaine patch. Failure is defined as lack of efficacy with an 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction AND</li> </ul>
		Prescriber has provided a justification of clinical necessity indicating that an alternative generic lidocaine patch formulation cannot be used.

	Drug Class: NON-STEROIDAL ANTI-IN	FLAMMATORIES (NSAIDS) - Oral - Effective 4/1/2024
No PA Required	PA Required	
Celecoxib capsule  Diclofenac potassium 50 mg tablet	ARTHROTEC (diclofenac sodium/ misoprostol) tablet CELEBREX (celecoxib) capsule	<ul> <li>DUEXIS (ibuprofen/famotidine) or VIMOVO (naproxen/esomeprazole) may be approved if the member meets the following criteria:         <ul> <li>Trial and failure<sup>‡</sup> of all preferred NSAIDs at maximally tolerated doses AND</li> <li>Trial and failure<sup>‡</sup> of three preferred proton pump inhibitors in combination with NSAID within the last 6 months AND</li> <li>Has a documented history of gastrointestinal bleeding</li> </ul> </li> </ul>
Diclofenac sodium EC/DR tablet	DAYPRO (oxaprozin) caplet	Diclofenac potassium 25 mg immediate-release tablets may be approved if the following
Ibuprofen suspension, tablet (RX)	Diclofenac potassium capsule, powder pack	criteria are met:  • Member is ≥ 18 years of age <b>AND</b>
Indomethacin capsule, ER capsule	Diclofenac potassium 25 mg tablet	Member does not have any of the following medical conditions:
Ketorolac tablet*	Diclofenac sodium ER/SR tablet	History of myocardial infarction
Meloxicam tablet	Diclofenac sodium/misoprostol tablet	<ul><li>Severe heart failure</li><li>Advanced renal disease</li></ul>
Nabumetone tablet	Diflunisal tablet	<ul><li>History of gastrointestinal bleeding</li><li>AND</li></ul>
Naproxen DR/ER, tablet (RX)	DUEXIS (ibuprofen/famotidine) tablet	<ul> <li>Member has trial and failure<sup>‡</sup> of four preferred oral NSAIDs at maximally tolerated doses</li> </ul>
Naproxen suspension	ELYXYB (celecoxib) solution	
Sulindac tablet	Etodolac capsule; IR, ER tablet	All other non-preferred oral agents may be approved following trial and failure; of four preferred agents. Failure is defined as lack of efficacy, contraindication to therapy,
	FELDENE (piroxicam) capsule	allergy, intolerable side effects, or significant drug-drug interactions.
	Fenoprofen capsule, tablet	*Ketorolac tablets quantity limits: 5-day supply per 30 days and 20 tablets per 30 days
	Flurbiprofen tablet	
	Ibuprofen/famotidine tablet	
	Ketoprofen IR, ER capsule	
	LOFENA (diclofenac) tablet	
	Meclofenamate capsule	
	Mefenamic acid capsule	
	Meloxicam submicronized capsule, suspension	

	NALFON (fenoprofen) capsule, tablet	
	NAPRELAN (naproxen CR) tablet	
	Naproxen sodium CR, ER, IR tablet	
	Naproxen/esomeprazole DR tablet	
	Oxaprozin tablet	
	Piroxicam capsule	
	RELAFEN DS (nabumetone) tablet	
	Tolmetin tablet	
	VIMOVO (naproxen/esomeprazole) DR tablet	
Therapeutic Dr	rug Class: NON-STEROIDAL ANTI-INFLA	AMMATORIES (NSAIDS) - Non-Oral - Effective 4/1/2024
No PA Required	PA Required	SPRIX (ketorolac) may be approved if meeting the following criteria:
		• Member is unable to tolerate, swallow or absorb oral NSAID formulations <b>OR</b>

Therapeutic Drug Class: NON-STEROIDAL ANTI-INFLAMIMATORIES (NSAIDS) - Non-Oral - Effective 4/1/2024				
No PA Required	PA Required	SPRIX (ketorolac) may be approved if meeting the following criteria:		
Diclofenac 1.5% topical solution	Diclofenac 1.3% topical patch, 2% pump	<ul> <li>Member is unable to tolerate, swallow or absorb oral NSAID formulations O</li> <li>Member has trialed and failed three preferred oral or topical NSAID agents</li> </ul>		
		(failure is defined as lack of efficacy, allergy, intolerable side effects or		

Diclofenac sodium 1% gel FLECTOR (diclofenac) 1.3% topical patch (OTC/Rx) Ketorolac nasal spray LICART (diclofenae) 1.3% topical patch PENNSAID (diclofenac solution) 2% pump, 2%

solution packet

All other non-preferred topical agents may be approved for members who have trialed and failed one preferred agent. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.

Quantity limit: 5-single day nasal spray bottles per 30 days

Diclofenac topical patch quantity limit: 2 patches per day

significant drug-drug interactions)

Diclofenac 3% gel (generic Solaraze) prior authorization criteria can be found in the Antineoplastic agents, topical, section of the PDL.

#### **Opioid Utilization Policy (long-acting and short-acting opioids):**

It is highly encouraged that the healthcare team utilize the Prescription Drug Monitoring Program (PDMP) to aid in ensuring safe and efficacious therapy for members using controlled substances.

#### Total Morphine Milligram Equivalent Policy Effective 10/1/17:

- The maximum allowable morphine milligram equivalent (MME) is 200 MME. Prescriptions for short-acting (SA) and long-acting (LA) opioids are cumulatively included in this calculation. The prescription that exceeds the cumulative MME limit of 200 MME for a member will require prior authorization and may require a provider-toprovider telephone consultation with the pain management physician (free of charge and provided by Health First Colorado).
- Prior authorization will be granted to allow for tapering
- Prior authorization for 1 year will be granted for diagnosis of sickle cell anemia

- Prior authorization for 1 year will be granted for admission to or diagnosis of hospice or end of life care
- Prior authorization for 1 year will be granted for pain associated with cancer

MME calculation is conducted using conversion factors from the following link: https://pharmacypmp.az.gov/resources/mme-calculator

Only one long-acting opioid agent (including different strengths) and one short-acting opioid agent (including different strengths) will be considered for a prior authorization.

Medicaid provides guidance on the treatment of pain, including tapering, on our webpage under the heading Pain Management Resources and Opioid Use at: <a href="https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use">https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use</a>

#### Opioid Naïve Policy Effective 8/1/17 (*Update effective 04/01/23 in Italics*):

Members who have not filled a prescription for an opioid within the past 180 days will be identified as "opioid treatment naïve" and have the following limitations placed on the initial prescription(s):

- The prescription is limited to short-acting opioid agents or Butrans (buprenorphine). Use of other long-acting opioid agents will require prior authorization approval for members identified as opioid treatment naïve.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 7 days, the quantity will be limited to 8 dosage forms per day (tablets, capsules), maximum #56 tablets/capsules for a 7-day supply
- The fourth prescription for an opioid will require prior authorization, filling further opioid prescriptions may require a clinical pharmacist review or provider to provider telephone consultation with a pain management physician (free of charge and provided by Health First Colorado).
- If a member has had an opioid prescription filled within the past 180 days, then this policy would not apply to that member and other opioid policies would apply as applicable.

#### Dental Prescriptions Opioid Policy Effective 11/15/18 (implemented in the claims system 01/07/19):

Members who receive an opioid prescribed by a dental provider will be subject to day supply limits and quantity per day limits for short acting opioids.

- The prescription is limited to short-acting opioid agents only. Use of long-acting opioid agents and short acting fentanyl agents will require prior authorization approval for members' prescriptions written by a dental provider.
- The days' supply of the first, second, and third prescription for an opioid will be limited to 4 days, the quantity will be limited to 6 dosage forms per day (tablets, capsules), maximum #24 tablets/capsules for a 4-day supply
- The fourth prescription for an opioid will require prior authorization. A prior authorization for the fourth fill may be approved for up to a 7-day supply and the quantity will be limited to 8 dosage forms per day (#56 tablets/capsules) for members with any of the following diagnoses/undergoing any of the following procedures:
  - o Traumatic oro-facial tissue injury with major mandibular/maxillary surgical procedures
  - o Severe cellulitis of facial planes
  - o Severely impacted teeth with facial space infection necessitating surgical management
- Other potential exemptions that exceed the first 3 fill limits (day supply and quantity) may be evaluated with a provider-to-provider telephone consult with a pain management specialist (free of charge and provided by Health First Colorado)

If a member has had an opioid prescription prescribed by a non-dental provider, then this policy would not apply to that member and other opioid policies would apply as applicable. Dental prescriptions do not impact the opioid treatment naïve policy, but the prescriptions will be counted towards the Morphine Milligram Equivalent (MME) daily dose.

#### Opioid and Benzodiazepine Combination Effective 9/15/19:

Prior authorization will be required for members receiving long-term therapy with an opioid medication who are newly started on a benzodiazepine medication <u>OR</u> for members receiving long-term therapy with a benzodiazepine medication who are newly started on an opioid medication. Prior authorization may be approved if meeting the following:

- The member discontinued or is no longer taking either the opioid or benzodiazepine medication and will not be using these in combination **OR**
- The member will not be taking the prescribed opioid and benzodiazepine medications at the same time based on prescribed dosing interval (such as prn administration) for the regimen AND the prescriber attests that the member has received appropriate counseling\* regarding the risks associated with combining opioid and benzodiazepine

medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR** 

- The prescriber has evaluated the regimen and attests that it is appropriate for the member to continue use of the concomitant opioid and benzodiazepine medication regimen as prescribed AND the prescriber attests that the member has received appropriate counseling\* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- Prior authorization may be approved for members receiving palliative or hospice care OR
- For benzodiazepine prior authorizations, approval may be granted if the benzodiazepine is being prescribed for seizure disorder or convulsions.

\*If counseling has not been provided, the prescriber attests that a reasonable effort will be made to contact the member or the member's pharmacy to ensure that counseling is provided.

#### Opioid and Ouetiapine Combination Effective 9/15/19:

Pharmacy claims for members receiving opioid and quetiapine medications in combination will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) related to risk of increased sedation from concomitant use of this drug combination.

#### Opioid and Buprenorphine-Containing substance use disorder (SUD) Product Combination Effective 06/01/21:

Opioid claims submitted for members currently receiving buprenorphine-containing SUD medications will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) with use of this drug combination.

Therapeutic Drug Class: <b>OPIOIDS, Short Acting -</b> Effective 4/1/2024					
Preferred	Non-Preferred	*Preferred codeine and tramadol products do not require prior authorization for adult			
No PA Required*	PA Required	members (18 years of age or greater) if meeting all other opioid policy criteria.			
(If criteria and quantity limit					
are met)		Preferred codeine or tramadol products prescribed for members < 18 years of age must			
		meet the following criteria:			
*Acetaminophen/codeine tablets	Acetaminophen / codeine elixir	Preferred tramadol and tramadol-containing products may be approved for			
	-	members < 18 years of age if meeting the following:			
Hydrocodone/acetaminophen	ASCOMP WITH CODEINE	o Member is 12 years to 17 years of age <b>AND</b>			
solution, tablet	(codeine/butalbital/aspirin/caffeine)	o Tramadol is NOT being prescribed for post-surgical pain following tonsil or			
		adenoid procedure AND			
Hydromorphone tablet	*Butalbital/caffeine/acetaminophen/codeine	<ul> <li>Member's BMI-for-age is not &gt; 95<sup>th</sup> percentile per CDC guidelines AND</li> </ul>			
	capsule	<ul> <li>Member does not have obstructive sleep apnea or severe lung disease OR</li> </ul>			
Morphine IR solution, tablet		o For members < 12 years of age with complex conditions or life-limiting illness			
	Butalbital/caffeine/aspirin/codeine capsule	who are receiving care under a pediatric specialist, tramadol and tramadol-			
**NUCYNTA (tapentadol) tablet		containing products may be approved on a case-by-case basis			
	Butalbital compound/codeine	Preferred Codeine and codeine-containing products will receive prior			
Oxycodone solution, tablet		authorization approval for members meeting the following criteria may be approved			
	Butorphanol tartrate (nasal) spray	for members < 18 years of age if meeting the following:			
Oxycodone/acetaminophen tablet		o Member is 12 years to 17 years of age AND			
	Carisoprodol/aspirin/codeine	o Codeine is NOT being prescribed for post-surgical pain following tonsil or			
*Tramadol 25mg, 50mg		adenoid procedure AND			
**************************************	Codeine tablet	o Member's BMI-for-age is not > 95 <sup>th</sup> percentile per CDC guidelines AND			
*Tramadol/acetaminophen tablet		o Member does not have obstructive sleep apnea or severe lung disease AND			
	Dihydrocodeine/acetaminophen/caffeine tablet	o Member is not pregnant, or breastfeeding AND			
		o Renal function is not impaired (GFR > 50 ml/min) AND			

DILAUDID (hydromorphone) solution, tablet

FIORICET/CODEINE (codeine/butalbital/acetaminophen/caffeine) capsule

Hydrocodone/ibuprofen tablet

Hydromorphone solution

Levorphanol tablet

Meperidine solution, tablet

Morphine concentrated solution, oral syringe

NALOCET (oxycodone/acetaminophen) tablet

Oxycodone capsule, syringe, concentrated solution

Oxycodone/acetaminophen solution

Oxycodone/acetaminophen tablet (generic PROLATE)

Oxymorphone tablet

Pentazocine/naloxone tablet

PERCOCET (oxycodone/ acetaminophen) tablet

ROXICODONE (oxycodone) tablet

ROXYBOND (oxycodone) tablet

SEGLENTIS (tramadol/celecoxib) tablet

Tramadol 100mg tablet

Tramadol solution

- Member is not receiving strong inhibitors of CYP3A4 (such as erythromycin, clarithromycin, itraconazole, ketoconazole, posaconazole, fluconazole [≥200mg daily], voriconazole, delavirdine, and milk thistle) AND
- o Member meets <u>one</u> of the following:
  - Member has trialed codeine or codeine-containing products in the past with no history of allergy or adverse drug reaction to codeine
  - Member has not trialed codeine or codeine-containing products in the past and the prescriber acknowledges reading the following statement: "Approximately 1-2% of the population metabolizes codeine in a manner that exposes them to a much higher potential for toxicity. Another notable proportion of the population may not clinically respond to codeine. We ask that you please have close follow-up with members newly starting codeine and codeine-containing products to monitor for safety and efficacy."

Non-preferred tramadol products may be approved following trial and failure of generic tramadol 50mg tablet AND generic tramadol/acetaminophen tablet.

All other non-preferred short-acting opioid products may be approved following trial and failure of three preferred products. Failure is defined as allergy‡, lack of efficacy, intolerable side effects, or significant drug-drug interaction.

‡Allergy: hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension, bronchospasm, and angioedema

Quantity Limits: Short-acting opioids will be limited to a total of 120 tablets per 30 days (4/day) per member for members who are not included in the opioid treatment naive policy.

- \*\*Nucynta IR will have a maximum daily quantity of 6 tablets (180 tabs per 30 days).
- Exceptions will be made for members with a diagnosis of a terminal illness (hospice or palliative care) or sickle cell anemia.
- For members who are receiving more than 120 tablets currently and who do not have a qualifying exemption diagnosis, a 6-month prior authorization can be granted via the prior authorization process for providers to taper members.
- Please note that if more than one agent is used, the combined total utilization
  may not exceed 120 units in 30 days. There may be allowed certain exceptions
  to this limit for acute situations (for example: post-operative surgery, fractures,
  shingles, car accident).

Maximum Doses: Tramadol: 400mg/day Codeine: 360mg/day

Butorphanol intranasal: 10ml per 30 days (four 2.5ml 10mg/ml package units per 30

days)

Theraneutic	Drug Class: FENTANYL PREPARATION	S (buccal, transmucosal, sublingual) - Effective 4/1/2024			
•	PA Required  ACTIQ (fentanyl citrate) lozenge  Fentanyl citrate lozenge, buccal tablet  FENTORA (fentanyl citrate) buccal tablet	Fentanyl buccal, intranasal, transmucosal, and sublingual products:  Prior authorization approval may be granted for members experiencing breakthrough cancer pain and those that have already received and are tolerant to opioid drugs for the cancer pain AND are currently being treated with a long-acting opioid drug. The prior authorization may be granted for up to 4 doses per day. For patients in hospice or palliative care, prior authorization will be automatically granted regardless of the number of doses prescribed.			
	Therapeutic Drug Class: <b>OPIOID</b>	S, Long Acting - Effective 4/1/2024			
Preferred	Non-Preferred	Jong Heding - Dijective 4/1/2024			
No PA Required	PA Required	*Belbuca (buprenorphine) buccal film may be approved for members who have trialed			
(unless indicated by * criteria)	1	and failed‡ treatment with Butrans (buprenorphine) patch at a dose of 20 mcg/hr <b>OR</b>			
	**OXYCONTIN (oxycodone ER) tablet	with prescriber confirmation that the maximum dose of Butrans 20 mcg/hr will not			
BELBUCA <sup>BNR</sup> (buprenorphine)		provide adequate analgesia.			
buccal film	Buprenorphine buccal film, transdermal patch	Quantity limit: 60 films/30 days.			
BUTRANS <sup>BNR</sup> (buprenorphine)	CONZIP (tramadol ER) capsule	Oxycontin (oxycodone ER) may be approved for members who have trialed and failed:			
transdermal patch	CONZII (trainadoi EK) capsulc	treatment with TWO preferred agents.			
Tunsdermar pateri	Fentanyl 37mcg, 62mcg, 87mcg transdermal patch	treatment with 1 110 preferred agents.			
*Fentanyl 12mcg, 25mcg, 50mcg,		All other non-preferred products may be approved for members who have trialed and			
75mcg, 100mcg transdermal	Hydrocodone ER capsule, tablet	failed‡ three preferred products.			
patch					
M 1: FD / : MG	Hydromorphone ER tablet	‡Failure is defined as lack of efficacy with 14-day trial, allergy (hives, maculopapular

		of charge by contacting the pharmacy call center helpdesk and requesting an opioid prescriber consult.			
		presenter consum.			

# Non-Preferred Preferred No PA Required PA Required (\*Must meet eligibility criteria) ARIKAYCE (amikacin liposomal) inhalation vial Tobramycin inhalation solution

#### Reauthorization:

Reauthorization for a non-preferred agent may be approved if the following criteria are

- Provider attests to continued benefit outweighing risk of opioid medication use AND
- Member met original prior authorization criteria for this drug class at time of original authorization

#### \*\*Ouantity/Dosing Limits:

- Oxycontin, Nucynta ER, and Hydrocodone ER (generic Zohydro ER) will only be approved for twice daily dosing.
- **Hysingla** will only be approved for once daily dosing.
- **Fentanyl patches** will require a PA for doses of more than 15 patches/30 days (if using one strength) or 30 patches for 30 days (if using two strengths). For fentanyl patch strengths of 37mcg/hr, 62mcg/hr, and 87mcg/hr, member must trial and fail two preferred strengths of separate patches that will provide the desired dose (such as 12mcg/hr + 50mcg/hr = 62mcg/hr).

#### II. Anti-Infectives

#### Therapeutic Drug Class: ANTIBIOTICS, INHALED -Effective 1/1/2024

(generic TOBI)

\*CAYSTON (aztreonam) inhalation solution

BETHKIS (tobramycin) inhalation ampule

KITABIS (tobramycin) nebulizer pak

TOBI (tobramycin) inhalation solution

TOBI PODHALER (tobramycin) inhalation capsule

Tobramycin inhalation ampule (generic Bethkis)

Tobramycin nebulizer pak (generic Kitabis)

\*CAYSTON (aztreonam) inhalation solution may be approved if the following criteria are met:

- Member has a history of trial and failure of preferred tobramycin solution for inhalation (failure is defined as lack of efficacy with a 4-week trial, intolerable side effects, or significant drug-drug interactions) **OR** provider attests that member cannot use preferred tobramycin solution for inhalation due to documented allergy or contraindication to therapy AND
- The member has known colonization of *Pseudomonas aeruginosa* in the lungs AND
- The member has been prescribed an inhaled beta agonist to use prior to nebulization of Cayston (aztreonam).

#### **ARIKAYCE** (amikacin) may be approved if the following criteria are met:

- Member has refractory mycobacterium avium complex (MAC) lung disease with limited or no alternative treatment options available AND
- Member has trialed and failed 6 months of therapy with a 3-drug regimen that includes a macrolide (failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interactions).

All other non-preferred inhaled antibiotic agents may be approved if the following criteria are met:

•	The member has a diagnosis of cystic fibrosis with known colonization
	of <i>Pseudomonas aeruginosa</i> in the lungs <b>AND</b>

•	Member has history of trial and failure of preferred tobramycin solution for
	inhalation (failure is defined as lack of efficacy with a 4-week trial,
	contraindication to therapy, allergy, intolerable side effects or significant drug-
	drug interactions).

Table 1: Minimum Age, Maximum Dose, and Quantity Limitations				
Drug Name	Minimum Age	Maximum Dose	Quantity Limit (Based on day supply limitation for pack size dispensed)	
ARIKAYCE (amikacin)	≥ 18 years	590 mg once daily	Not applicable	
BETHKIS (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period	
CAYSTON (aztreonam)	≥7 years	75 mg three time daily	28-day supply per 56-day period	
KITABIS PAK (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period	
TOBI <sup>†</sup> (tobramycin)	Age ≥ 6 years	300 mg twice daily	28-day supply per 56-day period	
TOBI PODHALER (tobramycin)	Age ≥ 6 years	112 mg twice daily	28-day supply per 56-day period	

<sup>&</sup>lt;sup>†</sup> Limitations apply to brand product formulation only

Members currently stabilized on any inhaled antibiotic agent in this class may receive approval to continue that agent.

Therapeutic Drug Class: <b>ANTI-HERPE</b>	TIC AGENTS - Oral - Effective 1/1/2024
PA Required	Non-preferred products may be approved for men

# Acyclovir tablet, capsule \*Acyclovir suspension (all other members) \*Acyclovir suspension (members under 18 years or cannot swallow a solid dosage form) \*Acyclovir suspension (all other members) VALTREX (valacyclovir) tablet

No PA Required

Famciclovir tablet

Non-preferred products may be approved for members who have failed an adequate trial with two preferred products with different active ingredients. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.

**Sitavig** (acyclovir) buccal tablet may be approved for diagnosis of recurrent herpes labialis (cold sores) if member meets non-preferred criteria listed above AND has failed trial with oral acyclovir suspension. Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.

Valacyclovir tablet				uire prior authorization for members pers ≥ 18 years of age who cannot swa		
				Maximur	n Dose Table	
				Adult	Pediatric	
			Acyclovir	4,000 mg/day	3,200 mg/day	
			Famciclovir	2,000 mg/day		
			Valacyclovir	4,000 mg/day	Age 2-11 years: 3,000mg/day Age ≥ 12 years: 4,000mg/day

Moxifloxacin tablet	Ofloxacin tablet	• has failed† an adequate trial (7 days) of ciprofloxacin suspension †Failure is defined as lack of efficacy, allergy, intolerable side effects, significant drug-drug interaction, or contraindication to therapy.			g-drug	

#### Therapeutic Drug Class: **HEPATITIS C VIRUS TREATMENTS -** Effective 1/1/2024

#### **Direct Acting Antivirals (DAAs)**

## Preferred No PA Required for initial treatment (\*must meet eligibility criteria)

#### **EPCLUSA**

(sofosbuvir/velpatasvir) 200 mg -50 mg, 150 mg-37.5 mg tablet, pellet pack

#### **HARVONI**

(ledipasvir/sofosbuvir) 45mg-200mg tablet, pellet pack

Ledipasvir/Sofosbuvir 90 mg-400 mg tablet (*Asegua only*)

#### **MAVYRET**

(glecaprevir/pibrentasvir) tablet, pellet pack

Sofosbuvir/Velpatasvir 400mg-100mg (*Asegua only*)

\*VOSEVI tablet (sofosbuvir/velpatasvir/voxila previr)

## Non-Preferred PA Required

EPCLUSA 400 mg-100 mg (sofosbuvir/velpatasvir) tablet

HARVONI 90 mg-400 mg (ledipasvir/sofosbuvir) tablet

SOVALDI (sofosbuvir) tablet, pellet packet

VIEKIRA PAK (ombitasvir/paritaprevir/ ritonavir/dasabuvir) tablet

ZEPATIER (elbasvir/grazoprevir) tablet

Pharmacy claims for **preferred products** prescribed for initial treatment will be eligible for up to a 90-day supply fill allowing for the appropriate days' duration for completing the initial treatment regimen (with no PA required). Subsequent fills will require prior authorization meeting re-treatment criteria below.

\*Second line preferred agents (Vosevi) may be approved for members 18 years of age or older with chronic HCV infection who are non-cirrhotic or have compensated cirrhosis (Child-Pugh A) AND meet the following criteria:

- GT 1-6 and has previously failed treatment with a regimen containing an NS5A inhibitor (such as ledipasvir, daclatasvir, or ombitasvir) **OR**
- GT 1a or 3 and has previously failed treatment with a regimen containing sofosbuvir without an NS5A inhibitor

#### AND

• Request meets the applicable criteria below for re-treatment.

#### **Re-treatment:**

All requests for HCV re-treatment for members who have failed therapy with a DAA will be reviewed on a case-by-case basis. Additional information may be requested for re-treatment requests including:

- Assessment of member readiness for re-treatment
- Previous regimen medications and dates treated
- Genotype of previous HCV infection
- Any information regarding adherence to previously trialed regimen(s) and current chronic medications
- Adverse effects experienced from previous treatment regimen
- Concomitant therapies during previous treatment regimen
- Vosevi regimens will require verification that member has been tested for evidence of active hepatitis B virus (HBV) infection and for evidence of prior HBV infection prior to initiating treatment.

**Non-preferred** agents may be approved if documentation is provided indicating an acceptable rationale for not prescribing a preferred treatment regimen (acceptable rationale may include patient-specific medical contraindications to a preferred treatment or cases where a member has initiated treatment on a non-preferred drug and needs to complete therapy).

Members currently receiving treatment with a non-preferred agent will receive approval to finish their treatment regimen, provided required documentation is sent via normal prior authorization request process.

Ribavirin Products					
No PA Required			Preferred	products are eligible for up to a 90-day supply fill.	
Ribavirin capsule			-	Ferred ribavirin products require prior authorizations which will be evaluated on v-case basis.	
Ribavirin tablet			a case-by	case dasis.	
				(HIV) TREATMENTS, ORAL - Effective 1/1/2024 rophylaxis (PEP) are eligible for coverage with a written prescription by an enrolled	
phari	macist. Additional infort	nation regarding pharmacist eni	ollment ca	n be found at <a href="https://hcpf.colorado.gov/pharm-serv">https://hcpf.colorado.gov/pharm-serv</a> .

Therapeutic Drug Class: <b>NEWER GENERATION ANTI-DEPRESSANTS</b> -Effective 4/1/20	24
--	----

PA	PA Reg

Bupropion IR, SR, XL tablet

Citalopram tablet, solution

Desvenlafaxine succinate ER (generic Pristiq) tablet

Duloxetine (generic Cymbalta) capsule

Escitalopram tablet

Fluoxetine capsule, solution, 60 mg tablet

Fluvoxamine tablet

#### **PA Required**

Non-preferred brand name medications do not require a prior authorization when the equivalent generic is preferred and "dispense as written" is indicated on the prescription.

APLENZIN (bupropion ER) tablet

AUVELITY ER (dextromethorphan/bupropion) tablet

Bupropion XL (generic Forfivo XL) tablet

CELEXA (citalopram) tablet

Citalopram hydrobromide capsule

CYMBALTA (duloxetine) capsule

Non-preferred products may be approved for members who have failed adequate trial with two preferred newer generation anti-depressant products. If two preferred newer generation anti-depressant products are not available for indication being treated, approval of prior authorization for non-preferred products will require adequate trial of all preferred products FDA approved for that indication (failure is defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, or significant drug-drug interaction).

**Zurzuvae** (zuranolone) may be approved if meeting the following criteria:

- Member is  $\geq 18$  years of age **AND**
- Member has a diagnosis of postpartum depression based on Diagnostic and Statistical Manual of Mental Disorders (DSM-5) criteria for a major depressive episode AND
- Member is not currently pregnant AND
- Prescriber attests that the member has been counseled and has been engaged in shared decision making with regard to:

Mirtazapine tablet, ODT	Desvenlafaxine fumarate ER tablet
Paroxetine IR tablet	DRIZALMA (duloxetine) sprinkle capsule
	EFFEXOR XR (venlafaxine ER) capsule
Sertraline tablet, solution	Escitalopram solution
Trazodone tablet	FETZIMA (levomilnacipran ER) capsule, titration
Venlafaxine IR tablet	pack
	Fluoxetine IR tablet, DR capsule
Venlafaxine ER capsules	Fluvoxamine ER capsule
	FORFIVO XL (bupropion ER) tablet
	LEXAPRO (escitalopram) tablet
	Nefazodone tablet
	Paroxetine CR/ER tablet, suspension
	Paroxetine mesylate capsule
	PAXIL (paroxetine) tablet, suspension
	PAXIL CR (paroxetine ER) tablet
	PEXEVA (paroxetine mesylate) tablet
	PRISTIQ (desvenlafaxine succinate ER) tablet
	PROZAC (fluoxetine) Pulvule
	REMERON (mirtazapine) Soltab (ODT), tablet
	Sertraline capsule
	TRINTELLIX (vortioxetine) tablet
	Venlafaxine ER tablet
	Venlafaxine besylate ER tablet
	VIIBRYD (vilazodone) tablet, dose pack
	Vilazodone tablet
	WELLBUTRIN SR, XL (bupropion) tablet
	ZOLOFT (sertraline) tablet, oral concentrate
	ZURZUVAE (zuranolone) capsule

- The importance of effective contraception during zuranolone treatment, as zuranolone may cause fetal harm **AND**
- The potential risks for the breastfed child and the lack of data supporting safe use of zuranolone during lactation **AND**
- Consideration for the favorable long-term safety data associated with use of SSRIs as first-line, recommended therapies for perinatal depressive disorders by the American College of Obstetricians and Gynecologists (ACOG) or SNRIs as reasonable ACOG-recommended alternatives

#### AND

- Prescriber attests that the member has been counseled to refrain from engaging in potentially hazardous activities requiring mental alertness, including driving, for ≥ 12 hours after each zuranolone dose AND
- The member has been counseled to take the medication with 400 to 1,000 calories of food containing 25% to 50% fat AND
- If patient is taking another oral antidepressant medication, the dose has been stable for  $\geq$  30 days **AND**
- Prescriber verifies that concomitant medications have been assessed for
  potential drug interactions (CNS depressants, CYP3A4 inhibitors, CYP3A4
  inducers) and any needed dosage adjustments for zuranolone have been made in
  accordance with package labeling AND
- Baseline renal and hepatic function have been assessed and prescriber verifies that dosing is appropriate in accordance with package labeling.

#### **Quantity Limit:**

- Zurzuvae 20 mg and 25 mg: 28 capsules/14 days
- Zurzuvae 30 mg: 14 capsules/14 days

Maximum dose: 50 mg once daily

<u>Duration of Approval</u>: Approval will allow 30 days to fill for one 14-day course of treatment per postpartum period

**Citalopram** doses higher than 40mg/day for ≤60 years of age and 20mg/day for >60 years of age will require prior authorization. Please see the FDA guidance at: https://www.fda.gov/drugs/drugsafety/ucm297391.htm for important safety information.

Members currently stabilized on a non-preferred newer generation antidepressant may receive approval to continue on that agent for one year if medically necessary. **Verification may be provided from the prescriber or the pharmacy.** 

The	rapeutic Drug Class: MONOAMINE OXID	ASE INHIBITORS (MAOIs) -Effective 4/1/2024
THE	PA Required  EMSAM (selegiline) patch  MARPLAN (isocarboxazid) tablet  NARDIL (phenelzine) tablet  Phenelzine tablet  Tranylcypromine tablet	Non-preferred products may be approved for members who have failed adequate trial (8 weeks) with three preferred anti-depressant products. If three preferred anti-depressant products are not available for indication being treated, approval of prior authorization for non-preferred products will require adequate trial of all preferred anti-depressant products FDA approved for that indication. (Failure is defined as: lack of efficacy after 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction)  Members currently stabilized on a Non-preferred MAOi antidepressant may receive approval to continue that agent for one year if medically necessary. Verification may be provided from the prescriber or the pharmacy.
		-DEPRESSANTS (TCAs) -Effective 4/1/2024
No PA Required  Amitriptyline tablet  Clomipramine capsule  Desipramine tablet  Doxepin 10mg, 25mg, 50mg, 75mg, 100mg, 150mg capsule, oral concentrate  Imipramine HCl tablet  Nortriptyline capsule	PA Required  Non-preferred brand name medications do not require a prior authorization when the equivalent generic is preferred and "dispense as written" is indicated on the prescription.  Amoxapine tablet  ANAFRANIL (clomipramine) capsule  Imipramine pamoate capsule  NORPRAMIN (desipramine) tablet  Nortriptyline solution  PAMELOR (nortriptyline) capsule  Protriptyline tablet  Trimipramine capsule	Non-preferred products may be approved for members who have failed adequate trial (8 weeks) with three preferred tricyclic products. If three preferred products are not available for indication being treated, approval of prior authorization for non-preferred products will require adequate trial of all tricyclic preferred products FDA approved for that indication. (Failure is defined as: lack of efficacy after 8-week trial, allergy, intolerable side effects, or significant drug-drug interaction)  Members currently stabilized on a non-preferred tricyclic antidepressant may receive approval to continue on that agent for one year if medically necessary. Verification may be provided from the prescriber or the pharmacy.
		INSON'S AGENTS -Effective 4/1/2024
N. DA D.		amine precursors and combinations
No PA Required  Carbidopa/Levodopa IR, ER tablet	PA Required  Carbidopa tablet  Carbidopa/Levodopa ODT	Non-preferred agents may be approved with adequate trial and failure of carbidopalevodopa IR and ER formulations (failure is defined as lack of efficacy with a 4-week trial, allergy, intolerable side effects or significant drug-drug interactions).
Carbidopa/Levodopa/Entacapone tablet	DHIVY (carbidopa/levodopa) tablet	Carbidopa or levodopa single agent products may be approved for members with diagnosis of Parkinson's Disease as add-on therapy to carbidopa-levodopa.

	T	
	DUOPA (carbidopa/levodopa) suspension  INBRIJA (levodopa) capsule for inhalation  LODOSYN (carbidopa) tablet  RYTARY ER (carbidopa/levodopa) capsule  SINEMET (carbidopa/levodopa) IR tablet  STALEVO (carbidopa/levodopa/ entacapone)  tablet	Non-preferred medications that <u>are not</u> prescribed for Parkinson's Disease (or an indication related to Parkinson's Disease) may receive approval for other FDA-labeled indications without meeting trial and failure step therapy criteria.  Members with history of trial and failure of a non-preferred Parkinson's Disease agent that is the brand/generic equivalent of a preferred product (same strength, dosage form and active ingredient) may be considered as having met a trial and failure of the equivalent preferred.  Members currently stabilized on a non-preferred product may receive approval to continue therapy with that product.
	MAO-	B inhibitors
No PA Required	PA Required	Non-preferred agents may be approved with adequate trial and failure of selegiline
Rasagiline tablet	AZILECT (rasagiline) tablet	capsule or tablet (failure is defined as lack of efficacy with a 4-week trial, allergy, intolerable side effects or significant drug-drug interactions).
Selegiline capsule, tablet	XADAGO (safinamide) tablet	Non-preferred medications that are not prescribed for Parkinson's Disease (or an indication related to Parkinson's Disease) may receive approval for other FDA-labeled
	ZELAPAR (selegiline) ODT	indications without meeting trial and failure step therapy criteria.
		Members with history of trial and failure of a non-preferred Parkinson's Disease agent that is the brand/generic equivalent of a preferred product (same strength, dosage form and active ingredient) may be considered as having met a trial and failure of the equivalent preferred.
		Members currently stabilized on a non-preferred product may receive approval to continue therapy with that product.
	Dopam	ine Agonists
No PA Required	PA Required	Non-preferred agents may be approved with adequate trial and failure of ropinirole IR AND pramipexole IR (failure is defined as lack of efficacy with 4-week trial,
Pramipexole IR tablet	APOKYN (apomorphine) SC cartridge	documented contraindication to therapy, allergy, intolerable side effects or significant drug-drug interactions).
Ropinirole IR tablet	Apomorphine SC cartridge	APOKYN (apomorphine subcutaneous cartridge) may be approved if meeting the
	Bromocriptine capsule, tablet	following:
	KYNMOBI (apomorphine) SL film	<ul> <li>APOKYN (apomorphine) is being used as an adjunct to other medications for acute, intermittent treatment of hypomobility, "off" episodes ("end-of-dose wearing off" and unpredictable "on/off" episodes) in patients with advanced</li> </ul>
	MIRAPEX (pramipexole) ER tablet	Parkinson's disease AND
	NEUPRO (rotigotine) patch	Due to the risk of profound hypotension and loss of consciousness, member is not concomitantly using a 5HT3 antagonist such as ondansetron, granisetron, dolasetron, palonosetron or alosetron.

	PARLODEL (bromocriptine) capsule, tablet Pramipexole ER tablet Ropinirole ER tablet	<ul> <li>Maximum dose: 6mg (0.6mL) three times per day</li> <li>KYNMOBI (apomorphine sublingual film) may be approved if meeting the following: <ul> <li>KYNMOBI (apomorphine) is being used for the acute, intermittent treatment of "off" episodes in patients with Parkinson's disease AND</li> <li>Due to the risk of profound hypotension and loss of consciousness, member must not be concomitantly using a 5HT3 antagonist such as ondansetron, granisetron, dolasetron, palonosetron or alosetron.</li> </ul> </li> <li>Maximum dose: 30mg five times per day</li> <li>Non-preferred medications that are not prescribed for Parkinson's Disease (or an indication related to Parkinson's Disease) may receive approval for other FDA-labeled indications without meeting trial and failure step therapy criteria.</li> <li>Members with history of trial and failure of a non-preferred Parkinson's Disease agent that is the brand/generic equivalent of a preferred product (same strength, dosage form and active ingredient) may be considered as having met a trial and failure of the equivalent preferred.</li> <li>Members currently stabilized on a non-preferred product may receive approval to continue therapy with that product.</li> </ul>
		inson's agents

(unless indicated by criteria)*	i A Keyuneu	*Vraylar (cariprazine) may be approved for members after trial and failure of one preferred agent. Failure is defined as contraindication, lack of efficacy with 6-week		
Aripiprazole tablet	Non-preferred brand name medications do not require a prior authorization when the equivalent	trial, allergy, intolerable		g-drug interactions, or known
Clozapine tablet	generic is preferred and "dispense as written" is indicated on the prescription.		hay be approved for members or scribed for an FDA-Appro	s meeting all of the following: oved indication AND
Lurasidone tablet	ABILIFY (aripiprazole) tablet, MyCite	Prescription meets dose and age limitations (Table 1) AND     Request meets one of the following:		

• Request meets one of the following:

Olanzapine tablet, ODT	Aripiprazole oral solution, ODT
Paliperidone ER tablet	Asenapine SL tablet
Quetiapine IR tablet***	CAPLYTA (lumateperone) capsule
Quetiapine ER tablet	Clozapine ODT
Risperidone ODT, oral solution, tablet	CLOZARIL (clozapine) tablet, ODT
SAPHRIS <sup>BNR</sup> (asenapine) SL	GEODON (ziprasidone) capsule
tablet (asenapine) SL	INVEGA ER (paliperidone) tablet
VRAYLAR (cariprazine) capsule*	LATUDA (lurasidone) tablet
Ziprasidone capsule	LYBALVI (olanzapine/samidorphan) tablet
	NUPLAZID (pimavanserin) capsule, tablet
	Olanzapine/Fluoxetine capsule
	REXULTI (brexpiprazole) dose pack, tablet
	RISPERDAL (risperidone) tablet, oral solution
	SECUADO (asenapine) patch
	SEROQUEL IR (quetiapine IR) tablet***
	SEROQUEL XR (quetiapine ER) tablet
	SYMBYAX (olanzapine/fluoxetine) capsule
	VERSACLOZ (clozapine) suspension
	ZYPREXA (olanzapine) tablet
	ZYPREXA ZYDIS (olanzapine) ODT

- Member has history of trial and failure of two preferred products with FDA approval for use for the prescribed indication (failure defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, contraindication, significant drug-drug interactions, or known interacting genetic polymorphism that prevents safe preferred product dosing) OR
- Prescriber attests that within the last year (365 days) the member has trialed and failed (been unsuccessfully treated with) a preferred antipsychotic medication that was used to treat the member's diagnosis (failure defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, significant drug-drug interactions, or known interacting genetic polymorphism that prevents safe preferred product dosing). Treatment must be under an FDA approved indication for a mental health condition or disorder.

\*\*Age Limits: All products including preferred products will require a PA for members younger than the FDA approved age for the agent (Table 1). Members younger than the FDA approved age for the agent who are currently stabilized on an atypical antipsychotic will be eligible for approval.

Atypical Antipsychotic prescriptions for members under 5 years of age may require a provider-provider telephone consult with a child and adolescent psychiatrist (provided at no cost to provider or member).

\*\*\*Quetiapine IR when given at subtherapeutic doses may be restricted for therapy. Low-dose quetiapine (<150mg/day) is only FDA approved as part of a drug titration schedule to aid patients in getting to the target quetiapine dose. PA will be required for quetiapine < 150mg per day except for utilization (when appropriate) in members 65 years or older. PA will be approved for members 10-17 years of age with approved diagnosis (Table 1) stabilized on <150mg quetiapine IR per day.

**Aripiprazole solution**: Aripiprazole <u>tablet</u> quantity limit is 2 tablets/day for pediatric members to allow for incremental dose titration and use of the preferred tablet formulation should be considered for dose titrations when possible and clinically appropriate. If incremental dose cannot be achieved with titration of the aripiprazole tablet for members < 18 years of age OR for members unable to swallow solid tablet dosage form, aripiprazole solution may be approved. For all other cases, aripiprazole solution is subject to meeting non-preferred product approval criteria listed above.

**Nuplazid** (pimavanserin tartrate) may be approved for the treatment of hallucinations and delusions associated with Parkinson's Disease psychosis **AND** following trial and failure of therapy with quetiapine or clozapine, or clinical rationale is provided supporting why these medications cannot be trialed. Failure will be defined as contraindication, intolerable side effects, drug-drug interaction, or lack of efficacy.

**Abilify MyCite** may be approved if meeting all of the following:

• Member has history of adequate trial and failure of 5 preferred agents (one trial must include aripiprazole tablet). Failure is defined as lack of efficacy with 6-

- week trial on maximally tolerated dose, allergy, intolerable side effects, significant drug-drug interactions AND
- Information is provided regarding adherence measures being recommended by provider and followed by member (such as medication organizer or digital medication reminders) AND
- Member has history of adequate trial and failure of 3 long-acting injectable formulations of atypical antipsychotics, one of which must contain aripiprazole (failure is defined as lack of efficacy with 8-week trial, contraindication, allergy, intolerable side effects, significant drug-drug interactions) AND
- Abilify MyCite is being used with a MyCite patch and member is using a compatible mobile application. AND
- Medication adherence information is being shared with their provider via a web portal or dashboard.

<u>Quantity Limits</u>: Quantity limits will be applied to all products (Table 1). In order to receive approval for off-label dosing, the member must have an FDA approved indication and must have tried and failed on the FDA approved dosing regimen.

Members currently stabilized on a non-preferred atypical antipsychotic may receive approval to continue therapy with that agent for one year.

Table 1	Table 1 Atypical Antipsychotics – FDA Approved Indication, Age Range, Quantity and Maximum Dose				
Brand	Generic	Approved Indications	Age Range	Maximum Daily Dose by Age/Indication	Quantity and Maximum Dose Limitations
ABILIFY	aripiprazole	Schizophrenia Bipolar I Disorder Bipolar I Disorder Irritability w/autistic disorder Tourette's disorder Adjunctive treatment of MDD	≥ 13 years ≥ 18 years 10-17 years 6-17 years 6-18 years ≥ 18 years	30 mg 30 mg 30 mg 15 mg 20 mg (weight-based) 15 mg	Maximum one tablet per day (maximum of two tablets per day allowable for members < 18 years of age to accommodate for incremental dose changes)
CLOZARIL	clozapine	Treatment-resistant schizophrenia Recurrent suicidal behavior in schizophrenia or schizoaffective disorder	≥ 18 years	900 mg	Maximum dosage of 900mg per day
CAPLYTA	lumateperone	Schizophrenia Bipolar I Disorder Bipolar II Disorder	≥ 18 years	42 mg	Maximum dosage of 42mg per day
	clozapine	Treatment-resistant schizophrenia Recurrent suicidal behavior in schizophrenia or schizoaffective disorder	≥ 18 years	900 mg	Maximum dosage of 900mg per day
FANAPT	iloperidone	Schizophrenia Bipolar I Disorder	≥ 18 years	24 mg	Maximum two tablets per day

GEODON	ziprasidone	Schizophrenia Bipolar I Disorder	≥ 18 years ≥ 18 years	200 mg 160 mg	Maximum two capsules per day
INVEGA	paliperidone	Schizophrenia & schizoaffective disorder	≥ 12 years and weight ≥ 51 kg ≥ 12 years and weight < 51 kg	12 mg 6 mg	Maximum one capsule per day
LATUDA	lurasidone	Schizophrenia Schizophrenia Bipolar I disorder Bipolar I disorder	≥ 18 years 13-17 years ≥ 18 years 10–17 years	160 mg 80 mg 120 mg 80 mg	Maximum one tablet per day (If dosing 160mg for schizophrenia, then max of two tablets per day)
NUPLAZID	pimavanserin	Parkinson's disease psychosis	≥ 18 years	34 mg	Maximum dosage of 34mg per day
RISPERDAL	risperidone	Schizophrenia Schizophrenia Bipolar mania Irritability w/autistic disorder	≥ 18 years 13-17 years ≥ 10 years 5-17 years	16 mg 6 mg 6 mg 3 mg	Maximum dosage of 16mg/day (4 tablet/day limitation applied in claims system to allow for dose escalation and tapering)
REXULTI	brexpiprazole	Schizophrenia Adjunctive treatment of MDD Agitation associated with Alzheimer's disease (AD)	≥ 13 years ≥ 18 years	4 mg 3 mg	Maximum of 3mg/day for MDD adjunctive therapy, and agitation due to AD, Maximum of 4mg/day for schizophrenia
SAPHRIS	asenapine	Schizophrenia Bipolar mania or mixed episodes	≥ 18 years ≥ 10 years	20 mg 20 mg	Maximum two tablets per day
SECUADO	asenapine patch	Schizophrenia	≥ 18 years	7.6 mg/ 24 hours	Maximum 1 patch per day
SEROQUEL	quetiapine	Schizophrenia Schizophrenia Bipolar I mania or mixed Bipolar I mania or mixed Bipolar I depression Bipolar I Disorder Maintenance	≥ 18 years 13-17 years ≥ 18 years 10-17 years ≥ 18 years ≥ 18 years ≥ 18 years	750 mg 800 mg 800 mg 600 mg 300 mg 800 mg	Maximum three tablets per day
SEROQUEL XR	quetiapine ER	Schizophrenia Bipolar I mania Bipolar I mania Bipolar I depression Adjunctive treatment of MDD	≥ 13 years ≥ 18 years 10-17 years ≥ 18 years ≥ 18 years	800 mg 800 mg 600 mg 300 mg 300 mg	Maximum one tablet per day (for 300mg & 400mg tablets max 2 tablets per day)
SYMBYAX	olanzapine/ fluoxetine	Acute depression in Bipolar I Disorder Treatment resistant depression (MDD)	≥ 10 years	12 mg olanzapine/ 50 mg fluoxetine	Maximum three capsules per day (18mg olanzapine/75mg fluoxetine)
VRAYLAR	cariprazine	Schizophrenia Acute manic or mixed episodes with Bipolar I disorder	≥ 18 years ≥ 18 years	6 mg 6 mg	Maximum dosage of 6mg/day
		Depressive episodes with Bipolar I disorder Adjunctive treatment of MDD	≥ 18 years ≥ 18 years	3 mg 3 mg	

ZYPREXA ZYPREXA ZYDIS	Schizophrenia Acute manic or mixed episodes with disorder	Bipolar I ≥ 13 years	20 mg	Maximum one tablet per day
Therapeut	c Drug Class: CALCITONIN GENE	- RELATED PEPTIDE	NHIBITORS (	CGRPis) -Effective 4/1/2024
PA Required for all agents		*Preferred agents may be app	roved if meeting the	e following criteria:
Preferred	Non-Preferred			-
		Preferred Medications for Mi	graine Prevention (n	nust meet all of the following):

gmin) pen, 120 mg syringe		-		ne member has tried and failed two preferred
* NHIDTEC (rime seems) OD		injectable product fo	rmulations. Failure	is defined as lack of efficacy, contraindication to

drug-drug interaction).

migraine AND

AND

therapy, allergy, intolerable side effects, or significant drug-drug interaction.

The requested medication is being used as acute treatment for migraine headache AND Member has history of trial and failure of two triptans (failure is defined as lack of efficacy with 4-week trial, contraindication to therapy, allergy, intolerable side effects, or significant

The requested medication is being used as preventive therapy for episodic or chronic

Member has tried and failed two oral preventive pharmacological agents listed as Level A per the most current American Headache Society/American Academy of Neurology guidelines (such as divalproex, topiramate, metoprolol, propranolol). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND The requested medication is not being used in combination with another CGRP medication

The member has history of adequate trial and failure of all preferred products indicated for preventive therapy (failure is defined as lack of efficacy with 4-week trial, contraindication

to therapy, allergy, intolerable side effects, or significant drug-drug interaction).

Preferred Medications for Acute Migraine Treatment (must meet all of the following):

Non-Preferred Medications for Migraine Prevention (must meet all of the following):

Member has diagnosis of migraine with or without aura AND

\* NURTEC (rimegepant) ODT

\* UBRELVY (ubrogepant) tablet

Non-Preferred Medications for Acute Migraine Treatment (must meet all of the following):

- Member is 18 years of age or older AND
- Medication is being prescribed to treat migraine headache with moderate to severe pain AND
- The requested medication is not being used in combination with another CGRP medication AND
- Member has history of trial and failure with <u>all</u> of the following (failure is defined as lack of efficacy with 4-week trial, allergy, contraindication, intolerable side effects, or significant drug-drug interaction):
  - o Two triptans AND
  - o One NSAID agent AND
  - One preferred agent indicated for acute migraine treatment

## Non-Preferred Medications for Treatment of Episodic Cluster Headache (must meet all of the following):

- Member is 19-65 years of age AND
- Member meets diagnostic criteria for episodic cluster headache (has had no more than 8 attacks per day, a minimum of one attack every other day, and at least 4 attacks during the week prior to this medication being prescribed) AND
- Member is not taking other preventive medications to reduce the frequency of cluster headache attacks AND
- Member has history of trial and failure of all of the following (failure is defined as lack of efficacy with 4-week trial, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction):
  - o Oxygen therapy AND
  - o Sumatriptan subcutaneous or intranasal OR zolmitriptan intranasal
- Initial authorization will be limited to 8 weeks. Continuation (12-month authorization) will require documentation of clinically relevant improvement with no less than 30% reduction in headache frequency in a 4-week period.

#### Age Limitations:

All products: ≥ 18 years

Table 1. Calcitonin Gene-Related Peptide Inhibitor Quantity Limits			
Drug Name	Maximum Dosing		
Aimovig (erenumab)	one 140 mg autoinjector per 30 days		
Ajovy (fremanezumab)	one 225 mg autoinjector or syringe per 30 days or three 225 mg autoinjectors or syringes every 90 days		
Emgality 100mg	three 100 mg prefilled syringes per 30 days		
(galcanezumab)			
Emgality 120 mg	two 120 mg pens or prefilled syringes once as first loading		
(galcanezumab)	dose then one 120 mg pen or prefilled syringe per 30 days		
Nurtec (rimegepant)	Prevention: 16 tablets/30 days; Acute Treatment: 8 tablets/30		

	days
Qulipta (atogepant)	30 tablets/30 days
Ubrelvy 50 mg (ubrogepant)	16 tablets/30 days
Ubrelvy 100 mg (ubrogepant)	16 tablets/30 days
ZAVZPRET (zavegepant)	6 unit-dose nasal spray devices per 30 days

Members with current prior authorization approval on file for a preferred agent may receive approval for continuation of therapy with the preferred agent.

## Therapeutic Drug Class: LITHIUM AGENTS -Effective 4/1/2024

#### PA Required No PA Required Non-preferred products may be approved with trial and failure of one preferred agent (failure is defined as lack of efficacy with 6-week trial, allergy, intolerable side effects, Non-preferred brand name medications do not Lithium carbonate capsule, require a prior authorization when the equivalent significant drug-drug interactions, intolerance to dosage form). tablet generic is preferred and "dispense as written" is indicated on the prescription. Members currently stabilized on a non-preferred product may receive approval to Lithium citrate solution continue therapy with that product. Lithium ER tablet LITHOBID ER (lithium ER) tablet

## Therapeutic Drug Class: NEUROCOGNITIVE DISORDER AGENTS -Effective 4/1/2024

	Non Ductoured	
Preferred	Non-Preferred	
*Must meet eligibility criteria	PA Required	*Eligibility criteria for Preferred Agents – Preferred products may be approved for
		a diagnosis of neurocognitive disorder (eligible for AutoPA automated approval).
*Donepezil 5mg, 10mg tablet	ADLARITY (donepezil) patch	
		Non-preferred products may be approved if the member has failed treatment with one
*Donepezil ODT	ARICEPT (donepezil) tablet	of the preferred products in the last 12 months. (Failure is defined as lack of efficacy,
	, ,	allergy, intolerable side effects or significant drug-drug interactions)
*Galantamine IR tablet	Donepezil 23mg tablet	
		Members currently stabilized on a non-preferred product may receive approval to
*Memantine IR tablet, dose	EXELON (rivastigmine) patch	continue on that agent for one year if medically necessary and if there is a diagnosis
pack	, J	of neurocognitive disorder.

	Tizanidine capsule ZANAFLEX (tizanidine) capsule, tablet	
		ND RELATED AGENTS -Effective 4/1/2024
Preferred *No PA Required (if age, max daily dose, and diagnosis met)	Non-Preferred PA Required  ADDERALL XR (mixed amphetamine salts ER)	*Preferred medications may be approved through AutoPA for indications listed in Table 1 (preferred medications may also receive approval for off-label use for fatigue associated with multiple sclerosis).

Amphetamine salts, mixed ER

(generic Adderall XR) capsule

capsule

ADZENYS XR-ODT (amphetamine)

Non-preferred medications may be approved for members meeting the following criteria (for Sunosi (solriamfetol) and Wakix (pitolisant), refer to specific criteria listed below):

• Prescription meets indication/age limitation criteria (Table 1) AND

Amphetamine salts, mixed (generic Adderall) tablet	Amphetamine salts, mixed ER (generic Adderall XR) capsule
Armodafinil tablet	Amphetamine tablet (generic Evekeo)
Atomoxetine capsule	APTENSIO XR (methylphenidate ER) capsule
Clonidine ER tablet	AZSTARYS (serdexmethylphenidate/dexmethylphenidate) capsule
CONCERTA <sup>BNR</sup> (methylphenidate ER) tablet	CONCERTA (methylphenidate ER) tablet
DAYTRANA <sup>BNR</sup>	COTEMPLA XR-ODT (methylphenidate ER)
(methylphenidate) patch	DESOXYN (methamphetamine) tablet
Dexmethylphenidate IR tablet	DEXEDRINE (dextroamphetamine) Spansule
Dexmethylphenidate ER capsule	Dextroamphetamine ER capsule, solution, tablet
Guanfacine ER tablet	DYANAVEL XR (amphetamine) suspension,
Methylphenidate (generic Methylin/Ritalin) solution,	tablet
tablet	EVEKEO (amphetamine) ODT, tablet
Methylphenidate ER tablet (generic Concerta)	FOCALIN (dexmethylphenidate) tablet, XR capsule
Modafinil tablet	INTUNIV (guanfacine ER) tablet
VYVANSE <sup>BNR</sup> (lisdexamfetamine) capsule	JORNAY PM (methylphenidate) capsule
(insuexamietamine) capsule	Lisdexamfetamine capsule, chewable tablet
	Methamphetamine tablet
	METHYLIN (methylphenidate) solution
	Methylphenidate CD/ER/LA capsule, tablet, chewable tablet, ER tablet (generic Relexxi/Ritalin), patch
	MYDAYIS ER (dextroamphetamine/ amphetamine) capsule
	NUVIGIL (armodafinil) tablet

- If member is  $\geq 6$  years of age:
  - Has documented trial and failure; with three preferred products in the last 24 months AND
  - If the member is unable to swallow solid oral dosage forms, two of the trials must be methylphenidate solution, dexmethylphenidate ER,
     Vyvanse, Adderall XR, or any other preferred product that can be taken without the need to swallow a whole capsule.

#### OR

- <u>If member is 3–5 years of age</u>:
  - Has documented trial and failure; with one preferred product in the last 24 months AND
  - If the member is unable to swallow solid oral dosage forms, the trial
    must be methylphenidate solution, dexmethylphenidate ER, Vyvanse,
    Adderall XR, or any other preferred product that can be taken without
    the need to swallow a whole capsule.

**SUNOSI** (solriamfetol) prior authorization may be approved if member meets the following criteria:

- Member is 18 years of age or older AND
- Member has diagnosis of either narcolepsy or obstructive sleep apnea (OSA) and is experiencing excessive daytime sleepiness AND
- Member does not have end stage renal disease AND
- If Sunosi is being prescribed for OSA, member has 1 month trial of CPAP AND
- Member has trial and failure<sup>‡</sup> of modafinil AND armodafinil AND one other agent in stimulant PDL class.

**WAKIX** (pitolisant) prior authorization may be approved if member meets the following criteria:

- Member is 18 years of age or older **AND**
- Member has diagnosis of narcolepsy and is experiencing excessive daytime sleepiness AND
- Member does not have end stage renal disease (eGFR <15 mL/minute) **AND**
- Member does not have severe hepatic impairment AND
- Member has trial and failure<sup>‡</sup> of modafinil AND armodafinil AND one other agent in the stimulant PDL class AND
- Member has been counseled that Wakix may reduce the efficacy of hormonal contraceptives and regarding use an alternative non-hormonal method of contraception during Wakix therapy and for at least 21 days after discontinuing treatment.

Maximum Dose (all products): See Table 2

PROCENTRA (dextroamphetamine) solution

PROVIGIL (modafinil) tablet

QELBREE (viloxazine ER) capsule

QUILLICHEW ER (methylphenidate) chewable tablet, XR suspension

RELEXXII (methylphenidate ER) tablet

RITALIN (methylphenidate) IR/ER tablet, ER capsule

STRATTERA (atomoxetine) capsule

SUNOSI (solriamfetol) tablet

VYVANSE (lisdexamfetamine) chewable tablet

WAKIX (pitolisant) tablet

XELSTRYM (dextroamphetamine) patch

ZENZEDI (dextroamphetamine) tablet

**Exceeding Max Dose:** Prior authorization may be approved for doses that are higher than the listed maximum dose (Table 2) for members meeting the following criteria:

- Member is taking medication for indicated use listed in Table 1 AND
- Member has 30-day trial and failure<sup>‡</sup> of three different preferred or nonpreferred agents at maximum doses listed in Table 2 **AND**
- Documentation of member's symptom response to maximum doses of three other agents is provided **AND**
- Member is not taking a sedative hypnotic medication (such as temazepam, triazolam, or zolpidem from the Sedative Hypnotic PDL class).

<sup>‡</sup>Failure is defined as: lack of efficacy with 4-week trial, allergy, intolerable side effects, or significant drug-drug interaction.

#### **Table 1: Diagnosis and Age Limitations**

- Approval for medically accepted indications <u>not</u> listed in Table 1 may be given with prior authorization review and may require submission of peer-reviewed literature or medical compendia showing safety and efficacy of the medication used for the prescribed indication.
- Preferred medications may also receive approval for off-label use for fatigue associated with multiple sclerosis if meeting all other criteria for approval.

Bolded drug names are preferred (subject to preferential coverage changes for brand/generic equivalents)

Drug	Diagnosis and Age Limitations	
Stimulants-Immediate Release		
Amphetamine sulfate (EVEKEO)	ADHD (Age $\geq$ 3 years), Narcolepsy (Age $\geq$ 6 years)	
Dexmethylphenidate IR (FOCALIN)	ADHD (Age ≥ 6 years)	
Dextroamphetamine IR tablet (ZENZEDI)	ADHD (Age 3 to 16 years), Narcolepsy (Age ≥ 6 years)	
Dextroamphetamine solution (PROCENTRA)	ADHD (Age 3 to 16 years), Narcolepsy (Age ≥ 6 years)	
Methamphetamine (DESOXYN)	ADHD (Age ≥ 6 years)	
methylphenidate IR (generic METHYLIN, RITALIN)	ADHD (Age $\geq$ 6 years <sup>†</sup> ), Narcolepsy (Age $\geq$ 6 years), OSA.	

Mixed amphetamine salts IR (generic ADDERALL)	<sup>†</sup> Prior Authorization for members 3-6 years of age with a diagnosis of ADHD may be approved with prescriber attestation to the following:  • Member's symptoms have not significantly improved despite adequate behavior interventions AND  • Member experiences moderate-to-severe continued disturbance in functioning AND  • Prescriber has determined that the potential benefits of starting methylphenidate before the age of 6 years outweigh the potential harm of delaying treatment.  ADHD (Age ≥ 3 years), Narcolepsy (Age ≥ 6 years)
	Stimulants –Extended-Release
Amphetamine ER (ADZENYS XR-ODT and ADZENYS ER suspension)	ADHD (Age ≥ 6 years)
Amphetamine ER (DYANAVEL XR)	ADHD (Age $\geq$ 6 years)
Mixedamphetamine salts ER (ADDERALL XR)	ADHD (Age $\geq$ 6 years)
Dexmethylphenidate ER (generic Focalin XR)	ADHD (Age $\geq$ 6 years)
Dextroamphetamine ER (DEXEDRINE)	ADHD (Age 6 to 16 years), Narcolepsy (Age ≥ 6 years)
Dextroamphetamine ER/amphetamine ER (MYDAYIS ER)	ADHD (Age $\geq 13$ years)
Dextroamphetamine ER patch (XELSTRYM)	ADHD (Age ≥ 6 years)
Lisdexamfetamine dimesylate ( <b>VYVANSE capsule</b> , Vyvanse chewable)	ADHD (Age ≥ 6 years), Moderate to severe binge eating disorder in adults (Age ≥ 18 years)
Methylphenidate ER OROS (CONCERTA)	ADHD (Age $\geq$ 6 years), Narcolepsy (Age $\geq$ 6 years), OSA
Methylphenidate patch (DAYTRANA)	ADHD (Age ≥ 6 years)
Methylphenidate SR (METADATE ER)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)
Methylphenidate ER (METADATE CD)	ADHD (Age ≥ 6 years)
Methylphenidate ER (QUILLICHEW ER)	ADHD (Age 6 years to ≤ 65 years), Narcolepsy (Age ≥ 6 years)
Methylphenidate ER (QUILLIVANT XR)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)
Methylphenidate ER (RELEXXI ER)	ADHD (Age 6 to 65 years)
Methylphenidate ER (RITALIN LA)	ADHD (Age ≥ 6 years)
Methylphenidate ER (ADHANSIA XR)	ADHD (Age ≥ 6 years)
Methylphenidate ER (JORNAY PM)	ADHD (Age ≥ 6 years)
Methylphenidate XR (APTENSIO XR)	ADHD (Age ≥ 6 years)
Methylphenidate XR ODT (COTEMPLA XR-ODT)	ADHD (Age 6 to 17 years)
Serdexmethylphenidate/dexmethylphenidate (AZSTARYS)	ADHD (Age ≥ 6 years)
	Non-Stimulants
Atomoxetine (generic STRATTERA)	ADHD (Age ≥ 6 years)
Clonidine ER	ADHD as monotherapy or adjunctive therapy to stimulants (Age ≥ 6 years)
Guanfacine ER (generic INTUNIV)	ADHD as monotherapy or adjunctive therapy to stimulants (Age $\geq$ 6 years)

Viloxazine ER (QELBREE)	ADHD (Age $\geq 6$ years)		
	Wakefulness-promoting Agents		
<b>Armodafinil</b> (generic NUVIGIL)  Excessive sleepiness associated with narcolepsy, OSA, SWD, and adjunct therapy to treat the sleepiness in patients with major depressive disorder (MDD) (Age ≥ 18 years)			
Modafinil (PROVIGIL)	Excessive sleepiness associated with narcolepsy, OSA, SWD, and adjunct therapy to treat fatigue and sleepiness in patients with major depressive disorder (MDD), antipsychotic medication-related fatigue (Age ≥ 18 years)		
Pitolisant (WAKIX)	Excessive sleepiness associated with narcolepsy (Age ≥ 18 years)		
Solriamfetol (SUNOSI)	Excessive sleepiness associated with narcolepsy, OSA (Age ≥ 18 years)		
KEY: <b>ADHD</b> –attention-deficit/hyperactivity disorder, <b>OSA</b> –obstructive sleep apnea, <b>SWD</b> –shift work disorder			

e 2: Maximum Dose	
Drug	Maximum Daily Dose
ADDERALL	60 mg
ADDERALL XR	60 mg
ADHANSIA XR	85 mg
ADZENYS XR ODT	18.8 mg (age 6-12)
ADZENYS ER SUSPENSION	12.5 mg (age $\ge$ 13)

Authorization for all acne agents prescribed solely for cosmetic purposes will not be approved.

Preferred topical clindamycin and erythromycin products may be approved by AutoPA verification of ICD-10 diagnosis code for acne vulgaris, psoriasis, cystic acne, comedonal acne, disorders of keratinization, neoplasms, folliculitis, hidradenitis suppurativa, or perioral dermatitis (erythromycin only). Approval of preferred topical clindamycin and erythromycin products for other medically accepted indications may be considered following clinical prior authorization review by a call center pharmacist.

All other preferred topical acne agents may be approved if meeting the following criteria:

For members > 25 years of age, may be approved following prescriber verification that the medication is not being utilized for cosmetic purposes AND prescriber verification that the indicated use is for acne vulgaris, psoriasis,

*Clindamycin/benzoyl peroxide gel jar (generic Benzaclin)	BENZAMYCIN (erythromycin/benzoyl peroxide) gel
*Clindamycin/benzoyl peroxide gel tube (generic Duac)	BP (sulfacetamide sodium/sulfur/urea) cleansing wash
*Dapsone gel	CABTREO (adapalene/benzoyl peroxide/clindamycin) gel
*Erythromycin solution	CLEOCIN-T (clindamycin) lotion
*Erythromycin/Benzoyl peroxide gel (generic Benzamycin)	CLINDACIN ETZ/PAC (clindamycin phosphate) kit
*Sulfacetamide sodium suspension	CLINDAGEL gel
*Sulfacetamide sodium/sulfur cleanser,	Clindamycin phosphate foam
	Clindamycin/Benzoyl peroxide gel pump
*RETIN-A <sup>BNR</sup> (tretinoin) cream, gel	Clindamycin/tretinoin gel
	Dapsone gel pump
	ERY/ERYGEL (erythromycin/ethanol) gel, medicated swabs/pads
	Erythromycin gel
	EVOCLIN (clindamycin) foam
	FABIOR (tazarotene) foam
	KLARON (sulfacetamide) suspension
	NEUAC (clindamycin/benzoyl peroxide/emollient) kit
	ONEXTON (clindamycin/benzoyl peroxide) gel, gel pump
	RETIN-A MICRO (tretinoin) (all products)
	ROSULA (sulfacetamide sodium/sulfur) cloths, wash

- cystic acne, disorders of keratinization, neoplasms, or comedonal acne. These medications are only eligible for prior authorization approval for the aforementioned diagnoses.
- For members ≤ 25 years of age, may be approved for a diagnosis of acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. Diagnosis will be verified through automated verification (AutoPA) of the appropriate corresponding ICD-10 diagnosis code related to the indicated use of the medication.

Non-preferred topical products may be approved for members meeting all of the following criteria:

- Member has trialed/failed three preferred topical products with different mechanisms (such as tretinoin, antibiotic). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Prescriber verification that the medication is being prescribed for one of the following diagnoses: acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne.

	SSS 10-5 (sulfacetamide sodium/sulfur) foam	
	Sulfacetamide sodium cleanser, cleansing gel, lotion, shampoo, wash  Sulfacetamide sodium/sulfur cream, pad, suspension, wash

		1

		defined as lack of efficacy of a 4-week trial, allergy, intolerable side effects or significant drug-drug interaction.
	Therapeutic Drug Class: ANTI-PSO	RIATICS -Topical -Effective 7/1/2024
No PA Required	PA Required	ZORYVE (roflumilast) may receive approval if meeting the following based on
Calcipotriene cream, solution	Calcipotriene foam, ointment	prescribed indication:
TACLONEX SCALP BNR	Calcipotriene/betamethasone dipropionate	Seborrheic dermatitis (0.3% foam formulation)
(calcipotriene/betamethasone) suspension	ointment, suspension	• Member is ≥ 9 years of age AND
-	Calcitriol ointment	Member has a diagnosis of seborrheic dermatitis AND
TACLONEX (calcipotriene/betamethasone) ointment	DUOBRII (halobetasol/tazarotene) lotion	<ul> <li>Member does not have moderate or severe hepatic impairment (Child-Pugh B o C) AND</li> </ul>
V.III.	ENSTILAR (calcipotriene/betamethasone) foam	Medication is being prescribed by or in consultation with a dermatologist AND
	SORILUX (calcipotriene) foam	• If the affected area is limited to the scalp:
	VTAMA (tapinarof) cream	<ul> <li>Prescriber attests that member has been counseled regarding alternative</li> </ul>
	ZORYVE (roflumilast) cream	treatment options, including over-the-counter (OTC) antifungal shampoo (such as selenium sulfide, zinc pyrithione) and OTC coal tar shampoo, when appropriate)
		<ul> <li>AND</li> <li>Member has documented trial and failure (with a minimum 2-week treatment period) of at least one prescription product for seborrheic dermatitis, such as ketoconazole 2% antifungal shampoo or a topical corticosteroid. Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction.</li> <li>If the affected area includes the face or body:</li> </ul>
		Member has documented trial and failure (with a minimum 2-week treatment period) with at least one product from ALL of the following categories (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug drug interaction):  Topical antifungal (such as ketoconazole, ciclopirox)  Topical corticosteroid

#### AND

• Member has been counseled that Zoryve foam is flammable. Fire, flame, or smoking during and immediately following application must be avoided.

tacrolimus)

• Topical calcineurin inhibitor (such as pimecrolimus,

# Plaque psoriasis (0.3% cream formulation) • Member is ≥ 6 years of age AND • Member has a diagnosis of plaque psoriasis AND

- Member has body surface area (BSA) involvement of ≤20% AND
- Member does not have moderate or severe hepatic impairment (Child-Pugh B or C) AND
- Medication is being prescribed by or in consultation with a dermatologist AND
- If the affected area is limited to the scalp:
  - Prescriber attests that member has been counseled regarding alternative treatment options, including over-the-counter (OTC) emollients, vitamin D analogs, and coal tar shampoo when appropriate

#### AND

- Member has documented trial and failure (with a minimum 2-week treatment period) of a topical corticosteroid. Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction.
- If the affected area includes the face or body:
  - Member has documented trial and failure (with a minimum 2-week treatment period) of at least one product from ALL of the following categories. (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction):
    - Topical corticosteroid
    - Topical calcineurin inhibitor (such as pimecrolimus, tacrolimus)

### **Quantity limit:**

Foam or cream - 60 grams/30 days

<u>Initial approval:</u>

Foam or cream: 8 weeks

<u>Reauthorization</u>: Reauthorization for one year may be approved based on provider attestation that member's symptoms improved during the initial 8 weeks of treatment and continuation of therapy is justified.

		Prior authorization for all other non-preferred topical agents may be approved with failure of two preferred topical agents. If non-preferred topical agent being requested is a combination product, trial of two preferred agents must include a preferred combination agent. Failure is defined as lack of efficacy of a 4-week trial, allergy, intolerable side effects or significant drug-drug interaction.  Preferred and non-preferred products that contain a corticosteroid ingredient (such as betamethasone) will be limited to 4 weeks of therapy. Continued use will require one week of steroid-free time in between treatment periods.  Members with >30% of their body surface area affected may not use Enstilar (calcipotriene/betamethasone DP) foam or Taclonex (calcipotriene/betamethasone DP) ointment products as safety and efficacy have not been established. Members may not apply Zoryve (roflumilast) cream to >20% of affected body surface area, as safety and efficacy have not been established.
	1 0	DULATORS, TOPICAL – Effective 7/1/2024
	Atopic	Dermatitis
No PA Required	PA Required	EUCRISA (crisaborole) may be approved if the following criteria are met:

		Non-Bisph	osphonates
	PA Required  Calcitonin salmon nasal spray  FORTEO (teriparatide) SC pen  Raloxifene tablet  Teriparatide SC pen  TYMLOS (abaloparatide) SC pen	<ul> <li>CALCITONIN SALMON (nasal) may be approved if the member meets the following criteria:         <ul> <li>Member has a diagnosis of post-menopausal osteoporosis (BMD T-scores of -2.5 or less)</li> <li>AND</li> </ul> </li> <li>Has trial and failure of preferred bisphosphonate for 12 months (failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) OR</li> <li>Member cannot swallow solid oral dosage forms or has a feeding tube.</li> <li>Quantity limit: One spray daily</li> <li>RALOXIFENE may be approved if the member meets the following criteria:         <ul> <li>Diagnosis of postmenopausal osteoporosis (BMD T-scores of -2.5 or less) AND</li> <li>Has trial and failure of preferred bisphosphonate for one year (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction)</li> <li>Maximum dose: 60mg daily</li> </ul> </li> </ul>	

**FORTEO** (teriparatide) or generic teriparatide may be approved if the member meets the following criteria:

- Member has one of the following diagnoses:
  - Male primary or hypogonadal osteoporosis (BMD T-scores of -2.5 or less).
  - Osteoporosis due to corticosteroid use
  - Postmenopausal osteoporosis

#### **AND**

- Member is at very high risk for fracture\* OR member has history of trial and failure of a
  preferred bisphosphonate for one year. Failure is defined as lack of efficacy, allergy,
  intolerable side effects, or significant drug-drug interaction AND
- For brand FORTEO, member has trialed and failed generic teriparatide. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction **AND**
- Prior authorization will be given for one year and total exposure of parathyroid hormone analogs (Forteo and Tymlos) shall not exceed two years

Maximum dose: 20mcg daily

**TYMLOS** (abaloparatide) may be approved if the member meets the following criteria:

- Member has a diagnosis of postmenopausal osteoporosis (BMD T-scores of -2.5 or less)
   AND
- Member is post-menopausal with very high risk for fracture\* OR member has history of trial
  and failure of a preferred bisphosphonate for one year (Failure is defined as: lack of efficacy,
  allergy, intolerable side effects, or significant drug-drug interaction) AND
- Prior authorization will be given for one year and total exposure of parathyroid hormone analogs (Forteo and Tymlos) shall not exceed two years.

Maximum dose: 80 mcg daily

All other non-preferred non-bisphosphonates may be approved for members who have failed treatment with one preferred bisphosphonate product at treatment dose. Failure is defined as lack of efficacy with a 12-month trial, allergy, unable to use oral therapy, intolerable side effects, or significant drug-drug interaction.

\*Members at very high risk for fracture: Members will be considered at very high risk for fracture if they meet <u>one</u> of the following:

- A history of fracture within the past 12 months **OR**
- Fractures experienced while receiving guideline-supported osteoporosis therapy **OR**
- A history of multiple fractures **OR**
- A history of fractures experienced while receiving medications that cause skeletal harm (such as long-term glucocorticoids) **OR**
- A very low T-score (less than -3.0) **OR**
- A high risk for falls or a history of injurious falls **OR**
- A very high fracture probability by FRAX (> 30% for a major osteoporosis fracture or > 4.5% for hip fracture)

Note: Prior authorization criteria for Prolia (denosumab) and other injectable bone resorption and related agents are listed on Appendix P.

## Therapeutic Drug Class: **CONTRACEPTIVES - Topical** *Effective 10/1/2023*

	SIMPONI (golimumab) pen, syringe	
	XELJANZ (tofacitinib) solution	
	XELJANZ XR (tofacitinib ER) tablet	

First line preferred agents (HADLIMA, HUMIRA, ENBREL, and XELJANZ IR) may receive approval for use for FDA-labeled indications.

\*TALTZ (ixekizumab) may receive approval for use for FDA-labeled indications following trial and failure; of HADLIMA/HUMIRA or ENBREL.

\*KEVZARA (sarilumab) may receive approval for use for FDA-labeled indications following trial and failure; of HADLIMA/HUMIRA or ENBREL AND XELJANZ IR.

Quantity Limit: XELJANZ IR is limited to 2 tablets per day or 60 tablets for a 30-day supply

### **Non-Preferred Agents:**

## **COSENTYX** (**secukinumab**) may receive approval for:

- FDA-labeled indications following trial and failure; of all indicated preferred agents OR
- Treatment of enthesitis-related arthritis if meeting the following:
  - o Member is  $\geq 4$  years of age and weighs  $\geq 15$  kg **AND**
  - Member has had trialed and failed! NSAID therapy AND ENBREL AND HADLIMA/HUMIRA

#### **KINERET** (anakinra) may receive approval for:

- FDA-labeled indications following trial and failure; of HADLIMA/HUMIRA **OR** ENBREL AND XELJANZ IR **OR**
- Treatment of systemic juvenile idiopathic arthritis (sJIA) or Adult-Onset Still's Disease (AOSD)

## **ILARIS** (canakinumab) may receive approval if meeting the following:

- Medication is being prescribed for systemic juvenile idiopathic arthritis (sJIA) or Adult-Onset
  - Still's Disease (AOSD), AND
- Member has trialed and failed: ACTEMRA (tocilizumab)
- Quantity Limits (effective 2/15/2024):

	YUFLYMA (adalimumab-aaty) auto-injector YUSIMRY (adalimumab-aqvh) pen	<ul> <li>Cryopyrin-associated periodic syndrome: 600mg (4mL) every 8 weeks</li> <li>All other indications: 300mg (2mL) every 4 weeks</li> </ul>
	Note: Product formulations in the physician administered drug (PAD) category are located on Appendix P	XELJANZ (tofacitinib) XR approval will require verification of the clinically relevant reason for use of the XELJANZ XR formulation versus the XELJANZ IR formulation, in addition to meeting non-preferred criteria listed below.
		<ul> <li>XELJANZ (tofacitinib) oral solution may be approved when the following criteria are met:</li> <li>Member has a diagnosis of polyarticular course juvenile idiopathic arthritis (pJIA) who require a weight-based dose for &lt;40 kg following trial and failure; of HADLIMA/HUMIRA OR ENBREL OR</li> <li>Member cannot swallow a tofacitinib tablet</li> </ul>
		All other non-preferred agents may receive approval for FDA-labeled indications following trial and failure; of all preferred agents that are FDA-indicated or have strong evidence supporting use for the prescribed indication from clinically recognized guideline compendia (only one preferred adalimumab product trial required).
		Non-preferred agents that are being prescribed per FDA-label to treat non-radiographic axial spondyloarthritis (nr-axSpA) will require trial and failure; of preferred agents that are FDA-labeled for treating an axial spondyloarthritis condition, including ankylosing spondylitis (AS) or nr-axSpA.
		Members currently taking COSENTYX or XELJANZ oral solution may receive approval to continue on that agent.
		‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction. Note that trial and failure of preferred TNF inhibitors will not be required when prescribed to treat polyarticular juvenile idiopathic arthritis (pJIA) in members with documented clinical features of lupus.
		The Department would like to remind providers that many products are associated with patient-centered programs that are available to assist with drug administration, education, and emotional support related to our members' various disease states.

- Member has trialed and failed‡ the following agents:
  - One medium potency to very-high potency topical corticosteroid [such as mometasone furoate, betamethasone dipropionate, or fluocinonide (see PDL for list of preferred products) AND
  - One topical calcineurin inhibitor (such as pimecrolimus or tacrolimus)

Quantity Limit: 2 syringes every 28 days after initial 14 days of therapy (first dose is twice the regular scheduled dose)

Approval: One year

#### **Non-Preferred Agents:**

Non-preferred agents indicated for the treatment of atopic dermatitis may receive approval if meeting the following:

- Member has a diagnosis of moderate to severe chronic atopic dermatitis AND
- Member has trialed and failed; therapy with two preferred agents for the prescribed indication AND
- Member has trialed and failed‡ the following agents:
  - One medium potency to very-high potency topical corticosteroid (such as mometasone furoate, betamethasone dipropionate, or fluocinonide)
  - One topical calcineurin inhibitor (such as pimecrolimus and tacrolimus)

#### **AND**

• The medication is being prescribed by or in consultation with a dermatologist, allergist, immunologist, or rheumatologist.

Approval: One year

‡Failure is defined as a lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.

Members currently taking a preferred agent may receive approval to continue therapy with that agent.

Members with current prior authorization approval on file for a non-preferred agent may receive approval for continuation of therapy with the prescribed agent.

	Other i
Preferred (If diagnosis met, No PA required)	Non-Preferred PA Required
(Must meet eligibility criteria*)	ACTEMRA (tocilizumab) syringe, Actpen
*DUPIXENT (dupilumab) pen, syringe	ARCALYST (rilonacept) injection
ENBREL (etanercept)	CIMZIA (certolizumab pegol) syringe
HUMIRA (adalimumab)	COSENTYX (secukinumab) syringe, pen-injector

OTEZLA (apremilast) tablet	ILARIS (canakinumab) vial
XELJANZ IR (tofacitinib) tablet	KINERET (anakinra) syringe
*XOLAIR (omalizumab) syringe,	NUCALA (mepolizumab) auto-injector, syringe
autoinjector	OLUMIANT (baricitinib) tablet
	YUFLYMA (adalimumab-aaty) auto-injector
	Note: Product formulations in the physician administered drug (PAD) category are located on Appendix P

# Other indications

\*DUPIXENT (dupilumab) may receive approval if meeting the following based on prescribed indication:

#### Chronic Rhinosinusitis with Nasal Polyposis

- Member is  $\geq 18$  years of age **AND**
- Medication is being prescribed as an add-on maintenance treatment in adult patients with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP) AND
- Member has trialed and failed‡ therapy with at least two intranasal corticosteroid regimens

# Eosinophilic Esophagitis (EoE):

- Member is  $\geq 1$  year of age **AND**
- Member weighs at least 15 kg AND
- Member has a diagnosis of eosinophilic esophagitis (EoE) with  $\geq 15$ intraepithelial eosinophils per high-power field (eos/hpf), with or without a history of esophageal dilations AND
- Member is following appropriate dietary therapy interventions **AND**
- Medication is being prescribed by or in consultation with a gastroenterologist, allergist or immunologist AND
- Member has trialed and failed; one of the following treatment options for EoE:
  - Proton pump inhibitor trial of at least eight weeks in duration if reflux is a contributing factor **OR**
  - Minimum four-week trial of local therapy with fluticasone (using a metered dose inhaler) sprayed into the mouth and then swallowed or budesonide slurry.

#### Prurigo Nodularis:

- Member is  $\geq 18$  years of age AND
- Medication is being prescribed as treatment for prurigo nodularis AND
- Member has trialed and failed! therapy with at least two corticosteroid regimens (topical or intralesional injection).

\*KEVZARA (sarilumab) may receive approval if meeting the following based on prescribed indication:

#### Polymyalgia Rheumatica:

Member has had an inadequate response to corticosteroids or who cannot tolerate corticosteroid taper.

\*XOLAIR (omalizumab) may receive approval if meeting the following based on prescribed indication: Chronic Rhinosinusitis with Nasal Polyps: • Member is 18 years of age or older **AND** corticosteroid regimens Chronic Idiopathic Urticaria (CIU): Member is 12 years of age or older AND Member is diagnosed with chronic idiopathic urticaria AND High-dose second generation H1 antihistamine H2 antihistamine First-generation antihistamine Leukotriene receptor antagonist Hydroxyzine or doxepin (must include) AND currently not been evaluated). IgE-Mediated Food Allergy:

- Medication is being prescribed as add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult patients 18 years of age and older with inadequate response to nasal corticosteroids AND
- Member has tried and failed‡ therapy with at least two intranasal
- Member is symptomatic despite H1 antihistamine treatment AND
- Member has tried and failed: at least three of the following:

Prescriber attests that the need for continued therapy will be periodically reassessed (as the appropriate duration of Xolair therapy for CIU has

Medication is being prescribed for reduction of allergic reactions (Type I), including anaphylaxis, that may occur with accidental exposure to one or more foods in adult and pediatric patients aged 1 year and older with IgEmediated food allergy.

All other preferred agents (HADLIMA, HUMIRA, ENBREL, OTEZLA, KEVZARA) may receive approval for use for FDA-labeled indications.

## **Non-Preferred Agents:**

**ARCALYST** (**rilonacept**) may receive approval if meeting the following:

Medication is being prescribed for one of the following autoinflammatory periodic fever syndromes (approval for all other indications is subject to meeting non-preferred criteria listed below):

- Cryopyrin-associated Autoinflammatory Syndrome (CAPS), including:

   Familial Cold Autoinflammatory Syndrome (FCAS)
   Muckle-Wells Syndrome (MWS)

   Maintenance of remission of Deficiency of Interleukin-1 Receptor

   Antagonist (DIRA) in adults and pediatric patients weighing at least 10 kg
   Treatment of recurrent pericarditis and reduction in risk of recurrence in adults and children ≥ 12 years of age

   AND

   Member has trialed and failed‡ colchicine AND
   Initial approval will be given for 12 weeks and authorization approval for continuation will be provided based on clinical response.

   ILARIS (canakinumab) may receive approval if meeting the following:
  - Medication is being prescribed for one of the following (approval for all other indications is subject to meeting non-preferred criteria listed below):
    - o Familial Mediterranean Fever (FMF)
    - Hyperimmunoglobulinemia D syndrome (HIDS)
    - Mevalonate Kinase Deficiency (MKD)
    - Neonatal onset multisystem inflammatory disease (NOMID)
    - TNF Receptor Associated Periodic Syndrome (TRAPS)
    - Cryopyrin-associated Autoinflammatory Syndrome (including Familial Cold Autoinflammatory Syndrome and Muckle-Wells Syndrome)
    - Symptomatic treatment of adult patients with gout flares in whom NSAIDs and colchicine are contraindicated, are not tolerated, or do not provide an adequate response, and in whom repeated courses of corticosteroids are not appropriate (limited to four 150mg doses per one year approval)

#### AND

- Member has trialed and failed‡ colchicine.
- Quantity Limits (effective 2/15/2024):
  - o Cryopyrin-associated periodic syndrome: 600mg (4mL) every 8 weeks
  - o All other indications: 300mg (2mL) every 4 weeks

# KINERET (anakinra) may receive approval if meeting the following:

- Medication is being prescribed for one of the following indications (approval for all other indications is subject to meeting non-preferred criteria below):
  - Neonatal onset multisystem inflammatory disease (NOMID).
  - Familial Mediterranean Fever (FMF)

#### AND

Member has trialed and failed‡ colchicine.

NUCALA (mepolizumab) may receive approval if meeting the following based on prescribed indication (for any FDA-labeled indications in this subclass category that are not listed, approval is subject to meeting non-preferred criteria listed below): Chronic Rhinosinusitis with Nasal Polyps: Member is 18 years of age or older **AND** Medication is being prescribed as an add-on maintenance treatment in adult patients with inadequately controlled chronic rhinosinusitis with nasal polyposis (CRSwNP) AND Member has a baseline bilateral endoscopic nasal polyps score (NPS; scale 0-8) AND nasal congestion/obstruction score (NC; scale 0-3) averaged over 28-day period AND Member has trialed and failed‡ therapy with three intranasal corticosteroids (see PDL Class) AND Medication is being prescribed by or in consultation with a rheumatologist, allergist, ear/nose/throat specialist or pulmonologist AND Initial authorization will be for 24 weeks, for additional 12-month approval member must meet the following criteria: o NC and NPS scores are provided and show a 20% reduction in symptoms from baseline AND o Member continues to use primary therapies such as intranasal corticosteroids. Eosinophilic Granulomatosis with polyangiitis (EGPA): Member is 18 years of age or older AND Member has been diagnosed with relapsing or refractory EGPA at least 6 months prior to request as demonstrated by ALL the following: Member has a diagnosis of asthma **AND** Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL or a blood eosinophil level of 10% AND Member has the presence of two of the following EGPA characteristics: Histopathological evidence of eosinophilic vasculitis, perivascular eosinophilic infiltration, or eosinophil-rich granulomatous inflammation Neuropathy Pulmonary infiltrates Sinonasal abnormality Cardiomyopathy Glomerulonephritis Alveolar hemorrhage Palpable purpura Antineutrophil cytoplasmic antibody (ANCA) positive

# AND • Member is on a stable dose of corticosteroids for at least 4 weeks prior to request AND • Dose of 300 mg once every 4 week is being prescribed. Hypereosinophilic Syndrome (HES): • Member is 12 years of age or older AND • Member has a diagnosis for HES for at least 6 months that is nonhematologic secondary HES AND • Member has a blood eosinophil count of greater than or equal to 1000 cells/mcL AND • Member has a history of two or more HES flares (defined as worsening clinical)

### Member has been on stable dose of HES therapy for at least 4 weeks, at time of request, including at least one of the following:

symptoms or blood eosinophil counts requiring an increase in therapy) AND

- Oral corticosteroids
- Immunosuppressive therapy
- Cytotoxic therapy

#### AND

• Dose of 300 mg once every 4 weeks is being prescribed.

All other non-preferred agent indications may receive approval for FDA-labeled use following trial and failure; of all preferred agents that are FDA-indicated or have strong evidence supporting use for the prescribed indication from clinically recognized guideline compendia (only one preferred adalimumab product trial required).

‡Failure is defined as lack of efficacy, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction.

Members currently taking a preferred agent may receive approval to continue therapy with that agent.

Members with current prior authorization approval on file for preferred or non-preferred agents will be subject to meeting reauthorization criteria above when listed for the prescribed indication **OR** if reauthorization criteria are not listed for the prescribed indication, may receive approval for continuation of therapy.

<u>Note</u>: Prior authorization requests for OLUMIANT (baricitinib) prescribed solely for treating alopecia areata will not be approved.

The Department would like to remind providers that many products are associated with patient-centered programs that are available to assist with drug administration, education, and emotional support related to our members' various disease states.

## Therapeutic Drug Class: **EPINEPHRINE PRODUCTS** - Effective 1/1/2024 No PA Required PA Required

Brand/generic changes effective 02/22/2024\*

\*Epinephrine 0.15mg/0.15ml, 0.3mg/0.3ml auto-injector (Mylan only)

EPIPEN 0.3 mg/0.3 ml (epinephrine) auto-injector

EPIPEN JR0.15 mg/0.15 ml, (epinephrine) auto-injector

AUVI-Q (epinephrine) auto-injector

Epinephrine 0.15mg/0.15ml, 0.3mg/0.3ml autoinjector (All other manufacturers; generic Adrenaclick, Epipen)

SYMJEPI 0.15mg/0.3ml, 0.3mg/0.3ml (epinephrine) syringe

Non-preferred products may be approved if the member has failed treatment with one of the preferred products. Failure is defined as allergy to ingredients in product or intolerable side effects.

Quantity limit: 4 auto injectors per year unless used / damaged / lost

#### Therapeutic Drug Class: NEWER HEREDITARY ANGIOEDEMA PRODUCTS -Effective 1/1/2024

#### PA Required for all agents in this class **Preferred** Non-Preferred Prophylaxis: Prophylaxis: HAEGARDA (C1 esterase CINRYZE (C1 esterase inhibitor) kit inhibitor) vial ORLADEYO (berotralstat) oral capsule *Treatment:* TAKHZYRO (lanadelumab-flyo) syringe, vial BERINERT (C1 esterase inhibitor) kit, vial *Treatment:* FIRAZYR (icatibant acetate) Icatibant syringe (generic FIRAZYR) syringe RUCONEST (C1 estera se inhibitor, recomb) vial

#### Medications Indicated for Routine Prophylaxis:

Members are restricted to coverage of one medication for <u>routine prophylaxis</u> at one time. Prior authorization approval will be for one year.

**HAEGARDA** (C1 esterase inhibitor - human) may be approved for members meeting the following criteria:

- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- o Member meets at least one of the following:
  - Haegarda is being used for short-term prophylaxis to undergo a surgical procedure or major dental work **OR**
  - Haegarda is being used for long-term prophylaxis and member meets one of the following:
    - o History of ≥1 attack per month resulting in documented ED admission or hospitalization **OR**
    - o History of laryngeal attacks **OR**
    - History of ≥2 attacks per month involving the face, throat, or abdomen AND

Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND Member has received hepatitis A and hepatitis B vaccination AND Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV Maximum Dose: 60 IU/kg Minimum Age: 6 years **CINRYZE** (C1 esterase inhibitor - human) may be approved for members meeting the following criteria: Member has history of trial and failure of Haegarda. Failure is defined as lack of efficacy allergy, intolerable side effects, or a significant drug-drug interaction AND Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) **AND** Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND Member meets at least one of the following: Cinryze is being used for short-term prophylaxis to undergo a surgical procedure or major dental work **OR** • Cinryze is being used for <u>long-term prophylaxis</u> and member meets one of the following: o History of  $\geq 1$  attack per month resulting in documented ED admission or hospitalization **OR** History of laryngeal attacks **OR** History of  $\geq 2$  attacks per month involving the face, throat, or abdomen AND Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND Member has received hepatitis A and hepatitis B vaccination AND Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV. Minimum age: 6 years

**ORLADEYO** (berotralstat) may be approved for members meeting the following criteria:

Maximum dose: 100 Units/kg

- Member has history of trial and failure of HAEGARDA. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) AND
- o Member has a documented history of at least one symptom of a moderate to

AND ORLADEYO is prescribed by or in consultation with an allergist or immunologist AND cyclosporine, fentanyl, pimozide, digoxin) AND Member meets at least one of the following: surgical procedure or major dental work meets one of the following: admission or hospitalization OR History of laryngeal attacks **OR** abdomen AND Minimum age:12 years Maximum dose: 150 mg once daily criteria: interaction AND

severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema

- Appropriate drug interaction interventions will be made for members using concomitant medications that may require dose adjustments (such as
  - ORLADEYO is being used for short-term prophylaxis to undergo a
  - ORLADEYO is being used for long-term prophylaxis and member
    - History of  $\geq 1$  attack per month resulting in documented ED
    - History of  $\geq 2$  attacks per month involving the face, throat, or
    - Member is not taking medications that may exacerbate HAE, including ACE inhibitors and estrogen-containing medications

**TAKHZYRO** (lanadelumab-flyo) may be approved for members meeting the following

- o Member has history of trial and failure of Haegarda. Failure is defined as: lack of efficacy, allergy, intolerable side effects, or a significant drug-drug
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level) **AND**
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND
- Member has received hepatitis A and hepatitis B vaccination.

Minimum age: 2 years

Maximum dose: The recommended starting dose is 300mg every 2 weeks. A dosing interval of 300 mg every 4 weeks is also effective and may be considered if the patient is well-controlled (attack free) for more than 6 months

#### **Medications Indicated for Treatment of Acute Attacks:**

Members are restricted to coverage of one medication for <u>treatment of acute attacks</u> at one time. Prior authorization approval will be for one year.

**FIRAZYR** (icatibant acetate) may be approved for members meeting the following criteria:

- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level)
   AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications

Minimum age: 18 years Maximum dose: 30mg

**BERINERT** (C1 esterase inhibitor - human) may be approved for members meeting the following criteria:

Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level)

#### **AND**

- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications **AND**
- Member has received hepatitis A and hepatitis B vaccination AND
- Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV

Minimum age: 6 years Max dose: 20 IU/kg

**RUCONEST** (C1 esterase inhibitor - recombinant) may be approved for members meeting the following criteria:

- Member has a history of trial and failure of Firazyr OR Berinert. Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, C1-INH level)
   AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling,

		airway swelling) in the absence of hives or a medication known to cause angioedema AND  Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND  Member has received hepatitis A and hepatitis B vaccination AND  Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV.  Minimum age: 13 years  Maximum dose: 4,200 Units/dose  All other non-preferred agents may be approved if the member has trialed and failed at least two preferred agents with the same indicated role in therapy as the prescribed medication (prophylaxis or treatment). Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction.
	Therapeutic Drug Class: <b>PHOSPH</b>	IATE BINDERS -Effective 10/1/2023
No PA Required	PA Required	Prior authorization for non-preferred products in this class may be approved if member
Calcium acetate capsule	AURYXIA (ferric citrate) tablet	meets all the following criteria:  • Member has diagnosis of end stage renal disease AND
PHOSLYRA (calcium acetate) solution	Calcium acetate tablet	<ul> <li>Member has elevated serum phosphorus [&gt; 4.5 mg/dL or &gt; 1.46 mmol/L] AND</li> <li>Provider attests to member avoidance of high phosphate containing foods from diet AND</li> </ul>

# XII. Renal/Genitourinary Therapeutic Drug Class: BENIGN PROSTATIC HYPERPLASIA (BPH) AGENTS -Effective 10/1/2023

		<b>V</b>
No PA Required	PA Required	
		Prior authorization for non-preferred products in this class may be approved if member meets all of
Alfuzosin ER tablet	AVODART (dutasteride) softgel	the following criteria:
		<ul> <li>Member has tried and failed‡ three preferred agents AND</li> </ul>
Doxazosin tablet	CARDURA (doxazosin) tablet	• For combinations agents, member has tried and failed‡ each of the individual agents
Dutasteride capsule	CARDURA XL (doxazosin ER) tablet	within the combination agent and one other preferred agent.

\*CIALIS (tadalafil) 2.5 mg, 5 mg tablet

Finasteride tablet

Tamsulosin capsule	Dutasteride/tamsulosin capsule
Terazosin capsule	ENTADFI (finasteride/tadalafil) capsule
	FLOMAX (tamsulosin) capsule
	JALYN (dutasteride/tamsulosin) capsule
	PROSCAR (finasteride) tablet
	RAPAFLO (silodosin) capsule
	Silodosin capsule
	*Tadalafil 2.5 mg, 5 mg tablet

No PA Required

‡Failure is defined as lack of efficacy with 8-week trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction.

\*CIALIS (tadalafil) may be approved for members with a documented diagnosis of BPH who have failed a trial of finasteride (at least 3 months in duration) AND either a trial of a nonselective alpha blocker (therapeutic dose for at least two months) OR a trial of tamsulosin (therapeutic dose for at least one month).

Documentation of BPH diagnosis will require BOTH of the following:

- AUA Prostate Symptom Score ≥ 8 AND
- Results of a digital rectal exam.

Cialis (tadalafil) will not be approved for any patient continuing alpha-blocker therapy as this combination is contraindicated in this population.

Doses exceeding 5mg per day of Cialis (tadalafil) will not be approved.

#### Therapeutic Drug Class: ANTI-HYPERURICEMICS -Effective 10/1/2023

$\mathcal{L}_{\mathcal{L}}}}}}}}}}$		
No PA Required	PA Required	Non-preferred xanthine oxidase inhibitor products (allopurinol or febuxostat formulations) may be
_	_	approved following trial and failure of preferred allopurinol. Failure is defined as lack of efficacy,
Allopurinol 100 mg, 300 mg	Allopurinol 200 mg tablets	allergy, intolerable side effects, or significant drug-drug interaction. If member has tested positive
tablets		for the HLA-B*58:01 allele, it is not recommended that they trial allopurinol. A positive result on
	Colchicine capsule	this genetic test will count as a failure of allopurinol.
Colchicine tablet	•	
	COLCRYS (colchicine) tablet	Prior authorization for all other non-preferred agents (non-xanthine oxidase inhibitors) may be
Febuxostat tablet		approved after trial and failure of two preferred products. Failure is defined as lack of efficacy,
	GLOPERBA (colchicine) oral solution	allergy, intolerable side effects, or significant drug-drug interaction.
Probenecid tablet		
	MITIGARE (colchicine) capsule	GLOPERBA (colchicine) oral solution may be approved for members who require individual
Probenecid/Colchicine tablet		doses < 0.6 mg OR for members who have documented swallowing difficulty due to young age
	ULORIC (febuxostat) tablet	and/or a medical condition (preventing use of solid oral dosage form).
	ZYLOPRIM (allopurinol) tablet	Colchicine tablet quantity limits:
		Chronic hyperuricemia/gout prophylaxis: 60 tablets per 30 days
		<ul> <li>Familial Mediterranean Fever: 120 tablets per 30 days</li> </ul>
