Possible Points	MEASURE NAME	MEASURE DESCRIPTION	DOCUMENTATION REQUIREMENTS	SIM	CPC+	NCQA PCMH
<b>CARE MANAGEMENT</b>						
10	<b>Standing Orders</b>	The practice uses written standing orders for services.	o At least one example of a written, signed standing order used by the practice	X		X
20	<b>Screening and Follow-Up</b>	The practice uses standardized/validated screening tools (for example: SBIRT, PHQ-9, Ages and Stages Questionnaire), and develops a follow-up process for at least three conditions, including one behavioral health condition.	o Blank screening tool for each identified condition (at least three); AND o Documented process for managing follow-up care	X	X	X
30	<b>Gaps in Care</b>	The practice identifies a strategy to identify gaps in care, and implements proactive care management to avoid potential overlaps or gaps in services and care for preventive services, immunizations, chronic or acute services, or patients not recently seen by the practice. The practice uses data regularly to proactively identify populations of patients and remind them or their families, of needed care based on patient information, clinical data, health assessments, and evidence-based guidelines.	o Strategy and documented process to identify gaps in care; AND o Documented process for proactively reaching out to identified patients/families	X		X
40	<b>ED &amp; Hospital Follow-Up</b>	The practice proactively contacts patients/families for appropriate follow-up care within an appropriate period following a hospital admission or emergency department (ED) visit. The practice contacts patients to evaluate their status after an ED or hospital visit and schedules follow-up appointments to reduce unnecessary ED utilization and ensure effective transitions of care.	o Documented process for emergency department and hospital follow-up, including timeframe for follow-up; AND o Documented process for identifying which ED/hospital visits the practice has determined require follow-up	X	X	X
50	<b>Risk Stratification</b>	The practice demonstrates that it can identify patients who are at high risk, or likely to be at high risk, and prioritize their care management to prevent poor outcomes. Practice identifies and directs resources appropriately based on need.	o Documented risk stratification methodology; AND o Documented process used to identify and provide care management for patients, based on risk stratification	X	X	X

Our mission is to improve health care access and outcomes for the people we serve while demonstrating sound stewardship of financial resources.

Possible Points	MEASURE NAME	MEASURE DESCRIPTION	DOCUMENTATION REQUIREMENTS	SIM	CPC+	NCQA PCMH
<b>CARE COORDINATION</b>						
10	<b>Clinical Question &amp; Data Sharing</b>	The practice gives consultants or specialists the succinct reason for referral, which may be stated as the "clinical question" (i.e. the general purpose of the referral). The practice includes follow-up communication or information in the referral.	<ul style="list-style-type: none"> <li>o A documented process that includes communication requirements when referrals are requested, specifically:               <ul style="list-style-type: none"> <li>o The type of referral (consultation or single patient visit);</li> <li>o Request for shared-or co-management of the patient for a specific condition for an indefinite or limited time;</li> <li>o Temporary or long-term principal care, such as a transfer; AND</li> </ul> </li> <li>o At least one de-identified example of a completed referral request</li> </ul>			X
20	<b>Care Compacts</b>	The practice maintains formal and informal agreements with a subset of specialists based on established criteria (including at least one Behavioral Health provider). Agreements typically indicate the type of information that will be provided when referring a patient to a specialist, and expectations regarding timeliness and content of response from the specialist. Include key contact for each provider's office.	<ul style="list-style-type: none"> <li>o At least one example of a care compact with a specialist; AND</li> <li>o At least one example of a care compact with a Behavioral Health provider</li> </ul>	X	X	X
30	<b>Referral Tracking</b>	Practice tracks referrals until the consultant's or specialist's report is available. This includes flagging and following up on overdue reports.	<ul style="list-style-type: none"> <li>o Documented process for tracking referrals; AND</li> <li>o Referral tracking log</li> </ul>		X	X

Possible Points	MEASURE NAME	MEASURE DESCRIPTION	DOCUMENTATION REQUIREMENTS	SIM	CPC+	NCQA PCMH
40	<b>Lab &amp; Imaging Tracking</b>	<ul style="list-style-type: none"> <li>o The practice tracks lab and imaging tests from the time they are ordered until results are available, and flags test results that have not been made available.</li> <li>o The practice flags abnormal results of lab or imaging tests brings these to the attention of the clinician, to ensure timely follow-up with the patient/family/caregiver.</li> <li>o The practice provides timely notification to patients about test results (normal and abnormal). Please note that filing the report in the medical record for discussion during a scheduled office visit does not meet this requirement.</li> </ul>	<ul style="list-style-type: none"> <li>o Documented process for tracking lab/imaging results; AND</li> <li>o Evidence of implementation</li> </ul>			X
60	<b>BH Integration</b>	The practice integrates with behavioral health. This could be through Care Management Agreements, partial integration (co-location with some systems shared), or full integration (co-location with all systems shared).	<ul style="list-style-type: none"> <li>o Documentation of Behavioral Health Integration through co-location; OR</li> <li>o Documentation of Care Management Approach (CPC+ Definition, see <a href="https://innovation.cms.gov/Files/x/cpcplus-bhinteg-options.pdf">https://innovation.cms.gov/Files/x/cpcplus-bhinteg-options.pdf</a>)</li> </ul>	X	X	X
