**Physician-Administered Drug Prior Authorization Procedures, Coverage Policies and Drug Utilization Criteria
For the Health First Colorado Medical Benefit**

Physician-Administered Drugs (PADs) requiring a prior authorization (PA) for the Health First Colorado medical benefit are listed in this document. Prior authorization criteria is based on FDA product labeling, CMS approved compendia, clinical practice guidelines, and peer-reviewed medical literature.

Physician-Administered Drugs and Medical Billing

PADs include any medication or medication formulation that requires administration by a healthcare professional, including cases where FDA package labeling for a medication specifies that administration should be performed by or under the direct supervision of a healthcare professional. PADs administered in a provider's office or clinic should be billed through the Health First Colorado medical benefit using the standard buy-and-bill process following procedures in the PAD Billing Manual (found on the PAD Resources Page at <https://www.colorado.gov/hcpf/physician-administered-drugs>).

PAD criteria listed on Appendix Y applies specifically to medications billed through the Health First Colorado medical benefit.

- Only PADs administered by a healthcare professional in the member's home or in a long-term care facility should be billed through the Health First Colorado pharmacy benefit (see "Medical VS. Pharmacy Benefit Medication Coverage" section below).

Prior Authorization Procedures

- Prior authorization requests (PAR) may be submitted via the Acentra PAR portal at <https://portal.kepro.com/>. For PA assistance or questions, you may contact Acentra via the following methods:
 - Phone: (720) 689 - 6340
 - Fax: (833) 923 - 2359
 - Email: COproviderissue@kepro.com
- PA forms can be signed by anyone who has authority under Colorado law to prescribe the medication. Assistants of authorized persons cannot sign the PA form.
- Physicians or assistants who are acting as the agents of the physicians may request a PA by phone.
- Please note that initiating therapy with a requested drug product, including non-preferred drugs, prior to a PA request being reviewed and approved does not necessitate approval of the PA request. This includes initiating therapy by administration in the inpatient setting, by using office samples or by any other means.
- All PA requests are coded online into the PA system.

Trial and Failure

- Generally, failure is defined as lack of efficacy, allergy, intolerable side effects, contraindication to therapy or significant drug-drug interaction. For medications that use a varying definition of failure, the definition will be noted in the medication's specific criteria, below.

Medical VS. Pharmacy Benefit Medication Coverage

- For more information about pharmacy benefits versus medical benefits please see the Pharmaceutical Benefit Help Guide (found on the PAD resources page at <https://hcpf.colorado.gov/physician-administered-drugs>).
- Medications administered by a healthcare professional or self-administered in the member’s home or long-term care facility should be billed through the Health First Colorado pharmacy benefit following the standards and procedures outlined in the Pharmacy Billing Manual (found on the Pharmacy Resources Page at <https://hcpf.colorado.gov/pharmacy-resources>).
- PADs are medications administered in a doctor’s office, clinic, outpatient hospital or dialysis unit are only to be billed by those facilities through the Health First Colorado medical benefit using the standard buy-and-bill process and following procedures outlined in the PAD Billing Manual (located at <https://www.colorado.gov/hcpf/physician-administered-drugs>). PAD criteria listed on Appendix Y applies specifically to drug products when billed through the Health First Colorado medical benefit, when administered in the clinic or office setting.

HCPCS	Drug	Criteria	PAR Length
J0172	Aduhelm (aducanumab-avwa)	<p>Aduhelm (aducanumab-avwa) may be approved if the member meets ALL the following criteria:</p> <ul style="list-style-type: none"> a. Member has documented diagnosis of mild cognitive impairment or mild dementia stage of Alzheimer’s disease, the population in which treatment was initiated in clinical trials, as evidenced by ALL the following: <ul style="list-style-type: none"> i. Positron Emission Tomography (PET) scan OR lumbar puncture positive for amyloid beta plaque ii. Clinical Dementia Rating global score (CDR-GS) of 0.5 or 1 (available at https://otm.wustl.edu/cdr-terms-agreement/) iii. Mini-Mental State Examination (MMSE) score of 24-30 OR Montreal Cognitive Assessment (moCA) Test score of 19-25 AND b. Member is ≥ 50 years of age AND c. The prescriber attests that member has been counseled on the approval and safety status of Aduhelm (aducanumab-avwa) being approved under accelerated approval based on reduction in amyloid beta plaques AND d. Prior to initiation of medication, the prescriber attests that the member meets ALL the following: <ul style="list-style-type: none"> i. Member has had a brain MRI within the prior one year to treatment initiation, showing no signs or history of localized superficial siderosis, ≥ 10 brain microhemorrhages, and/or brain hemorrhage > 1 cm ii. Attestation that MRI will be completed prior to the 7th (1st dose at 10 mg/kg) and 12th (6th dose at 10 mg/kg) infusion 	See criteria

HCPCS	Drug	Criteria	PAR Length
		<p style="text-align: center;">AND</p> <p>e. Member does not have any of the following:</p> <ul style="list-style-type: none"> i. Any medical or neurological condition other than Alzheimer's Disease that might be a contributing cause of the subject's cognitive impairment including (but not limited to) stroke/vascular dementia, tumor, dementia with Lewy bodies [DLB], frontotemporal dementia [FTD] or normal pressure hydrocephalus ii. Contraindications to PET, CT scan, or MRI iii. History of or increased risk of amyloid related imaging abnormalities ARIA-edema (ARIA-E) or ARIA-hemosiderin deposition (ARIA-H) iv. History of unstable angina, myocardial infarction, chronic heart failure, or clinically significant conduction abnormalities, stroke, transient ischemic attack (TIA), or unexplained loss of consciousness within 1 year prior to initiation of medication v. History of bleeding abnormalities or taking any form of anticoagulation therapy <p style="text-align: center;">AND</p> <p>f. Medication is prescribed by or in consultation with a neurologist</p> <p style="text-align: center;">AND</p> <p>g. The prescribed regimen meets FDA-approved labeled dosing:</p> <ul style="list-style-type: none"> i. <u>Infusion 1 and 2</u>: 1 mg/kg over approximately 1 hour every 4 weeks ii. <u>Infusion 3 and 4</u>: 3 mg/kg over approximately 1 hour every 4 weeks iii. <u>Infusion 5 and 6</u>: 6 mg/kg over approximately 1 hour every 4 weeks iv. <u>Infusion 7 and beyond</u>: 10 mg/kg over approximately 1 hour every 4 weeks <p><u>Initial approval period</u>: 6 months</p> <p><u>Second prior authorization</u>: an additional 6 months of therapy may be approved with provider attestation that a follow-up MRI will be (or has been) completed prior to the 7th infusion</p> <p><u>Subsequent approval</u>: an additional 6 months of therapy may be approved with provider attestation that a follow-up MRI will be (or has been) completed prior to the 12th infusion</p>	

HCPCS	Drug	Criteria	PAR Length
		<p><u>Maximum dose:</u> 10 mg/kg IV every 4 weeks</p> <p>The above coverage standards will continue to be reviewed and evaluated for any applicable changes due to the evolving nature of factors including disease course, available treatment options and available peer-reviewed medical literature and clinical evidence. If request is for use outside of stated coverage standards, support with peer reviewed medical literature and/or subsequent clinical rationale shall be provided and will be evaluated at the time of request.</p> <p>Continued approval for this indication may be contingent upon verification of clinical benefit in confirmatory trial(s).</p>	
J7171	Adzynma (apadamtase alfa)	<p>Adzynma (apadamtase alfa) may be approved if the following criteria are met:</p> <ul style="list-style-type: none"> a. Member is ≥ 2 years of age AND b. Member has a diagnosis of congenital thrombotic thrombocytopenic purpura (cTTP) confirmed by genetic testing indicating severe deficiency of ADAMTS13 protease and/or based on clinical judgment, AND c. The requested medication is being prescribed by or in consultation with a hematologist. <p><u>Maximum dose:</u> Prophylactic therapy: 40 IU/kg weekly On-demand therapy: 40 IU/kg/day</p>	One year
J0179	Beovu (brolucizumab)	<p>Beovu (brolucizumab) may be approved if all the following criteria are met:</p> <ul style="list-style-type: none"> a. Member is 18 years of age or older AND b. Member has a diagnosis of one of the following: <ul style="list-style-type: none"> i. Neovascular (wet) age-related macular degeneration (nAMD) ii. Diabetic macular edema (DME) <p>AND</p> <ul style="list-style-type: none"> c. Member does not have any of the following: <ul style="list-style-type: none"> i. Ocular or periocular infection ii. Active intraocular inflammation iii. Hypersensitivity to the requested medication <p>AND</p> <ul style="list-style-type: none"> d. Member’s best corrected visual acuity (BCVA) is measured at baseline and throughout treatment AND 	<p><u>Initial:</u> 6 months</p> <p><u>Reauthorization:</u> One year</p>

HCPCS	Drug	Criteria	PAR Length
		<ul style="list-style-type: none"> e. Requested medication will not be used with other ophthalmic vascular endothelial growth factor (VEGF) inhibitors AND f. Documentation of trial and failure* with bevacizumab containing product AND g. Documentation of the dosing regimen that is being requested <p><u>Reauthorization</u> may be approved if the following criteria are met:</p> <ul style="list-style-type: none"> a. Documentation of improvement or stabilization of disease state and visual status AND b. Documentation of ongoing treatment regimen AND c. Prescriber attests that the member has had no significant adverse effects or drug toxicity, such as endophthalmitis and retinal detachments, increase in intraocular pressure, arterial thromboembolic events (ATE), retinal vasculitis and/or retinal vascular occlusion AND d. Prescriber attests requested medication will not be used with other ophthalmic VEGF inhibitors <p><u>Maximum dose:</u> AMD: 6 mg every 4 weeks x 3 doses, then 6 mg every 8-12 weeks DME: 6 mg every 6 weeks x 5 doses, then 6 mg every 8-12 weeks</p> <p>*Failure is defined as lack of efficacy with a three-month trial, contraindication to therapy, allergy, intolerable side effects, or significant drug-drug interaction</p>	
<p>J0897</p>	<p><u>BONE RESORPTION INHIBITORS</u> Prolia, Xgeva (denosumab)</p>	<p>Prolia (denosumab) may be approved for members meeting all the following criteria:</p> <ul style="list-style-type: none"> a. Member has one of the following diagnoses: <ul style="list-style-type: none"> i. Postmenopausal osteoporosis with high fracture risk ii. Osteoporosis iii. Bone loss in men receiving androgen deprivation therapy in prostate cancer iv. Bone loss in women receiving adjuvant aromatase inhibitor therapy for breast cancer <p>OR</p> <ul style="list-style-type: none"> b. Member is considered very high risk for fracture defined as any one of the following: a fracture within the past 12 months, experience of fractures while receiving approved osteoporosis therapy (i.e.), a history of multiple fractures, experience of a fracture while receiving medications that cause skeletal harm (e.g. 	<p>One year</p>

HCPCS	Drug	Criteria	PAR Length
		<p>long-term glucocorticoids), very low T-score (e.g. < -3.0), high risk for falls or a history of injurious falls, or very high fracture probability by FRAX®</p> <p>AND</p> <ul style="list-style-type: none"> c. Member has serum calcium greater than 8.5mg/dL AND d. Member is taking calcium 1000 mg daily and at least 400 IU vitamin D daily AND e. For members not considered very high risk of fracture, member has trial and failure of bisphosphonate for one year (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) <p>AND</p> <ul style="list-style-type: none"> f. Member meets ANY of the following criteria: <ul style="list-style-type: none"> i. has a history of an osteoporotic vertebral or hip fracture ii. has a pre-treatment T-score of < -2.5 iii. has a pre-treatment T-score of < -1 but > -2.5 AND either of the following: <ul style="list-style-type: none"> 1. Pre-treatment FRAX score of > 20% for any major fracture 2. Pre-treatment FRAX score of > 3% for hip fracture iv. Maximum dose of medication is 60mg every 6 months g. Member who is at very high risk of fracture and is currently stable on medication may continue to receive prior authorization approval to continue. <p>Xgeva (denosumab) may be approved if member meets ONE of the following indications:</p> <ul style="list-style-type: none"> a. Prevention of skeletal-related events in members with multiple myeloma or in members with bone metastasis from solid tumors b. Giant cell tumor of bone that is unresectable or where surgical resection is likely to result in severe morbidity c. Hypercalcemia of Malignancy, refractory to bisphosphonate therapy d. If member is currently receiving and stabilized on medication, they may continue to receive prior authorization approval to continue. 	
<p>J0585, J0586, J0587, J0588</p>	<p><u>BOTULINUM TOXIN AGENTS</u> Botox (onabotulinumtoxinA) Dysport (abobotulinumtoxinA) Myobloc (rimabotulinumtoxinB) Xeomin (incobotulinumtoxinA)</p>	<p>Botulinum toxin agents may be approved if the member meets the following criteria:</p> <p>Botox (onabotulinumtoxinA) may be approved if the member meets ALL the following criteria:</p> <ul style="list-style-type: none"> a. If administered for <u>Chronic Migraine, prophylaxis</u> <ul style="list-style-type: none"> i. Member is 18 years of age or older AND 	<p>One year</p>

HCPCS	Drug	Criteria	PAR Length
		<ul style="list-style-type: none"> ii. Member has a diagnosis of chronic migraine, which is defined as headaches occurring 15 days or more monthly, where at least 8 of these days per month for at least 3 months are migraine days with or without aura AND iii. Member has trial and failure of topiramate AND iv. Dosing interval no sooner than every 12 weeks v. Reauthorization requests may be approved if member has shown a clinical reduction in number of migraine days per month OR <p>b. If administered for one of the following indications, member must meet the following age requirements and dosing must be no sooner than every 12 weeks</p> <ul style="list-style-type: none"> i. <u>Overactive Bladder</u> <ul style="list-style-type: none"> 1. Member is 18 years of age or older ii. <u>Spasticity</u> <ul style="list-style-type: none"> 1. Member is 2 years of age or older iii. <u>Cervical Dystonia</u> <ul style="list-style-type: none"> 1.
