1. Instructions for Using the Network Adequacy Quarterly Report Template

This document contains the March 2023 release of a standardized template for use by all Colorado Medicaid or CHP+ Managed Care Entities (MCEs) for quarterly Network Adequacy (NA) reporting to the Colorado Department of Health Care Policy and Financing (HCPF). Each MCE should generate one quarterly NA report for each applicable line of business (i.e., CHP+ MCO, Medicaid MCO, or RAE); the report shall contain template elements applicable to the line of business. Network categories required for quarterly reporting are defined in the CO Network Adequacy Crosswalk Definitions (December 2022 version).

The practitioners, practice sites, and entities included in the quarterly NA report will include ordering, referring, and servicing contractors that provide care through a Colorado Medicaid or CHP+ MCE. To ensure consistent data collection across MCEs, each MCE must use this HCPF-approved report template (MS Word and MS Excel templates) to present the MCE’s quarterly NA report and data for the corresponding practitioners, practice sites, and entities. Report due dates will align with those outlined in the MCE’s contract, unless otherwise stated.

Fiscal Year Quarter Reported	Quarterly Reporting Deadline for HCPF	Reporting Date for Member and Network Files
FY 2022-23 Q1	October 2022	September 30, 2022
FY 2022-23 Q2	January 2023	December 31, 2022
FY 2022-23 Q3	April 2023	March 31, 2023
FY 2022-23 Q4	July 2023	June 30, 2023

Definitions

- “MS Word template” refers to the *CO Network Adequacy_Quarterly Report Word Template_F1_0323* document.
- “MS Word MCE Data Requirements” refers to the *CO Network Adequacy_MCE_DataRequirements_F1_1222* document that contains instructions for each MCE’s quarterly submission of member and network data.
- “MS Excel Geoaccess Compliance template” refers to the *CO<20##-##>_NAV_FY<#####>Q<#>QuarterlyReport_GeoaccessCompliance_<MCE Type>_<MCE Name>* spreadsheet.
 - MCEs will use this file to supply county-level results from their geoaccess compliance calculations, including practitioner to member ratios and time/distance calculations.
- Use the Colorado county designations from the Colorado Rural Health Center to define a county as urban, rural, or frontier; the most recent county-level map is available at the following website:
 - <https://coruralhealth.org/resources/maps-resource>
 - Note: Urban counties with rural areas (e.g., Larimer County) should be reported with the rural counties and use rural time/distance standards.

- A “practice site” or “practice” refers to a physical healthcare facility at which the healthcare service is performed.
- A “practitioner” refers to an individual that personally performs the healthcare service, excluding single case agreement (SCA) practitioners.
- An “entity” refers to a facility-level healthcare service location (e.g., hospital, pharmacy, imaging service facility, and/or laboratory).

Report Instructions

Each MCE should use this template to generate one quarterly NA report for each applicable line of business (i.e., CHP+ MCO, Medicaid MCO, and RAE); the report shall contain template elements applicable to the line of business. The MCE should update the highlighted, italicized data fields on the cover page of this template to reflect their contact information, contract information, and report dates associated with the current report submission.

This report template contains a comprehensive list of NA requirements for the CHP+ MCO, Medicaid MCO, and RAE lines of business. Each table in this MS Word document contains a header row which confirms the applicable line(s) of business for each response. The table below shows expected network categories by MCE type. The accompanying MS Excel spreadsheets contain tabs in which network data can be imported (e.g., member counts, ratio results, time/distance calculation results).

Network Category	CHP+ MCO	Medicaid MCO	RAE
Facilities (Entities) <i>(Hospitals, Pharmacies, Imaging Services, Laboratories)</i>	X	X	
Prenatal Care and Women’s Health Services	X	X	X
Primary Care Providers (PCPs)	X	X	X
Physical Health Specialists	X	X	
Behavioral Health Specialists <i>(RAEs’ network categories include Substance Use Disorder [SUD] treatment coverage that went into effect on 1/1/2021)</i>	X		X
Ancillary Physical Health Services <i>(Audiology, Optometry, Podiatry, Occupational/Physical/Speech Therapy)</i>	X	X	

Questions

- Contact the MCE’s Department contract manager or specialist for data submission instructions and assistance with questions or access to HCPF’s FTP site.

2. Network Adequacy

Establishing and Maintaining the MCE Network

Supporting contract reference: The MCE shall maintain a network that is sufficient in numbers and types of practitioners/practice sites to assure that all covered services to members will be accessible without unreasonable delay. The MCE shall demonstrate that it has the capacity to serve the expected enrollment in that service area.

- To count members, include each unique member enrolled with the MCE and line of business as of the last day of the measurement period (e.g., March 30, 2023, for the quarterly report due to the Department on April 28, 2023).
- To count practitioners/practice sites:
 - Include each unique practitioner/practice sites contracted with the MCE and line of business as of the last day of the measurement period (e.g., March 30, 2023, for the quarterly report due to the Department on April 28, 2023).
 - Define unique individual practitioners using Medicaid ID; a practitioner serving multiple locations should only be counted once for the count of practitioners and ratio calculations.

Define unique practice sites by de-duplicating records by location, such that a single record is shown for each physical location without regard to the number of individual practitioners at the location.

Table 1A—Establishing and Maintaining the MCE Network: Primary Care Data

Requirement	Previous Quarter		Current Quarter	
	Number	Percent	Number	Percent
<i>Sample</i>	0	0.0%	0	0.0%
CHP+ MCO, Medicaid MCO, RAE				
Total members	196,766	N/A	199,966	N/A
Total primary care practitioners (i.e., PROV CAT codes beginning with “PV” or “PG”)	972	N/A	996	N/A
Primary care practitioners accepting new members	938	96.50%	962	96.59%
Primary care practitioners offering after-hours appointments	72	7.41%	96	9.64%
New primary care practitioners contracted during the quarter	21	2.16%	24	2.41%
Primary care practitioners that closed or left the MCE’s network during the quarter	21	2.16%	0	0.00%

Table 1B—Establishing and Maintaining the MCE Network: Primary Care Discussion

Describe any barriers that affect the MCE’s ability to maintain a sufficient network in number and type of primary care practitioners to assure that all covered services will be accessible to members without unreasonable delay.

Describe how the MCE ensures members’ access to family planning services offered by any appropriate physical health practitioner, practice group, or entity.

If utilized, describe the impact telehealth services had in overcoming these barriers. Describe the methods used to monitoring the availability and usage of telehealth services.

CHP+ MCO, Medicaid MCO, RAE

There are no material changes in the size of our networks since the last reporting period. Rocky Mountain Health Plans (RMHP) provides an inclusive network of Primary Care Medical Providers (PCMPs) in the Regional Accountable Entity (RAE) service area, with 192 PCMP service locations and a tiered structure for Per Member Per Month (PMPM) administrative payments and Key Performance Indicator (KPI) incentive payments. The structure ranges from Tier 1 practices that are open to all Medicaid Members and have accomplished the highest demonstrated practice transformation competencies through Tier 4 practices that meet minimum participation requirements. 41.67% of all practice sites are currently participating at Tier 1 or Tier 2.

RMHP met the time and distance requirements, ensuring accessibility and Member choice to primary care and family planning services, for the majority of network categories in the 14 rural and 8 frontier counties of RAE Region 1. The *Adult Primary Care Practitioner (PA)* and *Family Practitioner (PA)* time/distance standards were not met in Moffat County.

RMHP continues to offer RAE, Prime and CHP+ Members access to CirrusMD for RMHP. This is a free, text-based platform which allows Members to connect with providers 24/7 if they have a health question or if they are not sure if they should go to an urgent care or emergency room.

Prior to FY 22/23 Q3, RMHP was able to track utilization by line of business. However, as of January 1, 2023, there were changes to the eligibility files. As a result, RMHP can continue to track *CirrusMD for RMHP* registrations and encounters but can no longer track utilization beyond a broad Medicaid category. In FY 22/23 Q3 there were 122 unique Member registrations and 151 CirrusMD encounters. This is down from 260 unique Member registrations and 264 CirrusMD encounters in FY 22/23 Q2. RMHP is planning on aligning CirrusMD marketing strategy with UHC and anticipates an increase in encounters and registrations in future quarter’s reporting.

RMHP and CirrusMD have a workflow by which CirrusMD providers make referrals to RMHP Care Coordinators when Members have follow-up needs, such as finding a primary care provider. The number of referrals from CirrusMD providers to RMHP care coordinators remained the same from last quarter to this quarter.

Table 2A—Establishing and Maintaining the MCE Network: Behavioral Health Data

Requirement	Previous Quarter		Current Quarter	
	Number	Percent	Number	Percent
<i>Sample</i>	0	0.0%	0	0.0%
CHP+ MCO, Medicaid MCO, RAE				
Total members	196,766	N/A	199,966	N/A
Total behavioral health practitioners (i.e., PROVCAT codes beginning with “BV” or “BG”)	4,010	N/A	4,027	N/A
Behavioral health practitioners accepting new members	3,991	99.53%	4,008	99.53%
Behavioral health practitioners offering after-hours appointments	232	5.79%	249	6.18%
New behavioral health practitioners contracted during the quarter	30	0.75%	20	0.50%
Behavioral health practitioners that closed or left the MCE’s network during the quarter	20	0.50%	3	0.07%

Table 2B—Establishing and Maintaining the MCE Network: Substance Use Disorder (SUD) Treatment Facilities

Requirement	Previous Quarter	Current Quarter
	Number	Number
<i>Sample</i>	0	0
RAE		
Total SUD treatment facilities offering American Society of Addiction Medicine (ASAM) Level 3.1 services	15	15
Total SUD treatment facilities offering ASAM Level 3.3 services	1	1
Total SUD treatment facilities offering ASAM Level 3.5 services	15	15
Total SUD treatment facilities offering ASAM Level 3.7 services	8	8
Total SUD treatment facilities offering ASAM Level 3.2 WM (Withdrawal Management)	17	17
Total SUD treatment facilities offering ASAM Level 3.7 WM services	13	13

Table 2C—Establishing and Maintaining the MCE Network: Behavioral Health Discussion

Describe any barriers that affect the MCE’s ability to maintain a sufficient network in number and type of behavioral health practitioners to assure that all covered services will be accessible to members without unreasonable delay. If your network includes out-of-state practitioners serving members enrolled with the MCE, please describe.

If utilized, describe the impact telehealth services had in overcoming these barriers. Describe the methods used to monitoring the availability and usage of telehealth services.

For RAEs, describe any barriers to incorporating the ASAM levels of care for the SUD treatment practitioners, practice sites, and entities. Describe the methods used to monitor the available SUD treatment bed at each ASAM level.

CHP+ MCO, Medicaid MCO, RAE

Rocky Mountain Health Plans provides a robust network of behavioral health providers to our RAE Membership. RMHP is always open to expanding the network by enrolling new Behavioral Health and SUD providers as they meet our credentialing and contract requirements.

RMHP continues to expand our behavioral health and SUD network. In addition to contracting efforts, RMHP’s Care Coordination and Utilization Management teams maintain relationships with SUD providers statewide to find patients the appropriate ASAM level of care when needed.

RMHP met the time and distance requirements, ensuring accessibility and Member choice to behavioral health services, for the majority of network categories in the 14 *rural* and 8 *frontier* counties of RAE Region 1. Most identified deficiencies are within the *SUD treatment facility* network category across all ASAM levels. RMHP contracts with all SUD facilities within RAE Region 1. RAE Region 1 is comprised solely of *rural* and *frontier* counties, all of which fall within the geographic designation for [Mental Health Professional Shortage Areas](#) (HPSAs). Please refer to Appendix B for information regarding changes to Geoaccess reporting.

Overall behavioral health claims for RAE Members increased by 20% from last quarter, however telehealth claims decreased by .089% as compared to last quarter (as percentage of all claims). Telehealth services represented 37.68% of claims this quarter, as compared to 38.02% of overall behavioral health claims last quarter.

Table 3A—Establishing and Maintaining the MCE Network: Specialty Care Data

Requirement	Previous Quarter		Current Quarter	
	Number	Percent	Number	Percent
<i>Sample</i>	0	0.0%	0	0.0%
CHP+ MCO, Medicaid MCO				
Total members	n/a	N/A	n/a	N/A
Total specialty care practitioners (i.e., PROVCAT codes beginning with “SV” or “SG”)	n/a	N/A	n/a	N/A
Specialty care practitioners accepting new members	n/a	n/a	n/a	n/a
Specialty care practitioners offering after-hours appointments	n/a	n/a	n/a	n/a
New specialty care practitioners contracted during the quarter	n/a	n/a	n/a	n/a
Specialty care practitioners that closed or left the MCE’s network during the quarter	n/a	n/a	n/a	n/a

Table 3B—Establishing and Maintaining the MCE Network: Specialty Care Discussion

<p>Describe any barriers that affect the MCE’s ability to maintain a sufficient network in number and type of specialty care practitioners to assure that all covered services will be accessible to members without unreasonable delay.</p> <p>If utilized, describe the impact telehealth services had in overcoming these barriers. Describe the methods used to monitoring the availability and usage of telehealth services.</p>
CHP+ MCO, Medicaid MCO
<i>N/A</i>

3. Network Changes and Deficiencies

Network Changes

Supporting contract reference: The MCE shall report in writing to the Department, all changes or deficiencies in MCE Networks related to access to care.

Table 4–Network Changes: Discussion

<p>If the MCE experienced an unexpected or anticipated material change to the network or a network deficiency that could affect service delivery, availability, or capacity within the provider network, describe the change and state whether the MCE notified the Department, in writing, within five (5) business days of the change.</p> <p>Note: If the MCE experienced an unexpected or anticipated material change to the network or a network deficiency that could affect service delivery, availability, or capacity within the provider network during the quarter prior to the measurement period, the MCE’s response should include a description of the actions taken by the MCE during the current measurement period to address the deficiency.</p>
CHP+ MCO, Medicaid MCO, RAE
<i>N/A</i>

Table 5–CHP+ MCO Network Volume Changes and Notification: Discussion

<p>If the MCE experienced at least a five percent (5%) increase or decrease in its network in a thirty (30) calendar day period, describe the change and answer the following questions:</p> <p>Did the MCE notify the Department, in writing, within ten (10) business days of the change?</p> <p>Was the change due to a practitioner/practice site/entity’s request to withdraw; was the change due to the MCE’s activities to obtain or retain NCQA accreditation?</p> <p>Was the change due to a practitioner/practice site/entity’s failure to receive credentialing or re-credentialing from the MCE?</p>
CHP+ MCO
<i>N/A</i>

Inadequate Network Policies

Supporting contract reference: If the MCE fails to maintain an adequate network that provides Members with access to PCPs within a county in the MCE’s Service Area, the Department may designate that county as a mixed county for the purpose of offering the option of an HMO or the State’s self-funded network to eligible Members by providing the MCE a thirty (30) calendar day written notice.

Table 6—CHP+ MCO Inadequate Access to PCPs: Discussion

<p>Did the MCE fail to maintain an adequate network that provides members with access to PCPs within a county in the MCE’s service area?</p> <p>If the MCE answered “yes”, did the Department designate that county as a mixed county for the purpose of offering the option of an HMO or the State’s self-funded network to eligible members?</p>
CHP+ MCO
<i>N/A</i>

Table 7—CHP+ MCO Discontinue Services to an Entire County: Discussion

<p>Did the MCE discontinue providing covered services to members within an entire county within the MCE’s service area?</p> <p>If the MCE answered “yes”, did the MCE provide no less than sixty (60) calendar days prior written notice to the Department of the MCE’s intent to discontinue such services?</p>
CHP+ MCO
<i>N/A</i>

Table 8—CHP+ MCO Provider Network Changes: Discussion

<p>Did the MCE experience an unexpected or anticipated material change to the network or a network deficiency that could affect service delivery, availability or capacity within the provider network?</p> <p>If the MCE answered “yes”, did the MCE notify the Department, in writing, of the change?</p>
CHP+ MCO
<i>N/A</i>

4. Appointment Timeliness Standards

Appointment Timeliness Standards

Supporting contract reference: The MCE shall ensure its network is sufficient so that services are provided to members on a timely basis.

Table 9—Physical Health Appointment Timeliness Standards

Describe the method(s) used by the MCE to monitor its contract’s timeliness requirements for members’ access to physical health services. Describe findings specific to the current reporting period.
CHP+ MCO, Medicaid MCO, RAE
<p>RMHP Provider Network Management (PNM) staff distributes Appointment Wait Time Surveys to a sample of Members throughout all lines of business who received services from primary care practitioners, high-volume specialists, high-impact specialists, and prescribing as well as non – prescribing behavioral healthcare practitioners on a quarterly basis. The purpose of these surveys is to determine if appointment availability is sufficient for Members based on performance standards defined by the Division of Insurance (DOI), Colorado Department of Health Care Policy and Financing (HCPF), as well as the National Committee for Quality Assurance (NCQA).</p> <p>RMHP continued to utilize Qualtrics as an electronic method of distributing surveys quarterly during the second quarter of FY22-23. Surveys were sent out in January 2023 with response data being received in February 2023. Statistically valid Member distribution sample size is generated by using claim data reports to first determine the total number of Members who saw each practitioner type. Duplicate and deceased Members, as well as any Members who previously received a survey the quarter prior, are excluded from the total numbers. Once the Members have been identified, sample sizes are determined using a survey sample size calculator with a margin of error of 5% and a confidence level of 95%. In 2022, RMHP began increasing the sample size by an additional 50%, in an effort to improve the number of respondents. FY23 Q2 continued to have a low response rate of 3% overall. The greatest number of responses was seen in the High – Impact specialist category with [REDACTED] Members completing the survey, followed by Specialty High – Volume with [REDACTED] responses. There were [REDACTED] Member responses in the Behavioral health prescribing category and only [REDACTED] for Behavioral Health non – prescribing. Members who saw a Primary Care Practitioner produced [REDACTED] responses in FY23 Q2. It should be noted that although the greatest number of responses came from the High – Impact Specialty category, the largest percentage of response from Members to surveys sent was seen in the Behavioral Health prescribing category with a 5% response rate.</p> <p>RMHP has continued to work through the barriers associated with the low response rates. Discussions of modifying the survey process to a vendor level with the help from Cotiviti (previously Eliza) have been taking place since early 2023. Weekly meetings with Cotiviti began in March 2023 with input from multiple teams across the organization to revise the survey questions to be more accurate to the services rendered to the Membership. The decision has also been made to survey <u>all</u> Members who receive care from a Primary Care Practitioner, High Volume or High Impact Specialist as well as Prescribing and Non-Prescribing Behavioral Healthcare Practitioner and have valid email addresses on file. This process has an estimated target date to begin in FY23 Q4.</p>

RMHP will continue to implement the following changes to the Survey process:

- RMHP to finalize elements associated with the vendor survey process with a target date of implementation of FY23 Q4 as outlined below.
- Beginning in Q4 of FY23 we will survey all members that had an appointment in the previous month via an Interactive Voice Response (IVR) survey on their experience of getting needed care quickly.
- A newly identified vendor partner, Cotiviti, will conduct the survey and report all metrics on our behalf.
- RMHP will conduct the survey monthly for 6-months, at which time we will analyze data to ensure that surveying is taking place at the right cadence as well as evaluating membership sample size. RMHP will adjust this accordingly based on analysis findings.
- The survey will be brief, 3-5 questions and after each completed survey, the Member will receive a \$10 gift card. Note, only Medicaid and CHP+ Members are eligible for the gift card incentive.
- The data will also support our network development plan, provider education and training and will inform RMHP of how well the network is responding to Members’ access to care needs.

Table 10—Behavioral Health Appointment Timeliness Standards

Describe the method(s) used by the MCE to monitor its contract’s timeliness requirements for members’ access to behavioral health services. Describe findings specific to the current reporting period.

CHP+ MCO, RAE

As noted above in Table 9, the Member survey process we currently utilize applies to all priority provider groups and lines of business, including behavioral health services.

5. Time and Distance Standards

Health Care Network Time and Distance Standards

Supporting contract reference: The MCE shall ensure that its network has a sufficient number of practitioners, practice sites, and entities who generate billable services within their zip code or within the maximum distance for their county classification. The MCE must use GeoAccess or a comparable service to measure the travel time and driving distance between where members live and the physical location of the practitioners/practice sites/entities in the MCE's Region.

Enter time and distance compliance results (e.g., “Met” or “Not Met”) in the MS Excel template. Use Tables 11, 12, and 13 for additional relevant information regarding the MCE’s compliance with time and distance requirements in its contracted counties, including region-specific contracted counties for RAEs’ behavioral health networks. Geographic regions refer to the areas in which members reside, as members may travel outside their county of residence for care. For physical health time and distance requirements, MCEs are only required to report compliance with minimum time and distance requirements for members residing inside the MCE’s contracted counties. For statewide behavioral health time and distance requirements, MCEs are required to report compliance with minimum time and distance requirements for all members regardless of county residence.

- CHP+ MCO defines “child members” as 0 through the month in which the member turns 19 years of age.
- CHP+ MCO defines “adult members” as those over 19 years of age (beginning the month after the member turned 19 years of age).
- Medicaid MCO and RAE define “child members” as under 21 years of age.
- Medicaid MCOs and RAEs define “adult members” as those 21 years of age or over.

There are two levels of primary care practitioners: primary practitioners that can bill as individuals (e.g., MDs, DOs, NPs, and CNS’) and mid-level practitioners that cannot bill as individuals (e.g., PAs); each type of practitioner has its own row in the MS Excel template tabs for time/distance reporting.

A practitioner/practice site/entity should only be counted one time in the MCE’s data submission for each associated network category (PROVCAT code). If a practitioner provides primary care for adult and pediatric members at a specific location, count the practitioner once under the Adult Primary Care Practitioner PROVCAT code, once under the Pediatric Primary Care Practitioner PROVCAT code, and once under the Family Practitioner PROVCAT code. For example, a primary care nurse practitioner (NP) that serves adult and pediatric members can be categorized with the PV063, PV064, and PV065 PROVCAT codes. That practitioner will then be counted for the minimum network standards for pediatric primary care practitioner (NP) (PV064 and PV065); adult primary care practitioner (NP) (PV063 and PV064); and family practitioner (NP) (PV064).

Table 11–Urban Health Care Network Time and Distance Standards: Discussion

Present detailed time/distance results for members residing in Colorado’s urban counties using the accompanying MS Excel workbook template.

List the specific contracted urban counties in which the MCE does not meet the time/distance requirements. Each RAE should limit this discussion to counties within its RAE region for both physical and behavioral health time/distance requirements.

Describe the MCE’s approach to ensuring access to care for members residing in its contracted urban Colorado counties where the MCE does not meet the time/distance requirements.

CHP+ MCO, Medicaid MCO, RAE

RMHP’s service area counties are all designated as *rural* or *frontier*, however; RMHP has Region 1 attributed Members residing in some urban counties such as in the Denver Metro area. RMHP contracts with numerous providers in those areas although they may not cover all services. RMHP enters into single case agreements with providers in these areas when needed.

County Class	County	Network Category	Current % with Access
Urban	Adams	General Behavioral Health	99.60%
Urban	Adams	General Psychiatrists and other Psychiatric Prescribers	99.50%
Urban	Adams	General SUD Treatment Practitioner	99.50%

Table 12–Rural Health Care Network Time and Distance Standards: Discussion

Present detailed time/distance results for members residing in Colorado’s rural counties using the accompanying MS Excel workbook template.

List the specific contracted rural counties in which the MCE does not meet the time/distance requirements. Each RAE should limit this discussion to counties within its RAE region for both physical and behavioral health time/distance requirements.

Describe the MCE’s approach to ensuring access to care for members residing in its contracted rural Colorado counties where the MCE does not meet the time/distance requirements.

CHP+ MCO, Medicaid MCO, RAE

Time/distance deficiencies in one or more network categories exist in several counties, which is a function of provider availability in rural and frontier areas. For example, SUD treatment facilities and psychiatric hospitals are limited, despite the inclusion of all active practices and facilities in our networks for the entire geography of Region 1.

RMHP’s Care Coordination team assists Members who need a particular service that may not be available in their community. Care Coordinators work with participating providers in nearby communities to facilitate appointment scheduling, as well as transportation.

RMHP continues to offer RAE, PRIME and CHP+ Members access to CirrusMD for RMHP. This is a free, text-based platform which allows Members to connect with providers 24/7 if they have a health question or if they are not sure if they should go to an urgent care or emergency room.

COLORADO
Department of Health Care
Policy & Financing

Table 13–Frontier Health Care Network Time and Distance Standards: Discussion

Present detailed time/distance results for members residing in Colorado’s frontier counties using the accompanying MS Excel workbook template.

List the specific contracted frontier counties in which the MCE does not meet the time/distance requirements. Each RAE should limit this discussion to counties within its RAE region for both physical and behavioral health time/distance requirements.

Describe the MCE’s approach to ensuring access to care for members residing in its contracted frontier Colorado counties where the MCE does not meet the time/distance requirements.

CHP+ MCO, Medicaid MCO, RAE

Time/distance deficiencies in one or more network categories exist in numerous counties. In many cases this is a function of care being consolidated in one location within a county and in others cases the pattern of care is to travel to neighboring communities for care.

RMHP’s Care Coordination team assists Members who need a particular service that may not be available in their community. Care Coordinators work with participating providers in nearby communities to facilitate appointment scheduling, as well as transportation.

RMHP continues to offer RAE, PRIME and CHP+ Members access to CirrusMD for RMHP. This is a free, text-based platform which allows Members to connect with providers 24/7 if they have a health question or if they are not sure if they should go to an urgent care or emergency room.

Appendix A. Single Case Agreements (SCAs)

Individual practitioners with single case agreements (SCAs) are not counted as part of the MCE’s health care network and should be excluded from tabulations in the body of this MS Word report and the associated MS Excel report(s). However, the Department acknowledges the role of SCAs in mitigating potential network deficiencies and requests that the MCE use Tables A-1 and A-2 below to list individual practitioners or SUD treatment facilities with SCAs and describe the MCE’s use of SCAs.

Table A-1–Practitioners and SUD Treatment Facilities with SCAs: Data

SCA Practitioners or SUD Treatment Facilities	Medicaid ID	County Name	HCPF Network Category Code(s)	HCPF Network Category Description (include ASAM levels for SUD treatment facilities)	Number of Members Served by SCA
<i>Franklin Q. Smith</i>	0000000	<i>Denver</i>	<i>PV050</i>	<i>Adult Only Primary Care</i>	■
<i>Chrysalis Behavioral Health</i>	0000000	<i>Baca</i>	<i>BF085</i>	<i>SUD Treatment Facility, ASAM Levels 3.1 and 3.3</i>	■
CHP+ MCO, Medicaid MCO, RAE					
Lakeland Behavioral Health	N/A	Missouri	BF140	Mental Hospital	■
Piney Ridge Treatment Center	N/A	Arkansas	BF140	Mental Hospital	■

Table A-2–Practitioners with SCAs: Discussion

<p>Describe the MCE’s approach to expanding access to care for members with the use of SCAs.</p> <p>Describe the methods used to upgrade practitioners with SCAs to fully contracted network practitioners.</p>
<p>CHP+ MCO, Medicaid MCO, RAE</p> <p>RMHP uses SCAs for specific Member needs such as specialized care (in or outside the region) or special circumstance (e.g., hardships around transportation or travel or an existing relationship with a provider who is not in the network).</p> <p>In the event that RMHP becomes aware of a provider through the SCA process that is registered with interChange and is willing to join the network, RMHP offers to contract with the provider and provide assistance with the interChange process.</p>

Appendix B. Optional MCE Content

Optional MCE Content

Friday, April 28, 2023

To Medicaid and CHP+ Stakeholders,

In January of 2023, Rocky Mountain Health Plans (RMHP), A UnitedHealthcare Company (UHC), integrated key technology systems to improve efficiency and accuracy of our operational processes. As a part of this transition, we are now able to leverage UHC licenses for Quest Analytics to produce more accurate network adequacy reports. The UHC license agreement includes two functions that were not previously available to RMHP.

1. **Counting Providers in Neighboring Counties:** The old license (used to produce reports through December 2022) only counted providers that were located within a county when determining if minimum provider count requirements were met. In contrast, the new license counts both providers in each county as well as providers in neighboring counties (if those neighboring providers are within the required time and distance standards).
2. **Address Clean Up Algorithm:** Quest Analytics conducts geo-coding (a process that crosswalks an address to a specific latitude and/or longitude). When there address in-accuracies are present in raw address data, the geo-coding software may not be able to match an address to a specific latitude and longitude (this is true of all geo-coding software). In these instances, Quest Analytics will distribute those addresses within the zip code's geography. Within our new licensing, we have technology that allows us to clean up addresses' errors prior to geo-coding, which means that more addresses are mapped "completely." Our new technology allows us to completely geo-code 97.4% of provider and Member addresses (up from 96.5% with old previous technology).

These technology and licensing change allows RMHP to report network adequacy data more accurately. These changes to improve the accuracy of reporting has resulted in changes in which county and specialty combinations meet or do not meet network adequacy (between the report submitted for State Fiscal Year 2023 Quarter 2 vs Quarter 3). These changes result from more accurate reporting methods (and not changes within our network). These changes are summarized below.

Program	Scenario	Unique County and Specialty Combinations	
		Count	Percent
CHP+	Accessibility Status Unchanged	756	98.6%
CHP+	Changed from Unmet to Met	0	0.0%
CHP+	Changed from Met to Unmet	11	1.4%
PRIME	Accessibility Status Unchanged	243	88.0%
PRIME	Changed from Unmet to Met	6	2.2%
PRIME	Changed from Met to Unmet	27	9.8%
RAE	Accessibility Status Unchanged	863	89.7%
RAE	Changed from Unmet to Met	11	1.1%
RAE	Changed from Met to Unmet	88	9.1%

Any questions about changes in methodology should be directed to David Moklaizky, VP of Analytics and Strategy (david.moklaizky@uhc.com).

Appendix C. Optional MCE Content

This optional appendix may contain additional information, graphs, or maps that the MCE would like to include in its quarterly report.
