# Attribution

The method used to connect Health First Colorado members to a Primary Care Medical Provider.

Note: **Primary care medical providers (PCMPs)** are providers enrolled with Health First Colorado that meet certain licensing requirements and contract with the RAE covering the region in which their practice is located. PCMPs serve as the focal point of care for members attributed to them and partner with their RAE to coordinate the health needs of their members.

Assignment

The process used to connect Health First Colorado members to a RAE.

Standard Attribution in ACC Phase III

1. **Member choice:** members may select their PCMP through the enrollment broker. Otherwise, we use their utilization as another way to gauge their choice.

2. **Utilization:** attribution determined via predominance of claims, in the following order: (this methodology will begin Fall 2025 with reattribution)
   1. Two most recent primary care visits
   2. Preventive service visits (ages 0 to 19)
   3. All E&M claims
   4. All other claims

3. **Unattributed:** members without a chosen PCMP or claims history remain unattributed.

> **Key change:** prioritize recency of visits. Note: this change will go-live fall 2025 with re-attribution.

> **Key change:** no geographic or family attribution

Re-Attribution in ACC Phase III

- **Re-attribution:** Process for regularly updating attribution to reflect new utilization patterns.
  - ➢ Occurs monthly for members ages 0 to 1 and unattributed members.
  - ➢ Occurs quarterly for all members.

Key change: runs more frequently for all members.
