# Program Overview

The **Maternity Bundled Payment** program is an **incentive payment** program that aims to improve **Care Quality**, reduce **Care Cost**, and promote & improve **Health Equality**

## Program Methodology

- Program covers **Prenatal**, **Delivery**, and **Postpartum Care**
- A **comprehensive budget** to cover a complete set of maternal services
- **Retrospective evaluation** to compare provider's actual cost against the budget
- **Incentive Payment** based on provider's performance on **quality measures**

# Quality Measure Selection Process

Measure Pool	Reportability Validation
Postpartum Depression Screenings	Reportable
Contraceptive Care – Postpartum*	Reportable
Percentage of Low Birthweight Births*	Reportable
Unexpected Complications in Term Newborns	Reportable
Severe Maternal Morbidity	Reportable
Behavioral Health Risk Assessment	Requires EHR; reportable in the future
Prenatal and Postpartum Care*	Billing manual update; reportable in the future
Prenatal Immunization Status	System accessibility; reportable in the future
Low Risk Cesarean Delivery*	CDPHE data refreshing; reportable in the future
Cesarean Birth	Replaced by "Low Risk Cesarean Delivery"
Elective Delivery	No longer CMS core measure
Group B Strep Screenings	Not nationally recognized
Gestational Diabetes Screenings	Not nationally recognized
Hep B Screening	Not nationally recognized
Smoking During Pregnancy	Not nationally recognized
Exclusive Breast Milk Feeding	Specs include NICU
Prenatal Screening for HIV	Specs unavailable

Four asterisked measures are CMS core measures.

# Preliminary Selection Results

## Measure Selection Stakeholder Engagement

- Maternity Advisory Committee (MAC)
- Providers (including existing and interested providers)
- Advocacy groups
- Others

Candidate Measures	Type
Postpartum Depression Screenings	Tie to Payment
Severe Maternal Morbidity	Tie to Payment
Unexpected Complications in Term Newborns	Tie to Payment
Contraceptive Care – Postpartum	Tie to Payment
Percentage of Low Birthweight Births	Reporting/Tracking

# Measure Specification

Measure	SPECS
<p><b>Postpartum Depression Screenings</b></p>	<p>1. Depression screening: The percentage of deliveries in which women were screened for clinical depression using a standardized tool within 12 weeks (84 days) post-delivery.            2. Follow-up on positive screen: The percentage of deliveries in which postpartum women received follow-up care within 30 days of screening positive for depression.</p>
<p><b>Severe Maternal Morbidity (SMM)</b></p>	<p>Denominator: All mothers during their birth admission, excluding ectopic and miscarriages.            Numerator: Among the denominator, all cases with any SMM code.</p>
<p><b>Contraceptive Care – Postpartum</b></p>	<p>Among women ages 15 through 44 who had a live birth, the percentage that is provided:            1) A most effective (i.e., sterilization, implants, intrauterine devices or systems (IUD/IUS)) or moderately (i.e., injectables, oral pills, patch, or ring) effective method of contraception within 3 and 60 days of delivery.            2) A long-acting reversible method of contraception (LARC) within 3 and 60 days of delivery.</p>
<p><b>Percentage of Low Birthweight Births</b></p>	<p>The percentage of births with birthweight &lt;2,500 grams</p>
<p><b>Unexpected Complications in Term Newborns</b></p>	<p>This is a hospital level performance score reported as the percent of infants with Unexpected Newborn Complications among full term newborns with no preexisting conditions, typically calculated per year.</p>
