PIAC Strategy

- April—Initial conversation on current ACC performance
- May & June—Deeper dive into topics of greatest interest
- July—Comment on ACC Phase III Draft Vision

Today's Goals

- Identify PIAC's top areas of interest regarding ACC Phase II performance that will be used to design future in-depth PIAC discussions
- Capture PIAC's thoughts about the ACC's performance in relation to Phase II goals and objectives

Framing

- ✓ What is working well in the ACC that should be continued and/or built upon for Phase III?
- ✓ What is not working as well and presents opportunities for improvement for Phase III?
- ✓ NOTE: Please focus on structural, programmatic, and policy aspects of the ACC, not individual RAE, provider, or member stories.

Jamboboard Exercise

Use the sticky note feature on left side of the screen.

Add your initials to the sticky note.

In a brief word or phrase provide comments on:

- What aspects of ACC Phase II are working well?
- Which aspects of ACC Phase II have the greatest need for improvement?

Goals

- To improve member health & reduce costs

Objectives

1. Join physical and behavioral health under one accountable entity
2. Strengthen coordination of services by advancing team-based care and health neighborhoods
3. Promote member choice and engagement
4. Pay providers for the increased value they deliver
5. Ensure greater accountability and transparency

Discussion: Member Health

- Improve Member Health
 - How has the implementation of ACC Phase II led to improvements in member health?
 - Have there been any unintended consequences to member health based on the design and implementation of ACC Phase II?

Discussion: One Entity

- Join physical and behavioral health under one accountable entity
 - What have been positive outcomes of having one accountable entity for physical and behavioral health?
 - Have there been any unintended consequences of creating one entity for physical and behavioral health?

Discussion: Team-based Care & Health Neighborhoods

- Strengthen coordination of services by advancing team-based care and health neighborhoods
 - How has the implementation of ACC Phase II led to advances in team-based care and the functioning of the health neighborhood?
 - Have there been any unintended consequences in relation to team-based care and health neighborhoods based on the design and implementation of ACC Phase II?

Discussion: Member Engagement

- Promote member choice and engagement
 - How has the implementation of ACC Phase II supported member choice and engagement?
 - Have there been any unintended consequences regarding member choice and engagement based on the design and implementation of ACC Phase II?

Discussion: Pay for Value

- Pay providers for the increased value they deliver
 - How has the implementation of ACC Phase II positively impacted payments for providers and their ability to participate in value-based payment arrangements?
 - Have there been any unintended consequences to provider payment and value-based payment arrangements based on the design and implementation of ACC Phase II?

Discussion: Accountability

- Ensure greater accountability and transparency
 - In what ways has the implementation of ACC Phase II increased Department and Regional Accountable Entity accountability or transparency?
 - What opportunities are there to improve accountability and transparency under the current design of ACC Phase II?

Thank You!
