Matt Pfeifer - HCPF

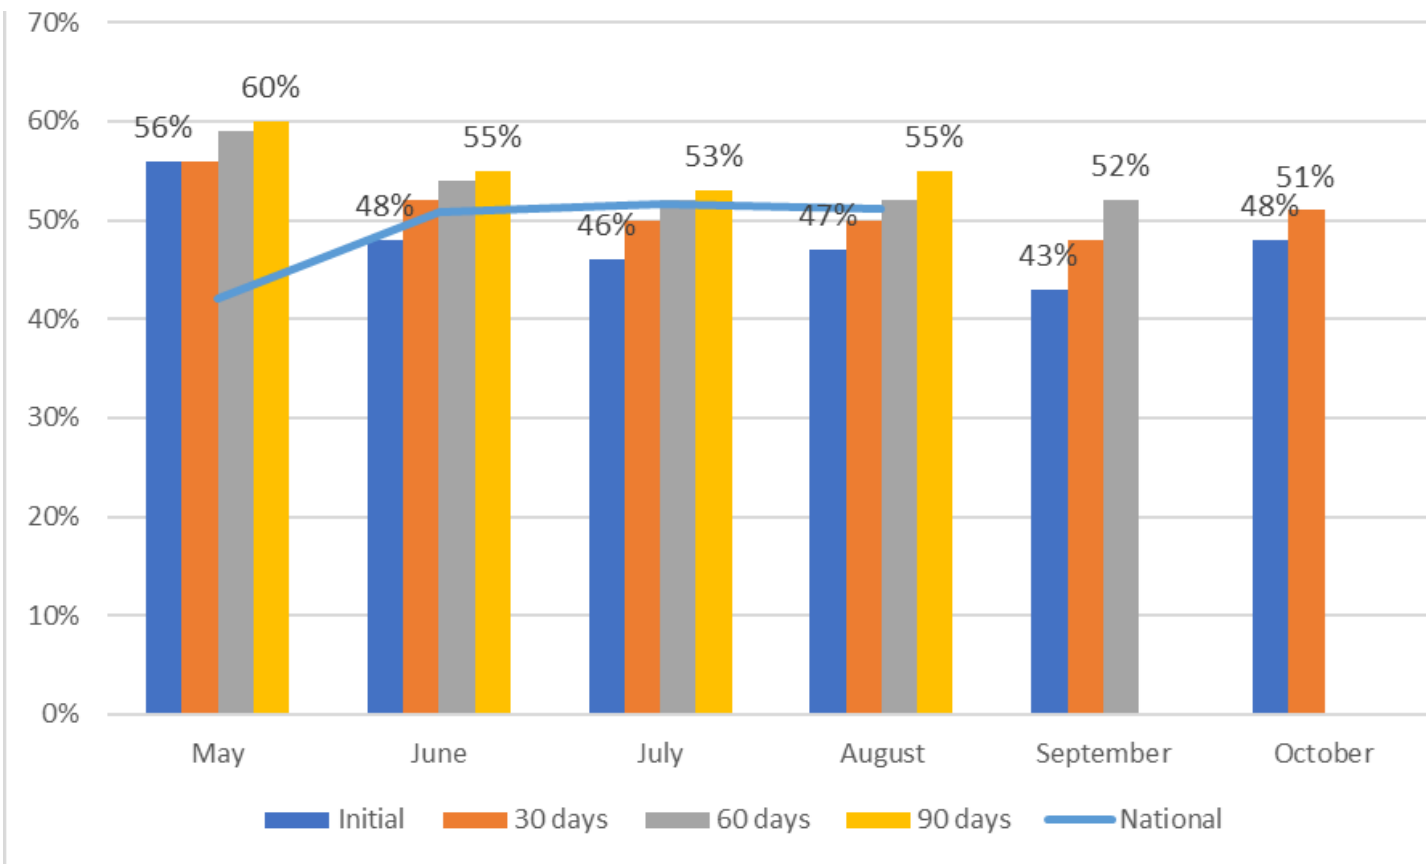

Colorado made it a top priority to get people who lost their jobs during COVID induced economic downturn onto Medicaid

Renewal Rate improves over 90 day reconsideration period

Measuring a month after the 90 day reconsideration period generates 7-8 points better - and more accurate - renewal results (June - Aug), and already 11 points better in the month of Sept with only 60 of the 90 days' data available.

This methodology is a more accurate reflection of coverage impact to individuals, and a more accurate reflection on the Biden Administration and state's efforts to [Keep People Covered](#).

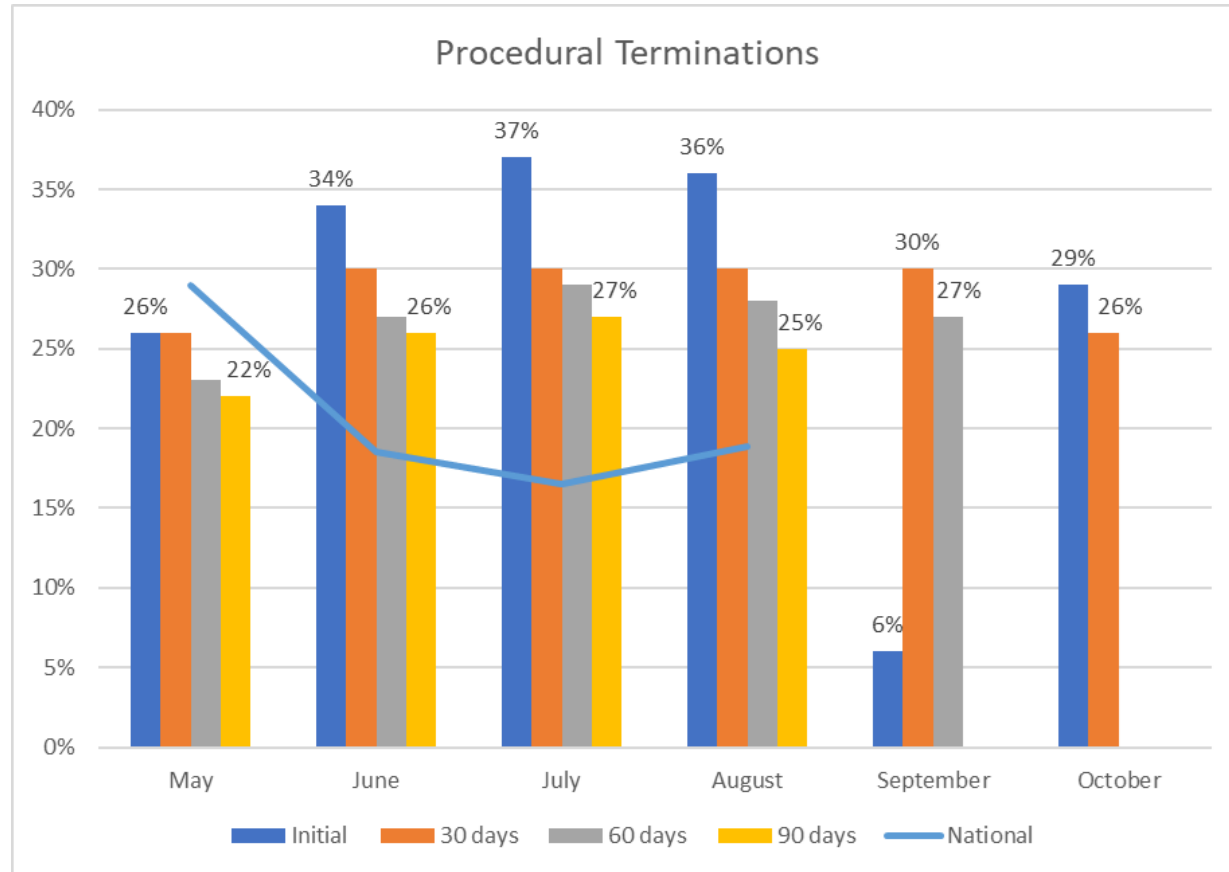

Procedural Denials

Procedural denials drop after the 90 day reconsideration period by about 9 points (36% to 25%).

Our procedural denials will be higher because our pending rate is so low (historically 1-3% vs national 20%+).

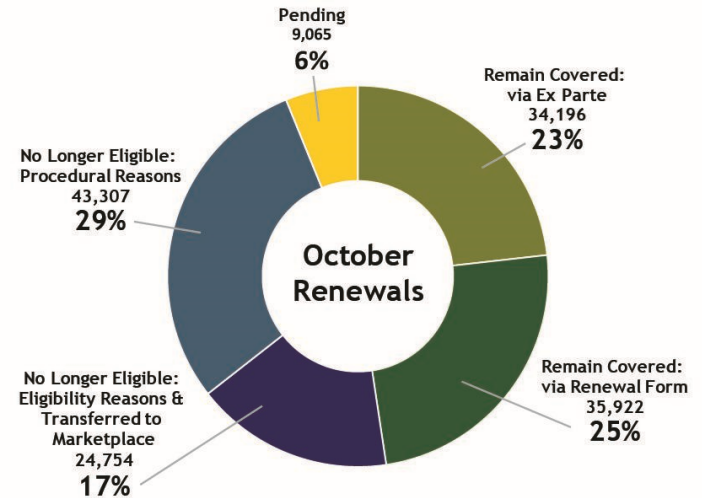

Efforts to improve:

- more time for LTSS members & added LTSS outreach center
- created escalation process
- shortened renewal packet
- massive partnership with providers and stakeholders
- ex parte to individual level
- improved digital tool (PEAK)
- continued correspondence improvement projects

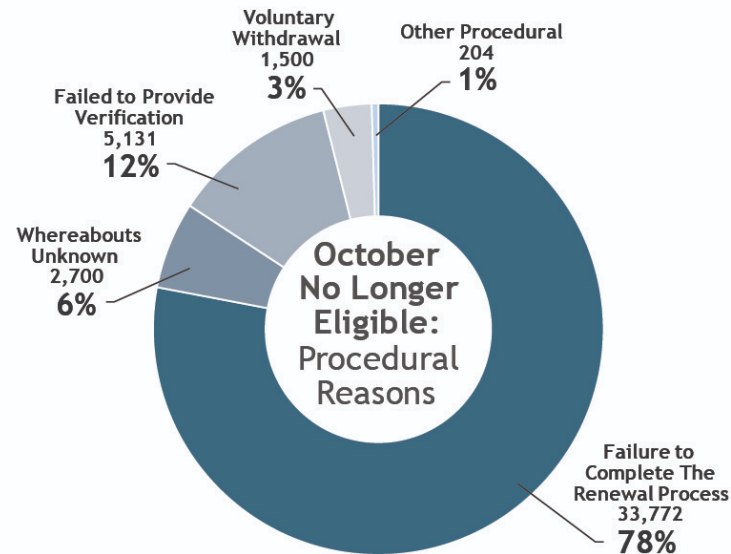

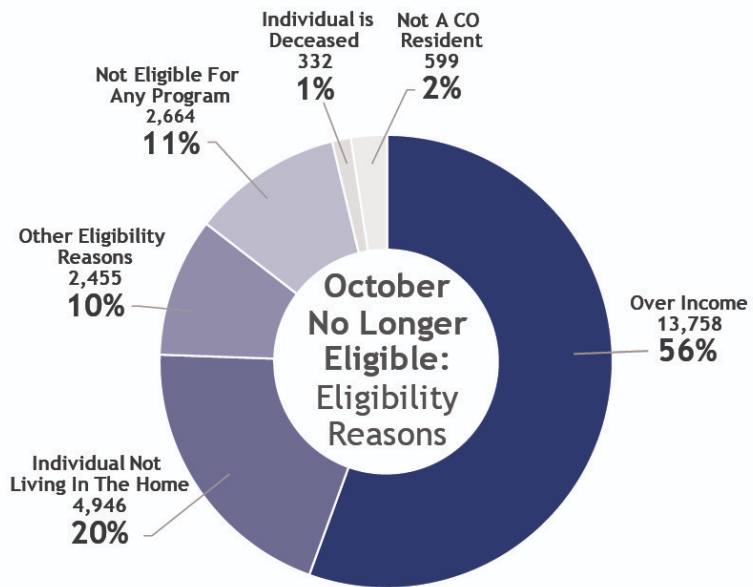

*September and October data not included

Based on pre-pandemic data, on average about half of those losing coverage become eligible for Medicaid again within two years.
