Multi-Factor Authentication (MFA) Summary

Single-Factor authentication (username/password) is not sufficiently secure when handling sensitive Personal Health Information or Personally Identifiable Information. Multi-Factor authentication is required to properly secure access to sensitive information.

What is MFA?

Multi-Factor authentication (MFA) is an authentication method that requires users to verify identity using multiple independent methods. Instead of just asking for a username and password, MFA implements additional credentials like a pin sent via email or text, or a verification call made to a pre-registered phone number.

How Does Multi-Factor Authentication Work?

The goal of MFA is to provide a multi-layered defense system. This helps ensure that the users who access your system are who they say they are. Even if one factor is compromised, there are still more barriers to breach.

For example, to log in to a secure program, a user would need to type a password and enter another number from a text, phone call, or email. Only the correct password combined with the correct number from the additional authentication factor would give a user access.

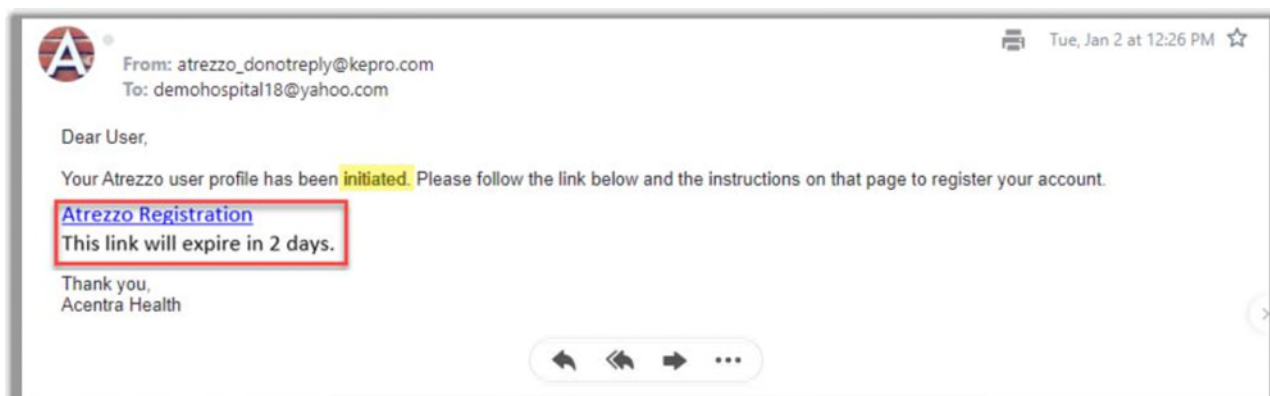

New Portal User MFA Registration

Use these instructions if you are a new portal user and need to register your Acentra account. The below instructions will guide you through completing the Multi-Factor Authentication (MFA) Registration, which is a one-time process.

Your Atrezzo Portal Administrator will create your account. The system will send an email with a link for Atrezzo Registration. Click the link to begin the MFA registration process.

IMPORTANT: The Atrezzo Registration link will expire within 2 days of receipt. If you have not completed the registration process, see your Atrezzo Portal Administrator to have a new link sent via email.

Select the best multi-factor authentication method for you, [Phone](#) or [Email](#), following the instructions below.

NOTES:

- 1) When choosing an authentication method, you will be required to enter an email address for both options. Only choose the Email option if you do not have access to a direct phone line (landline or mobile).
- 2) A phone registration will require a direct line with 10-digits; extensions are not supported.
