

DOC BH Engagement

February 2021

Medicaid Release Volume	Engagement Volume	Performance Rate	Target Rate	Difference (%)	Difference (Members)
7162	1012	14.13%	13.39%	0.74%	53

- Performance increased from 13.7% to 14.13%. Performance has increased by almost 5 percentage points since March 2020, indicating a continued impact of the cross-system efficiencies gained under COVID-19 adjustments to the Approved Treatment Provider (ATP) network. Timely filing creates some fluctuation and noise in the most recent months.
- RAEs 4, 7 and 2 are grouped between 18% and 21%.
- Collectively contractors are *exceeding the target* by 53 members, or about 7 members per contractor over the course of the year.
- HCPF is finalizing an updated target for this fiscal year. The proposed target is 19.1%. Current trend of a .4-.5% monthly increase indicate the rate at the beginning of FY21-22 will be 15.5-16%.
- Automation of data processes has improved the accuracy of enrollment figures and decreased the amount of "No RAE" members. The most significant impact if this development can be seen in the DHMC rate which was adjusted downward. Some additional data improvements are likely in the upcoming months.
- Women continue to access care at a higher rate than men, and whites continue to access care at higher rate than non-whites. Non-whites saw a consistent increase.
- 12 Month rolling release volumes decreased slightly but access volumes increased.
- HCPF, RAEs, DOC and stakeholders continue regular meetings to improve performance on this metric and for justice system involved members. Coordinating in-reach efforts to avoid duplication is an ongoing issue being addressed.
- CO recently passed legislation to increase in-reach efforts and funding.
- DOC is working with community providers to reimburse for in-reach appointments while the member is not yet Medicaid eligible.
- Issues related to providers understanding of medical necessity is a challenge being addressed. Members who have SUD treatment needs but have not been actively using while incarcerated are particularly impacted.
