DOC BH Engagement									
August 2020									
Medicaid Release Volume	Engagement Volume	Performance Rate	Target Rate	Difference (%)	Difference (Members)				
7161	797	11 13%	13 39%	-2.26%	162				

 Berformance increased from 10.69% to 11/13%. There is a modest positive trend from March 2020, indicating an impact of the Special Needs Parole Program and the adjustments to the Approved Treatment Provider (ATP) Network. Timely filing creates some fluctuation and noise in the most recent months.

•Eour performance cohorts have emerged: Cohort 1 (RAEs 2, 4, and 7); Cohort 2 (RAE 1); Cohort 2 (RAEs 5 and 6 and DHMC), and Cohort 4 (RAE 3). RAE 4 broke through the 15% ceiling and showed the greatest performance to date. DHMC's trend change from the previous month due to an attribution change within the base dataset. Each contractor needs to coordinate an additional **1.69** visits per month to hit the collective target.

•Women continue to access care at a higher rate than men, and whites continue to access care at higher rate than non-whites. Males were static whereas females saw an increase.

•Monthly release volumes were consistent with pre-COVID trends. Monthly access rates continue to be nearly double than pre-COVID rates.
