EVV CDASS Match Rate & Strike Data

EVV CDASS Program Updates

EVV Strike Reset Letter was recently sent to members to communicate that strikes have reset for 2023. If you have an active live-in caregiver exemption for all caregivers, you may disregard the notice.

The best way to maintain EVV compliance of 80% or greater is to ensure caregivers collect EVV when services are provided and meet FMS payroll schedules.

EVV Compliance Rates:

- December 2022- Initial data showed 93.94% compliance. EVV data and claims issues were resolved and the percentage has improved.
- January 2023 - EVV data transmission process issues identified. No member strikes will be delivered. EVV compliance data will be reviewed and updated next month.

Visit the [EVV Resources](#) web page to review the [EVV CDASS Compliance Protocol](#).
