Questions and Answers		
SP/B3 MODIFIERS - Open discussion about the purpose/need for these. Can these be removed?	John	Collected feedback. There is no urgency on this matter - just seeking initial reaction. In general, where this may simply things the removal of these modifiers would be a massive lift for providers and others who have built this into their EMR/systems.
H0017 - Billing for ATUs - should we add 35 (CMHC) be added to Provider Types that can bill? “All RAEs are required to send their encounters (all claims paid and denied by the RAE) to the inter-Change system per contractual agreement. All claims sent to the interChange are adjudicated against Department policy rules which are aligned with the USCS Manual, or other pertinent manuals as provided by HPO.”	Amie Adams	Agreed to work with Amie A to revise this coding page and update, including noting ATUs on this page. Draft page will be sent out to Committee for review before publication.
H0018 (CSU) - Modifier for Adults?	Michelle T	Agreed “ET” modifier alone would indicate CSU service for Adult. Will add this notation to the page. HE + ET indicates CSU for Child, Adol, Young Adult.
H0033 review/approve language that this code explicitly covers “take home” Buprenorphine. This will not change the benefit or impact reimbursement.	John	No change to H0033 coding page will be made. Sharon (BHA) agreed to take this back and see if they can clarify guidance elsewhere. Unlike on H0020, this code is for observation and would not be appropriate to add for take home, since it would not be billed for take home doses (diff than H0020).
Residential Services billed on a 1500 Claim form. To make this clear in the coding manual, recommend editing:	John	Agreed to work with Michelle T to propose some policy language to

<p>1) Remove "Residential Treatment Center" from the UB-04 section - maybe add PRTF and ICF-MR - based on CMS link below?</p> <p>2) Add "Residential Services" to the 1500 section with some explanatory language: "Only facilities that include room and board should be billed on a UB04.... "When room and board is billed separately or excluded from the per diem code, these services should be billed on a 1500....</p>		<p>clarify this. Draft changes will be sent out to Committee for review before publication.</p>
<p>96127 (noted on 96146) is not in the coding manual. https://therathink.com/cpt-code-96127/</p>	<p>John</p>	<p>Agreed to delete 96127 from page</p>
<p>H0023 - can Medical Assistant be added to Service Providers?</p>	<p>Amie Adams</p>	<p>Agreed to add Certified/Registered MA to the Service providers</p>
<p>H2014 - can the age restriction be removed?</p>	<p>Cherilyn (Northrange)</p>	<p>Agreed to remove age restriction and work with Cherilyn to update page to provide example activities appropriate for all ages. John will review adding CAT/CAS to service providers. Draft page will be sent out to Committee for review before publication.</p>
<p>96372 should not be reported with a 99211 E/M since this is considered included</p>		<p>Reviewed. No changes to language on the page – comes directly from CPT manual.</p>
<p>H2011 vs 90839/40 -what is the distinction in these codes?</p>		<p>Robust discussion and examples of how the codes are distinct. No suggested changes to descriptions on the coding pages. John will review adding CAT/CAS to H2011</p>
<p>90875 – Interactive Complexity question chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://downloads.cms.gov/medicare-coverage-database/lcd_attachments/34616_20/L34616_PSYCH014_BCG.pdf</p>	<p>Amie Adams</p>	<p>CMS guidance updated 11/1/2016 to allow code to be used for translation. Will update appendix and share with the Committee for review before publication.</p>
<p>Review language: "E/M codes are covered by the RAEs when they are billed in conjunction with a psychotherapy add-on or when used for the purposes of medication management with minimal psychotherapy provided by a prescriber from the RAE network. These codes cover a broad range of services for members in both inpatient and outpatient settings. They are generic in the sense that they are intended to be used by all physicians, nurse-practitioners, and physician assistants and to be used in primary and specialty care alike."</p>	<p>John</p>	<p>Agreed to delete highlighted text. This is not accurate.</p>
