What support would you need from a hospital to serve more clients? Select all that you would need.

What support would you need from a hospital to serve more clients? Select all that you would need.

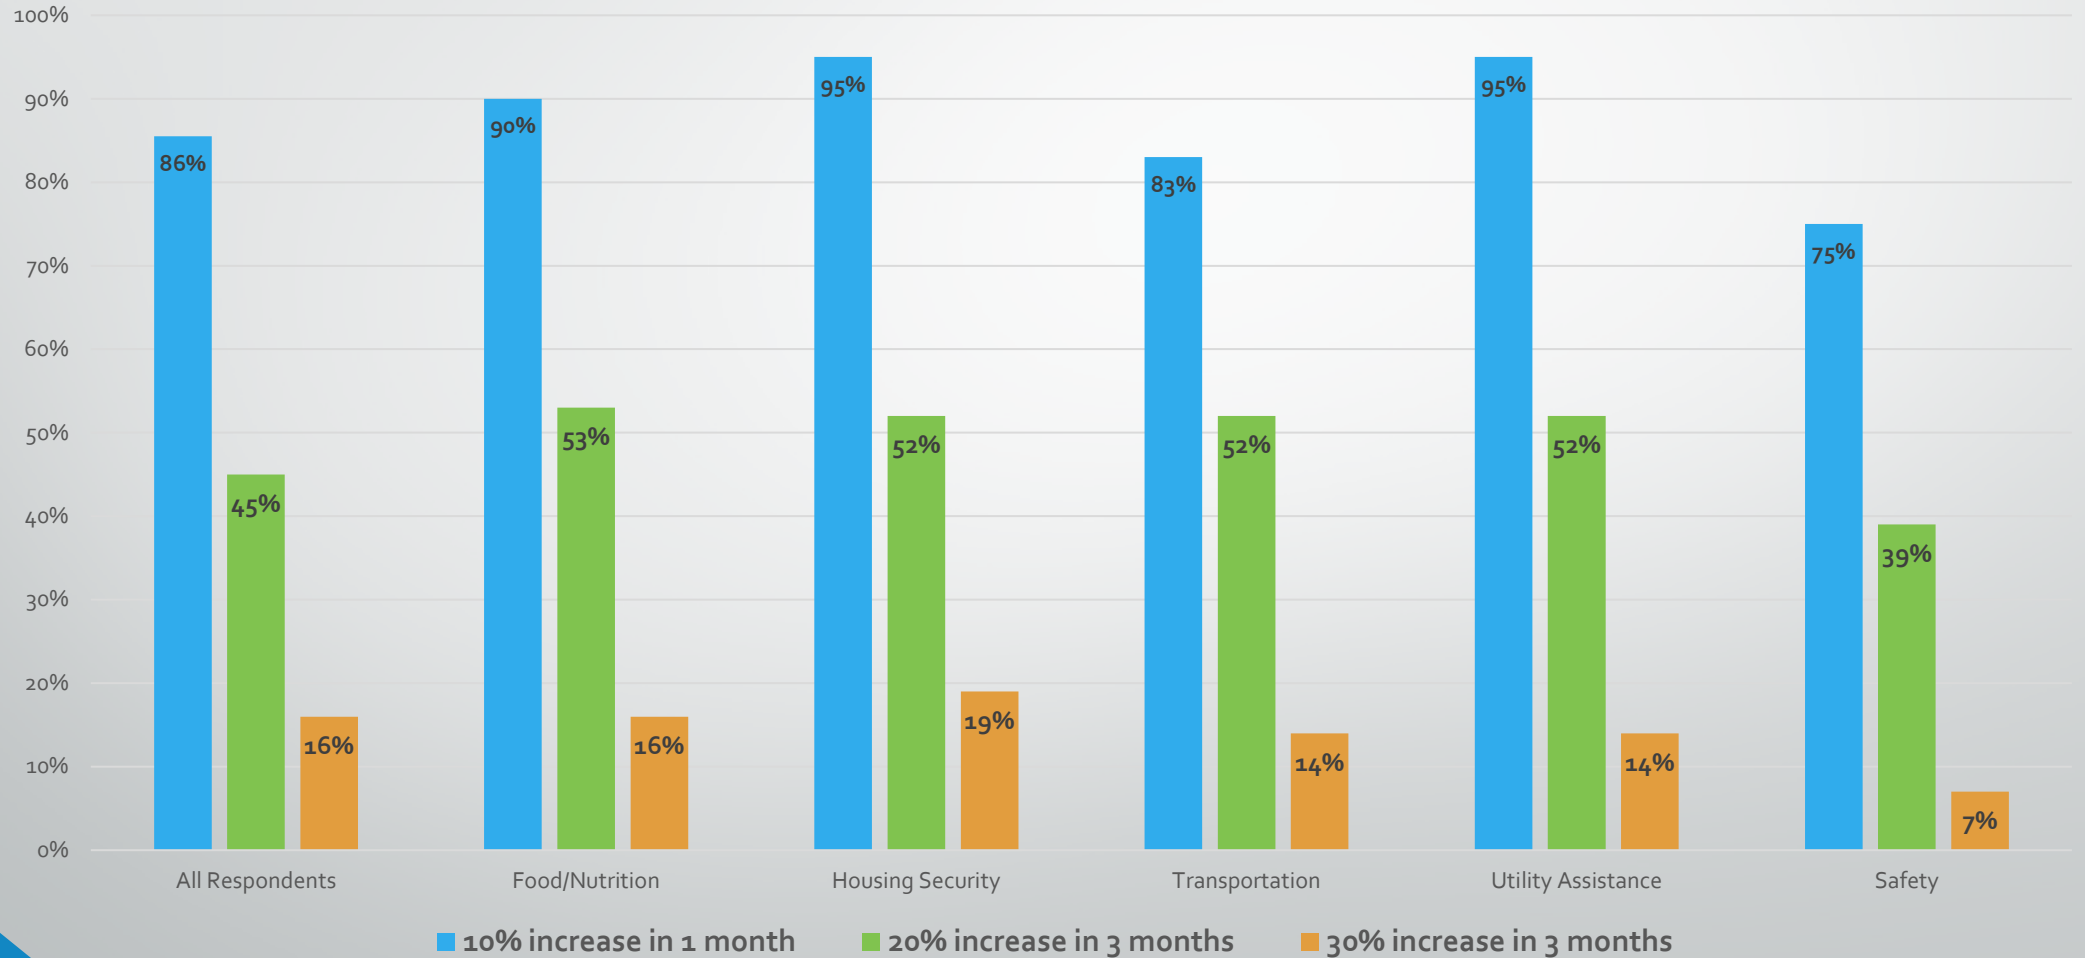

Could you sustain services to all of your clients under each of following conditions?

Could you sustain services to all of your clients under each of following conditions?

HTP - Percent answering yes

Suggestions

- Deeper engagement of more CBOs by service and by geography
- HCPF and CHASE should define what a Community-Based Organization is for their purposes. Is it a provider of direct, non-health services? An organization in a given community? Both?
- Systemic level engagement from hospitals instead of programmatic based interactions
- CBOs are mostly unaware of HTP and unprepared for new referrals from hospitals but very willing to partner to develop solutions.
- These results provide an initial indication that CBOs will not be able to handle an increase of more than 10-20% of current client levels
