

Systemic Assessment Crosswalk on Settings

In January 2014, the Centers for Medicare & Medicaid Services (CMS) published a rule to ensure that Home and Community Based Services (HCBS) are provided in settings that meet certain criteria. 79 Fed. Reg. 2948 (Jan. 16, 2014). The rule went into effect in March 2014, and states have five years—until March 2019—to ensure that their HCBS settings are compliant with the rule.

The Colorado Department of Health Care Policy & Financing (HCPF or “the Department”) has developed a Statewide Transition Plan (STP) for bringing Colorado’s HCBS settings into compliance with the HCBS Settings Rule. Under the STP, the Department has conducted a comprehensive review of the kinds of settings in which HCBS services are provided in Colorado and the state statutes, regulations, and waivers that govern the provision of HCBS services in these settings. The results of this systemic review are set forth below. Summaries and paraphrases of state legal authorities are for convenience only and are not intended to be complete or authoritative for any purpose outside of this crosswalk.

In addition to the Department, other state agencies, such as the Colorado Department of Public Health and Environment (CDPHE) and the Colorado Department of Human Services (CDHS), are involved in ensuring compliance with the HCBS Settings Rule. The Department plans to work with these agencies to ensure that their relevant statutes and regulations promote compliance. Although the Department has begun coordinating with CDPHE and CDHS on this endeavor, this crosswalk is issued only by the Department and is not a joint publication with CDPHE or CDHS.

The following notes are intended to make it easier to review and comment on the crosswalk:

1. Certain criteria in the HCBS Settings Rule apply to all HCBS settings. These criteria are set out below in red font above Table 1. Within Table 1, all affected HCBS settings are listed alphabetically from top to bottom. From left to right, the crosswalk summarizes existing state statutes, regulations, and waivers, stating whether they are consistent with, silent with respect to, or in conflict with each federal criterion.
2. Additional criteria in the HCBS Settings Rule apply only to provider-owned or -controlled residential HCBS settings. These criteria are set out below in orange font above Table 2. Within Table 2, all affected provider-owned or -controlled residential HCBS settings are listed alphabetically from top to bottom. From left to right, the crosswalk summarizes existing state statutes, regulations, and waivers, stating whether they are consistent with, silent with respect to, or in conflict with each federal criterion.
3. The Department is proposing to take a “belt and suspenders” approach to ensuring that all HCBS settings conform to the federal requirements.
 - a. Pursuant to this approach, the Department plans to propose two new regulations: 10 CCR 2505-10 AAA, requiring all HCBS settings to comply with set 1 of the federal criteria (see red text above Table 1), and 10 CCR 2505-10 BBB, requiring all provider-owned or -operated residential HCBS settings to comply with set 2 of the federal criteria (see orange text above Table 2). “AAA” and “BBB” are placeholders for numbers to be assigned later.
 - b. In addition, the Department plans to propose piecemeal edits to its regulations governing particular HCBS settings, and to work with other agencies that are involved with such settings, as set out in the two tables below. These edits are described below as “redlines.” The Department hopes that these redlines will be relatively uniform across different kinds of settings, but it invites comment on whether different language or considerations should apply to particular settings.
4. For the sake of efficiency and uniformity, the Department expects the bulk of the redlines to affect its own regulations and those of other agencies. The Department plans to seek changes to statutes and waivers only where necessary to mitigate possible conflicts with federal requirements, and not to address mere silence in a statute or waiver vis-à-vis federal requirements (which will be addressed via regulatory amendments). Working with CMS, the Department may eventually seek to amend its waivers so that similar requirements are addressed with similar language, and so that services that are provided under multiple waivers are described in a consistent way.
5. Where a statute, regulation, or waiver is silent with respect to two or more federal requirements, the silence is noted in the first column in the table; subsequent columns in the table that direct the reader to “see Column X” (prior column) mean that the authority is also silent with respect to the additional federal requirements.
6. Where the crosswalk indicates that the Department plans to propose redlines or work with another agency to do so, the public will have an opportunity down the road to review and comment on the actual proposed redlines (e.g., during a rulemaking proceeding or the notice-and-comment period for waiver amendments). Therefore, while you may comment on all aspects of this crosswalk, you may find it most efficient to focus now on big-picture issues, and to save particular wording preferences for the comment periods to come.

Set 1 of federal criteria: standards applicable to all HCBS settings (42 C.F.R. § 441.301(c)(4))

Home and community-based settings must have all of the following qualities, and such other qualities as [CMS] determines to be appropriate, based on the needs of the individual as indicated in their person-centered service plan:

- (i) The setting is integrated in and supports full access of individuals receiving Medicaid HCBS to the greater community, including opportunities to seek employment and work in competitive integrated settings, engage in community life, control personal resources, and receive services in the community, to the same degree of access as individuals not receiving Medicaid HCBS.
- (ii) The setting is selected by the individual from among setting options including non-disability specific settings and an option for a private unit in a residential setting. The setting options are identified and documented in the person-centered service plan and are based on the individual's needs, preferences, and, for residential settings, resources available for room and board.
- (iii) Ensures an individual's rights of privacy, dignity and respect, and freedom from coercion and restraint.
- (iv) Optimizes, but does not regiment, individual initiative, autonomy, and independence in making life choices, including but not limited to, daily activities, physical environment, and with whom to interact.
- (v) Facilitates individual choice regarding services and supports, and who provides them.

New Rule AAA will provide that the above standards apply to all settings in which HCBS/HCBS services are provided, except where HCBS/HCBS services are otherwise permitted to be delivered in a setting that is institutional or does not meet the HCBS settings standards, such as respite- services available under certain waivers. See 79 Fed. Reg. at 3011. Palliative/Supportive Care services provided outside the child's home (under the Children with Life-Limiting Illness waiver) are similar to respite, and new Rule AAA will not apply to such services. In addition to protecting the federally prescribed rights as set forth above, new Rule AAA will also

- protect some of the rights currently set forth in 10 CCR 2505-10 8.515.80(C) (rights of participants in the Waiver for People with Brain Injury);
- require that if restraints are used with an individual, the use be based on an assessed need after all less restrictive interventions have been exhausted; be documented in the individual's person-centered plan as a modification of the generally applicable settings criteria, consistent with the standards in Rule BBB; be compliant with any applicable waiver; and be reassessed over time;
- provide that any restrictive or controlled egress measures must be consistent with the following criteria:
 - o the measures are implemented on an individualized (not setting-wide) basis;
 - o the measures make accommodations for individuals who are not at risk of wandering or exit-seeking behaviors;
 - o the measures are documented in the individual's person-centered plan as a modification of the generally applicable settings criteria, consistent with the standards in Rule BBB;
 - o the plan documents an assessment of the individual's wandering or exit-seeking behaviors (and the underlying conditions, diseases, or disorders relating to such behaviors) and the need for safety measures; options that were explored before any modifications occurred to the person-centered plan; the individual's understanding of the setting's safety features, including any controlled-egress; the individual's choices for prevention of unsafe wandering or exit-seeking; the individual's and their caregivers'/representatives' consent to controlled-egress goals for care; the individual's preferences for engagement within the setting's community and within the broader community; and the opportunities, services, supports, and environmental design that will enable the individual to participate in desired activities and support their mobility; and
 - o the measures are not developed or used for non-person-centered purposes, such as punishment or staff convenience;
- provide that if an individual requests that a provider hold his/her funds, their signed person-centered plan must document this request, the reasons for the request, and the parties' agreement on how the provider should handle the funds (including acknowledgement of the provider's obligations under C.R.S. 25.5-10-227 and the Social Security Administration's (SSA's) requirements for representative payees, if applicable or if the parties so elect) and what they define as "reasonable amounts" under C.R.S. 25.5-10-227 (if applicable or if the parties so elect).

6-8. Private homes belonging to clients or their families, professional provider offices, and clinics	Colorado's statutes, regulations, and waivers do not expressly require that private homes, professional provider offices, and clinics be integrated, selected by the individual, etc. Colorado understands CMS's position to be that if HCBS services are provided in a private home, professional provider office, or clinic, the setting must meet the HCBS settings requirements set forth in 42 C.F.R. § 441.301(c)(4). Colorado plans to promulgate new Rule AAA making these requirements applicable to all settings in which HCBS services are provided. Set 2 of federal criteria: standards applicable to provider-owned or controlled residential settings (42 C.F.R. § 441.301(c)(4))

Home and community-based settings must have all of the following qualities, and such other qualities as [CMS] determines to be appropriate, based on the needs of the individual as indicated in their person-centered service plan: . . .

(vi) In a provider-owned or controlled residential setting, in addition to the qualities at §441.301(c)(4)(i) through (v), the following additional conditions must be met:

(A) The unit or dwelling is a specific physical place that can be owned, rented, or occupied under a legally enforceable agreement by the individual receiving services, and the individual has, at a minimum, the same responsibilities and protections from eviction that tenants have under the landlord/tenant law of the State, county, city, or other designated entity. For settings in which landlord tenant laws do not apply, the State must ensure that a lease, residency agreement or other form of written agreement will be in place for each HCBS participant, and that the document provides protections that address eviction processes and appeals comparable to those provided under the jurisdiction's landlord tenant law.

(B) Each individual has privacy in their sleeping or living unit:

(1) Units have entrance doors lockable by the individual, with only appropriate staff having keys to doors.

(2) Individuals sharing units have a choice of roommates in that setting.

(3) Individuals have the freedom to furnish and decorate their sleeping or living units within the lease or other agreement.

(C) Individuals have the freedom and support to control their own schedules and activities, and have access to food at any time.

(D) Individuals are able to have visitors of their choosing at any time.

(E) The setting is physically accessible to the individual.

(F) Any modification of the additional conditions, under §441.301(c)(4)(vi)(A) through (D), must be supported by a specific assessed need and justified in the person-centered service plan. The following requirements must be documented in the person-centered service plan:

(1) Identify a specific and individualized assessed need.

(2) Document the positive interventions and supports used prior to any modifications to the person-centered service plan.

(3) Document less intrusive methods of meeting the need that have been tried but did not work.

(4) Include a clear description of the condition that is directly proportionate to the specific assessed need.

(5) Include regular collection and review of data to measure the ongoing effectiveness of the modification.

(6) Include established time limits for periodic reviews to determine if the modification is still necessary or can be terminated.

(7) Include the informed consent of the individual.

(8) Include an assurance that interventions and supports will cause no harm to the individual.

New Rule BBB will provide that the above standards apply to all provider-owned or controlled residential settings in which HCBS/HCB services are provided, except where HCBS/HCB services are otherwise permitted to be delivered in a setting that is institutional or does not meet the HCBS settings standards, such as respite- available under certain waivers. See 79 Fed. Reg. at 3011. Palliative/Supportive Care services provided outside the child's home (under the Children with Life-Limiting Illness waiver) are similar to respite, and new Rule BBB will not apply to such services. In addition to protecting the federally prescribed rights as set forth above, new Rule BBB will also protect some of the rights currently set forth in 10 CCR 2505-10 8.515.80(C) (rights of participants in the Waiver for People with Brain Injury).

Additional updates: Under the Brain Injury (BI) Waiver, respite is defined as "Services provided to individuals unable to care for themselves; furnished on a short-term basis because of the absence or need for relief of those persons normally providing the care." BI Waiver, App. C. The BI Waiver regulations state that "Respite Care means services as defined at Section 8.516.70." 10 CCR 2505-10 8.515.2. The cited regulation, in turn, states that "[a]n individual client shall be authorized for no more than a cumulative total of thirty (30) days of respite care in each certification period unless otherwise authorized by the Department." *Id.* 8.516.70. The Department will propose to add this modifiable 30-day limit to the waiver.

The Supported Living Services (SLS) Waiver states that "Respite services [are] provided on a short-term basis, because of the absence or need for relief to those persons who normally provide care for the participant." SLS Waiver, App. C. In addition, SLS waiver participants can obtain only a limited amount of respite, because they are subject to a Service Plan Authorization Limit (SPAL), that is, "an annual upper payment limit of total funds available to purchase services to meet the client's ongoing needs." *Id.* 8.500.90. The Department will propose to add a modifiable 30-day limit, similar to the one in the BI Waiver regulations, to the SLS Waiver and regulations.

Global updates: in 10 CCR 2505-10 8.500 et seq., 8.500.90 et seq., and 8.503 et seq. (regulations for DD, SLS, and CES waivers), and 8.600 et seq. (regulations for individuals with IDD), the Department plans to update definitions and references involving the Division for Developmental Disabilities and the Operating Agency (*i.e.*, the former DDD within CDHS) to the Division for Intellectual & Developmental Disabilities (*i.e.*, the current DIDD within HCPF). In these regulatory sections and in 10 CCR 2505-10 8.100.1 (Definitions), the Department also plans to update references involving intermediate care facilities for the mentally retarded (ICF/MRs or ICF-MRs) to intermediate care facilities for individuals with intellectual disabilities (ICF/IIDs).
