The Average Speed to Answer (ASA) for all calls to the call center shall not exceed one (1) minute during each month. The ASA shall be defined as the wait time before a caller starts talking to an agent and includes the amount of time callers wait in a queue and while the agent's phone rings. An "Answer," shall be defined as a live agent talking to a caller, and not as a machine communicating with a caller.						

The QMP shall be calculated as a percentage of the total number of weeks in each month. Each week in a four-week month is valued at 25% of the QMP for that month. Each week in a five-week month is valued at 20% of the QMP for that month. The number of weeks in a month is determined as any week in which the majority of business days falls within a given month.
