*Note: Metric #6 includes inpatient and residential SUD services for individuals with a diagnosis of SUD in any position on a claim. Metric #10 includes inpatient and residential SUD services for individuals with a diagnosis of SUD in the primary position on a claim. For some subpopulations, this results in the unduplicated number of individuals receiving SUD services (Metric #6) exceeding the number of individuals receiving the total number of services as defined in Technical Specifications 5.0. CMS is aware of this nuance and is investigating whether to align specifications for Metrics #6 and #10. This metric programming nuance affects the subpopulations of Dual Eligibles, Older Adults, and Children. Because the number of inpatient and residential SUD services contributes to Metric #6 exceeding the sum of Metrics #7-12, it suggests that additional preventive, outpatient, and intensive outpatient care is needed to divert the acute levels of care.*
