## Phase III

CDAC

September 13, 2023

Adela Flores-Brennan (she/her), John Barry - HCPF  
Suman Mathur (she/her), Kendra Neumann (she/her) - CHI

# Agenda

1. History and Background of the ACC | 10:10 - 10:20
2. Discussion: Pain Points and Opportunities for Improving Disability Competent Care | 10:20 - 10:30

# History & Background of the ACC

# Roles of the RAEs

1. Build a network of care providers
  - Contract with Primary Care Medical Providers (PCMPs)
  - Contract with behavioral health providers and administer the capitated behavioral health benefit
2. Provide care coordination, care programs, and case management
  - Some RAEs do this themselves, while others contract this out
3. Assist with practice transformation (e.g. support PCMP offices integrating behavioral health services into their clinics)
4. Respond to local community needs to best support Medicaid members

# HCPF's relationship to RAEs and Providers

- Contracts with RAEs:
  - HCPF pays RAEs a per-member per-month (PMPM) payment and a capitated payment for behavioral health.
- Payment agreements with providers:
  - HCPF directly reimburses physical health providers with fee-for-service payments.

# RAEs contract with providers

- Contracts with behavioral health providers:
  - RAEs reimburse behavioral health providers for all services.
- Contracts with physical health providers:
  - RAEs pass on PMPM payments to providers and can also provide bonus or alternative payments.

# ACC Phase III

# Goals for Phase III

- **Improve** quality care for members
- **Close** health disparities and **promote** health equity
- **Improve** care access
- **Improve** the member and provider service experience
- **Manage** costs to protect member coverage and benefits, and provider reimbursements

**Do you have  
clarifying  
questions about  
ACC Phase III?**

# Discussion

# Improving Access to Disability Competent Care

- How can your RAE or provider(s) improve your experiences accessing care?
- What are some best practices you've seen in the community that you'd like to see replicated?
