Title of Rule: Revision to the Medical Assistance Rule concerning Child Health Plan Plus program rule updates, Sections 110,140, 310 and 320
Rule Number: CHP 21-03-30-B

REGULATORY ANALYSIS

1. Describe the classes of persons who will be affected by the proposed rule, including classes that will bear the costs of the proposed rule and classes that will benefit from the proposed rule.

The proposed rules will impact members enrolled in the CHP+ programs. The rule updates will benefit members enrolled in CHP+ by remaining eligible during this Coronavirus (COVIS-19) Public Health Emergency.

2. To the extent practicable, describe the probable quantitative and qualitative impact of the proposed rule, economic or otherwise, upon affected classes of persons.

The proposed rule will help to determine eligibility correctly by applying regulations appropriately to help members remain eligible for the CHP+ programs during this Coronavirus (COVID-19) Public Health Emergency.

3. Discuss the probable costs to the Department and to any other agency of the implementation and enforcement of the proposed rule and any anticipated effect on state revenues.

The Department expects that eligibility could potentially increase as members who are outside the state for the duration of the emergency will not be disenrolled. This will lead to an increase in expenditure for the Department as the member will be included in the monthly capitation payment. The Department also assumes that the waiving of enrollment fees for the CHP+ program will reduce revenues to the Department which will result in the increase of expenditures to the CHP+ Trust fund, Healthcare Affordability and Sustainability Fee (HAS) Cash Fund, and federal funds in order to fill the gap in revenue lost from the premiums. Compare the probable costs and benefits of the proposed rule to the probable costs and benefits of inaction.

4. Compare the probable costs and benefits of the proposed rule to the probable costs and benefits of inaction.

The Department expects that inaction to the proposal to allow CHP+ member to retain eligibility outside the state will result in lack of care to those members who are outside the state during the emergency period who will need those services. The Department sees no benefit to inaction.

In addition, the Department expects that inaction to the proposal to waive enrollment fees will cause potential members to not qualify because they are unable to pay the

premiums due to the severity of the economic shock. The Department also sees no benefit to inaction.

5. Determine whether there are less costly methods or less intrusive methods for achieving the purpose of the proposed rule.

There are currently no less costly measures to the Department that will allow the Department to service members more effectively during the emergency period.

6. Describe any alternative methods for achieving the purpose for the proposed rule that were seriously considered by the Department and the reasons why they were rejected in favor of the proposed rule.

There are no alternative methods for the proposed rule that were considered
