(1) Adjusted CORE value due to billing issues. 1915(i) program mid from invoices and other claims were billing program expenditure incorrectly.

(2) Presented information regarding the enrolled clients in each waiver is derived from the average number of monthly PARs (Prior Authorization Requests) for the waiver.

(3) N/A - Data cannot be displayed due to the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

(4) Percentage selected to modify enrollment for FY 2020-21 through FY 2022-23

(5) Percentage selected to modify per enrollee costs for FY 2020-21 through FY 2022-23

(6) Enrollment in 1915(i) waiver ended in FY 2018-19 due to members transferring to the SLS waiver.

(7) Waiver operation ended 6/30/2018.

(1) Average Monthly Enrollment is defined by the average number of active PARs, for each waiver, per month.										
(2) Average Monthly Waiver Utilizers is defined by the average number of clients with a paid claim, for each waiver, per month of service.										
(3) The selected FY 2020-21, FY 2021-22, FY 2022-23 Average Monthly Utilizer Conversion Factor for all waivers is an average of the two previous fiscal year actuals. See narrative for more detail.										
(4) N/A - Waiver ended operation on 1/1/2019.										
(5) Waiver ended operation 6/30/2018

(1) RN Group/LPN Group and Blended RN/LPN Services are forecasted individually, but due to small cells sizes, the three services are grouped together. The rate is weighted across the three services based on utilization. The unit of service (hour) is constant across the three services.				
(2) Presented information regarding the utilizer per service is derived from the average number of clients with a paid claim per month. The Department believes this to be an accurate representation of utilizers for PDN services as clients typically continue services once a need is identified.				
(3) N/A - Rows cannot be displayed due to the Health Insurance Portability and Accountability Act of 1996 (HIPAA).				
(4) Since clients can access multiple services, the total average utilizers per month does not reflect the sum of the services but rather the total average utilizers per month for PDN as a benefit.

(1) Due to cell sizes, the Telehealth forecast is done at the total expenditure level. Telehealth is not a widely utilized service and displaying utilization figures would violate the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

(2) Presented information regarding the utilizers per service is derived from the average number of clients with a paid claim per month. The Department believes this to be an accurate representation of utilizers for LTHH services as clients typically continue services once a need is identified.

(3) Since clients can access multiple services, the average utilizers does not reflect the sum of the services but rather the total Average Utilizers Per Month for LTHH as a benefit.

**Hospice Nursing Facility Room and Board FY 2020-21, FY 2021-22 and FY 2022-23 Footnotes:**

- (1) Fiscal year per diems are the quotient of annual IBNR-adjusted expenditure and patient days, by first-date-of-service. Estimates for FY 2020-21, FY 2021-22, and FY 2022-23 are computed by applying rate reductions where appropriate and projecting the maximum-allowable-growth (2%) in General Fund expenditure. See footnote (4) for a detailed discussion of incurred-but-not-reported analysis. Rate reduction in FY 2020-21, FY 2021-22, and FY 2022-23 due to HB 13-1152; see footnote (6) for further detail.

- (4) Of the estimated costs for the current year dates of service, a portion of those claims will be paid during the same fiscal year in which they were incurred while the rest of the claims will be paid in a future period. In order to estimate how much of the total expenditure incurred in the current year will be paid in the current year, expenditure patterns must be analyzed by month. This is because, for example, a claim incurred in July 2017 has 11 more months to pay during FY 2017-18 (from August 2017 to June 2018), while a claim incurred in May 2018 only has one additional month to pay during FY 2017-18 (June 2018). Thus, more claims from May 2018 will pay in FY 2018-19 than claims from July 2017. Based on the Department's estimate of incurred-but-not-reported (IBNR) claims, the Department estimates in the table below the portion of claims outstanding for any given fiscal year by analyzing estimated IBNR (based on five years of data) and averages the total to provide an estimate of the total percentage of claims that will pay in the same fiscal year that the claim was incurred.

**Estimate of Claims Incurred and Paid in the Same Fiscal Year**

Month Incurred	Additional Months Until End of Fiscal Year	Estimated Percent Complete at End of Fiscal Year (IBNR Factor)
July	11	99.96%
August	10	99.88%
September	9	99.66%
October	8	99.41%
November	7	99.09%
December	6	98.72%
January	5	98.30%
February	4	97.34%
March	3	95.76%
April	2	93.11%
May	1	88.47%
June	0	79.52%
Average		95.77%

- (5) As calculated in the table below, the estimated FY 2020-21 expenditure for core components with FY 2019-20 dates of service is the estimated FY 2019-20 core components per diem rate multiplied by the estimated number of patient days. This calculation is then multiplied by one minus the calculated IBNR rate.

Calculation of Expenditure From Claims in Previous Fiscal Year	FY 2019-20	Source

- (6) HB 10-1324 imposed a rate reduction of 1.5% effective March 1, 2010 and effective until June 30, 2011. HB 10-1379 imposed a rate reduction of 1% in addition to the rate reduction of HB 10-1324 for the period of July 1, 2010 to June 30, 2011. SB 11-215 imposed a rate reduction of 1.5% effective July 1, 2011 for FY 2011-12 that was extended for FY 2012-13 by HB 12-1340. HB 13-1152 extended the 1.5% rate reduction indefinitely, effective July 1, 2013. The rate reductions apply to all days incurred under the effective periods of each bill. As not all days will be reported in the fiscal year in which they are incurred, the impact of the rate cuts extends over multiple fiscal years. The tables below show the incremental impact of HB 13-1152. These figures may vary from previous submissions of the Department's requests due to revised forecasts for rates and patient days. Because HB 13-1152 made the 1.5% rate reduction permanent, potential rate reductions of 1.5% for FY 2020-21, FY 2021-22, and FY 2022-23 are accounted for here.

- (7) Hospice Services refers here to the following categories of service: hospice routine home care, hospice general inpatient, continuous home care, hospice inpatient respite, hospice physician visit, and hearing, vision, dental, and other PETI services. Hospice routine home care (HRHC) expenditure is forecast by multiplying estimated patient days by estimated rates in FY 2020-21, FY 2021-22, and FY 2022-23. HRHC patient days for FY 2020-21 are estimated by trending forward FY 2019-20 patient days by 2.79%, while FY 2021-22 and FY 2022-23 patient days are estimated by trending forward the previous year's patient days estimate also by 2.79%. HRHC rates are estimated by trending forward the previous years rates by 3.00%. Hospice general inpatient expenditure estimates are produced by assuming an increase of 2.77% for FY 2019-20, FY 2020-21, and FY 2021-22. Expenditure estimates for the remaining service categories are based on trending FY 2019-20 actuals forward by 10.00% for FY 2020-21.
