FTE	0.0	0.0	0.0

Summary of Request

For FY 2025-26 the Department requests an increase of \$59,301,174 total funds, including an increase of \$32,293,538 General Fund and a decrease of \$116,084 Healthcare Affordability & Sustainability Fee Cash Fund (HAS Fee Fund). For FY 2026-27 the Department requests an increase of \$136,855,181 total funds, including an increase of \$72,893,346 General Fund and a decrease of \$1,713,868 HAS Fee Fund. These funds would be used to fund Home and Community Based Services (HCBS) waiver program costs. The request includes funding for Adult Comprehensive (HCBS-DD) reserved capacity and emergency enrollments totaling 510 per fiscal year.

Senate Bill (SB) 21-039, "Eliminate Sub-minimum Wage Employment," directed the Department to create a Buy-In option for HCBS-DD Waiver services. The Department began automatic enrollments for DD Buy-In on January 1, 2020. Currently, the number of members identified as eligible for DD Buy-In is significantly higher than original fiscal note estimates, and the HAS Fee Fund cannot sustain the current level of DD Buy-In enrollments. Therefore, instead of increasing HAS Fee expenditure projections to align with DD Buy-In enrollment, the Department requests to continue using General Fund for members who were moved to DD Buy-In. The Department is continuing to investigate the discrepancy between current DD Buy-In enrollments and original estimates.

Current Program

Effective July 2018, the Department manages four Medicaid HCBS waiver programs for people with developmental disabilities: Adult Comprehensive Services (HCBS-DD), Supported Living Services (HCBS-SLS), Children's Extensive Services (HCBS-CES), and Children's Habilitation Residential Program (HCBS-CHRP). These programs provide services such as residential care, day habilitation services and behavioral services, as well as case management, and are delivered through a variety of approved providers.

Problem or Opportunity

Each year, the Department's appropriations for programs serving individuals with intellectual and developmental disabilities are set in advance of the fiscal year, based on prior year utilization and expenditure. As more recent data becomes available, the appropriation needs to be adjusted to account for the most recent projections of expenditure and caseload in order to minimize any potential over or under-expenditures. The Department requests to adjust existing appropriations and designated full program equivalents (FPE) within the four Medicaid waiver programs for people with developmental disabilities: Home and Community Based Services Adult Comprehensive Services (HCBS-DD), Supported Living Services (HCBS-SLS), Children's Extensive Services (HCBS-CES), and Children's Habilitation Residential Program (HCBS-CHRP); further, the Department's request accounts for associated changes to Case Management services. Adjustments to targeted appropriations accurately reflect the current cost per FPE, based upon current spending trends, and maximize the number of individuals that can be served in the programs.

The Home and Community Based Services, Adult Comprehensive services program (HCBS-DD) provides services to adults with developmental disabilities who require extensive supports to live safely in the community and who do not have the resources available to meet their needs. The Home and Community Based Services - Supported Living Services program (HCBS-SLS) is for adults who can either live independently with limited to moderate supports or who need more extensive support provided by other persons, such as their family. The Home and Community Based Services - Children's Extensive Services program (HCBS-CES) provides benefits to children who have a developmental disability or delay, and who need near constant line of sight supervision due to behavioral or medical needs. The Home and Community Based Services -Children's Habilitation Residential Program (HCBS-CHRP) provides treatment and out of home services for children with intellectual and developmental disabilities and very high needs. The CHRP waiver was transferred from the Colorado Department of Human Services (DHS) to the Department effective July 1, 2018. HB 18-1328 "Redesign Residential Child Health Care Waiver" gave the Department authority to operate the waiver and directed the Department to redesign the waiver and receive federal approval from the Centers for Medicare and Medicaid Services (CMS) on the newly redesign waiver. The Department received approval from CMS on the redesigned waiver in June 2019 and the redesigned waiver went into effect July 1, 2019.

In FY 2012-13, the Department of Human Services requested and received funding to eliminate the waiting list for the HCBS-CES program. In FY 2013-14, the Department of Health Care Policy

and Financing requested and received funding to eliminate the waiting list for the HCBS-SLS program. In order to prevent new waiting lists the General Assembly must provide new funding each year to allow for growth in both programs. In contrast, the HCBS-DD program continues to have a waiting list for services; as of the November 1, 2021 Update to the Strategic Plan for Assuring Timely Access to Services for Individuals with Intellectual and Developmental Disabilities (House Bill 14-1051), there were 2,819 people waiting to receive HCBS-DD waiver services. The waiting lists may include those requiring emergency enrollments as well as those transitioning out of institutional settings. Additionally, the list may include current Medicaid recipients being served in an alternative waiver that does not fully meet their needs and may also include individuals being served in nursing facilities or hospitals that are not as costeffective as the HCBS waivers.

Each year, additional enrollments in the HCBS-DD waiver are needed to provide resources for emergency placements, individuals transitioning out of foster care, from a youth waiver, or transitions from an institutional setting. Without additional enrollments each year, people with intellectual and developmental disabilities would transition to other less appropriate, costlier settings or become vulnerable to abuse, neglect or homelessness as an increasing number of people continue to wait on the list to receive the services they need.

Proposed Solution

To adjust the current appropriations for the programs administered by the Office of Community Living, for FY 2025-26 the Department requests an increase of \$59,301,174 total funds, including an increase of \$32,293,538 General Fund and a decrease of \$116,084 Healthcare Affordability & Sustainability Fee Cash Fund. For FY 2026-27 the Department requests an increase of \$136,855,181 total funds, including an increase of \$72,893,346 General Fund and a decrease of \$1,713,868 Healthcare Affordability & Sustainability Fee Cash Fund. Based on the assumptions used in this request, the Department calculated maximum enrollment figures for each waiver program and the number of full-program equivalents (FPE) for each fiscal year. If this request is approved, the Department calculates that by the end of FY 2025-26 it would serve: 9,169 enrollees on the HCBS-DD waiver, 5,052 enrollees on the HCBS-SLS waiver, 5,201 enrollees on the HCBS-CES waiver, and 569 enrollees on the HCBS-CHRP waiver. For the years covered in the request, the Department would limit HCBS-DD enrollments to the maximum enrollment figure. However, for the HCBS-SLS, HCBS-CES, and HCBS-CHRP programs, the Department would adhere to the policy of maintaining no waiting lists; therefore, the enrollment numbers are for information only, and the Department would exceed those figures if necessary and use the regular budget process to account for any change in the estimates. The number of associated FPE for each fiscal year is shown in exhibit D.3 of the appendix.

Anticipated Outcomes

The Office of Community Living finances long term services and supports in the community to adults and children with developmental disabilities who would otherwise receive services in more restrictive and expensive institutional settings or who would be without services

altogether. The Department strives to provide the right services to the right people at the right time and place.

The Department's request includes as much funding as possible to provide needed services for the highest number and the most at-risk eligible people. If the Department's request is approved, the Department would have resources to cover 19,991 people on average per month in FY 2025-26, and 21,576 people on average per month in FY 2026-27, thereby improving their physical, mental, and social well-being and quality of life.

Assumptions and Calculations

Department's calculations are contained in the appendix. The appendix is organized into a series of exhibits, providing both calculation information and historical cost and caseload detail. The section below describes each exhibit individually. In many cases, the specific assumptions and calculations are contained in the exhibits directly; the narrative information below provides additional information and clarification where necessary.

Exhibit A.1.1 - A.1.13: Calculation of Request

This exhibit provides the final calculation of the incremental request, by line item. Values in the total request column are taken from calculations in exhibits A.2 through A.4, as well as exhibit C which relates to projected expenditure. The adjusted spending authority amounts reflect the estimated appropriation for each line and can be found in Tables G.1 through G.3. The incremental request is the sum of the differences between total request and spending authority for each line item.

Exhibit A.2 through A2.4: Current, Request, and Out Year Fund Splits

These exhibits provide a breakdown for each line item's expenditure estimate including fund splits for each program. This exhibit also allows for adjustments in the federal financial participation rate (FFP) based on the type of services delivered within each program.

Following the declaration of a public health emergency by the Secretary of Health and Human Services during the COVID-19 pandemic, CMS notified states that an increased FMAP would be available for each calendar quarter occurring during the public health emergency, including retroactively to January 1, 2020. To be eligible to receive the 6.2 percentage point FMAP increase, states must adhere to a set of requirements which include, but are not limited to, maintaining eligibility standards, methodologies, and procedures; covering medical costs related to the testing, services, and treatment of COVID-19; and not terminating individuals from Medicaid if such individuals were enrolled in the Medicaid program as of the beginning date of the emergency period or during the emergency period. The Department is compliant with all requirements and has been drawing the enhanced federal match accordingly. The Consolidated Appropriations Act of 2023 decoupled the continuous coverage requirement and the additional federal match from the public health emergency declaration. The continuous coverage requirement and additional federal match both ended on March 31, 2023. The current

6.2 percent additional match stepped down to 5.0 percent from April 2023 through June 2023, 2.5 percent from July through September 2023, and 1.5 percent from October through December 2023, after which there was no longer an additional match. The state portion of Buy-In expenditure is paid for with Healthcare Affordability & Sustainability Fee Cash Fund dollars, while standard HCBS-SLS and case management are paid for with General Fund dollars. Costs associated with Buy-In HCBS-SLS and case management services are separated in these exhibits to reflect the difference in funding source.

Exhibit A.5: Cash Funds Report

Recent iterations of the Department's forecast include the addition of several cash fund sources. Because of this, the Department has added Exhibit A.5 to clarify the amount of and source of cash funds allocated and requested in each year.

Exhibit A.6: Buy-In Adjustments

HB 16-1321 "Medicaid Buy-In Certain Waivers" created a buy-in option for working adults who would otherwise not qualify due to income or asset limits for the HCBS-SLS waiver. The program was implemented on December 1, 2017. SB 21-039 "Elimination of Subminimum Wage Employment" created a buy-in option for working adults who would otherwise not qualify due to income or asset limits for the HCBS-DD waiver. The buy-in option for the HCBS-DD waiver began implementation on January 1, 2020.

This tab separates expected expenditure of HCBS-DD and HCBS-SLS clients using the disabled buy-in eligibility criteria to access the waiver. Expected expenditure for this population is included in the total expenditure values calculated in Exhibit B and C but is funded with HAS Fee Fund dollars instead of General Fund dollars. Exhibit A.6 services to isolate the amount expected to be spent on this population and to calculate the amount of funding required from the HAS Fee Fund. This exhibit can also be used to track cost and caseload trends in the HCBS-SLS Buy-In program.

In FY 2019-20, the Department began to automatically move clients who met criteria for Working Adults with Disabilities (WAwD), the Department's Medicaid Buy-In program, into the appropriate Buy-In category. This is intended to allow clients who are able to work to earn more and accumulate more resources. The change was requested and reviewed with the stakeholder community. Clients who are automatically moved have the option to opt-out of the WAwD program and remain under the more restrictive criteria of their existing waiver. As a result of this change, the Department saw a significant increase in the number of SLS Buy-In clients.

Exhibit B: Summary of Program Costs

This exhibit provides a summary of historical program expenditure, as paid for through the Department's Medicaid Management Information System (MMIS), and projected totals as calculated in exhibit C.

Exhibit C: Calculation of Projected Expenditure

This exhibit provides the calculation of projected expenditure using revised assumptions about caseload and per FPE cost (calculated in exhibits D.3 and E, respectively). The exhibit then calculates the difference between the appropriated or base request amounts which results in the estimated over/under-expenditure for each waiver, by fiscal year. In fiscal years where systemic under-expenditure exists, this exhibit would also calculate an additional number of people that could be enrolled within existing resources and converts the total enrollment figures into new paid enrollments and calculated the new cost for additional enrollments for each fiscal year. This exhibit calculates costs for Medicaid matched services only and does not include State-Only programs. Therefore, the appropriation reflected in this exhibit does not match the adjusted appropriation in Exhibit A.1.

Exhibit D.1: Calculation of Maximum Enrollment

Department's calculations are contained in the appendix. The appendix is organized into a series of exhibits, providing both calculation information and historical cost and caseload detail. The section below describes each exhibit individually. In many cases, the specific assumptions and calculations are contained in the exhibits directly; the narrative information below provides additional information and clarification where necessary. To forecast the number of enrollments, the Department took the appropriated enrollments from the Long Bill and estimated a base trend. Selection of trends for each waiver are discussed below. Once the base enrollments are determined, the Department adds additional enrollments authorized through special bills or other initiatives, as bottom line adjustments, to reach the final estimated maximum enrollment. This process is repeated for the request year and the out year. Information on trend selection and Bottom-Line Adjustments for each program are provided below.

As of FY 2014-15 there is no longer a waiver cap in the HCBS-SLS or HCBS-CES waivers, so the maximum enrollment forecast for these waivers has been removed from the exhibits.

Adult Comprehensive Waiver (DD)

For FY 2024-25, the Department was appropriated funding for 7,990 enrollments through HB 24-1430 "FY 2024-25 Long Appropriations Bill" which included a request to increase the HCBS-DD enrollment cap by 129 clients as bottom-line adjustments. These bottom-line adjustments were composed of 189 emergency enrollments, 10 foster care transitions, 22 clients expected to move from an institutional setting, 71 youth transitions expected to move to the HCBS-DD waiver as they age out of the youth, and 129 enrollments appropriated through JBC action.

The Department bases its emergency enrollment forecast on the number of emergency enrollments that enrolled in the HCBS-DD waiver during FY 2024-25. In FY 2014-15 and FY 2015-16 the Department provided increased training to Community Centered Boards (CCBs) on the emergency enrollment criteria and process, while at the same time updating the forms necessary to initiate an emergency enrollment. The Department believes that part of the

increase in emergency enrollments is a result of CCBs becoming more adept at identifying potential emergency enrollments, and more aware of the steps necessary to enroll a client as an emergency enrollment.

The Department also believes that trends in the Colorado housing market have impacted the number of emergency enrollments into the HCBS-DD waiver. A common cause of an emergency enrollment is impending homelessness. Many individuals have lost housing due to rent increases, homes being sold after elderly caregivers & parents pass away, and limited access to Section 8 housing. The Department has received feedback from stakeholders that there has been an increase in the age of caregivers. As caregivers age, some become less willing or able to provide the level of care needed by the client, leaving them neglected and more likely to qualify as an emergency enrollment.

Clients authorized as emergency enrollments, who may or may not be on the HCBS-DD waitlist, are allowed to enroll in the HCBS-DD waiver prior to clients on the waitlist. Without additional enrollments allocated for these clients, they would continue to take priority over clients on the HCBS-DD waitlist thereby increasing the size of the waitlist and waiting period for clients on the waitlist. If there are no allocated enrollments available, clients meeting the emergency criteria may find themselves in settings that do not meet their needs, leave them open to abuse or neglect, or leave them vulnerable to homelessness. Emergency enrollment, however, has been more constant throughout the most recent fiscal years. The Department believes this is due to the focus on authorizing enrollments through churn and increased resources for managing the waiting list. Therefore, this forecast does not include any substantial changes to the way emergency enrollments are forecast.

Exhibit D.2: Conversion of Enrollment to Full Program Equivalent (FPE)

Department's In order to properly calculate expenditure, the Department must use a consistent caseload metric that directly ties to expenditure. In this exhibit, and throughout the request, the Department uses average monthly paid enrollment to determine the number of clients for which it anticipates paying claims for in each fiscal year. This caseload metric is referred to as "full-program equivalents," or FPE. The Department notes, however, that the number of FPE is not always equal to the enrollment for each waiver. The relationship of FPE to maximum enrollment can vary based on a large number of factors including lag between enrollment and delivery of services and the lag between delivery of services and billing of claims; however, in order to accurately set the appropriation and manage the program, it is critical to explicitly identify both the number of FPE, enrollment, and the interaction between the two.

The Department's methodology to account for the above-mentioned variation includes the selection of an FPE conversion factor which is based on the ratio of average monthly enrollments (as calculated in Exhibit D.3) to FPE in historical data. Enrollments are derived from the number of unique waiver clients in a given month with an active prior authorization request (PAR) which means that these clients have been authorized by the CCBs to receive services. The Department then uses this metric to convert the average monthly enrollment forecast to projected FPE in Exhibit D.3.

For each waiver, the selected FPE current year conversion factor is calculated using an average of historical data. For HCBS-DD, HCBS-SLS, and HCBS-CES, the Department selected a conversion factor based on historical data prior to the start of the COVID-19 Public Health Emergency. The Department anticipates that waiver participation will continue to increase following the end of the public health emergency and during the post-pandemic recovery. For HCBS-CHRP, the Department selected an FPE conversion factor consistent with the HCBS-CES waiver.

The Department assumes that the conversion factor for HCBS-DD Buy-In and HCBS-SLS Buy-In services will match that of non-Buy-In HCBS-SLS services because Buy-In clients will exist in the same provider environment, with the same barriers to access, as non-Buy-In clients. Furthermore, the Department expects Buy-In clients to exhibit fluctuations in service demand similar to those of non-Buy-In clients based on their similar medical conditions that qualify them for the service, though varying due to their unique physical, psychological, and social states.

Exhibit D.3: Calculation of Average Monthly Enrollment, FPE, and Per-FPE Expenditure

This exhibit provides a summary of historical average monthly enrollment and estimates average monthly enrollment and FPE as well as a summary of historical per FPE expenditure and calculates estimated per FPE expenditure for the years covered in this request.

Calculation of Average Monthly Enrollment and FPE

The Department's methodology involves three steps and begins with the enrollment level at the end of the prior fiscal year. First, the final estimated average monthly enrollment under current policy is calculated by waiver specific methods, discussed below; these enrollments are then adjusted based on a linear enrollment ramp-up over the fiscal year. The Department assumes that by the end of each fiscal year, enrollment will be at the maximum appropriated or maximum assumed level and that the increase in enrollments from the beginning of the fiscal year to the end will happen evenly across 12 months.

Finally, the FPE adjustment factor, described in the conversion of enrollment to FPE, Exhibit D.2, is applied to the final estimated average monthly enrollment to arrive at the estimated FPE for the fiscal year. The steps described above are repeated for each waiver and fiscal year with the request and out years beginning with the FY 2025-26 and through FY 2027-28 estimated maximum enrollment levels.

Maximum Assumed Enrollment for the HCBS-DD Waiver

For the HCBS-DD waiver, maximum enrollment comes from total appropriated enrollments. This is due to the existence of the enrollment cap in this waiver. In most fiscal years, the Department assumes that several members equal to the appropriated enrollment amount will

be authorized for services for each year in this request, which is the case in this request. To calculate average monthly enrollment in the HCBS-DD waiver, the maximum authorized enrollment is adjusted downwards by multiplying by the ratio of authorized to enrolled clients using the monthly linear enrollment calculation.

Calculation of Per-FPE Expenditure

The Department has included a base trend in FY 2024-25 for all HCBS waivers to reflect the estimated increase in utilization resulting from the end of the public health emergency and subsequent recovery. Other adjustments to the cost per utilizer trend stem from rate changes or legislative impacts in FY 2023-24 and FY 2024-25. There were several different rate changes for FY 2024-25 and the request year that included an across-the-board rate increase.

In addition to the rate adjustments, bottom line adjustments account for the expected effect of approved policy in the Long Bill and any special bills.

As part of the Department's FY 2023-24 R-07 Provider Rate request, the JBC approved higher rates for Group Residential Support Services (GRSS) services. GRSS providers take on member with high medical and behavioral needs. For Non-Medical Transportation (NMT) on the DD and SLS waivers, the Department requested funding to increase these rates so that they are in alignment with the NMT service offered on other waivers.

The FY 2022-23 R-9 Office of Community Living Program Enhancement request increased rates and expanded benefits for services offered through HCBS waivers. Additionally, this request maintained funding for State General Fund programs, including the Family Support Services Program (FSSP), State Supported Living Services, and State Supported Living Services Case Management. A bottom-line impact is included in FY 2023-24 and beyond to account for these impacts.

Annualization of 53 pay periods in FY 2024-25

There were 53 pay periods in FY 2024-25 compared to the normal number of 52. Therefore, a bottom-line impact was added in FY 2024-25 to account for the additional week of billing. In this request, there is a corresponding negative adjustment to avoid double counting the impact of the extra pay period.

HB 22-1114 Transportation Services for Medicaid Waiver Clients

Beginning July 1, 2024, the bill authorizes a transportation network company to provide nonmedical transportation services to persons enrolled in certain Medicaid waiver programs, including home- and community-based services for the elderly, blind, and disabled; home- and community-based services for persons with intellectual and developmental disabilities; home- and community-based services for persons with major mental health disorders; home- and community-based services for persons with brain injury; and complementary and alternative medicine for a person with a spinal cord injury.

R-6 Provider Rate Requests

Funding for 2.0% Across the board rate increase, targeted rate adjustments informed by the Department's rate review process, increases in the base wage for HCBS services, and an increase to the single assessment tool rates.

Relocating Community First Choice (CFC) Services to the State Plan

JBC staff approved to allocate 129 new DD waiver enrollments on top of the waiting list. Community First Choice (CFC) is a federal Medicaid option that allows states to provide home and community-based services to eligible members, promoting independence by offering support with activities of daily living, such as bathing, dressing, and meal preparation. On July 1, 2025, many services such as Personal Care and Homemaker that were previously offered on the HCBS waivers moved onto the state plan through CFC.

HB 24-1038 High Acuity Services for Children and Youth

The bill requires HCPF, in collaboration with the Behavioral Health Administration (BHA) and the Department of Human Services (DHS), to develop a system of care for children and youth who are less than 21 years of age and who have complex behavioral health needs.

Yearly Limit of the Community Connector Service

On June 13, 2025, the Medical Services Board approved an update to regulation 10 CCR 2505-10 8.7513.C that sets a yearly limit of 2,080 units for the Community Connector service under the CES and CHRP waivers.

FY 2023-24 BA-07 Community-based Access to Services

The Department requests funding to implement several key initiatives in response to findings identified by the Department of Justice (DOJ) that Colorado is violating Title II of the Americans with Disabilities Act (ADA). The initiatives are focused on providing more information to members on their options to prevent unnecessary institutionalization, providing effective transition services out of the nursing facilities, expanding access to the community-based service system, and increasing access to integrated community-based housing opportunities.

Exhibit E: Regional Center Information

This exhibit details the historical average enrollment and costs for clients receiving HCBS-DD services in Regional Centers. Regional Center claims are paid for from an appropriation within the Department via a transfer to the Department of Human Services (CDHS) who manages Regional Center programs. The cost of these clients is not forecasted in this request. Clients in Regional Centers do however receive TCM services as well as administrative Case Management payments which are managed and paid for by HCPF, so Regional Center enrollment information is included in this request to fully account for these costs. To determine utilization of these services the Department predicts that enrollment will remain constant over the request period.

Exhibit F: Case Management Services Forecast

Department's This exhibit forecasts Per Member Per Month (PMPM) case management, Monitoring, Intakes and Assessments, and Administrative costs. These services are provided on a monthly, yearly, or periodic basis for members. As a result, utilization and expenditure for these services are directly tied to the number of clients enrolled in the waiver programs for LTSS and individuals with IDD.

Effective July 1, 2020 the Department started paying a PMPM case management payment for each client instead of the previous rate structure of 15-minute unit Targeted Case Management (TCM) claims. The PMPM includes case manager tasks such as: assessing a client's long-term care needs, developing and implementing personalized care plans, coordinating and monitoring the delivery of services, and evaluating the effectiveness of services. To calculate PMPM costs for LTSS, the exhibit takes the estimated FY 2025-26 Home and Community Based Services (HCBS) waivers enrollment trend from R-1 Exhibit G1.2 and multiplies that by FY 2025-26 PMPM rate. To calculate PMPM costs for individuals with IDD, the exhibit takes the estimated FY 2025-26 enrollment trends for IDD Waivers from Table D.3.2 and multiplies that by FY 2025-26 PMPM rate.

Monitoring visits are face to face visits between a client and case manager. Monitoring activities include at a minimum: evaluation of the delivery and quality of services and supports for the health, safety, and welfare of the member; satisfaction with services and choice in providers; and the promotion of self-determination, self-representation, and self-advocacy. The Department provides quarterly monitoring visits for each client with IDD and semi-annual monitoring visits for members on LTSS waivers. To calculate IDD monitoring costs, the exhibit takes the estimated average monthly enrollment for IDD Waivers from Table D.3.1, assumes four visits per member, and multiplies that by the FY 2025-26 IDD monitoring rate. To calculate LTSS monitoring costs, the Department takes estimated enrollment for each waiver, assumes 20% of members will receive their second optional monitoring visit, and multiplies that number by the FY 2025-26 LTSS monitoring rate.

The Department requires intake, Supports Intensity Scale (SIS) and Continued Stay Review (CSR) assessments for IDD clients. Members receive an initial functional assessment during the intake process and then a CSR assessment annually thereafter. Their intake assessment includes the determination of an individual's functional eligibility. Once an individual is determined eligible, case managers work with the member to determine needs and appropriate services which works to identify the best waiver to meet the member's needs and develop a person-centered Support Plan for Long Term Services and Supports (LTSS). The intake assessment evaluates the members functioning level for activities of daily living, composed of the supervision of needs related to behaviors, memory, and cognition. This same assessment is completed upon application for initial enrollment and annually thereafter as a CSR. SIS includes an assessment of the individual's support needs in personal, work-related, and social activities in order to identify and describe the types and intensity of support an individual requires. The SIS measures support needs in the areas of home living, community living, lifelong learning, employment, health and safety, social activities, and protection and advocacy. The scale ranks

each activity according to *frequency* (none, at least once a month), *amount* (none, less than 30 minutes), and *type* of support (monitoring or verbal gesturing). Finally, a Support Level is determined based on the Total Support Needs Index, which is a standard score generated from the items tested by the Scale. The Support Level determines the rate for some services and is used to determine a Service Plan Authorization Limit (SPAL) for members enrolled in the Supported Living Services (SLS) waiver. CSRs are required yearly to ensure waiver members continue to be functionally eligible and are also being provided the correct amount of support. Unscheduled functional assessments may also be completed on an unscheduled basis, outside the initial and annual CSR, if there is a significant event that could result in a change in the individual's functioning. The exhibit assumes that all new enrollments would receive an intake assessment and all current members will receive a CSR assessment.

In addition to the intake and CSR functional needs assessment, the Department uses a separate tool for members enrolled in the CHRP waiver called The Inventory for Client and Agency Planning or (ICAP) assessment. The support level score results from the ICAP are used to determine the reimbursement rate for habilitation services. The ICAP measures support needs by determining "adaptive behavior skills" (motor skills, social and communication skills, personal living skills, and community living skills) and "maladaptive behavior skills" or problem behaviors (hurtful to self or others, destructive to property, disruptive or offensive behavior, unusual or repetitive habits, socially offensive behaviors, withdrawal or inattentive behaviors and uncooperative behaviors). The tool measures the child/youth's maladaptive behaviors according to frequency and severity. Scores are determined by the total Adaptive Behavior Raw Score and the General Maladaptive Behavior Score. Final scores are then translated to a support level that are used for habilitation purposes.

The Department pays for administrative deliverables related to quality including operations guides, community outreach reports, complaint trend analyses, critical incident reports, critical incident trend analysis, case manager training deliverables, appeals, and the Human Rights Committee (HRC). These activities are paid either by fixed deliverables per agency or by the number of times an activity is required, such as appeals or HRC.

SB 16-192 "Assessment Tool Intellectual & Developmental Disabilities" requires the Department to design and implement a new assessment tool for individuals receiving long-term services and supports, including services for persons with intellectual and developmental disabilities. A bottom-line impact is built into the forecast for cost of reassessment for everyone receiving these services in FY 2026-27.

Exhibit G.1 through G.3 Appropriation Build

Exhibit G.1 through G.3 build the appropriation for the current, request and out years based on Long Bill and special bill appropriations and changes made to spending authority through budget requests. The appropriation builds for each year then separates out the programs within each appropriation with assumed amounts attributed to each of them.

To build the request and out-year appropriations the Department begins each exhibit with the prior year's final estimated appropriation for each program and adjusts the appropriation based on incremental amounts for each approved request or bill.
