

HCPF Case Manager Training: Introduction to Disability

Post-Test

Select all that apply to the question

1. Which of the following are part of the intersection of poverty, disability, and race?

- Poverty can be a direct cause of disabilities due in part to health disparities including limited access to medical care, unhealthy living conditions, and low-income high-risk employment.
- Most disabilities are caused by poor health behaviors common to people living in poverty.
- People of color tend to face barriers that limit their ability to accumulate wealth resulting in greater poverty rates than whites.
- People of color generally have family support and do not need as many services.
- Having a disability imposes additional costs on families and individuals often resulting in economic hardships.
- People with disabilities are often in need of assistance with budgeting and money management.
- Necessary benefits like Long-term services and supports are often regulated by income caps and asset limits.
- Unemployment rates for people with disabilities who are people of color are much higher than their white counterparts with and without disabilities.

2. Which of the following are questions to ask a client using an asset-based approach?

- What do you consider your best/strongest skill? What skills would you like to further develop?
- How do you think you can be effective from a wheelchair?
- As a person who is blind, what problems do you think you will encounter in a job?
- What part of working do you value the most?
- Which of the employment goals that I wrote for you would you like to work on first?
- How can I help you?
