Want RAC Updates?

HCPF has created a form to ensure quick and efficient information is being communicated externally while any updates to the website are being made. This form link is on the HCPF RAC website [here](#).

The HCPF RAC team has utilized interChange provider contact information to send communications in the past, however, we have found that this information can be inaccurate. Providers are encouraged to update their contact information in interChange, but in order to ensure providers who are participating in RAC stakeholder engagement are getting the most up to date information, we are providing this option which you can access on the HCPF RAC website, or click the link below.
