

Private Duty Nursing PAR Approval and Denial Rates April 2023 through March 2024

PDN PARs by Approval Type

- From April 2023 through March 2024, 78.6% of PDN cases were fully approved.
- 18.6% of PDN cases were partially denied.
 - The vast majority of partial denials are due to a lack of medical necessity for the requested amount.
- 2.7% of PDN cases were fully denied.
- Due to the small percentage of denials, both full and partial, the data is unable to be separated out by age group in order to protect the HIPAA Safe Harbor Act.
- Members can have multiple outcomes if they have had multiple cases or PARs. Additionally, a member may have more than one PAR depending on the length of the request, a change in the home care provider, or a decision to start a new case or PAR by the agency to facilitate the timing of renewals.
