4. Open Discussion-

(Due to time constraints, these will be discussed at the October meeting. Please bring additional questions to that meeting.)

- Anita Rich asked how is behavioral health being wrapped up within the lens of care coordination? How do all of the different scopes of care coordination including medical issues, behavioral health, social issues. How do they all work together in the RAE/MCO?
- Karma Wilson asked how are the RAEs working with the rural and frontier hospitals in the care of their patients. From her experience, this has been a non-existent part of the care management process. The struggle is real for mental health care for the rural and frontier area. Lack of resources, lack of support, and lack of mental health to serve this area.
- Dede de Percin's question: How can we be successful at Care Coordination when there aren't providers (BH, Specialists) or resources (housing, e.g.). This is a global problem that the RAEs can't solve, but also critical to successful care coordination and patient outcomes.

- Pat Cook asked if next month can all the RAES return and talk about consumer lens and outliers. The calls she receives in her office across the state is more real time, practical and or urgent issues. When she calls case managers to explore, it can be a very successful collaboration to null. It would also be really helpful another month to talk about real time intersection with SEP for the high risk, HCBS waiver clients and care coordination. She would be interested in inbound calls and topics of concerns.
