## **SECTION 3.0 BACKGROUND INFORMATION**

### **3.1 THE DEPARTMENT OF HEALTH CARE POLICY AND FINANCING**

- 3.1.1 The Department serves as the Medicaid Single State Agency. The Department develops and implements policy and financing for Medicaid and the Children's Health Insurance Program, called Child Health Plan *Plus* (CHP+) in Colorado, as well as a variety of other health care programs for Coloradans who qualify. For more information about the Department, visit [www.Colorado.gov/HCPF](http://www.Colorado.gov/HCPF).
- 3.1.2 The Department is a covered entity under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) (United States Code [U.S.C.] Title 42 Sections 1320d through 1320d-8 [42 U.S.C. §§1320d – 1320d-8]) and its implementing regulations.
- 3.1.3 The Department operates the Colorado Medicaid Program, known as Health First Colorado, in accordance with the Colorado Medical Assistance Act (Section 25.5-4-104, *et seq.*, C.R.S.) and Title XIX of the Social Security Act. Colorado Medicaid is annually funded from appropriations authorized by the Colorado General Assembly and matched by federal funds.

### **3.2 PROJECT BACKGROUND**

#### **3.2.1 Colorado Medicaid Program History**

- 3.2.1.1 Colorado Medicaid serves 1.33 million people and has an annual budget of \$9.1 billion. The Department's mission is to improve health care access and outcomes for the people we serve while demonstrating sound stewardship of financial resources. In the past five years, eligibility for Medicaid has expanded to include more children, pregnant women, parents and low-income adults. Medicaid enrollment increased from 588,925 in June 2011 to 1.34 million as of February 2017. Colorado chose to expand eligibility in advance of the Affordable Care Act and further expanded eligibility under the Affordable Care Act.
- 3.2.1.2 Individuals and families served by Colorado Medicaid, in large part, have complex health needs either because of life circumstances or a disability. Research has demonstrated that individuals served by Medicaid face significant barriers to better health and that individuals enrolled in Medicaid report poorer health compared to others in our state.
- 3.2.1.3 To meet the unique needs of those we serve, the Department has a long history of innovation and service to improve access, health care quality, and the health of its Clients. In addition, the Department works collaboratively with a very engaged community of Clients, providers, stakeholders, advocacy organizations, Community organizations, foundations, and legislators.

3.2.1.4 Currently, Colorado Medicaid Clients are primarily served through three major programs: the Accountable Care Collaborative Program (Program), Community Behavioral Health Services Program, and Long-Term Services and Supports (LTSS). Moving into the future, the Department intends to build on the successes of each program while also seeking to integrate these programs to better serve Clients and to effectively utilize state resources.

### **3.2.2 Health Care Reform in Colorado**

3.2.2.1 In 2007, the State of Colorado embarked on a journey to improve Coloradans' access to cost-effective, high-quality health care services. The Blue Ribbon Commission for Health Care Reform (the Commission) assessed a variety of health care reform models in Colorado. After months of careful deliberation and discussion with stakeholders, constituents, legislators and executive officials, the Commission presented a comprehensive report in 2007 that provided a blueprint for health care reform in Colorado. Drawing upon the Commission's recommendations, the administration proposed a series of legislative initiatives referred to as the "Building Blocks to Health Care Reform." During the 2008 legislative session, the legislature passed all of the initiatives. The new legislation expanded children's health care coverage, increased reimbursement for providers, improved efficiencies in private and public health insurance programs, increased transparency and accountability across the health coverage system and identified further strategies to expand access to cost-effective, high-quality health care.

3.2.2.2 Two of the reform efforts were the Medicaid Value-Based Care Coordination Initiative (now known as the Accountable Care Collaborative Program) and the Colorado Health Care Affordability Act. The Department worked simultaneously on these efforts. The Department submitted a formal budget action for the Accountable Care Collaborative Program on November 3, 2008, and in April 2009, the Colorado Health Care Affordability Act (Colorado House Bill 09-1293) became law. The legislation authorized the Department to generate revenue through a hospital provider fee and draw down federal matching funds. A portion of the fees would be used to provide coverage to additional uninsured Coloradans and make health care more affordable by reducing uncompensated care and cost-shifting, without costing taxpayers or businesses more in taxes. Through this legislation, at least 100,000 more Coloradans became eligible to apply for medical assistance programs.

3.2.2.3 The passage of the Colorado Health Care Affordability Act, coupled with the unprecedented growth in Medicaid caseload due to the economic recession, reinforced the need for the Department to re-invent and innovate every aspect of its physical, behavioral and long term services and supports programs. The passage of the Patient Protection and Affordable Care Act enabled the Department to make significant changes to the way health care services were delivered to Medicaid Clients in order to maximize their health, functioning and independence. Over the past seven years, the Department has:

3.2.2.3.1 Implemented and expanded the Accountable Care Collaborative to more than one million Medicaid Members, resulting in improved health and more coordinated care.

- 3.2.2.3.2 Enhanced the Community Behavioral Health Services Program by adding substance use disorder services and increasing the program’s focus on recovery and resiliency and trauma-informed care.
- 3.2.2.3.3 Created the Office of Community Living, improved programs using person- and family-centered approaches, and increased the number of Clients served in the community instead of institutions.

### **3.2.3 The Accountable Care Collaborative Program**

- 3.2.3.1 The Accountable Care Collaborative Program is the core of the state’s Medicaid program. It promotes improved health for Members by delivering care in an increasingly seamless way. The Accountable Care Collaborative works on the principle that coordinated care, with needed Community supports, is the best, most efficient way to deliver care to individuals. It is easier for Members and providers to navigate and it makes smarter use of every dollar spent.
- 3.2.3.2 The Program began as a managed Fee-for-Service model operated under a State Plan Amendment approved by the Centers for Medicare & Medicaid Services (CMS). It functions as a Primary Care Case Management (PCCM) model following the applicable federal requirements in 42 C.F.R. § 438. Prior to the Program, Medicaid Clients received their physical health services through an unmanaged Fee-for-Service approach.
- 3.2.3.3 The Program represents an innovative way to accomplish the Department’s goals for Medicaid reform. It differs from a capitated managed care program by investing directly in Community infrastructure to support care teams and Care Coordination. It also creates aligned incentives to measurably improve Client health and reduce avoidable health care costs. The Program makes the people and organizations that actually provide care accountable for the quality, outcomes and the cost of that care. The fundamental premise of the Program is that regional communities are in the best position to make the changes that will cost-effectively optimize the health and quality of care for all Members. These regional communities are also best positioned to identify and meet Member needs and deliver efficient health care by assertively addressing unwarranted variation in practice patterns, misincentives from a volume-based payment system, and avoidable excess costs from fragmented care, while also promoting evidence-guided, shared decision making.
- 3.2.3.4 The Program provides the framework in which other health care initiatives, such as medical homes, health information technology and payment reform, can thrive as they better serve Members and create value. It is a hybrid model, adding the characteristics of an Accountable Care Organization to the PCCM model. Certain fundamental Accountable Care Organization characteristics are essential to the success of the Program. These characteristics include understanding Members’ health and social needs, managing and integrating the continuum of care across different settings, including primary care, inpatient care and post-acute care; having enough Members to support comprehensive performance measurement; being capable of prospectively planning budget and resource needs; and having the ability to develop and organize provider networks.

- 3.2.3.5 The four initial goals of the Accountable Care Collaborative Program were to:
  - 3.2.3.5.1 Expand access to comprehensive primary care
  - 3.2.3.5.2 Ensure access to a focal point of care (i.e., Medical Home) for all Members
  - 3.2.3.5.3 Ensure a positive Member and provider experience
  - 3.2.3.5.4 Apply an unprecedented level of statewide data and analytics functionality
- 3.2.3.6 To achieve these goals, the Accountable Care Collaborative was comprised of three key components:
  - 3.2.3.6.1 Regional Care Collaborative Organizations are responsible for ensuring accountable care by developing a formal contracted network of primary care Medical Homes and an informal network of specialists and ancillary providers.
  - 3.2.3.6.2 Primary Care Medical Providers (PCMPs) serve as the Medical Home for Members, providing whole-person, coordinated, and culturally competent care.
  - 3.2.3.6.3 Statewide Data and Analytics Contractor (SDAC) provides operational support and data (via a web-based provider portal) to the Department, Regional Care Collaborative Organization staff, and PCMPs to support program functions.
- 3.2.3.7 The state was divided into seven geographic regions with each region served by one Regional Care Collaborative Organization. In the first contract period, five vendors served the seven regions, as three regions were awarded to one vendor. Program Members were assigned to a region and Regional Care Collaborative Organization based upon their county of residence.
- 3.2.3.8 The Program has demonstrated improved health, reduced costs, and improved service utilization patterns. Members who have been in the Program for longer than six months are more likely to seek and receive preventive services and follow-up care, and less likely to receive services at an emergency room, receive high-cost imaging services, or be re-admitted to the hospital. Financial analysis indicates the Program avoided Member medical costs of \$205 million, with net costs avoided of \$61 million in FY 2015-16, and total cumulative savings of \$139 million since the program began.
- 3.2.3.9 The Accountable Care Collaborative is designed to be iterative. The first phase of the program was primarily focused on connecting Members to primary care services. Over the course of the Program, it evolved considerably to:
  - 3.2.3.9.1 Expand enrollment from 500 Members to over one million Members in the first five years of the Program's operation.
  - 3.2.3.9.2 Connect more Coloradans to a Medical Home.
  - 3.2.3.9.3 Increase coordination of care between systems.
  - 3.2.3.9.4 Enhance PCMP standards to align with national patient-centered Medical Home standards.
  - 3.2.3.9.5 Evolve payment to reflect the iterative nature of the program and incent greater value.

- 3.2.3.9.6 Increase coordination with Long-Term Services and Supports (LTSS) by enrolling approximately 30,000 full benefit Medicare-Medicaid enrollees into the Program.

### **3.2.4 Community Behavioral Health Services Program**

- 3.2.4.1 The Community Behavioral Health Services Program is a statewide program that provides comprehensive mental health and substance use disorder services to individuals enrolled in Medicaid. The program is operated under a federal 1915(b) waiver and administered by capitated managed care entities known as Behavioral Health Organizations (BHOs). Under this waiver, BHOs provide State Plan services (available to all Medicaid Members) as well as certain community-based services, known as 1915(b)(3) or "alternative" services. These services include respite, clubhouse/drop-in services, Assertive Community Treatment, and other non-medical services, all of which are provided in the least restrictive and most cost-effective manner in order to best use available funding. Proactively providing a broad array of supportive services in the community reduces the need for other high-cost services.
- 3.2.4.2 The program started as a pilot in 1995 and eventually expanded statewide. The program offers an array of services, and has been credited with directly decreasing the length and number of psychiatric hospitalizations. It has been recognized nationally as a model for serious and persistent mental illness and serious emotional disturbance as well as for shortening overall recovery time, increasing Client resilience and dealing with trauma-related behavioral health complications.
- 3.2.4.3 For the Community Behavioral Health Services Program, the state is divided into five (5) geographic regions with each region served by one BHO. There are currently four BHOs serving the five geographic service areas as two regions were awarded to one vendor. Medicaid Clients were assigned to a region and BHO based upon their county of residence.
- 3.2.4.4 The program has a long history in Colorado and has evolved significantly over the past 21 years, including the following events:
  - 3.2.4.4.1 Expanded the Community Behavioral Health Services Program in FY 2013-14 to include an outpatient substance use disorder treatment, increasing access to these services.
  - 3.2.4.4.2 Developed more than 400 sites across Colorado at which behavioral and physical care are integrated, thereby improving access to behavioral health services.
  - 3.2.4.4.3 Increased coordination of care for specialty populations, including children, adolescents and their families who are involved in the Child Welfare system.
  - 3.2.4.4.4 Evolved payment to incent greater value and improve Client screening, assessment and engagement.
  - 3.2.4.4.5 Developed trauma-informed and trauma-specific treatment interventions to address underlying behavioral health issues.

### **3.2.5 Long Term Services and Supports (LTSS)**

- 3.2.5.1 Colorado's system of Long-Term Services and Supports (LTSS) provides comprehensive services to people with many types of long-term care needs, including those with physical disabilities, serious mental health needs, and developmental and/or intellectual disabilities. The LTSS system works to support Clients in the least-restrictive settings possible. Long-Term Services and Supports are generally delivered in home and community based settings, nursing facilities or hospitals. The Home and Community Based Services (HCBS) system is operated through 11 individual waivers under 1915(c) authority from the Centers for Medicare and Medicaid Services (CMS). Services and supports associated with HCBS waivers include but are not limited to, personal care services, access to alternative care facilities, home modification, adult day programs, non-medical transportation and medication monitoring. To be considered for waiver services, a Client must meet financial and functional eligibility and program targeting criteria. HCBS waiver services are provided to individuals who, but for the provision of waiver services, would require the level of care provided in a nursing facility, hospital, or an intermediate care facility for individuals with intellectual disabilities.
- 3.2.5.2 In Colorado, most people access the LTSS system through two types of entities: Single Entry Points (SEPs) and Community Centered Boards (CCBs). SEPs and CCBs, in addition to three private case management entities, act as the case management agencies for LTSS Clients receiving HCBS. Case management duties include level-of-care functional assessment, service plan development, referral, monitoring and remediation of Grievances and issues related to the provision of LTSS.
- 3.2.5.3 SEPs predominately serve as the entry point and Case Management Agency for older individuals, adults with mental health needs, individuals with traumatic brain or spinal cord injuries, and children with life-limiting illnesses. CCBs predominately serve as the entry point and Case Management Agency for individuals with intellectual and/or developmental disabilities and children with autism. Private case management entities, SEPs and CCBs can provide case management services for children with special health care needs through different waivers. There are 24 SEPs and 20 CCBs throughout the state.
- 3.2.5.4 In 2014, the Department established a Federal-State partnership with the Centers for Medicare & Medicaid Services (CMS) to implement the Colorado Demonstration to Integrate Care for Medicare-Medicaid Enrollees, otherwise called The Accountable Care Collaborative: Medicare-Medicaid Program. The program is an important step in integrating the LTSS system with the Accountable Care Collaborative as it coordinates the physical, behavioral and social health needs for full-benefit Medicare-Medicaid Members. The goals of the Demonstration are to improve health outcomes for full benefit Medicare-Medicaid Members, to improve Member experience through enhanced coordination and quality of care, and to decrease unnecessary and duplicative services, and the resulting costs. Under this Demonstration, the Department is eligible to receive a retrospective performance payment based on its performance on quality and savings criteria. The Demonstration is currently scheduled to end on December 31, 2017; however, the Department is exploring opportunities with CMS to extend the program.
- 3.2.5.5 Colorado's system of LTSS has achieved important accomplishments, including:

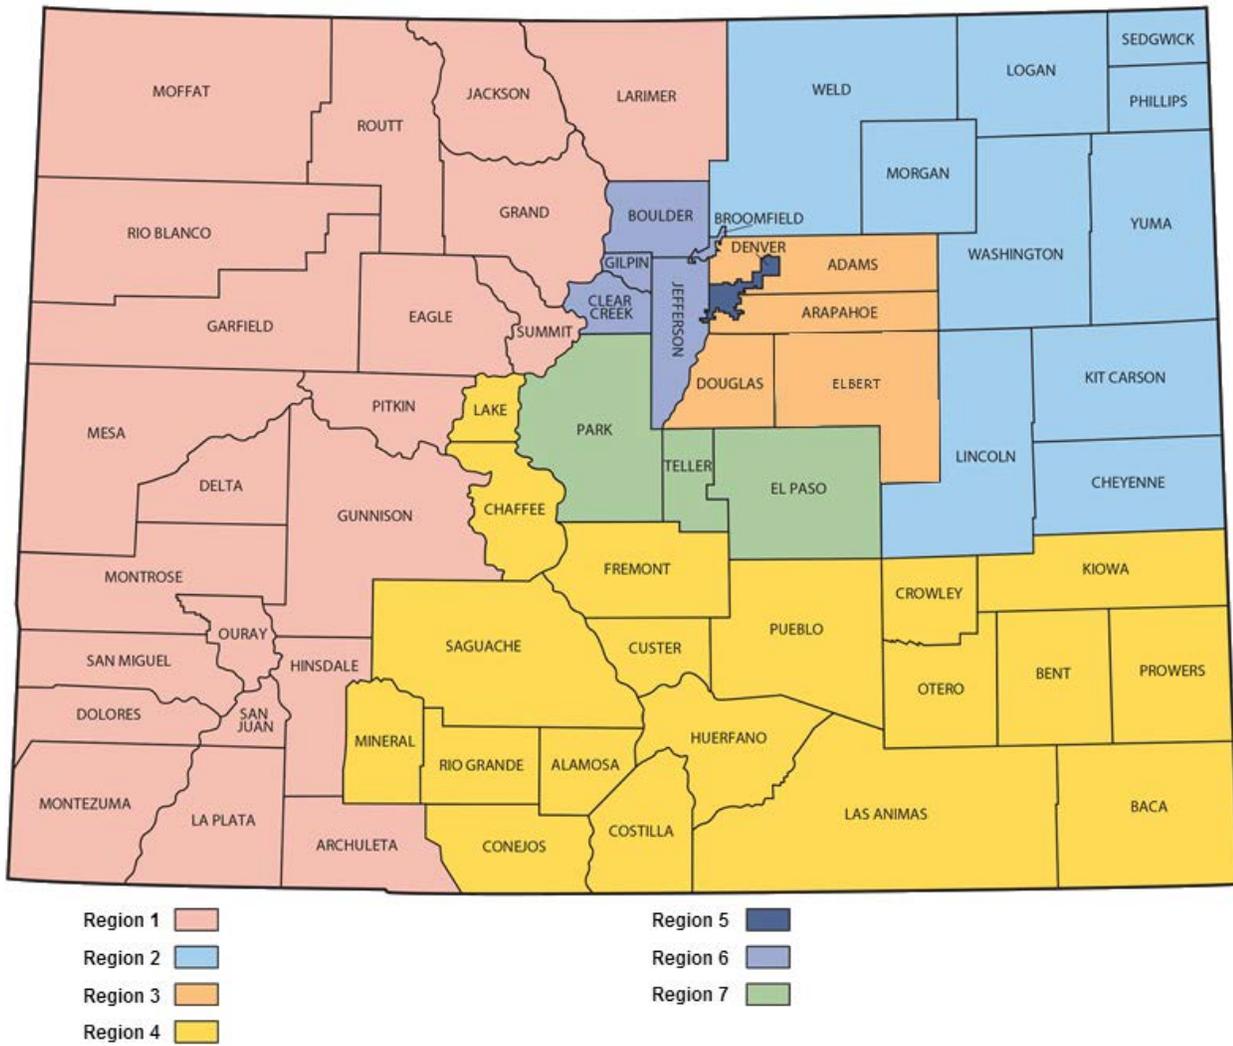

- 3.2.5.5.1 Maintained a high level of LTSS Clients living in the community.
- 3.2.5.5.2 Transitioned 203 individuals from long-term care facilities to community living between April 2013 and September 2016 through the Colorado Choice Transitions Program.
- 3.2.5.5.3 Developed a pilot program to test the No Wrong Door model to streamline access to LTSS.
- 3.2.5.5.4 Increased participation in the Supported Employment Benefit from 1,120 in January 2011 to 2,327 in June 2016.
- 3.2.5.5.5 Created the Community Living Quality Improvement Committee to help shape a robust quality improvement process.
- 3.2.5.5.6 Conducted Person-Centered Thinking training with over 2,100 families, case managers and service providers across the state to help reshape how LTSS are provided.
- 3.2.5.5.7 Developed a plan for implementing conflict-free case management, including allowing Clients to eventually choose their own Case Management Agency.

### **3.3 NEXT ITERATION OF THE ACCOUNTABLE CARE COLLABORATIVE PROGRAM**

- 3.3.1 Over the last five (5) years the Accountable Care Collaborative Program has shown progress in creating a health care delivery program that improves health outcomes, better manages care and is a smarter use of resources. The Program was designed with a long-term vision in mind, and the understanding that to meet Members' complex health needs, delivery system change must be iterative to keep up with an evolving health care system. One important improvement will be to continue to move toward more coordinated and integrated care that increasingly rewards improved health outcomes.
- 3.3.2 The next iteration of the Accountable Care Collaborative Program begins in July 2018. The Accountable Care Collaborative Program will build upon its first seven years and advance the Department's goals to improve Member health and life outcomes and to use state resources wisely. To achieve these goals, the Program will focus on the following objectives:
  - 3.3.2.1 Join physical and behavioral health under one accountable entity
  - 3.3.2.2 Strengthen coordination of services by advancing Team-based Care and Health Neighborhoods
  - 3.3.2.3 Promote Member choice and engagement
  - 3.3.2.4 Pay providers for the increased value they deliver
  - 3.3.2.5 Ensure greater accountability and transparency

- 3.3.3 One entity, the Regional Accountable Entity (RAE), will be responsible for promoting physical and behavioral health and the previous duties originally contracted by the Regional Care Collaborative Organizations and Behavioral Health Organizations (BHOs) in their region. The RAE will use this expanded scope to promote the population's health and functioning, coordinate care across disparate providers, interface with LTSS providers, and collaborate with social, educational, justice, recreational and housing agencies to foster healthy communities and address complex Member needs that span multiple agencies and jurisdictions. The RAE will manage a network of primary care physical health providers and behavioral health providers to ensure access to appropriate care for Medicaid Members. A critical function of the RAEs is to create a cohesive network of providers that work together seamlessly and effectively to provide coordinated health care services to Members. Having one entity will improve the Member experience by creating one point of contact and clear accountability for treating the whole person.
- 3.3.4 The state will continue to be divided into seven regions, as described in Appendix D, to promote innovation, flexibility and local ownership of the public health and health care delivery system.

## Regional Map for the Next Iteration of the Accountable Care Collaborative Program

- 3.3.5 Clients will be automatically enrolled as Members in the Accountable Care Collaborative through mandatory enrollment and immediately connected with a Primary Care Medical Provider (PCMP). A PCMP must be a medical practitioner with a focus on primary care (family medicine, internal medicine, pediatrics, geriatrics, obstetrics and gynecology). Using either a claims-based attribution methodology or a Client choice-based attribution methodology, the Department will attribute Clients to a PCMP. Based on the PCMP's geographic location, the PCMP Practice Site will be contracted with only one RAE. The geographic location of the Member's attributed PCMP will determine the Client's assignment to a RAE. Members will be able to choose a PCMP at any time through the Department's enrollment broker.
- 3.3.6 The Accountable Care Collaborative Program will strengthen the PCMP network and the relationship between the RAE and PCMPs. RAEs will be given greater latitude to contract with practices that meet a set of basic minimum requirements that maintain the Department's commitment to enhancing the level of Medical Home standards. PCMPs will be encouraged and supported in delivering Team-based Care by leveraging all staff to the greatest extent possible and utilizing lay health workers, promotores, peers, and patient navigators.
- 3.3.7 The RAE will administer the Department's Capitated Behavioral Health Benefit to promote optimized mental health and wellness for all Members and to ensure delivery of Medically Necessary mental health and substance use disorder services. For more than twenty (20) years the Community Behavioral Health Services Program has provided an excellent safety net of services for individuals with serious and persistent mental illness and serious emotional disturbance and has built up community systems of care for these populations. During the next iteration of the Accountable Care Collaborative, one of the primary roles of the RAE will be to ensure the continued viability of the Medicaid behavioral health safety net system and the continued delivery of high-quality, cost-effective behavioral health services. The RAE is expected to build on the foundation established over the past 20 years to deliver a full continuum of State Plan and 1915(b)(3) Services for Members requiring frequent and intensive mental health treatment. Additionally, the RAEs will be responsible for continuing to improve the delivery of substance use disorder treatment for Members in collaboration with the state's Managed Service Organizations and the Office of Behavioral Health. As the Medicaid population has grown significantly over the past 10 years and features a wider range of medical and behavioral health complexity, the Department is committed to leveraging the Capitated Behavioral Health Benefit to serve all 1.3 million Medicaid Members. The RAE will have responsibility for overseeing the delivery of mental health and wellness interventions for all Members, regardless of the presence of a behavioral health diagnosis, so that emotional, behavioral, social and intellectual well-being potentials are achieved. In order to achieve these goals, the RAE will contract with a range of behavioral health providers practicing in a variety of health care settings.

- 3.3.8 While the Department is integrating the administrative functions for the Department's primary care and behavioral health networks, the RAE will need to effectively manage the financial risk of the Capitated Behavioral Health Benefit in order to be successful with this Contract. That means the RAE will be responsible for ensuring that capitation funds are used for the support of the Behavioral Health delivery system and are not used to supplement the RAE's responsibilities to address Members' physical health needs.
- 3.3.9 In addition, the RAE will have responsibility for ensuring timely and appropriate access to Medically Necessary services offered by the full range of Medicaid providers in the Health Neighborhood, including specialty, hospital, and home-based care, to meet the health and functioning needs of Members. The RAE will develop infrastructure that supports coordination between Network Providers and the Health Neighborhood, including: streamlining referral processes, improving communications among providers, clarifying roles and responsibilities of providers, and increasing the number of specialty care providers enrolled in Medicaid and actively treating Members. The RAEs will support provider access and utilization of tools and resources that will enable them to serve Members with complex conditions, obtain brief specialty consults, and make appropriate, timely, and coordinated referrals for Members requiring more intensive specialty care. The Department recognizes the vital role that all its providers offer to Members. For example, a Community pharmacist, home health worker or personal aide will generally see a Member more often than the PCMP. These providers can also play a role in the RAE's health promotion activities. The RAE can help strengthen the Health Neighborhood so that non-PCMP assessments inform subsequent interactions with Members.
- 3.3.10 The Department will continue to selectively contract with one Contractor for a region as opposed to multiple contractors within a region. One of many reasons for this decision is based on the recognition that an individual and region's health is impacted by many conditions and services beyond just clinical services. The RAE will develop mechanisms to engage Community partners within the RAE's region for population health and non-medical Community services. The RAE can invest in regional approaches to low-income population health without "Member plan switching" concerns. The Department recognizes that sizable percentages of the population will move off of Medicaid and wishes those Members to be healthier when they depart. The Department recognizes that there is also a sizable percentage for whom Medicaid will be a long-term payer. A regional model allows the RAE to promote Community and infrastructure approaches to creating a healthy culture and environment. The RAE can leverage these partnerships in order to link Members to appropriate Community organizations and resources. The RAEs will act as the Department's regional agent to advance multiple initiatives to promote pathways that help Members reach their full potential and address the Colorado's 10 Winnable Battles, which disproportionately impact low income communities and can be most effectively combatted in childhood.

- 3.3.11 In order to maximize impact and minimize redundancies, the Program will focus on greater coordination with the Colorado Departments of Human Services, Public Health and Environment, Education, and Corrections, as well as initiatives such as Comprehensive Primary Care Plus (CPC+), State Innovation Model (SIM), Hospital Transformation Program, and the Colorado Opportunity Project. The RAE will play key regional roles in these initiatives as they are well aligned with the Accountable Care Collaborative's goals.
- 3.3.12 At the highest level, the next phase of the Accountable Care Collaborative aims to achieve the following:
  - 3.3.12.1 Members will have their medical and behavioral health care needs met and receive Community supports in a seamless way.
  - 3.3.12.2 Members and providers navigating the system will find it easier to use, and providers will be further incented to make improved outcomes their highest priority when treating and supporting Members.
  - 3.3.12.3 Appropriate use of medical care will be the norm as overuse of some forms of care will continue to drop, ensuring that resources are used to their highest good in an efficient and effective system of care.

### **3.3.13 Population Health Management and Care Coordination Services**

- 3.3.13.1 One of the objectives of the Program is strengthening coordination of services by advancing Team-based Care and Health Neighborhoods. Care Coordination provides a person- and family-centered approach to facilitate the appropriate delivery of physical health, behavioral health, LTSS, specialty care, ancillary services, oral health and other social services that support Member health and well-being. Ideally, Care Coordination will be provided face to face by individuals with strong ties to the Community who can develop ongoing relationships with Members.
- 3.3.13.2 Once a Client is enrolled in the Program, the Department will conduct a brief Health Needs Survey through the Department's Enrollment Broker. The Health Needs Survey will be used to help PCMPs and RAEs identify a Member and family's potential immediate needs.
- 3.3.13.3 The RAE will be required to develop a clear population health management strategy fully aligned with other state health initiatives, particularly Colorado's 10 Winnable Battles and State of Health reports. In order to achieve Colorado's aim to be the healthiest state, the state has developed a life stage model that recognizes that interventions and plans vary throughout one's life. Health equity efforts can only be successful if particular focus is made on low-income populations who bear the brunt of health disparities and inequities. The RAEs will serve as the Department's regional leads for these efforts and their incentives will be, in part, tied to their progress against these goals.

3.3.13.4 The next iteration of the Accountable Care Collaborative Program will include efforts to improve the coordination and delivery of services for special populations: children involved with the child welfare system, individuals transitioning out of institutions and correctional facilities, and children at risk for out-of-home placement. As Members receiving LTSS already receive case management for a defined set of benefits, the RAE will collaborate with LTSS providers to design care coordination approaches that ensure a Member's complete health and wellness needs are being met and that reduces duplication of services and system fragmentation.

### **3.3.14 Integration of Primary Care and Behavioral Health Services**

3.3.14.1 The Accountable Care Collaborative will support the integration of primary care and behavioral health by creating a single administrative entity (the RAE) overseeing both primary care and behavioral health services, as well as adjusting how services are reimbursed.

3.3.14.2 The Department will retain capitation for behavioral health services (referred to as the Capitated Behavioral Health Benefit) while making important changes to the behavioral health benefit.

3.3.14.2.1 The Department will rely less on the use of a covered diagnosis as a requirement for accessing Medically Necessary covered behavioral health services. Covered diagnoses will continue to be used to identify inpatient hospitalizations, emergency department visits, laboratory tests, and specific outpatient and alternative behavioral health services that will be reimbursed through the behavioral health benefit.

3.3.14.2.2 The Department will increase access to short-term behavioral health interventions by encouraging the delivery of behavioral health within primary care settings. Short-term behavioral health treatment delivered in primary care settings may be reimbursed Fee-for-Service for up to six (6) sessions per episode of care. These sessions will not require a covered behavioral health diagnosis. Additional sessions will require authorization from the RAE for reimbursement through the Capitated Behavioral Health Benefit.

3.3.14.3 The Department expects greater focus on innovative place-based community behavioral health education, skills training, and promotion of well-being across life stages and functional status. The RAE will be responsible for maintaining a comprehensive statewide network of mental health and substance use disorder providers capable of delivering the full range of covered services to support Members in improving their mental health, substance use, and life outcomes. This includes providing services in multiple community-based settings, vocational services, clubhouse and drop-in centers, prevention and early intervention activities, support for Members transitioning to a new system of care or care environment, and other services that empower Members to reach their full potential.

### **3.3.15 Health Information Technology and Analytics**

3.3.15.1 The Department's emerging Health Information Technology (HIT) ecosystem will enable greater data and information sharing among the Health Neighborhood.

- 3.3.15.2 The use of technology and data-driven decision making is integral to the operation and success of the Accountable Care Collaborative. The combination of technology solutions provided by the Contractor and the Department will enable effective data and information sharing among Network Providers and the Health Neighborhood to improve Member health, measure performance and control costs.
- 3.3.15.3 The Department is implementing the Colorado interChange System, which will replace the previous Medicaid Management Information System (MMIS). Colorado interChange will offer enhanced functionality and capabilities that makes it easier for providers to use. The Colorado interChange system will also provide more functionality to implement different types of payment approaches.
- 3.3.15.4 The Department is implementing a Business Intelligence and Data Management System (BIDM System) that collects, consolidates, and organizes data from multiple sources for reporting and business process analysis. The BIDM System replaced the Statewide Data Analytics Contractor (SDAC) used for the first iteration of the Accountable Care Collaborative.
- 3.3.15.5 RAEs and Network Providers will be able to access the Colorado interChange and BIDM System provider portals to check Member eligibility, view Member and population utilization and costs, access region-specific enrollment rosters, assess performance on Key Performance Indicators and quality-improvement activities, and generate ad hoc reports to support Program activities. These new technology resources will help to ensure clear lines of responsibility; facilitate coordinated care; promote data sharing; and ensure that the RAE is supporting the entire team.

### **3.3.16 Payment Innovation**

- 3.3.16.1 The Accountable Care Collaborative was designed to help support the transition of payment within Medicaid to value-based models. The Department is committed to implementing innovative payment practices that reward efficiency, quality, coordination and health improvement and disincent duplication of services, overuse of low value services and fragmentation of care. Payment innovation within and supported by the Accountable Care Collaborative will align and complement state and federal alternative payment initiatives (e.g., Comprehensive Primary Care Plus, Medicare Access and CHIP Reauthorization Act of 2015 (MACRA)). The Department will evolve payment by:
  - 3.3.16.1.1 Reducing the amount of guaranteed administrative and service payments and linking a greater proportion of reimbursement to value
  - 3.3.16.1.2 Creating flexible payments not tied to volume that fund non-traditional integrated, coordinated, comprehensive models of care.
  - 3.3.16.1.3 Aligning provider rate-setting methodologies across provider types so that they are aligned and mutually-reinforcing (e.g., FQHCs, CMHCs, primary care)
  - 3.3.16.1.4 Continuing to test innovative payment methodologies that improve health outcomes, Member satisfaction, and cost effectiveness as authorized in 25.5-5-415, C.R.S.

- 3.3.16.2 The RAEs will receive an administrative per-member per-month (PMPM) payment between \$14.50 and \$15.50, \$4 of which will be withheld by the Department to fund pay-for-performance. The PMPM will support the RAE's health promotion activities within the region, the RAE's investments for the efficient, affordable delivery of care within the Health Neighborhood, and appropriate coordination of care for Members. In the next iteration of the Program, the Department is changing the way the PMPM is currently distributed. Instead of making a Medical Home payment directly to providers, the Department will make the entire administrative payment to the RAE. This will enable the RAE to design flexible funding arrangements to support PCMPs for participation in working to achieve the goals and objectives of the Accountable Care Collaborative. A minimum of 33% of the RAE's PMPM must be distributed to the PCMP network, and RAEs must give PCMPs the option to receive a standard \$2 PMPM. However, the RAE may work with providers to design different value-based payment arrangements that may exceed \$2 PMPM.
- 3.3.16.3 The RAE will also receive a monthly Capitated Payment for each enrolled Member for the provision of the Capitated Behavioral Health Benefit. The RAE will assume comprehensive risk and take full responsibility for optimizing the mental health of Members, treating Members substance use disorders, and for providing and arranging for all covered inpatient and outpatient behavioral health services. The Department will tie the capitation payment to value in two ways.
- 3.3.16.3.1 Capitation Rate Setting: The capitation rate is built from an actuarially certified point estimate. CMS allows states to set individual contractor rates within a narrow (1.5%) range around the actuarially certified point estimate. In the next iteration, the Department will determine the RAE's rate within the available range based on the RAE's individual performance on identified metrics. All RAEs must meet or exceed several base standards or metrics in order for the rate to be set at the point estimate. If a RAE fails to meet the base standards, it will be paid at a rate below the point estimate. If a RAE achieves identified stretch performance goals, it will be paid at a rate higher than the point estimate.
- 3.3.16.3.2 Behavioral Health Incentive Payment: Subject to available funding, the Department will work with CMS to create an incentive program that will enable RAEs to earn up to a 5% incentive on top of their capitation for achieving key performance targets.
- 3.3.16.4 The Department will continue to withhold \$4 from the RAE's administrative PMPM of between \$14.50 and \$15.50 to fund a pay-for-performance program that features three components.
- 3.3.16.4.1 Key Performance Indicators: the RAE will be able to earn performance payments based on up to nine Key Performance Indicators (KPIs). The KPIs are designed to reward the RAE for improvement of the regional delivery system as a whole and for achieving progress on Department priorities. The RAE will have responsibility for sharing incentive payments with Network Providers and/or the Health Neighborhood in a way that furthers the goals and objectives of the program.

- 3.3.16.4.2 Flexible Funding Pool: This pool will be created from any monies not distributed for KPIs and will be used to reinforce and align evolving program goals. The current Accountable Care Collaborative has utilized a similar pool of funding to increase payment for PCMPs that meet enhanced Medical Home standards, to support practices participating in the State Innovation Model, and to focus vendor attention on priority program outcomes. The Department will distribute monies from the Flexible Funding Pool in a similar manner for the next iteration. For example, the Department may distribute funds based on improving performance on a priority goal identified by the Department, or it may incentivize provider participation in new state or federal initiatives that are aligned with the Accountable Care Collaborative.
- 3.3.16.4.3 Public Reporting: The Department is committed to transparent reporting of vendor performance on key health and cost measures. Public reporting will be comprised of two components: 1) reporting of HEDIS and other clinical measures that align with SIM, CPC+, and other state and federal initiatives; and 2) reporting of broader public health type metrics where the RAE and provider play a critical but perhaps not determinative role in affecting change. Obesity rates, suicide rates and passive tobacco exposure are all examples of public health measures that RAEs can influence. While initially the Department will not reimburse performance on these measures directly, the Department will track progress on these measures to guide the evolution of the program.
- 3.3.16.5 Fee-for-Service Payment Innovation
- 3.3.16.5.1 In addition to changing payments within the Accountable Care Collaborative, the Department will be transforming how it reimburses primary care services through the Primary Care Alternative Payment Model (Primary Care APM). Primary Care providers that leverage Team-based Care practices, care management activities, Member engagement tools, and quality improvement strategies to deliver more efficient, cost effective care and to improve Member health will have an opportunity to earn a higher reimbursement rate.
- 3.3.16.5.2 These reforms will align with the Department’s FQHC payment reform as well as various CMS-sponsored payment initiatives, such as the State Innovation Model and Comprehensive Primary Care Plus. The RAEs will have a key administrative role to assess and certify PCMPs for participation in the Primary Care APM, and to support providers in understanding, preparing for, and participating in the Primary Care APM.
- 3.3.16.5.2.1 The Department’s Primary Care APM will feature two separate payment models for a core set of identified primary care codes.
- 3.3.16.5.2.1.1 Track One Primary Care APM: ACC PCMPs that are certified by the RAE as meeting certain criteria will receive higher reimbursement for a core set of primary care codes.

3.3.16.5.2.1.2 Track Two Primary Care APM: Primary care providers who apply and are accepted to participate will be able to transition a significant portion of their reimbursement to a prospective payment that provides a guaranteed revenue stream to help providers shift from delivering volume-based care to more value-based practices. The remainder of their reimbursement will be based on billing a core set of primary care codes.

### 3.3.16.6 Testing Payment Reform Models

House Bill 12-1281 created the Medicaid Payment Reform and Innovation Pilot Program (25.5-5-415, C.R.S), which allows the Department to accept proposals for innovative payment reform pilots that demonstrate new ways of paying for improved Client outcomes while reducing costs in the Accountable Care Collaborative. The Department has tested two specific payment reform models: a full-risk, comprehensive physical health payment reform program for adults operating in six counties on the western slope and a primary care capitation program operating in the Denver metropolitan area.

3.3.16.6.1 This next iteration of the Accountable Care Collaborative will allow a broader application of the primary care capitation program tested under 25.5-5-415, C.R.S., through the Track Two Primary Care APM. This will allow qualified primary care providers to assume increasing levels of risk for a primary care benefit and accountability for improved financial and health outcomes.

3.3.16.6.2 The Department will incorporate lessons learned from the current models and continue to work with RAEs to test innovative payment models developed under 25.5-5-415, C.R.S. However, the Department is not able to guarantee continuation of existing contracts under 25.5-5-415, C.R.S, as they are developed under individualized CMS authority tied to a particular awardee, not a region.

### 3.3.17 Additional RAE Responsibilities

3.3.17.1 As the Accountable Care Collaborative is an iterative program, the Department continues to explore ways to evolve the program and implement activities to improve Member health and life outcomes. The Department is currently working on four additional areas of responsibility that may be incorporated into the RAE contract: Accountable Care Collaborative: Medicare-Medicaid Program, Wraparound Program, Pre-Admission Screening and Resident Review (PASRR), and brokering of case management. Each of these responsibilities require further development and/or state and federal approvals before they can be incorporated into the Work.

3.3.17.2 If either the Wraparound Program, PASRR, and/or brokering of case management scopes of work are approved at the state and federal level for inclusion into the Work, the Department would support each of the activities through distinct compensation mechanisms that would be defined in formal Contract amendments.

3.3.17.3 Accountable Care Collaborative: Medicare-Medicaid Program

- 3.3.17.3.1 The Department is in conversations with the Centers for Medicare & Medicaid Services regarding a potential extension of the Accountable Care Collaborative: Medicare-Medicaid Program. If an extension is pursued and granted, the Contractor would be required to meet all requirements and conditions stated in the approved Memorandum of Agreement and Final Demonstration Agreement with the Centers for Medicare & Medicaid Service.
- 3.3.17.3.2 The Contractors would be eligible to receive a portion of any potential shared savings the Department receives from the Centers for Medicare & Medicaid services resulting from the program.
- 3.3.17.4 Wraparound Program
- 3.3.17.4.1 The Department is working with the Colorado Department of Human Services and CMS to design and implement the Wraparound Program as part of an intensive Systems of Care to improve the health, well-being and functioning of children and youth with significant mental health conditions who are at risk for out-of-home placement, as well as their families and caregivers. The Systems of Care is a comprehensive, community-based program to ensure that children and youth with significant mental health conditions and their families/caregivers receive services they need for success in home, school and Community. This system is designed to improve the health, well-being, and functioning of these children/youth and their families/caregivers and seeks to reduce potentially-preventable emergency room, inpatient, and residential child care facilities utilization.
- 3.3.17.4.2 The state's System of Care is built on the evidence-based model detailed within the book *Building Systems of Care: A Primer* (2010).
- 3.3.17.4.3 The core components of the System of Care are:
- 3.3.17.4.3.1 Wraparound Care Coordination (Wraparound). An evidence-based model of Care Coordination that assists the child and the family/caregiver to access behavioral health, medical and oral, social, educational, developmental and other services to meet the needs and the objectives of the family.
- 3.3.17.4.3.2 Parent/Caregiver Peer Support. A program that provides a structured, one-to-one, strength-based relationship between a parent/caregiver and a trained peer parent/caregiver of a child or youth with special needs.
- 3.3.17.4.3.3 Intensive In-home Therapy Services. A combination of State Plan benefits and other services.
- 3.3.17.4.3.4 Flexible Funds. Funding that is made available to assist the child/youth and family/caregiver with non-medical needs that nonetheless impact the health, functioning and well-being of the child or family.

- 3.3.17.4.4 For the next iteration of the Accountable Care Collaborative, the Department may require the RAEs to oversee the provision of a Wraparound Program that consists of both the Wraparound Care Coordination and parent/caregiver peer support components. The Contractor shall implement the Wraparound Program when requested by the Department and participate in the evolution of the Wraparound Program.
- 3.3.17.5 Pre-Admission Screening and Resident Review (PASRR)
- 3.3.17.5.1 The Pre-Admission Screening and Resident Review program (PASRR) is a protection and advocacy program that ensures individuals who have major mental illness and/or an intellectual or developmental disability receive the appropriate treatment in the appropriate setting for the appropriate amount of time. PASRR is a federally mandated program created in 1987 through the Omnibus Budget Reconciliation Act (OBRA). It is designed to determine Medical Necessity for nursing facility placement and need for specialized services for individuals with mental illness and/or an intellectual or developmental disability.
- 3.3.17.5.2 PASRR has three goals for any individual being admitted to a Medicaid certified nursing facility: 1) to identify individuals with mental illness and/or an intellectual or developmental disability; 2) to ensure these individuals are placed appropriately, whether in the community or in a nursing facility; and 3) to ensure that these individuals receive the services they require for their mental illness or their intellectual or developmental disability diagnosis in whatever setting they reside.
- 3.3.17.5.3 PASRR requires that individuals be assessed when they apply to a nursing facility (the Pre-admission Screen, or PAS) and on a systematic basis after admission (the Resident Review, or RR, upon change in status or condition). There are three elements to PASRR.
- 3.3.17.5.3.1 Pre-Admission Screen (PAS) Level I is a preliminary screen completed by staff from nursing facilities, Single Entry Point agencies or hospital discharge planners for the purpose of indicating the possible presence of mental illness or intellectual or development disability for an individual seeking nursing facility admission.
- 3.3.17.5.3.2 PAS Level II is an in-depth evaluation completed by a trained assessor to confirm the presence of a mental illness or intellectual or developmental disability, determine the appropriate living situation, and identify what specialized services are needed, if any.
- 3.3.17.5.3.3 Resident Review is conducted on a systematic basis for Members residing in a nursing facility and whenever there is a change in a Member's condition that may affect their mental illness or intellectual/developmental disability status.

- 3.3.17.5.4 The Department may require the RAEs to manage the Colorado PASRR in accordance with state and federal statutes, rules and regulations. PASRR administration will include reviewing PAS Level I and II, conducting or coordinating the completion of Level II assessments, arranging specialized services, noticing Members and agencies about the PASRR outcomes, monitoring the quality of PASRR and participating in required trainings.
- 3.3.17.6 Brokering of Case Management
- 3.3.17.6.1 In Colorado, SEPs and CCBs, in addition to three private agencies, act as the case management agencies for LTSS Members receiving Home and Community Based services (HCBS).
- 3.3.17.6.2 In March 2014, CMS implemented regulation regarding person-centered service plan development. Part of this regulation requires states to separate case management from direct service delivery functions to eliminate conflict of interest for services provided under HCBS waivers. This rule addresses the conflict of interest that may arise when one entity is responsible for both performing case management functions and providing direct services. As a result of these federal regulations, Colorado’s existing system for its HCBS waivers is no longer compliant. There are 20 Community Centered Boards (CCB) designated by statute to provide case management for three waivers for individuals with intellectual and developmental disabilities, and all 20 CCBs provide direct HCBS waiver services. In addition, the CCBs perform all eligibility determination for services for people with intellectual and developmental disabilities. Furthermore, the Single Entry Point agencies perform eligibility determination and case management for the eight other HCBS waivers in Colorado. Some of the Single Entry Point agencies also provide direct HCBS waiver services for people for whom they provide case management.
- 3.3.17.6.3 To continue receiving federal funding for the I/DD waivers, Colorado must come into compliance with the CMS conflict-free case management regulations. In accordance with Colorado House Bill 15-1318, which was passed in 2015 to create 25.5-6-409.3, C.R.S., the Department has created a plan for the delivery of conflict-free case management that complies with federal regulations, with input from CCBs, SEPs, and other stakeholders.
- 3.3.17.6.4 As part of the Department’s efforts to create a conflict-free case management system, the RAE may be required to act as a neutral party to support Members in selecting the Case Management Agency that best meets their needs. The RAE will be responsible for brokering a case management network that maximizes choice. Agencies currently providing LTSS case management can continue to serve Members, if that is the Member’s choice, and the RAE will honor local control.
- 3.3.17.7 Limited Managed Care Capitation Initiatives—Exclusive to Regions 1 and 5

- 3.3.17.7.1 The Department currently has contracts for two (2) existing capitated physical health managed care programs: Denver Health Medicaid Choice operates in Region 5 and Rocky Mountain Health Plan Prime operates in Region 1. These managed care programs support unique, established systems of care with distinct billing and payment structures for participating providers.
- 3.3.17.7.2 To support the continuity of care for Members receiving care through Denver Health Medicaid Choice and Rocky Mountain Health Plan Prime and the continued engagement of the providers participating in these managed care programs, Offerors for Region 1 and Region 5 may submit a proposal for implementing a capitated payment reform initiative as part of their proposal. Any proposed capitated payment reform initiative shall be in accordance with C.R.S. 25.5-5-415, support the established system of care operating in the region, incorporate value-based payments for Providers, maximize the integration of behavioral health and physical health services, operate within the Offeror's Accountable Care Collaborative infrastructure, and meet all applicable federal managed care regulations as described in 42. C.F.R. § 438. The Department will evaluate the Region 1 and Region 5 proposals for capitated payment reform initiatives following the awarding of Contracts and the Department will have discretion in exercising any option to implement a capitated payment reform initiative in Region 1 or Region 5.

### **3.3.18 Future Considerations**

- 3.3.18.1 The Accountable Care Collaborative Program has and will continue to be iterative and evolve over time. The first contract of the Accountable Care Collaborative Program created a platform for future delivery system and payment reform efforts. The Department intends to continue to make changes to the Program that could alter the scope of the Program and the Contract resulting from this RFP.
- 3.3.18.2 Revisions to the Program that may require changes to the Work in this procurement and resulting Contract may include:
- 3.3.18.2.1 Implementation of policies and program requirements to comply with any alterations to the Affordable Care Act, Medicaid regulations, and/or federal participation and financing.
  - 3.3.18.2.2 Implementation of alternative benefit packages within Colorado Medicaid.
  - 3.3.18.2.3 Implementation of payment reform as authorized in 25.5-5-415, C.R.S.
  - 3.3.18.2.4 Administration of the CHP+ or the incorporation of CHP+ members into the ACC.
  - 3.3.18.2.5 Administration of the Dental Administrative Services Only contract.
  - 3.3.18.2.6 Administration of the Non-Emergency Medical Transportation (NEMT) administrative contract and/or benefits.
  - 3.3.18.2.7 Implementation of recommendations from the LTSS No Wrong Door pilot.
  - 3.3.18.2.8 Inclusion of Case Management Agency functions not already included in the Work.

- 3.3.18.2.9 Implementation of new initiatives sponsored by the Centers for Medicare and Medicaid Services or other national healthcare agencies.
- 3.3.18.2.10 Inclusion of new service bundles addressing social determinants of health.
- 3.3.18.2.11 Implementation of a statewide Member engagement incentive and/or wellness promotion program.

## **SECTION 8.0 EVALUATION METHODOLOGY**

### **8.1 EVALUATION PROCESS**

- 8.1.1 The evaluation of proposals will result in recommendations for award of a Contract for each of the regions. The award will be made to the Offerors whose proposals, conforming to the solicitation, will be most advantageous to the State of Colorado.
- 8.1.2 The Department will conduct a comprehensive, thorough, complete and impartial evaluation of each proposal received.
- 8.1.3 The Department will select vendors in compliance with C.R.S. §24-103-203(7) which states, “The award shall be made to the responsible offeror whose proposal is determined in writing to be the most advantageous to the state, taking into consideration the evaluation factors set forth in the request for proposal”.
- 8.1.3.1 It is the Department’s intent to award a maximum of two (2) regional Contracts to a single Offeror in order to adhere to the fundamental premise of the Accountable Care Collaborative that regional communities are in the best position to make the changes that will cost-effectively optimize the health and quality of care for all Members. The Accountable Care Collaborative was designed with seven (7) regions to enable the participation of different entity types and partnerships, to best meet the unique needs of the state’s diverse communities, to build off local systems of care to administer the program, and to allow the state to implement and assess a variety of approaches to improving Member health and reducing costs.
- 8.1.4 The Department encourages proposals from Service-Disabled Veteran Owned Small Businesses. Each Offeror that is a Service-Disabled Veteran Owned Small Businesses should submit verification that it is incorporated or organized in Colorado or maintains a place of business or has an office in Colorado and is officially registered and verified as a Service-Disabled Veteran Owned Small Business by the Center for Veteran Enterprise within the U.S. Department of Veterans Affairs. ## **8.2 EVALUATION COMMITTEE**

- 8.2.1 Two (2) Evaluation Committees will be established applying measures that ensure the integrity of the evaluation process. These measures include the following:
  - 8.2.1.1 Selecting committee members who do not have a conflict of interest regarding this solicitation.
  - 8.2.1.2 Facilitating the independent review of proposals.
  - 8.2.1.3 Requiring the evaluation of the proposals to be based strictly on the content of the proposals.
  - 8.2.1.4 Ensuring the fair and impartial treatment of all Offerors.
- 8.2.2 The Department will distribute proposals between each of the two (2) Evaluation Committees. Each region will be assigned, in its entirety, to one (1) evaluation team to review.
  - 8.2.2.1 The Department will review the number of proposals received for each region and shall divide the regions between the evaluation committees in an attempt to distribute the proposals as equally as possible between the two (2) committees.

- 8.2.3 Each Evaluation Committee will review the proposals received for each assigned region using the Value Analysis process described in Sections 8.2.14 through 8.2.18.
- 8.2.3.1 Each Evaluation Committee will rank the proposals for each of the assigned regions based on which proposals they find to be the most advantageous to the state.
- 8.2.4 The Evaluation Committees will prepare a Selection Memo for the Department's Purchasing Director that lists the selected, top ranked Offeror for each region.
- 8.2.5 The Department's Purchasing Director will review the Selection Memo to verify that each top ranked Offeror has not been initially selected for more than two (2) regions.
- 8.2.5.1 In determining whether an Offeror has been initially selected for more than two (2) regions, the Department's Purchasing Director will take into consideration the Offeror's Ownership/Controlling Interest described in Appendix A, Administrative Information, Section 4.3, Complete Proposal, Subsection 5.
- 8.2.6 For any Offeror initially selected by the Evaluation Committee for more than two (2) regions the Department's Purchasing Director will:
  - 8.2.6.1 Open the Offeror's Confidential Ranking List described in Appendix A, Administrative Information, Section 4.3., Complete Proposal, Subsection 4, Confidential Ranking List and review Offeror's order of preference.
  - 8.2.6.2 The Department's Purchasing Director will recommend to the Evaluation Committee that they verify the Offeror's order of preference and submit a revised Selection Memo to the Department's Purchasing Director.
  - 8.2.6.3 Based on the order of preference information the Evaluation Committee may revise the selection memo to reach a final award.
- 8.2.7 In the event that an Offeror bids on a third (3<sup>rd</sup>) region in which no other proposals were received, the Offeror may be selected to be awarded the third (3<sup>rd</sup>) region at the Department's discretion.
- 8.2.8 In the event that no proposals are received in a region the Department reserves the right to negotiate with an Offeror selected for another region to provide services in the region in which no proposals were received.
- 8.2.9 The objective of the Evaluation Committee is to conduct reviews of the proposals that have been submitted, to hold frank and detailed discussions among themselves, and to recommend an Offeror for award.
- 8.2.10 The Evaluation Committee will evaluate proposals to determine if each Offeror met all mandatory qualification requirements. The mandatory qualification requirements are scored on a Met/Not Met basis and only those proposals found by the Evaluation Committee to meet all mandatory requirements can be considered for a Contract resulting from this solicitation.
- 8.2.11 Proposals will be evaluated by the Evaluation Committee using the evaluation criteria in Section 8.4. The evaluators will consider whether all critical elements described in the solicitation have been addressed, the capabilities of the Offeror, the quality of the approach and/or solution proposed, the price and any other aspect determined relevant by the Department.

- 8.2.12 The Evaluation Committee will determine which proposal is the most advantageous to the State of Colorado by performing a value analysis.
- 8.2.13 The Evaluation Committee will perform a value analysis by comparing the technical differences among proposals and whether these differences justify paying the cost differential provided in each Offeror’s proposal.
  - 8.2.13.1 A Service-Disabled Veteran Owned Small Business may be given preference in the sole discretion of the Department.
- 8.2.14 The Evaluation Committee will have discretion in determining the manner and extent to which it will utilize technical and cost evaluation results. For example, the Evaluation Committee may award to an Offeror with higher costs if the Committee determines that the benefits of the technical differences for that Offeror’s proposal outweigh the proposal’s cost difference.
- 8.2.15 Based on the Evaluation Committee’s value analysis, the Committee will determine which Offeror is most advantageous to the State. The Evaluation Committee will explain its value analysis and the determination in a written document.
- 8.2.16 The Evaluation Committee may, if it deems necessary, request clarifications, conduct discussions or oral presentations, or request best and final offers. The Evaluation Committee may adjust its scoring based on the results of such activities. However, proposals may be reviewed and determinations made without such activities. Offerors should be aware that the opportunity for further explanation might not exist; therefore, it is important that all proposal submissions are complete.

**8.3 COMPLIANCE**

- 8.3.1 It is the Offeror’s responsibility to ensure that Offeror’s proposal is complete in accordance with the direction provided within all solicitation documents. Failure of an Offeror to provide any required information and/or failure to follow the response format set forth in Appendix A, Administrative Information, may result in the disqualification of that Offeror’s proposal.
