

# Participant Directed Evaluation Study

HCPF asked Mission Analytics to broadly explore all available options to expand self-direction for these “bundles” of services.

**HOME MODIFICATION, NON-MEDICAL TRANSPORTATION, AND RESPITE (MTR)**

**ACUPUNCTURE, CHIROPRACTIC, AND MASSAGE THERAPY (CIH)**

Options may include:

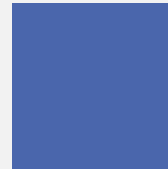

- Moving services to Community First Choice (CFC)
- Amending waivers that currently offer these services for self-directed options, or
- Adopting a 1915(j) or 1915(i) state plan option

HCPF wants to explore all available options to determine any viable self-direction authorities and identify the potential impact of implementing said authority.

# The How – What will Mission Accomplish?

Stakeholder  
Engagement

Process Analysis and  
Assessment Summary  
& Cost Modeling

Center for Medicare  
and Medicaid Services  
(CMS) Concept Paper

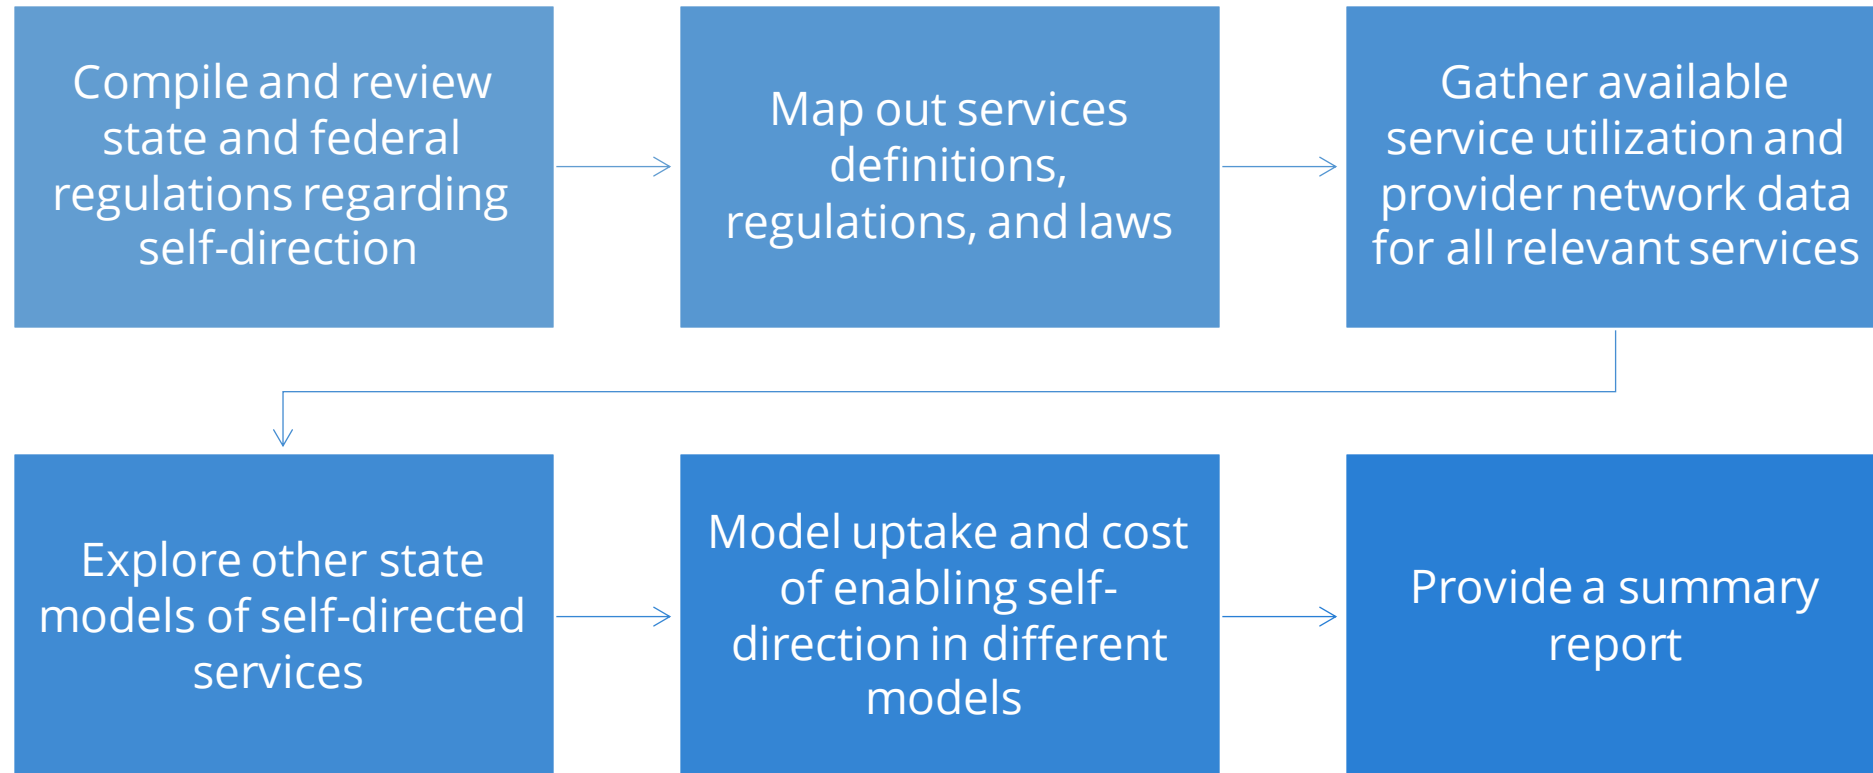

Recommendations  
Report

# Stakeholder Engagement

- Develop a workgroup collaborative, to include interested parties based on the HCPF interest survey form
- Meet with the workgroup collaborative including ongoing quarterly engagement
- Complete individual interviews and surveys with focus groups of providers, FMS agencies, members, and others as identified
- Share feedback with the PDPPC collaborative as needed

# Process Analysis and Assessment Summary & Cost Modeling

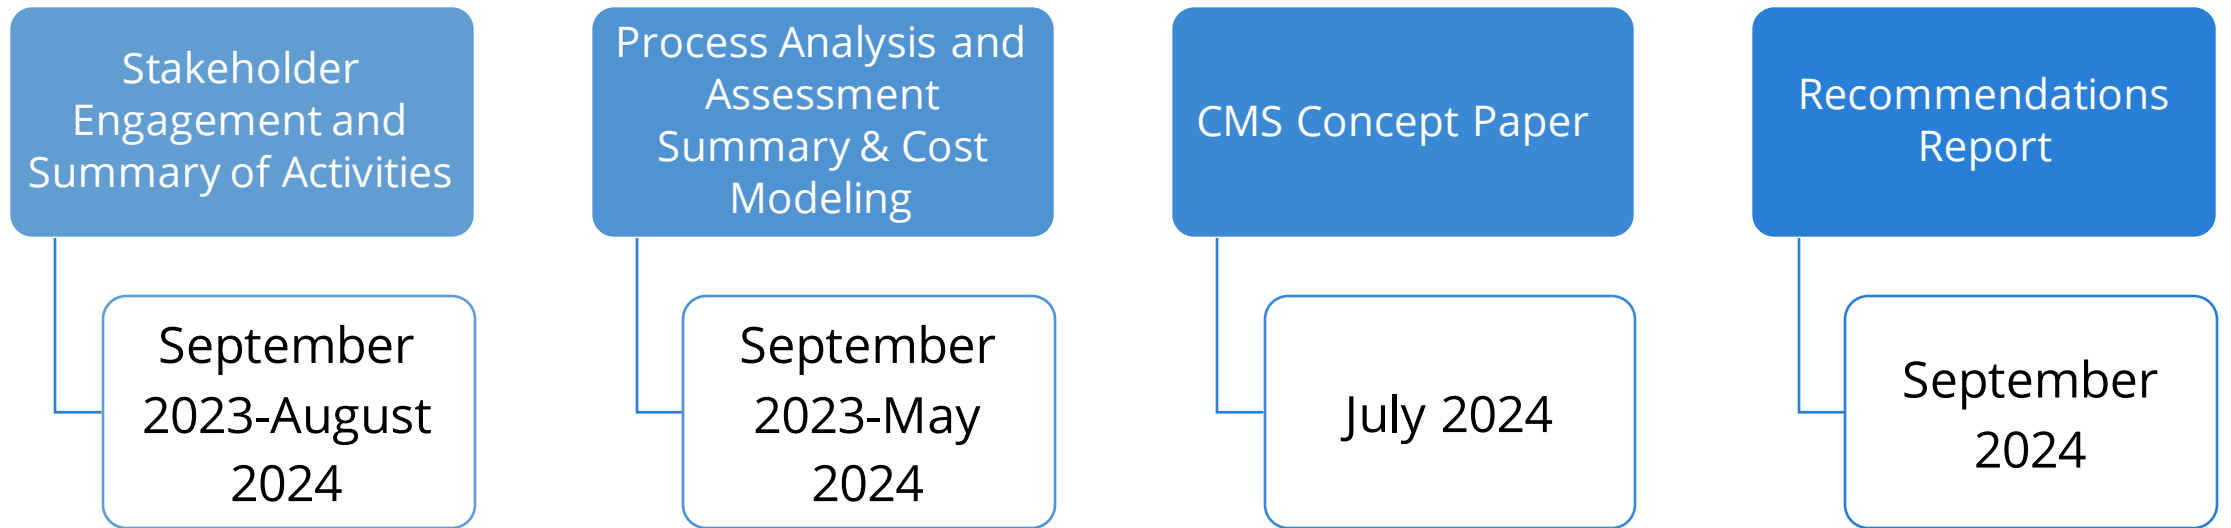

# CMS Concept Paper

- A brief review of Colorado's existing HCBS systems, including opportunities for self-direction.
- A summary of why HCPF and stakeholders in Colorado wish to enable self-direction for CIH and MRT services.
- An explanation on how enabling self-direction fits into other HCBS systems change efforts currently underway.
- Sketch HCPF's proposal(s) for enabling self-direction for CIH and MRT services.
- A summary of stakeholder input to date.

# Recommendations Report

- A 5-page executive summary of the full report.
- Summaries of the information gathered from the policy analysis and stakeholder feedback.
- Descriptions of federal, and state statutes, rules, and/or regulation changes needed to implement the recommendations.
- A detailed cost analysis and estimated budgets for recommendations.
- An estimated timeline to implement recommendations.
- Any CMS engagement and feedback.
- Proposed models of self-direction for CIH services, non-medical transportation, respite, and home modification services.
